It is just as logical to use the ox cart for your deliveries or the horse car to get back and forth to your business as it is to handle your oils, gasoline, varnishes or kerosene by the old wasteful, extravagant, inconvenient and profitless methods.

A GILBERT & BARKER
Oil or Gasoline
Storage and Distributing System

will quickly pay for itself by eliminating all waste from seepage-leakage-evaporation-over-measuring and spilling. A G. & B. Outfit means that oil-soaked floors are a thing of the past, it will keep you clean, your store clean, your oils and gasoline clean. It will put your oil handling on a safe, sane, business basis. It's your insurance of getting your legitimate profit from every quart you buy.

If you haven't a G. & B. Outfit in your store you are paying for it in labor, waste and lost profits. If you have it—it pays for itself—quickly. Bulletin 52 tells the story. To-day is a better day than to-morrow—write.

The "1900" Cataract Electric Washer

With the addition of our two newest and greatest models, the "1900" line is complete.

The Washers the Women Want

The articles that are in demand are the profitable ones, from the Hardware Man's standpoint. Those that are hard to sell—the unknown ones—prove less lucrative, in the long run.

It's Profits That You Want

and you can get them from "1900" Washers.

For more than twenty years we have been making and selling nothing but washing machines—the very best that can be made. Our whole attention has been centred on "1900" Washers, on perfecting and developing new models.

The "1900" Cataract Electric Washer

These most modern washers, as well as the other "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising, and these inquiries are turned over to such "1900" dealers as have proven their worth in their different territories.

The "1900" Agitator Electric Washer

If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the wholesale Department.

May Protest Circular No. 97

Manufacturers Declare That Regulations Effective To-day by Canadian Railway War Board Are Unworkable—Not Opposed to Cash Basis Plan For Freights, But to Drastic Clauses Which They Say Are Unnecessary

A UNITED protest by manufacturers and retailers in all parts of Canada is expected against Circular No. 97, issued by the Canadian Railway War Board, which became effective to-day. The manufacturers and retailers are in no way opposed to the railways adopting the cash basis plan, but what they do object to, and object to most strenuously, are the provisions of the order. Officials of the Canadian Manufacturers' Association stated to HARDWARE AND METAL that some of the regulations laid down in Circular No. 97 are absolutely unworkable. That there is a good deal in this is shown by the diametrically opposite interpretations given to the rulings by railway officials. This has been brought out in correspondence between manufacturers who wanted information regarding the operation of the order. They secured this from railway agents to whom they wrote, only to be told that the exact opposite was intended when they took the matter up with the Canadian Railway War Board.

Storm is Brewing

A storm is brewing over the methods of collection outlined in the order. Just why firms whose capital runs into millions and whose credit is unquestioned should be compelled to furnish bonds which will secure the prepayment of their goods is not explained. The conditions under which payment is to be made are very clearly stipulated in the order. If lived up to manufacturers claim that they are absolutely unworkable and will result in a congestion of freight at the terminals that will completely paralyze business.

For instance, if manufacturers who ship hundreds of pieces of merchandise daily send their representative down to the railway offices at 5 o'clock each evening and demand bills so that they can look them over before giving a cheque in payment, the manufacturers state that the railways will be unable to handle the business. If an agent of the railway accepts freight and marks it prepaid and there is any delay in handling it, the railway leaves itself open to claims for damages. It is pointed out that agents will be careful about doing this, and manufacturers foresee all kinds of troubles in getting their shipments moving.

Planning to Protest

Already a number of protests have been received by the Canadian manufacturers, and it is stated that a committee will likely be appointed shortly to ask for a readjustment of the orders which became effective to-day.

Some manufacturers state openly that in their opinion the Railway War Board has outlived its usefulness. They state also that the attitude of the Board is to give the impression that its orders are official Government instructions, whereas the manufacturers claim the Board is purely and simply a railway organization.

They are planning to take up with the Government and with the Minister of Railways the whole question of the Board and its activities, and may demand that the Board be abolished as entirely unnecessary now that the war is over.

Opposite Views

The manufacturers claim that the accounting departments of the railways are responsible for Circular 97, and that the traffic departments are opposed to it. They also claim that they forwarded certain suggestions regarding the regulations on February 14 and that about a week later word came back that their suggestions came too late to be considered. Any delay there was, it is claimed, was due to the Railway War Board. It is likely that the Government will be asked to look into this matter also.

Circular 97 is as follows:

CIRCULAR NO. 97

(Superseding Circular No. 86 and supplements thereof.)

To the Railways and others concerned:—

Effective March 1st, 1919, the collection of transportation charges including demurrage and storage charges) by railways operating in Canada, for services rendered, shall be on a cash basis, and, effective as of that date, credit accommodations then in existence which may be in conflict with the following regulations shall be cancelled:—

1. Tickets shall be sold only for cash in advance of service. Baggage charges are subject to the same rule as tickets, except C.O.D. baggage and storage charges, which must be paid in cash before delivery.

2. In cases where the enforcement of this rule with respect to freight will retard prompt movement or delivery of the freight or the prompt release of equipment or station facilities, carriers will be permitted to extend credit for a period of not exceeding seven days after receipt for shipment of a consignment, if it be prepaid, or after delivery at destination if it be a collect consignment see clause 6) provided the consignor, if it be a prepaid consignment, or the consignee, if it be collect, file a surety bond, either individual (not connected with the business for which credit is requested) or corporate surety company or bank guarantee, in an amount satisfactory to the treasurer or other properly designated officer of the carrier. The form of such bond shall be as per form attached, conditioned upon and providing for payment of all charges within seven days after forwarding or delivery of the freight. Upon receipt and acceptance of such bond, a carrier may accept and forward prepaid consignments or may deliver collect consignments in advance of payment of all charges thereon, to the amount covered by the bond. Failure to pay such charges within the time prescribed will automatically cancel such credit.

Arranging Credits

3. Treasurers or other properly designated officers of individual carriers are required to arrange and conduct all matters relating to such credits. They shall designate the amount and accept or reject the surety offered.

Bonds may be required and accepted for individual consignments, or blanket bonds may be accepted from individual shippers or consignees to cover all of their consignments for a given period. The period of credit in such cases shall, however, be limited to seven days on each shipment, as herein prescribed.

Where shipper or consignee so desires, one bond may be taken out to cover two or more points. The name of each point, and proportion of amount of bond applicable to each point, however, must appear in bond.

4. Premiums on all bonds and all expenses incident thereto shall be borne by the applicant for credit to whom the accommodation is granted.

5. Cheques within the instructions issued by the individual railways to their agents will be considered as payment in cash.

At points where there are no banking facilities or where firms have no accounting office, arrangements may be made, subject to the carrier's treasurer or other duty duly authorized officer, whereby representative of shipper or consignee may settle by giving the carrier's agent a sight draft on shipper or consignee. Remittance of draft, in these circumstances, attached to expense bills, to treasurer or other desig-

nated officer of carrier will be accepted as cash. Where acceptance of draft as cash as herein provided is arranged, shipper or consignee, as the case may be, shall absorb the amount of exchange on such draft.

Will Govern Credit

6. In computing the credit period the following will govern:—

(a) Prepaid shipment. Credit period shall be computed from time shipper is notified of amount due the carrier covering transportation of the shipment or shipments concerned.

(b) Collect consignment. Credit period shall be computed from time consignee is advised of charges due, or time goods are made available for delivery, whichever may be the later.

(c) In either instance where notice of charges due is mailed, shipper or consignee, as the case may be, shall be held to have been notified at 7 o'clock a.m. following date of mailing.

7. Transportation charges on freight placed in storage, either on property of carrier or in private warehouses, on order of shipper or consignee, after arrival at ultimate destination, are due and payable when such freight is placed in storage. If charges are not collected from the warehouse company, they should be collected from the consignee under the terms of this circular or immediately succeeding the time of the placement in storage, and not after final delivery to consignee.

8. In the handling of cars in connection with "industrial" railroads, delivery shall be considered to have been accomplished and transportation charges due—

(a) When cars are placed upon sidings or team tracks of so-called plant facility industrial railroads, either those connecting directly with the road haul carrier or those located on terminal switching lines.

(b) When placed on interchange tracks with industrial railroads.

(c) Under the provisions of paragraphs (a) and (b), cars will also be considered as delivered when constructively placed as provided by demurrage rules.

(d) The provisions of paragraphs (a), (b), and (c), do not apply to "common carrier" industrial railroads so long as in good faith deliveries are promptly made by them to consignees and the trunk line carrier's agent is furnished with adequate information with respect to such deliveries so as to permit the prompt rendition of the freight bills.

Paid as Rendered

9. In case of any question as to accuracy of charges, bills must be paid as rendered and claims presented for alleged errors. This will not prevent adjustments by agents of obvious error. An obvious error is one on which both railway agent and shipper or consignee are agreed, and which may be corrected without further investigation. In circumstances where the carrier's representative is unable to recognize the inaccuracy claimed by shipper or consignee prior to settlement, the ruling embodied in the first sentence of this paragraph shall govern.

Agents are required to revise their bills properly before presenting for payment, but there is no objection to the consignor or consignee checking the bills and paying charges on the corrected basis, providing the practice is not abused and they proceed in good faith with a revision of the bill both for under-charges and over-charges. Consignor or consignee should make the change in red ink, and the tariff authority for the change should be indicated upon the bill.

In the event of settlement being made on corrected bill, and the correctness of the consignor's or consignee's action is not apparent to the railway representative, due bill for the deducted amount shall be rendered promptly and credit period of seven days allowed on the supplementary bill, computed from time of service or mailing as prescribed in clause 6, paragraph (c) hereof.

10. Freight consigned "to order" or "to order, notify," shall be delivered only upon surrender to the agent of the carrier of the original bills of lading for such freight and the payment of the freight charges thereon, as hereunder provided. Provided, however, if such bill of lading be lost or delayed, the freight may be delivered in advance of surrender of the bill of lading upon receipt by the agents of a certified cheque for an amount equal to one hundred and ten (110) per cent. of the invoice, or upon receipt of surety bond, either individual or corporate, acceptable to the treasurer or other properly designed officer of the carrier in an amount for twice the amount of the invoice.

Practical Blacklist

11. In the event of cancellation of credit by one carrier for failure to pay transportation charges within the prescribed credit period, the carrier cancelling credit shall immediately notify other railways concerned, who shall make similar cancellation. Similar notice shall be given as between carriers in the event of the cancelled credit being re-established.

12. The foregoing regulations shall apply to shipments delivered to and received from consignors and consignees by cartage companies, as well as to shipments handled direct between consignor and consignee and carrier.

13. Until otherwise ordered, these regulations shall not apply to transportation service rendered—

Departments of the Dominion Government;
Nations allied with Canada in war;
The various provincial governments of Canada;
The countries and municipal governments;
Transportation and authorized cartage companies.

14. Advice of the foregoing regulations shall be given promptly to all to whom credit accommodations are now given, to the end that the regulations may be put into effect at the time specified with as little inconvenience as possible.

The Canadian Railway War Board
Executive Committee.

How Fort William Hardware Dealer Cashed in By a Little Timely Advertising

Ira Gerry, manager of Gerry's Hardware at Fort William, Ont., was quick to take full advantage of a sales opportunity that presented itself last week, and ever since has been "cashing in" splendidly. On Wednesday morning the mammoth elevator of the C.N.R., one of the largest structures of the kind in the world, was partially destroyed by fire. The fire broke out in the west wing, which was being torn down to make way for a larger building, and thousands of dollars worth of tools belonging to the workers were destroyed.

Acting on the idea that the majority of these men would need new hammers, saws, and other tools right away, Mr. Gerry put the ad shown in connection with this article in the daily papers.

Asked by HARDWARE AND METAL if many of the carpenters and other workmen took advantage of the offer, Mr. Gerry said: "I should say they did.

"We sold a great number of these men partial sets of tools, and a number of others purchased whole sets. Many of the workmen who saw the advertisement came to the store and stated that if we would hold the offer open until they could arrange a settlement with the company, they would buy whatever tools they needed from us. These men, as long as they are here, will, when in need of hardware or tools, think of our store; therefore the ultimate results of that one little advertisement are impossible to estimate."

CARPENTERS!
NOTICE!

10 P. C. Discount on Carpenters' Tools to all men who lost their tools in the C. N. Elevator Fire. This offer is good for the balance of this month.

MUST RETURN STOCK

Judgment against H. A. Middleton, formerly superintendent of the factory of the Oak Tire & Rubber Co. at Oakville, Ont., was given at Osgoode Hall. Middleton is to return the $5,000 stock which was to become his on the completion of five years as superintendent, and a reference is directed to the Master in Ordinary to determine the amount he must pay for misrepresentation and slander of the company. The company claims $10,000. No defence was put in by Middleton.

"Dollar Day" Ads Produced Business

Some Suggestions For Copy That May be Turned to Advantage by Hardware Dealers, Either in Their General or Special Advertising—How Good Advertising and a Strong Campaign Turned a Dull, Stormy Day Into a Business Getter

SOME advertising copy that produced results and that contains suggestions that may be turned to advantage by hardware dealers all over Canada has been used in Western Ontario in the last two weeks in connection with "Dollar Day" campaigns. A large number of similar campaigns are planned in various sections of the Dominion for the next few weeks and the advertisements reproduced in connection with this article may help hardware dealers in arranging their copy. They may also offer suggestions for general layout that may be adopted by dealers in connection with their general advertising.

It may be of interest to note that no firms except dry goods merchants used larger space than the hardware dealers in connection with the campaigns that were put on in London, Ont., and St. Marys, Ont.

Produced Results

That the advertising and the campaigns produced results is shown by the statements of the following hardware dealers:

"Personally I think 'Dollar Day' is a splendid thing," said Thomas H. Purdom, Jr., of the Purdom Hardware Company, London,Ont.,to HARDWARE AND METAL. "A Dollar Day campaign now and again is a great stimulant to business. The recent campaign proved the value of our advertising. We know this from the sales that were made of the articles we advertised. We got direct results. For instance we sold more food choppers, tire chains, floor mops, sad irons and electric lamps on "Dollar Day" than we would ordinarily sell in a whole week. Besides bringing crowds of city people into our store the farmers and their wives came in for miles around and made purchases."

Advertises Consistently

It might be mentioned incidentally that the Purdom Hardware Co. is a consistent advertiser. It believes in the free use of good illustrations and also in backing up its advertising matter by attractive window displays.

In spite of unfavorable weather conditions "Dollar Day" in St. Marys, Ont., was a splendid success.

"The sale was one of the most successful we ever put on," said J. M. Adam of the J. M. Adam Hardware. 'The streets were thronged with people all day long and our store was crowded. I believe the people realized fully that everything advertised on sale was a bargain and that they were getting things at prices that meant real savings. Our advertising undoubtedly impressed the farming community with the idea that it was worth while to shop in St. Marys on Dollar Day and they came in in hundreds."

This advertisement proved a big sales producer. As a result of it a man residing forty miles away who was unable to get to town telephoned long distance and placed an order for a stove and range. Both the rebuilt vacuum cleaners offered as specials were sold as well as large quantities of the Dollar Day specials.

Added Attraction

To liven up the day more than ever the merchants got together and arranged for the town band to put on a program. This was done and the whole impression was conveyed to visitors to the town that Dollar Day is something to be remembered like Fair Day. This is to some extent missionary work for

The ad reproduced above occupied half a page and as a sales producer was a winner. The proprietor of the store states that he sold more goods in many lines in the day than he would have ordinarily i n a week. The firm in the above ad carries out an idea that is used in all its copy, that is a generous use of attractive cuts and the quotation of prices in large figures.

Sales of dairy pails, paints and granite and tinware were largely increased as a result of the above advertisement. The day on which the sale fell was such a stormy one that ordinarily little business would have resulted. As a result of the advertising and campaign however the firm made a large number of sales in spite of the weather.

future Dollar Days and aimed to fix the event in their minds.

It will be noticed from Mr. Adam's advertisement that he had certain stoves which he wished to dispose of and also two overhauled vacuum cleaners. He not only sold two base burners and the vacuum cleaners but as a result of his advertising got an order over long distance telephone from a man forty miles away for a range and a heater.

Other Good Sales

"We had very heavy sales of granite ware, aluminum ware and milk pails," said Mr. Adam. "Our sales of Eleys' shells and of wringers were also most satisfactory. Owing to the mild weather and the fact that there has been little or no sleighing in this section we got little or no results from sleigh bells."

Mr. Adam believes in having display tables laden with various goods in his store at all times. These are frequently changed and on "Dollar Day" were used to splendid advantage in selling all kinds of specials in brushes which had been advertised.

In connection with "Dollar Day" Mr. Adam arranged a window diplay of paints and although no mention was made in his ad. of paints being offered the sales were most satisfactory. Mr. Adam also took advantage of the presence of the big crowd in town to demonstrate an incubator and brooder he is handling. While no sales were made he got in touch with a number of very promising prospects from which it is expected business will result later.

Sold Many Pails

The district immediately surrounding St. Marys is one of the very finest dairying sections in Canada. As will be seen from the advertisement of the St. Marys Hardware, Limited, dairy pails and paints were among the specials featured.

"Dairy pails were our largest sale on 'Dollar Day,' the manager stated to HARDWARE AND METAL. "We also sold a lot of paint. As may be seen from the advertisement we have been offering a special discount on all tin and graniteware for a month. Our sales have been good throughout the month and were good on 'Dollar Day' also."

DECREASED SILVER PRODUCTION

One result of the curtailment of refined copper production now under way throughout the country is an equally severe restriction in the output of silver, as a large number of the copper producers turn out annually millions of ounces of silver as a by-product. The lead and zinc mines also produce a large amount of silver each year.

If the curtailment policy of the copper, zinc and lead producers is continued throughout the greater part of the year, it will be reflected in a sharp drop in the silver production of this country for 1919. Already the available supply of silver is being affected as a result of restricted operations this year to date.

Convention Echoes

ONE of the most gratifying features in connection with the Annual Convention was the interest the hardware dealers showed in the splendidly varied programme. The remarks of the various speakers were followed with keen attention. Frequent outbursts of applause and the questions that were asked of the speakers at the conclusion of their remarks showed perhaps better than anything else could the interest the dealers took in the subjects under discussion. This year's programme contained many new features, all of practical value to the dealer. In addition, it included all the old features that previous experience has demonstrated are worth while. In justice to those who arranged the programme it should be stated that one who mingled freely among the delegates heard everywhere expressions of approval and praise for their efforts.

* * *

One of the best evidences of the interest taken by the delegates in the sessions was their anxiety not to lose any time. On several occasions the presiding officer was not in the chair at the time the programme was scheduled to start. This was regrettable, as considerable valuable time was lost. In this case the delegates were not to blame because at opening time there was always a good crowd on hand. More than one hardware dealer stated that in his opinion the sessions should have been started at the time they were supposed to start whether there was one man present or one hundred.

* * *

While there was always a fair sized crowd on hand when the time for starting came, there were many dealers hanging around in the halls. A suggestion made by a dealer for rounding these men up and getting them into the convention hall, may be worth while putting into practice at future meetings. This dealer thought it would be a good plan to appoint a committee of six or ten men whose duty it will be to go around through the halls ten or fifteen minutes before the meetings commence and send all those who should be at the meeting into the hall. Making full allowance for the fact that some of the hardware men who come to the Convention wish to skip a discussion occasionally in order to visit with a friend or take in an exhibit in which he is interested, there were many men who were not absent for reasons of this kind, but simply because they were hanging around. They came in later, but many of them missed many valuable points in the addresses given by the various speakers.

* * *

Hamilton is right after the Annual Convention again next year. At the banquet tendered to the visitors on the first evening of the gathering by Wood, Alexander and James, of Hamilton, Mr. Wood extended to the delegates a hearty invitation to come again next year. This was repeated on other occasion by Hamilton dealers and manufacturers. As far as the hardware men are concerned opinion seemed general that no city in Canada contains so much of special interest to the trade as Hamilton. Many, however, are inclined to the view that it is not fair to the Hamilton merchants and manufacturers to impose upon their generosity so repeatedly. There is absolutely no question that they appreciated to the fullest extent the hospitable treatment they received and that they all have a warm spot in their hearts for Hamilton, but the hardware men at the same time took into consideration the fact that entertainment such as was lavished upon them in Hamilton must have involved considerable trouble and expense. In thanking the Hamiltonians for their warm welcome and hospitality President D. A. Macnab said that the Executive would be glad indeed to again consider the offer to hold the next convention in Hamilton.

* * *

Talking of the banquet that was held on the first evening, it might be mentioned that H. L. Frost, President of the Frost Steel and Wire Co., of Hamilton, is a real artist at card tricks. During the entertainment which followed the dinner he mystified the audience several times by feats which he accomplished with a finesse that is seldom seen among professional performers on the stage. In addition to this he also proved himself an able after-dinner speaker.

PROMPT REPORT SURPRISES SECRETARY

G. D. Davis, Esq.,
Manager, Hardware and Metal,
Toronto.

Dear Mr. Davis:—

After closing up Convention affairs in Hamilton I reached Toronto Friday at noon, and was very much surprised at having placed in my hands shortly after my arrival in Toronto, a copy of HARDWARE AND METAL, containing a full report of the Convention proceedings, which only closed the night before. I cannot but express my respect for your journal which has shown such enterprise in the reporting of the proceedings of the Convention in such a complete way.

On behalf of the Association, I must express my appreciation of the excellence and promptness of your report of the proceedings, and am sure the various articles will be read with great interest by the trade generally.

Yours very truly,
W. F. MACPHERSON,
Secretary.

A good many stories were told at the banquets by various speakers, but one of the best was that recounted by A. T. Enlow, of the Dominion Sheet Metal Company, Hamilton, as follows:

"When the British sailors were receiving the surrender of the German fleet a crew from one of the Hun submarines came aboard a big battleship. One of the sailors walked up to a crowd of British Tars and spitting noisily said: 'That for your British navy.' Repeating the operation in a moment he said: 'And that for your Admiral Beatty.'

"A husky British sailor stepped up to the Hun and said: 'See here, Fritz, you are welcome to your opinion of the British navy and also to think what you like about Admiral Beatty, but I warn you that you had better be damn careful whose ocean you are spitting in.'"

* * *

SOUVENIRS were quite in evidence at the manufacturers' luncheon. The souvenir menu, compliments of Canada Steel Goods Co., Ltd., was most unique and attractive, consisting of a 4½ x 4½ lightweight butt, finished in dull brass finish, with menu printed in gold and blue on inner sides of the butt. Many complimentary remarks were heard regarding the originality of the idea, and the enterprise of the Canada Steel Goods Co., Ltd., in supplying each guest with one of the souvenirs.

THE Laidlaw Bale-Tie Co., Hamilton, have a lot to answer for, judging by the way in which a great many hardware men are still struggling to solve the wire puzzle distributed at the Convention. The puzzle which they gave away last year, consisting of two nails, was finally mastered by most of the merchants, but their latest innovation appears to have kept most of the visitors guessing, in fact, we know of a couple of hardware men who are spending their spare time in the evenings struggling with the puzzle, determined to overcome it without assistance from outside quarters. The same firm distributed an attractive and useful paper knife made from a wire spike, and nickel-plated.

* * *

BIRD & SON distributed miniature rolls of roofing with a Hamilton-made cigar enclosed in each roll. McClary Mfg. Co. supplied neat ash trays for the members at the luncheon. E. C. Atkins & Co., saw manufacturers, supplied the song books used at the complimentary luncheon given by the hardware manufacturers of Hamilton.

* * *

DURING the second day of the convention, some practical joker spread the good word around that refreshments could be easily secured at Room 3023. It was surprising how soon some of the visitors began to feel chills, symptoms of the flu, colds, etc., and soon hastened sky-wards on the elevators, hoping to find the oasis on the desert. They found to their dismay that room 3023 did not exist, but that you can get a good view of the City of Hamilton from the top floor of the Royal Connaught.

* * *

IN accordance with past custom John Caslor, of Toronto, sat at the receipts of customs. John complains that too much of his time is taken up in collecting the cash and he should have assistance. He has found out after fourteen years, that while sitting out at the entrance collecting the coin to keep the wheels turning, he has been missing many of the good things that have been going on inside. There are few men who have given more time or more faithful attention to the affairs of the Convention than John Caslor.

* * *

HARRY SEYBOLD, of Starke, Seybold & Co., Montreal, was a visitor at the Convention and went back East highly pleased with what he saw and heard at the Convention. Mr. Seybold would heartily favor a similar association operating in Quebec Province.

* * *

W. A. RANKIN, of Ottawa, was one of the best regular attendants at the meetings. W. A. believes in starting on time and running the meetings according to schedule.

* * *

MR. BARTON, of Barton & Fisher, traveled a great distance to attend the Convention, but he says it was well worth the time and expenses.

* * *

THE question of the next meeting place was left with the Executive, but the general opinion is that the latter body will decide upon Hamilton as the meeting place for next year. Many members have suggested Hamilton as a permanent convention city.

* * *

TWO good conventions deserve another and five hundred new members are needed without delay. There are over 1,200 hundred hardware merchants who should belong to the association. The special services supplied by the association are alone worth more than the membership fee. If you are not a member, drop a line to Secretary Macpherson, at Prescott, and ask him what you get for your five dollars.

* * *

AT the closing session late Thursday afternoon, a note of thanks was unanimously passed to Secretary Macpherson, the manufacturers, wholesalers and trade newspapers for assistance and co-operation in making such a success of the Convention.

* * *

THE new officers are already laying plans for future activities of the association and the outlook is for a big year in 1919, and a bigger-than-ever Convention next February.

* * *

AT the luncheon tendered to the delegates on Thursday by the hardware manufacturers of Hamilton, Col. Arthur Hatch, who presided, threw a bomb into the gathering by his attack on the attitude of the Western farmers in connection with free trade.

* * *

WHEN the question of raising the membership fee came up for discussion and the proposal was made to make it $5 there was not a dissenting vote. On the contrary many of the hardware dealers declared that $5 is much too small, and that if the association charged $25 it would have a larger membership, and that $25 would be little enough for the benefits received.

* * *

FEATURES of the programme such as the moving-picture show, and the various demonstrations were keenly appreciated by many of the dealers who found in them not only much that was instructive but decidedly interesting and profitable.

* * *

HAMILTON manufacturers were greatly pleased at the interest taken in the various factories, and methods of making various lines of goods. Many parties of hardware men found time between the various addresses and demonstrations to visit a number of the firms and meet the proprietors and representatives.

* * *

THE hardware men also took much interest in the exhibits and made a pretty thorough inspection of them. Many of the exhibitors lined up a lot of good business.

* * *

THE dealers who came to the Convention can do a lot, if they will, to advertise the association. They have a lot of real talking points as the Convention was without doubt one of the best in the history of the Ontario organization. Dealers who had not been at the meetings for some time and came down this year as a result of what they heard about the 1917 Convention, expressed themselves as splendidly satisfied. Every dealer who was there can bring in one or more new members if he will do a little missionary work. The stronger the membership the more good work it can do.

* * *

NO speaker on the whole programme was listened to with keener interest than W. H. Davis, of Hamilton, the Government Inspector of Income Taxes. He talked of profits, and assessments and exemptions, and a few dozen other things that come under the Income Tax regulations. This is a complicated subject but Mr. Davis handled it in a manner that delighted all who heard him, and by answering scores of questions shot at him from all parts of the hall he cleared up a lot of misunderstanding that apparently has existed in the minds of hardware dealers all over the province.

* * *

J. B. ARCHER, of the Moore Hardware Co., St. Catherines, created a good deal of amusement and also a good deal of interest when he told of the money he has made by using the Association Sales Bureau. There were a lot of good suggestions for other dealers in Mr. Archer's talk, and from what they said it is likely that many of them will make use of the bureau.

* * *

SECRETARY MACPHERSON is optimistic about the possibilities of increased membership this year. To HARDWARE AND METAL he stated that there is every indication that the membership will show an increase of about fifty per cent.

Co-operation Needed More Than Ever

Whole World is Facing Problems That Can Only Be Solved By Mutual Spirit of Helping One Another—Canadian Manufacturers and Retailers Vitally Interested in Working Out the Solution

Address by GEORGE A. SIMPSON, Sales Manager of the Steel Company of Canada, Limited, at the Annual Convention of the Retail Hardware Association of Ontario

Mr. Chairman and Gentlemen:

It affords me great pleasure to again address you and I appreciate the compliment of being again included in your programme.

Since your last Conference, great changes have taken place. At that time the clouds of war were hanging very low and prospects of peace were slight. Industries all over the world were being run at top speed, fabulous prices were being paid for everything and there was a terrific demand for the products of every industry. To-day peace is in sight, but the industrial world is marking time, prices are high, but there is no demand for the products of labor. Conditions are practically reversed. In my judgment the world was never confronted by problems quite as stupendous as the ones we are facing to-day and it will require great caution to successfully adjust them.

Co-operation Necessary

The keynote of my address to-day is Co-operation and in the course of my remarks, I shall endeavor to point out how blindly men in their industrial and commercial life compete for money, even to the point of embracing the doctrine of the Survival of the Fittest, while in their social, intellectual and moral development, they give the life to this inhuman doctrine by co-operation, to the end that right may prevail.

The facts are—during the past four years the world has been passing through the most terrible tragedy in all history and for the moment we were called on to supply, in unprecedented quantities and at unheard of prices, material of every description. Result — we have made headway; we have passed through a period of prosperity, measured from a money-making standpoint, that completely eclipses all previous records. But all this was not without its dangers and through these, during the period of storm, we passed in safety and now we are confronted with the calm.

Like Sailing Ship

We are like a sailing ship that has been battered and distressed by storm, head winds and clouded skies, driven under bare poles at terrific speed, with crew exhausted and bearings lost. And then comes the calm and sunshine, the captain and officers with quadrant and sextant take the sun and from that they get their latitude and longitude; they get their bearings and then they prick their chart and decide the course. But in doing this, they must be careful and what is more important, they must be honest with their findings, or their course will not be correct and they will bump on the rocks and reefs that send ships to destruction without warning.

Canada's Position

And so it is with the world in general and Canada in particular; we must take our bearings, prick our chart and select a course, but, like the navigator, we must be honest with our findings and if we are, we will—like him, bring our ship safely to port. He has a number of fixed conditions, so have we, but these conditions are specific, not general; they are conditions to be considered by men with brains—business conditions, not politics—and as such they must be considered by business men. The problem of reconstruction is not one for Ottawa alone. It is a vital subject, calling for the serious consideration and co-operation of every thinking man in Canada.

GEORGE A. SIMPSON
Sales Manager of the Steel Company of Canada, Limited, Hamilton, Ontario.

Drastic Changes

In an article published in *MacLean's Magazine* last February, and later, I outlined, in an address before the members of this Association that the whole world was undergoing the most drastic change in all its history. The whole structure, economic, agricultural and industrial, would need to be reconstructed after the war. I also called attention to the enormous producing capacity that had been created by the demand for war material which would, after the war, have to be considered and I stated then that the whole subject was one for active, vigilant men to handle, men of broad vision, vast experience and sound judgment, men whose only thought was for the betterment of all mankind in general and the prosperity and happiness of Canada in particular. When this nation is faced by big crisis, it is the Government that calls upon the people, and not the people who call upon the Government, because in the final analysis, it is the people who govern.

A Big Problem

A problem now confronts us, therefore, it is up to the business men of the country to assert themselves, otherwise the situation is serious. But if they do, there is no cause for alarm and we can cast aside all forebodings and face the future with unbound courage and confidence and, without a shadow of doubt, declare to the world that this nation, which wos so quickly and successfully transformed by the big business and financial men of the country to a war basis can, with their guidance, revert to peace conditions with equal success. The world has been passing through a serious illness, the crisis has been reached and possibly passed, but the period of convalescence must be reckoned with. Great care must be exercised and prudent measures must be adopted. The change to peace conditions will be slow and caution will be necessary.

Need Employment

It is essential in getting back to peace conditions that there should be employment for labor and that wages should not decline faster than the price of commodities, as this would reduce the consuming power of millions of persons and check the production capacity of the country. Reconstruction presents some knotty problems, but by co-operation the problems of peace can be solved, as the problems of war were solved—VICTORIOUSLY.

Support Home Firms

Under present conditions, I not only think that Canadian industries should be given every opportunity to supply all material that can be produced in Canada, but they should be furnished by Canadian manufacturers, jobbers and dealers with every bit of reliable information that can be procured from any source, which would enable them to furnish material at a cost to the manufacturer, jobber and dealer that they would pay for similar material purchased elsewhere.

I may be wrong, but my feelings prompt me to say that, under present conditions, any Canadian manufacturer, jobber or dealer worthy of the name is inviting well-deserved criticism—and he is entitled to it—if he wilfully purchases material elsewhere that he could, through a little effort on his part, purchase in Canada at a similar figure.

In my judgment his actions, under present conditions, are unpatriotic, as his first allegiance, if he is earning his living here, should be to the country that affords him a living. How any Canadian manufacturer, jobber or dealer can howl himself hoarse shouting "Welcome" to the returning Canadian soldiers, if at the same time he is making no effort to keep the wheels of Canadian industry turning and thereby give them employment, is beyond my understanding and to say the least, a short-sighted policy.

Commercial Patriotism

Canadian industries should not only be given a chance, but they should be given the "Last Chance" to produce material in Canada, in the production of which the services of our returning soldiers could be utilized. These are trying times—and to enable Canada to safely cross the bridge, commercial patriotism is as necessary in 1919 as military patriotism was in 1914, to save the Empire.

My views, expressed in the foregoing, cover the situation in a general way as I see it to-day; but there are definite and distinct issues that must be taken up and discussed and one of the most vital is Capital and Labor. This subject is as old as the hills, but labor is at last coming into its own. Mankind, as a result of the terrific sacrifice during the past five years, has become more human and more considerate of each other.

Lincoln on Labor

Abraham Lincoln many years ago spoke of labor as follows:

"Inasmuch as most good things are produced by labor, it follows that all things of right belong to those whose labor has produced them. But it has so happened in all ages of the world that some have labored and others have, without labor, enjoyed a large proportion of the fruits. This is wrong and should not continue. To secure to each laborer the whole product of his labor as nearly as possible is a worthy subject for any Government to consider."

And Thomas Paine the great English patriot, son of a mechanic of Quaker origin, born in the year 1737, wrote in his "Rights of Man" as follows:—

"When it shall be said in any country in the world—'My poor are happy—neither ignorance nor distress is to be found among them; my jails are empty of prisoners, my streets of beggars, the aged are not in want, the taxes are not excessive; the rational world is my friend, because I am a friend of its happiness'—when these things can be said, then may that country boast of its Constitution and its Government."

I merely repeat these expressions of great men, uttered in the dim and distant past, to show that there has been sown in the minds of men a seed, which is now about to bear fruit.

The thought uppermost in the minds of thinking men to-day, who represent Capital and Labor, is "How can we co-operate in the fullest sense to bring about this happy conclusion?" In other words—co-operation is taking the place of competition. Arthur Jerome Eddy, another great thinker, but of the present period, puts it in this language: "Competition is said to be the life of trade, and competition is also the death of trade, but co-operation is trade."

A Sordid Struggle

The old form of competition was for trade. Men fought each other by means fair or foul. In its simplest form, it was a competition for money. It was rather a sordid struggle and one has only to read history to see how little of service entered into it.

Success was measured by money—by naked money—and no question asked.

The man who got money was the big man.

"How did you get it?" was a question the moral conscience had not then learned to ask.

No verdicts were rendered except in terms of lucre.

Did Not Matter

If a man was handicapped by a conscience and a heart, and so failed in the race for gold, it did not matter—he had failed! His condemnation was without extenuation. Many of us can remember that in our youth this criterion of success still ruled. The men who won fortunes were held up for our admiration and emulation. Their swift rise in their own interest was the path we were urged to follow. Nothing was said of the things they did by the way, of the men on whose broken lives they ascended, of the laws they violated, of the consciences they seared. And nothing was said of the tragic lack of satisfaction which the winners felt when they reached the top. The one book which ought to be written, and which perhaps never can be written, is the story, not of the zest of the man climbing to riches, but the terrible life-emptiness of some of the men who arrived and were held up as models to the youth of the country. Through broken confessions here and there we know what that emptiness was.

Burned Itself Out

But the time came when the very ruthlessness of this competition for mere, meaningless money burned itself out. In a country like our own, where thought is free and observation fairly open, the mere fact of wealth ceased to answer all questions. All of us have seen the revolution within our own lifetime. We have seen men who were once held up as examples to little boys, hurled down in a storm of public ignominy, pursued by the courts, and in some cases become fugitives and expatriates. There are names, which in our boyhood stood for the bright star of success that are now bywords for hissing. Why? Because the standard of competition is changed.

Co-operation Trade

"Competition is the life of trade" and "Competition is also the death of trade," but "Co-operation is Trade." One proposition is as true as the other according to the point of view of him who utters it.

To the man who has downed his competitor, competition is the life of trade; to the competitor who is downed, competition is death.

Competition, blind, vicious, unreasoning, may stimulate trade to abnormal activity, but such a condition is no more sound, healthy life than is the abnormal activity of the man who has taken a little too much alcohol. One stimulant is like another, exhausting in the end. The old competition was a fetish that men ignorantly worshipped, but the cult has had its day; the sanctity of the god is being assailed, the people are waking up and asking: "What is this competition and why should it be hedged about and preserved?"

Do Not Seem Sound

All over the world there is a ferment of new ideas, of protest, of doubt, of discontent regarding this matter of competition. The old ideas do not seem so sound; they do not ring so true as they once did; they do not fit present conditions; there is something wrong. As a matter of fact, they never were true, they never were more than superficially sound. Competition was the life of trade only when trade was piratic, merciless. Competition — good, old-fashioned "cut-throat" competition—belongs to trade's buccaneering days when every industry flew the black flag and the appearance of a competitor meant war to the knife. Conditions have changed. Men no longer look upon one another as industrial and commercial brigands. I admit we are far from an era of universal good feeling, of mutual confidence, of generous and hearty co-operation, but the world is working that way.

Not Yet Written

The science of commerce is yet to be written; some day it will be, for there must be a thread of reason in what men do to make money; there must be some fundamental principles, the discovery and observance of which will clear up many of the uncertainties attending business transactions. There must be some basic propositions, the truth of which cannot be gainsaid. And when this science of commerce is written, we will find it resting on a foundation of co-operation.

Men are just beginning to learn that it is easier to make money by straightforward methods, than by devious ones; that truth is a commercial asset. The new competition, based on co-operation, is a policy that demands concerted action for its adoption and promotion. Co-operation means a broader outlook than the mere quest of money.

It may be said once for all that no organization can live beyond the exigencies of the hour, unless it has an interest beyond dollars and cents. The desire to make greater profits may bring men together, but it will not hold them long; the motive is too sordid to encourage any large degree of enthusiasm, and without enthusiasm no movement can go forward.

Times Changing

Times are changing and, with the times, business methods. Secrecy is yielding to publicity, men are coming out into the open and dealing more fairly with one another. As an inevitable result, competition is undergoing a change; the old is giving way to the new—true competition is taking the place of the false. The world feels that things are happening, but they are happening so fast, it does not quite comprehend. The people do not understand the new competition that is slowly but surely taking the place of the old, therefore they oppose it and vainly try to preserve the old and vicious order of things—try to make men fight when they no longer wish to fight—to make them destroy one another industrially and commercially when they are striving to establish industrial and commercial peace.

The old cry, "Competition is the life of trade" is yielding to the new cry, "Co-operation is trade." The old cry is the echo of primitive and barbaric conditions. It never did mean competition on terms of fairness and equality; it meant the relentless suppression of the weak, the merciless triumph of the strong; it meant methods so questionable, they are now condemned as criminal.

The Old Is Passing

The old, with its unfair advantages, its secret prices and rebates, its conspiracies to ruin competitors, help favored parties, localities, towns, at the expense of others, is passing; the new is taking its place, is winning its way in spite of ignorant clamor, regardless of opposition. It is winning its way because, fundamentally, it is right—it is progress.

What is competition? The man in the street laughs at the question: "Why everybody knows what competition is."

Well, what is it? "It is the effort of the other fellow to get my job," the laborer cries.

"It is the effort of the other man to get my customers," the merchant and manufacturer respond.

"It is the fierce struggle for life and means the elimination of the weak, the survival of the strong," the biologist says, and dismisses the subject.

"Is it so?" Then competition is not worth preserving: it is a biological rather than an economic, a natural rather than a human condition; it is part of the philosophy of evolution, rather than a matter of ethics; it is on a level with those relentless forces with which men are striving; like the familiar doctrine of the "survival of the fittest," it is more than non-human, it is INHUMAN.

Should We Do This

Granted that the universe is an evolution, that man is an evolution, that society is an

evolution—that all are products of that one fundamental law, the survival of the fittest, which is neither more nor less than competition in its fiercest form—what then? Should we bend all our efforts to make it more certain that the weak disappear and the strong survive?

No; only in the breeding of plants and animals do we try to aid the law of natural selection, and even with animals we are tender toward the sick and old—toward those Nature is trying to eliminate. We even pass laws to protect them and organize societies to help them. When it comes to human beings, only savages permit the law of the survival of the fittest to work unchecked; they expose infants, abandon the sick, kill the aged—they are evolutionists without human compunctions—they are biologists without hearts.

Forgets The Law

Civilized man ,in his struggle for existence, forgets that law, which the evolutionist says is the foundation of progress. Were it not for a few savage examples to the contrary, we might say he fights it instinctively. But fight it he does with laws, with customs, with moral sanctions, with social conventions, with individual standards of right and wrong, with praise for those who sacrifice their lives for others, with words of scorn for the selfish and cowardly—in short, with almost every legal, social and moral force do men fight for the preservation of the sick, the weak, the helpless, the very beings the cold doctrine of evolution says should be eliminated. Yet in his commercial and industrial relations, he is in that savage condition wherein the "destruction of the weak and helpless" is carried out, not only "voluntarily and deliberately" and "with Spartan firmness," but with precisely the satisfaction a Roman audience watched one gladiator slay another, or a wild beast devour a Christian.

A distinguished professor says: "The big company has a right to beat the little one in an honest race for cheapness in making and selling goods; but it has no right to foul its competitor and disable it by an underhand blow.". But he reserves to the big company the right to define the term "honest," and as to what they consider an underhand blow. Germany subscribed to this principle in relation to weaker nations. And Germany to-day, standing alone on the ruins of her survival of the fittest ambition, must feel a vast responsibility and realize that Fate does strip those whose ways are blindly ordered by such an inhuman doctrine.

It is the theory of the thoroughgoing evolutionist—the "big fellow" has the right to survive because he has the brute force; the little fellow must and should go to the wall in order that the "fittest" may live and the commercial race be improved.

Standing Alone

Strange how these crude propositions drawn from natural development persist in the field of economics long after they have disappeared from the field of ethics. In all social, mental, moral progress in their daily lives, men give the lie to the proposition that the strong have the right to elbow the weak to one side; on the contrary, it is recognized that the most precious privilege of the strong is the succoring of the weak—that is life at its best.

If such is the law of man's social, intellectual, and moral development, why should not the same high obligation obtain in his commercial and industrial development? That is a question every writer, every speaker on the subject should ask himself, and remain silent until the answer comes, for at heart it is not a question of making money, but of MAKING MEN.

Knows No Pity

Nature is merciless, she knows no pity. "Survival of the fittest" is her goal. The way is strewn with corpses of the weak, with the debris of the rejected. Nature has no use for the lame, the halt and the blind; her prizes are to the strong, and to only those of the strong who have no heart, who unfeelingly trample on the neck of others. The slightest hesitation is fatal; the man who lags behind to lend a helping hand never catches up, the man who lifts the weak, carries the old, sits by the side of the sick, is a fool. Nature's competition is a battle in which no quarter is given.

Why should men compete so blindly, so mercilessly? Why should we seek to make it a law of the industrial world that only the young, the strong, the vigorous shall find employment? Why should it be a law of the commercial world that only the big, the rich, the powerful shall survive? Because that is the natural order of things, it does not follow it should be the human.

The human law should not be the survival of the strong, but the survival of all, of the best there is in all and, oftentimes, there is more of good, more of real value to humanity in the weak than in the strong. The decrepit body may be of little use to nature, but to mankind it may possess a priceless content, and even though the aged are a burden from a material point of view, they are needed to develop those qualities of sympathy and unselfishness, of devotion and love, that lift men toward the angels.

Something Finer

No, competition—true competition—is not the mere striving of two men to get the same job, the same customer, the same material advantage—it must be and it is something finer and better than that. The old form of competition is not worth while It is not worth fostering or preserving. It savors of the dark ages of progress, of those primitive and savage conditions when the weak were abandoned and the old were killed. It is a curious persistence of a natural, a biological law in the industrial world long after man, in his social and moral relation, has advanced to higher and finer ideals. Morality has made progress in every department of human thought, save that of economics. Ethical standards have been set up in every branch of human activity save that of making money.

Most Contemptible

Of all the rivalries in which man engages, brute competition in the production and distribution of wealth is the most contemptible, since it is the most sordid; a mere money-making proposition, unrelieved by a single higher consideration. This is not the fault entirely of competition, of rivalry as such, but of our industrial economy. There is nothing inherently wrong in rivalry in the large sense of the term; on the contrary—it is a most powerful incentive toward perfection, ethical, æsthetic and material; it is the most powerful incentive toward co-operation, which is the foundation of progress.

Rivalry—competition in its broadest significance, is the earnest, intelligent, friendly striving of man with man to attain results beneficial to both; it is neither relentless nor indifferent; it is neither vicious nor vindictive; it is not inconsiderate, nor is it wholly selfish; it is not mechanical, but human and should be, therefore, sympathetic.

Against Progress

Competition without co-operation is war, and war is "Hell"; but it does not promote progress. So far from promoting progress, such competition stays and hinders; it generates the bitterness, the jealousy, the distrust that disintegrates families, partnerships, classes, provinces, states and nations. Such competition is progress only in the sense that war is progress. Rightfully viewed, there is not a single good result accomplished by men in politics or economics commonly attributed to wars, struggles and competition, that should not be attained by intelligent and far-sighted co-operation. That it should be argued that the lives of millions of men, the tears of millions of widows and children are necessary is a lamentable confession of human incompetence.

The argument that it is necessary for countless numbers of men, women and children to live in slums, to freeze, starve, and suffer in order that competitive conditions in the labor and industrial world may be maintained and society profit by their misery is also a lamentable confession of human incompetency. It is criminal and the blind worship of "cut-throat competition" and our application of the doctrine of the survival of the fittest to our industrial and commercial affairs is the root of all those evils.

The Extension of Trade in the Empire

Address by Fred W. Field, British Trade Commissioner

The appointment of a Trade Commissioner in Ontario, with headquarters at Toronto, is one of four appointments made, or to be made, in Canada by the British Government, through its newly constituted Department of Overseas Trade (Development and Intelligence). This department combines the activities of the former Commercial Intelligence Department of the British Government's Board of Trade and of the commercial phases of the work of the Foreign Office.

It is interesting to know that the idea of the Trade Commissioner Service of the United Kingdom was suggested by the Premier of one of the overseas Dominions. At the Imperial Conference in London in 1907, which was attended by the representatives of the various Dominions, Sir Joseph Ward, then Premier of New Zealand, drew attention to the need for the commercial representation of the United Kingdom in the Overseas Empires. Mr. Lloyd George, who, at that time was president of the British Government's Board of Trade, immediately took action upon this suggestion and shortly afterwards arrangements were made for the appointment of four Trade Commissioners. One was sent to Australia, one to South Africa, one to New Zealand and one to Canada, with headquarters at Montreal.

Completed Its Tour

Some years later, the Dominions' Royal Commission commenced and duly completed its tour of the British Empire. The Commission was composed of representatives of the British Government and of the various Dominion Governments, Sir George Foster representing Canada. Their work, broadly speaking, was to investigate the natural resources, trade prospects and kindred matters in the British Empire. They visited all the Dominions and in Canada traveled from Halifax to Vancouver, stopping at practically all the most important points and taking a great amount of useful evidence. During their visit to this Dominion, they soon realized that it was impossible for one Trade Commissioner, however capable and energetic he might be, satisfactorily to cover the duties in the entire Dominion of Canada in addition to the Dominion of Newfoundland. They therefore recommended, in their report on Canada and in their final

Important Addresses Given at the Annual Convention Covered Fully By "Hardware and Metal"

The subjects dealt with at the annual convention of the Retail Hardware Association of Ontario covered a wide range of subjects of interest to the trade. Complete reports appeared in last week's issue of HARDWARE AND METAL of the following important addresses:

"The Fourteenth Annual Convention," covering the first day's proceedings, addresses of welcome and addresses from trade representatives, including Mr. Adam Taylor of Guelph.

The President's Address.

Report of the Secretary.

The newly elected officers.

Treasurer's financial report.

The Wednesday morning session.

Address on "Ready Mixed Paints" by W. S. Fallis, of Montreal, managing director of the Sherwin-Williams Company of Canada.

"Wire and Wire Fencing," address by H. L. Frost, of the Frost Steel and Wire Company, Hamilton.

"The Stove Outlook for 1919," address by F. M. Tobin, of Toronto, secretary of the Canadian Stove Manufacturers' Association.

"Wire Nails and Kindred Products," address by F. H. Whitton, general manager of the Steel Company of Canada.

"The Glass Situation," address by Mr. J. E. Harrison, manager of Pilkington Brothers, Ltd., Thorold, Ont.

"Electrical Supplies for the Retail Trade," address by A. S. Edgar, of the Canadian General Electric Company, Toronto.

"The Linseed Oil Situation," address by A. C. McCuaig, manager of the Dominion Linseed Oil Company, Montreal.

"The Manufacture and Use of Insecticides," address by Shirley P. Newton, chief chemist of the Canada Paint Company, Montreal.

"A Short Talk on Dry Colors" by Chester A. Holkesvig, superintendent of the Dry Color Plant, McArthur, Irwin, Ltd, Montreal.

"The Wholesaler's Viewpoint," addresses by C. A. Whitwam, of London, Ont., Vice-president of the Canadian Wholesale Hardware Association and by S. H. Alexander, of Wood, Alexander & James, Hamilton, Ont.

"The White Lead Situation," address by S. W. Smith, Ontario, Manager of the Brandram-Henderson Company, Ltd., Montreal.

"Getting the Most Out of Your Territory," address by John C. Kirkwood, of Toronto.

"Vagaries of the Income Tax," address by W. H. Davis, of Hamilton, Government Inspector of Income Taxes.

"How I Placed My Business On a Cash Basis," address by W. F. Macpherson, of Prescott, Ont., Secretary of the Retail Hardware Association of Ontario.

"How to Advise a Customer to Finish Floors With Varnish and With Wax," address by William Home, of Berry Bros., Inc., Toronto.

"How I Made Use of the Sales Association Bureau," by J. B. Archer, Vice-president of the Moore Hardware Co., Ltd., St. Catharines, Ont.

"The Use of Illustrations in Advertisements," address by George D. Davis, manager of HARDWARE AND METAL.

"The Troubles of a Merchant and How to Stop Them," illustrated moving pictures and lecture by S. F. Fannon of the National Cash Register Company.

"Review of the Gasoline Situation," address by F. J. Wolfe, sales manager Western Ontario Division, Imperial Oil Co., Ltd., Toronto.

"Use of Price Ticket in Window," address by Nelson Mills, Vice-president of the Mills Hardware Co., Hamilton.

report, the extension of Great Britain's trade commissioner service, not only in this country but in other parts of the Empire. They proposed that the number of Trade Commissioners should be increased from four to sixteen, the number in Canada to be increased from one to four. This recommendation was adopted. The result is that a senior Commissioner has now been appointed, with headquarters at Montreal; that commissioners will be appointed at Winnipeg and Vancouver; and that a commissioner has been appointed in Ontario, with headquarters at Toronto.

An Important Step

Those who know the vast extent of this country, its great distances, its natural resources, its volume of trade, and the prospects of the Dominion generally, will realize what an important step this extension is. Even with the present delimitation of territory, you will realize that the four commissioners (the senior of them also attending to matters, within the scope of his duties, in Newfoundland— have an opportunity for very active work.

The extension of the Trade Commissioner Service of Great Britain was welcomed in an unanimous resolution introduced at the Imperial War Conference in London in April, 1917. It was also approved by the British War Cabinet.

Our service, therefore, was first suggested by the then Prime Minister of New Zealand, instituted by the present Prime Minister of Great Britain (then president of the Government Board of Trade), endorsed in a resolution proposed by General Smuts of South Africa, at the Imperial War Conference, and finally approved by the British War Cabinet. The origin of the service is consequently a happy indication of its inter-Imperial character.

Lengthy Instructions

The functions of a Trade Commissioner are described in lengthy general instructions which are sent to those officers. It is unnecessary to repeat them here in any detail, but among the general functions of a Commissioner, it is his duty:—(1) To keep in close touch with the Governments and State authorities in the Dominion to which he is attached; (2) To visit the principal commercial centres in his area and establish touch with the members of the commercial community; (3) To study and report upon the tariff laws, and customs regulations, as well as legislation affecting banking, patents and copyrights, shipping, harbors, etc.; (4) To watch the imports into the Dominion, to furnish reports on the best methods of meeting foreign competition, and to furnish reports on financial and trade conditions; (5) To make an annual general report on the conditions and prospects of trade in his area, and to supplement it by special reports dealing as exhaustively as possible with particular questions which are likely to be of interest to British firms.

These functions are more or less of a general character. The broad idea of the service is to see that a regular flow of commercial information of value is maintained, and to put Canadian importers and, to some extent, Canadian exporters in touch with manufacturers and others in the Mother Country.

Many Delegations

As an example of the interest which is taken in the work of the Trade Commisioners by British firms, it may be mentioned that when the Commissioners in Australia visited the United Kingdom officially in 1916, firms and deputations there to the number of 705 sought interviews with him in regard to the prospects of British trade, etc., in the Australian market. During his stay in England he also visited 31 works. The visits to works of various kinds are naturally a valuable education to a Trade Commissioner, who necessarily must deal with trades and subjects of many different types.

Continued on Page 68

EDITORIAL COMMENT

"THE elevator to success is not running—use the stairs."

* * *

THERE'S just one man can keep on raising your pay. Look him squarely in the eye and ask him about it—when you are shaving.

THE STEEL SITUATION

MANY hardware men have regarded as peculiar the fact that when steel appeared so very scarce during the war there should be so little demand for it now. The situation is not altogether a paradox. Steel was used very largely in connection with the war. Nearly all industries were marshaled for winning the war, and they were the steel consumers. They were, after all, fairly well supplied. There was very little "unessential" consumption shut off except that which tended to disappear of its own accord because costs were so high, this being particularly true in the case of building. There is another thing to be considered. Since the armistice was signed, shipments of steel have been heavy, and many who really were quite short of steel have since been supplied.

Another and very important factor must be considered, the matter of stocks of jobbers, and manufacturing consumers. While these buyers did not have, during the war, the stocks they desired they still had stocks of considerable proportions. Two new conditions have arisen: First, the general belief that prices are going to be lower before they are higher, moving buyers to get their stocks down to the lowest possible point; (2) The great shortening in the period of mill delivery. During the war deliveries were not to be counted upon at all, unless one had a very high degree of priority, while now mills can roll and ship steel almost overnight.

WESTERN DEVELOPMENT

THERE have been so many other things to occupy attention that many people have lost sight of some of the things happening at home and one of these is immigration. Last month there entered Western Canada from the United States 807 persons who brought with them cash totalling $716,519 and settlers' effects valued at $73,400. Many hundreds of others, the great majority of them practical farmers, will come to Canada from the States this spring, it is stated. There are indications also of a westward movement from many of the towns and villages of Ontario. Many of the younger men, among them returned soldiers, are preparing to go farming This general movement will have the effect to a certain extent of stimulating many lines of business. Many people regard the unusual activity of the banks in opening branches in the West as one of the best indications of the development that is likely to occur there. Unquestionably there have been more bank branches opened in the past two months than in many years before.

WATCH YOUR ADVERTISING

IT is very easy for a merchant, especially if he is very busy, to either procrastinate about advertising or if he is running an ad to neglect to change the copy regularly. It is still more easy to do these things if the merchant, as is often the case, does not realize fully the value his advertising is to his store. The more a merchant delays the quicker his losses pile up. Good timely copy, attractively presented to the buying public of your district, will bring results and will lay the foundation for a steadily increasing business. No merchant can afford to neglect his advertising.

BEWARE OF THIS PROPAGANDA

PROPAGANDA, the source of which is easily suspected, is very busy in many places these days urging that the world "apply Christianity to Germany," or in other words that we should forget and forgive. If there were the slightest reason for hoping that the German people have undergone a change of heart and were in the slightest degree sorry for the horrors they have caused, Canadians would not be slow to forget. But there is not. Germany just now is hilariously democratic because she has been deserted by autocracy. The German people, however, if they had the chance, if they had been victorious instead of losers, would be just as diabolically heartless and cruel as ever. For forty years Germany has known no master but Force. It is the only thing they respect and the only thing they will respect. Millions of red poppies blooming over countless thousands of mounds of earth in Flanders and the memory of the ghastly things that strew the ocean's bed should amply offset any tendency there might be to listen to any hypocritical supplications of the Huns for mercy which they never showed.

EVENTS IN THE TRADE

Business Changes

Niagara Falls, Ont.—McEvers & Henry, hardware, have dissolved partnership. A. E. McEvers continues.

Wolseley, Sask.—E. F. Chesney of Semans, Sask., has purchased the hardware business of F. F. Elsey & Sons.

Innisfail, Alta.—The Watt Hardware Co. has taken over the business formerly conducted by the Day Hardware Company.

Fire Losses

The plant of the Thorold Basket Company, Thorold, Ont., was destroyed by fire. The loss is $20,000.

T. S. Simms and Company Ltd., St. John, N.B., sustained a loss of $10,000 in a fire which damaged a warehouse at Fairville, N.B., in which a stock of broom corn was stored.

Fire which is believed to have started in the furnace room almost completely destroyed the wholesale and retail store of the Mechanics Supply Company, St. Paul St., Quebec., on Monday. The loss with insurance will amount to $150,000, it is estimated.

Obituary

George Booth, aged 82, president of the Booth, Coulter Copper and Brass Co., Toronto, and ex-treasurer of the Canadian Manufacturers' Association, is dead.

Personals

T. Fairbanks of Broadview has joined the sales staff in the hardware store of E. F. Chesney at Wolseley, Sask.

Percy E. Paddick, of Florence, Ont., has been appointed manager of the hardware store of R. M. Birce at Essex, Ont.

A. R. Bernhardt, formerly of the Bernhardt Hardware Co., Preston, Ont., has been appointed manager of the Bank of Toronto at Stayner, Ont.

Harold Smith, accountant in the Bank of Ottawa at Perth, Ont., is returning to his home in Cornwall, Ont., and will go into the hardware business.

F. C. Moore, formerly with the Marshall, Wells Co., Winnipeg, has been appointed Western manager for the Hamilton Stove and Heater Co., of Hamilton, Ont.

J. A. Coulter of Ingersoll, Ont., president and managing director of the John Morrow Screw and Nut Company, has left for Los Angeles, where he plans to remain for some weeks.

H. Richardson, of the hardware firm of Richardson & Rae, was elected president of the newly-formed Retail Merchants' Association at Ingersoll, Ont., T. N. Dunn, hardware, is a member of the executive committee.

James G. Lorriman has returned to take charge of the Preston end of the Metal Shingle and Siding Co., Ltd., as manager. Mr. Lorriman was with the company as sales manager in the years of 1907 to 1910. During his absence he has been editor and manager of HARDWARE AND METAL, manager marine specialty branch of Brandram-Henderson Limited, and latterly manager of the Toronto office of The Advertising Service Co.

Trade Notes

George Livingstone, implement dealer, Barrie, Ont., has been succeeded by J. H. McCaw.

The wholesale hardware firm of F. Bacon & Co., Montreal, has been dissolved.

William Kellet, Toronto, grocer and household hardware, is discontinuing business.

The Rainbow Coil Protector Co., Charles A. Gareau, manager, has been registered at Montreal.

The Vulcan Knitting Mills of Canada, Ltd., Three Rivers, Que., has changed its name to National Gloves, Ltd.

Newbury and Ross, of Hamilton, have extended their store on James Street North and installed a new front.

G. M. Howell of Toronto is opening a sheet metal, stove and furnace business at 417 Colborne St., Brantford.

The Imperial Sheet Metal Works, Sarnia, Ont., W. C. Keller, manager, have moved into new premises at Victoria and Lochiel streets.

Commercial Agencies, 23 Jordan St., Toronto, have received the selling rights for Canada for Hudson Brothers aluminum cooking utensils.

The Sharples Separator Company, West Chester, Pa., announces the appointment of Prof. Robert A. Lamson as dairy educational manager.

Fitzgerald and Kent will open a hardware store at 232 King Street, Hamilton. Messrs. Fitzgerald and Kent were formerly with the hardware firm of Kent, Garvin & Company.

Stevens-Heppner Co., Ltd., of Port Elgin, Ontario, have recently taken out supplementary letters patent, increasing the capitalization of their company from one hundred and fifty thousand dollars to five hundred thousand dollars.

The partnership between Howe and Henderson, Ingersoll, Ont., tinsmiths, has been dissolved and the business will be carried on by Dennis Howe.

W. C. A. and Oscar O. Watt, formerly of Red Deer, Alta., have purchased the business of the Day Hardware Co. at Innisfail. D. A. Smith, who has been manager at Innisfail returns to the Day Hardware Company's store in Red Deer.

The hardware firm of Keyes & Reynolds at Sault Ste. Marie has been dissolved. J. E. Keyes will continue the business while Mr. Reynolds becomes manager of the Fulton Hardware Co.

David B. Wilson, who recently purchased the hardware business of John Fennell, Napanee, Ont., has remodelled the building and added considerable shelving space in the main part of the store.

Montreal News

Robert Miller, of Starke-Seybold Ltd., is ill.

Oliver B. North, of O. B. North and Co., New Haven, Conn., was in Montreal this week.

F. Clive Hatch was in Montreal this week representing the Martin Mfg. Co. of Whitby, Ont.

The Paint, Oil, and Varnish Association held a special meeting in Montreal on Thursday.

Herbert Seybold, of Starke-Seybold Ltd., returned from Toronto and Hamilton last week.

Gordon Hale, of Starke-Seybold pricing department, has been laid up for the past ten days.

J. A. Vincent, of J. A. Vincent Ltd., Acton Vale, Que., maker of stepladders, was in Montreal this week.

Chas. C. Evans, representing W. J. Dennis and Co., Chicago, makers of weatherstrip, was a Montreal visitor.

J. R. Dalany, manager of the Chamberlain Co., Pittsburgh, manufacturers of Desolvo, was in Montreal this week.

W. H. Newton, trade sales manager of the Canada Paint Co., Ltd., Montreal, is in Toronto and Western Ontario points this week.

Arthur A. Rice, with Abbey and Imbrie, fishing tackle makers, New York, expects to be in Montreal in a few days.

Mr. Beaudell, buyer for the hardware department of the Hudson's Bay Co., Calgary, and Mr. Freeland, buyer for the same firm at Edmonton, were in Montreal this week.

Richardson and Bureau, manufacturers' representatives, Montreal, have been

appointed Eastern Canada agents for Desolvo.

The James Walker Hardware Co., Ltd., used a unique advertisement in the daily paper this week calling the attention of automobilists to a special attachment for spark plugs. It read as follows: "No more cleaning plugs; No more carbonized plugs; No more engine missing; No more new plugs—For explanation, see our window. Demonstration on Wednesday and following days. James Walker Hardware Co., Ltd." An actual demonstration was afterwards given in the window.

Winnipeg News

Wm. Chalmers, of Deloraine, was a visitor to the bonspiel.

W. H. Hyde, of Astern, Man., spent a few days in the city this week.

J. H. Stewart, of Fortier, Man., was a visitor in the city this week.

M. Brownstone, of Niverville, Man., spent a few days in the city this week.

J. Timms, Oakville, Man., spent part of the week in the city on business.

Mr. Lacey, of the Corning Glass Co., Corning, N.Y., is in Winnipeg this week.

O. L. Lewis, of Gerstendorfer Bros., New York is calling on the trade this week.

M. Breckman, of Breckman Bros., Lundar, Man., spent a few days in the city this week.

Joe Hamelin, of Hamelin & Co., St. Rose Du Lac, was a visitor during the week.

J. D. McLean, of Shoal Lake, Man., was a visitor in the city during the week.

E. E. Lydy, manager of the Maytag Co., has just returned from a visit to Vancouver.

Percy Dietrich, of the Shirley & Dietrich Co., Ltd., Galt, Ont., is calling on the jobbing trade this week.

Arthur L. Stelck, of the Sutherland & Stelck Implement Co., Dauphin, was a visitor in the city for a few days this week.

Mr. McCune, of McCune & Son, Hudson's Bay Junction, was in the city for a few days on business.

Mr. Dykeman, of Dykeman & Gordon, Benito, has returned after spending some time in the city on business.

L. A. Willson, Western manager for Anthes Foundry, Ltd., Winnipeg, returned last week from a business trip in Eastern Canada.

W. W. Hicks, who represents several large automobile accessory houses in Western Canada, left last week for Calgary and other points.

P. A. C. McIntyre & Co., manufacturers' agents, Winnipeg, have moved their offices from 1206 McArthur Bldg. to 810 Confederation Life Building.

Incorporations

F. M. Tobin of Toronto, secretary of the Canadian Stove Founders' Association, is in New Brunswick this week.

Colonel W. M. Gartshore, of the McClary Mfg. Co., London, Ont., has been re-elected as president of the Western Fair Board.

Thomas H. Purdom Jr., of the Purdom Hardware Co., London, Ont., is spending a week in New York.

W. Zimmerman, managing director of Whites Ltd., Collingwood, Ont., was a recent visitor in Sarnia.

Norton Tool and Machine Co., Ltd., capital $40,000, head office Toronto, plans to manufacture and deal in tools, machinery, implements and hardware.

Acme Electro-Plating Company Ltd., head office Toronto, capital $40,000, plans to manufacture and deal in hardware, machine supplies, and utensils.

A. T. Howe and Son, Limited, capital $150,000, head office Toronto, Ont., plans to manufacture and deal in wool, hemp, flax, jute and fibres.

Consolidated Stampings and Enamelling Ltd., head office Toronto, capital $500,000. plans to manufacture and deal in metal, enamel, porcelain, pottery and glassware of all kinds, and also hardware.

Montreal Forge and Shackle Company Ltd., head office Montreal, capital $20,000, plans to manufacture and deal in chains, tools, and shipping accessories.

Aspromet Company of Canada, Ltd., capital $200,000. head office Sarnia, Ont., plans to manufacture and deal in steel, iron, metal, asbestos, cement, asbestos-protected metal sheets, paints and strips.

Edward A. Robinson Co. Ltd., head office Montreal, capital $50,000, plans to carry on the general business of brass founders, metal workers, painters, and to manufacture and deal in hardware, cement, chemicals and explosives.

National Electric Products Ltd., capital $1,000,000, head office Toronto, plans to manufacture and deal in metallic and chemical products.

Brantford Roofing Co., Ltd., capital $250,000, head office Brantford, Ont., plans to acquire the property of the Brantford Roofing Co., Ltd., and to manufacture roofing materials, building papers, paints, oils and varnishes.

Mills Brothers Resume Business Duties After Distinguished Service on the Firing Line

Lieut. Fred. J. Mills, M.C., and Lieut. Wilfred Mills, of Hamilton, Ont., who recently returned from overseas, have resumed their former positions with the Mills Hardware Company, Limited. Both young men, since the inception of the company have been directors. When the call came, Lieut. Fred J. Mills went overseas three and a half years ago, and saw much active service at the front in France with the 40th Battery. For distinguished services he was awarded the Military Cross. He was wounded, but has now fully recovered.

Lieut. Wilfred Mills went to Italy and saw eighteen months' service with an Imperial unit. For special services he was decorated with the Croce al merito deguerre, and also with the War Service Medal. He came through the heavy fighting in Italy unharmed. Both young men are sons of Mr. Charles Mills, president of the Mills Hardware Company, Limited.

LIEUT. WILFRED MILLS

LIEUT. FRED J. MILLS, M.C.

BONUS FOR OFFICE EMPLOYEES

At a social evening tendered to the office employees of the Dunlop Tire and Rubber Goods Company of Toronto by General Manager J. Westren, not only theh entire head office and city branch staffs, but representatives from branches at Montreal, Ottawa, London, and Hamilton were present.

Mr. Westren made a number of announcements—the most interesting to the staff being one of a pecuniary nature, in which all shared. He also spoke of the broader field in sight for the company owing to the affiliation with the larger British Dunlop Company, by reason of which they have access to the methods and formulae of the latter company, sharing in the use of any new patents.

Predicts Big Improvement in the Demand For Glass

THE following letter has been sent out by the Plate Glass Manufacturers of America, Pittsburgh, Pa.:

To Manufacturers:

"The news from various parts of the country contains items of much encouragement regarding the plans for resumption of building operations. The 'New York Real Estate Record and Guide" summarizes the situation with the statement that building projects in the metropolitan district are more numerous than they have been at any time within the past two years.

"The House Public Buildings committee has just reported favorably the Annual Public Buildings Appropriation Bill, carrying a total of $50,000,000 for construction of post offices and other public structures, including the following: Chicago, Ill., $6,000,000; Boston, Mass., $3,500,000; Pittsburgh, Pa., $2,950,000; Springfield, Mass., $1,400,000; The Bronx, N.Y. City, $1,000,000; Syracuse, N.Y., $1,000,000; Baltimore Md., $1,000,000; Philadelphia, Pa., $1,000,000, besides buildings for numerous smaller cities.

"According to information gathered by the Department of Labor, building projects to the extent of $236,000,000 were held back on account of the war, during the years of 1917 and 1918. According to the same source, it will require approximately $500,000,000 to make up the building deficiency existing in the States of New York, Maine, New Hampshire, Vermont, Massachusetts and Rhode Island for the same period.

"Altogether we are quite optimistic on the outlook for a big improvement in the demand for glass in the very near future."

People Urged to "Buy Now" by American Council of National Defence

"BUY only what you need but buy it now," is the keynote of an official statement issued by Grosvenor Clarkson, director of the United States Council of National Defence in inaugurating a campaign to stimulate business and help relieve the industrial situation.

The official statement is in part as follows:

"The United States Council of National Defence, composed of the Secretaries of War, Navy, Interior, Agriculture, Commerce and Labor, has begun a nation-wide campaign urging the people of the country to buy only what they need, but to buy it now. The Council's action is based on the general industrial situation. In the Northern States unemployment is present because of suspension of outdoor work. Workers on outdoor improvements have crowded into the congested cities and are finding more or less difficulty in getting temporary employment. There is business hesitation normal to post-war readjustment. Prices are to some extent declining. Men hesitate to buy materials and supplies on a falling market. This means stopping work in some places and reducing amount of work done in others. Return of soldiers in large numbers adds for the time to the problem.

Invites Trouble

Without expressing undue alarm, the Council of National Defence believes that the situation invites the activities of certain restless elements of society. The Bolshevist takes advantage of idleness. Empty stomachs and purses create his opportunity. His fellow, the I. W. W. agitator, seizes the same occasion. There is a great volume of business waiting to be done in America. Private stocks of all kinds are low. The country's means are ample and when the full flow of private buying begins, there will be business for all. But it may take several months to bring this about, and action is needed now.

Foundation of Commerce

Our commerce rests upon the personal purchases of individuals. If all were to stop buying there would be no business. It is called good business to delay buying until the market reaches bottom. If economic law alone were now concerned that would be right action. But there is directly involved at this moment the saving of men from unemployment and the social consequences to them and to the country.

There must be no waste. We must still save. Taxes are coming and there will soon be another loan. The middle course that the Council urges is: Buy only what you need, but buy it now. If this course is followed commercial springs of action will be tapped and a real danger averted."

The Council is transmitting this programme to the 184,000 units of the State, county, community and municipal councils of defence.

NATIONAL AUTOMOTIVE EXHIBITION

A large and varied list of exhibits will be shown at the National Automotive Exhibition of Eastern Canada to be held in Montreal, April 5 to 12. This will be the only motor show to be held in Canada in 1919. Among the exhibits will be pleasure and commercial cars, tractors, motor cycles, motor boats, and accessories.

LEAVES FOR OLD COUNTRY

T. B. Wiliamson, buyer, H. S. Howland, Sons & Co., Toronto, leaves to-day for New York, from where he sails on the Olympic for the Old Country. Mr. Williamson expects to spend 6 or 7 weeks in England and Scotland, combining business with pleasure. Mr. Williamson is looking forward to a visit with his father, who resides in Scotland and is now getting along pretty well in years.

Lieut. Robert Miller Returns From Overseas

Robert B. Miller has returned from overseas to Montreal, where he is with his former employers, Starke, Seybold & Co., wholesale hardware. Mr. Miller joined the First Canadian Tank Battalion in April, 1918, and very shortly after went to England. While in training there he secured his commission as Lieutenant and was just ready to leave

LIEUT. ROBERT MILLER

under orders for active service in France when the armistice was signed. Subsequently he returned to Canada and again joined his old firm, and with whom he has been connected since 1904 in various capacities, and for some time as a buyer of shelf hardware. His new engagement is that of assistant to Col. Robert M. Starke, in the heavy goods department.

Bright Outlook For Bicycles in Quebec

At the second annual meeting of the bicycle and motorcycle dealers of Montreal and Quebec district, held at Freeman's Hotel, important trade matters were discussed, and the possibilities of the trade for 1919 were outlined and fully discussed, including various advertising schemes.

L. Quevillon, manager of the Montreal branch of the Canada Cycle and Motor Co. presided, and a number of outside speakers attended. Among these was J. W. Gibson, general manager of the Canada Cycle and Motor Co., Toronto, and B. B. Halliday, general sales manager, also from the Toronto office, who, in his remarks, outlined the advertising campaign of his company for 1919.

Must Pay $1,080 For Failure to Fill Contract For Electric Irons

THE Radiant Electric Co., Ltd., of Grimsby, Ont., was ordered by judgment of the Superior Court, rendered by Mr. Justice Maclennan, in Montreal, to pay $1,080 damages to W. H. Spencer & Co., Limited, of Montreal, for failure to fulfil a contract for the supply of 3,000 electric irons. Of the amount mentioned $435 has to be paid to indemnify Spencer & Co. against the judgment which was rendered at the same sitting of the court, condemning Spencer & Co. to pay $435 to Lewis Brothers, Limited, of Montreal, for loss sustained through Spencer's failure to supply Lewis & Co. with 1,500 of the irons.

Admitted Contract

Spencer & Co., pleading to the principal action, admitted the contract with Lewis Brothers and failure to fill the order. It was added that it was only possible for defendants to procure the irons from the Radiant Electric Company, of Grimsby, Ont., and that, acting in good faith, they contracted with this company for 3,000 irons, but the company refused to supply the irons, so that it was impossible for Spencer's to carry out their contract with Lewis Brothers.

Action was therefore taken against the Radiant Electric Company to guarantee Spencer & Co. against judgment on the principal action, and claiming further damages, bringing the total to $1,080—for Spencer's own loss of profits through non-fulfilment of the order.

The Radiant Electric Company said that Armour Brothers, through whom Spencer's said the order was booked, were not authorized or empowered to accept the order for the irons, and if the order was accepted—which was denied—the same was never accepted by the Radiant Co., who, therefore, denied responsibility for the damages claimed.

Acceptance of Order

Mr. Justice Maclennan said that on August 12, 1916, Spencer & Co. wrote to the Radiant Electric Company that they were interested in the purchase of electric irons, and inquired if defendants-in-warranty had arranged with any jobber or representative for the sale of its products in the Eastern Provinces. In answer the Radiant Co. wrote on August 14 that Armour Brothers of Montreal represented them in Quebec, and they were writing to their representatives informing them that Spencer & Co. were interested in electric irons. On October 13, 1916, Armour Brothers, pretending to act as duly authorized agents of the defendants-in-warranty, showed Spencer & Co. samples of an electric iron and quoted prices thereon. Thereupon Spencer's entered into a contract with Lewis Brothers for the sale and delivery during 1917 of 1,500 electric irons.

Given in Writing

On October 16, 1916, Spencer's delivered to Armour Brothers an order in writing for 3,000 electric irons, Armour Brothers making out an acceptance of the order in writing. On October 30, the Radiant Company wrote that it would not accept the order, the reason given being that there had been an advance in the price of electric irons.

Justice Maclennan pointed out that this increase did not take place until about two weeks after the order had been given to and accepted by the agents. It was established that the powers of Armour Brothers, as agents for the Radiant Company, were to show goods, quote prices, and submit offers to their principals for acceptance or refusal. But none of these limitations or conditions of agency, the judge said, were known or disclosed to Spencer & Co.

Must Accept Liability

In the absence of such notice the Radiant Company could not by any instructions to its agents escape liability for acts done by the agents, which fell within the apparent scope of their authority.

If the Radiant Company was not bound by the acceptance of the order by its agents and by its failure to promptly notify Spencer & Co. that it would not accept the same, they had given Spencer & Co. reasonable cause to believe Armour Brothers, as their agents and representatives, had the power and right to enter into contracts on their behalf for the sale of electric irons to purchasers and dealers in such goods. Spencer & Co., in good faith, relying upon the letter of the Radiant Co. of August 14, 1916, and the representations of Armour Brothers dealt and contracted with Lewis Brothers, plaintiffs in the principal action, for the sale to the latter of 1,500 electric irons, and purchased from the Radiant Co. 3,000 electric irons through their agents in Montreal.

In the circumstances, and seeing that the plaintiffs-in-warranty had suffered a loss of profit on the transaction, the court gave judgment for Spencer & Co. against the Radiant Electric Co. for $1,080, and condemned Spencer & Co. on the principal action to pay $435. The Radiant Electric Company were condemned in costs on both the principal action and the action in warranty.

HOLD BOWLING TOURNAMENT

W. A. Rowland, works manager, Steel Company of Canada, Swansea works, was the host at a bowling tournament given to the employees of the Swansea office and works on February 22nd. T. F. Hodgson and C. G. Knott from the city office were in attendance also.

At a little tournament held just prior to Christmas the employees presented Mr. Rowland with a silk umbrella, which remembrance so pleased him that he promised to provide a further night's entertainment and this was fulfilled last Saturday night at the alleys of the Toronto Bowling Club.

Prizes were offered for teams turning in the best scores and a special prize was given for the highest individual score made in one game. This latter going to Mr. Stevens, with a total of 199 pins. A remembrance of a suitable nature was made to all those competing, whether prize winners or not.

Team winners with their scores and the prizes they won:

1st Prize—Alex McPherson—Score 490
James Smith — Score 421

Total—911

Prizes, two pairs gold cuff links.

2nd Prize — Walter Hunter—Score 499
Tom Hart — Score 375

Total—874

Prizes, two gold tie pins.

3rd Prize—C. G. Knott—Score 419
Eddie Phillips — Score 390

Total—809

Prizes, two boxes cigars.

The prizes were presented by Mr. Rowland and the recipients in responding made reference to the harmony existing between Mr. Rowland, the works manager, and the office and works staff.

An interesting part of the evening's ceremonies was when Judge T. F. Hodgson, of the city office, was presented with a box of flowers as a slight remembrance of his being born on the same day of the year as George Washington, February 22.

TO STOP ADULTERATION OF SHELLAC

At the annual meeting of the Shellac Importers' Association held in New York it was decided to eliminate the danger of adulterated shellac by insisting on a well-defined standard of purity hereafter. It was said that according to information received from India there has been recently considerable adulteration with flour and other substances and manufacturers have reported a marked increase in loss when the shellac was dissolved prior to use.

It is now the intention of the importers to insist upon a standard of purity based upon accurate tests and they will probably insist on regulations to determine the exact percentage of foreign matter to be allowed in each grade when dissolved in hot alcohol.

NAVAL STORES MERGER

At a meeting held in New Orleans on Wednesday, a $3,000,000 stock company to be known as the Naval Stores Producers' Export Company was formed. The company plans to go strongly after overseas and other export trade. It was formed following a meeting of men representing about a third of the entire turpentine and rosin producing interests of the south. The feeling is prevalent that the balance of the trade may join the export company.

THE CLERKS DEPARTMENT

Make Good First and You Will Make Friends

Don"t Set Out to Cultivate Friends Who You Figure May Prove Useful, But Develop Qualities and Abilities That Will Win People's Esteem

"HOW much does friendship count in business?" B. C. Forbes has put this question up to Albert Wiggins, one of the youngest and most successful bankers in New York. In the "American Magazine" he gives in full Mr. Wiggins' views on this matter as follows:

"The banker with a million friends," he is sometimes called. The number and staunchness of his friends are a standard theme of the financial world.

"Making friends is the passport to success——"

He stopped me. "Character—personality—is the passport to success, not friends," he cut in very emphatically.

"You don't believe, then, in the truth of the adage, 'If you can make a lot of friends you will make a lot of money'?"

"Certainly not; friends made for an end don't last till the end. Any friendship that has to be bought, not necessarily in dollars, but by fawning or flattering or dining or entertaining, is not worth the price; it is not worth having. Smiles don't win the best kind of friends; it's what is behind the smiles—personality, ability. Friendships inspired by your pocketbook are not friendships; they are, as far as you are concerned, frauds, for they are not genuine, they are not true-blue, they are not sincere. Deliberately setting out to win friends for selfish motives is like deliberately setting out to win happiness; you gain friends as you gain happiness, not by purposely trying to obtain them, but by meriting them in the course of the day's work."

"Is it not true," I persisted, "that when you, or any other executive or corporation head, want a man for a very responsible, high-salaried job you never dream of putting a want ad in the paper for him, but select someone you know or know of, someone who is either a friend of yours or a friend of some of your friends? You don't pick a stranger, do you?"

"That is true—and then, again, it is not true," he replied earnestly. "It is true that big jobs are usually filled in the way you say; but the man who is selected is not selected because he is a friend, but **because he can deliver the goods.** A man is not judged by his friends, but by his own personality and even more by his record.

"You seem to want to put the cart before the horse. Friends don't make a man, but if a man has the right qualities, the right personality, the right calibre, he cannot help making friends; they just feel drawn to him. The thing to do is not to set out to cultivate friends who, you figure, may prove useful, but to cultivate and develop qualities and abilities that increase your own usefulness. If you do that, and do it, of course, on the square, the friendship part will take care of itself."

Then he added, gravely, after a pause: "God help the man who has no friends."

"Exactly," I chimed in. "Let's get at the bottom of just what making friends can do and what it cannot do in helping a man to get on in life; also, how the most worth-while friendships are born."

"The man's a rotter who starts out to make friends for what there is in it for him. He's also a fool, for people will soon get onto his curves."

Then he launched into an analysis which exploded many popular notions on the importance of painstakingly building up a wide circle of friends as one of the sesames to success, and followed it up with clear-cut, forceful suggestions and statements on the real things worth cultivating in order to rise in the world, the things which, if a man once attains them, will mean that "all other things will be added unto them."

"The banker with a million friends" is Albert H. Wiggin, head of the powerful Chase National Bank, youngest bank chairman in New York, director of thirty of America's leading railroads, industrial corporations, mining companies, financial institutions, public utilities, insurance companies, and treasurer of the United Hospital Fund, trustee of the Music School Settlement, trustee of the East Side House, located in a poor section of New York City, etc.

He was not always influential. He was the son of a New England country preacher. His first connection with banking was during his school vacations, when he acted as errand and office boy. The family purse did not permit of a college education. Instead, he became a bank clerk. Before he was twenty-three he was examining banks in Boston for the Federal Government. In this position it is easier to make enemies than friends, but even thus early Al. Wiggin realized that the man who is afraid, when occasion demands, to make an enemy is not fitted to be a worth-while friend.

So thoroughly had he mastered the intricacies of banking and so efficiently did he perform his work that, when only twenty-six, he was elected as an officer by a Boston bank and later became vice-president of a larger one. His duties brought him in touch with New York bankers. The young Bostonian's talents were recognized. And the inevitable happened: he was offered, and accepted, the vice-presidency of one of New York's famous institutions, the National Park Bank—this when thirty-one.

Soon he developed ability as a financier—banker and financier are not synonymous terms: the banker may be a man of routine, whereas the financier is a creative being, with a penchant for taking hold of large-scale enterprises and aiding in engineering their success. The banker is often negative, the financier always a positive force, a man who does things, a man who is not afraid, under propitious circumstances, to dare.

From his strictly commercial bank located in a business district to a financial bank located in the Wall Stret district was Mr. Wiggin's next, and entirely logical, step. He was thirty-six when he joined the Chase Bank as vice-president. At forty-three he ascended to the presidency. But not before he had made his mark, made it under the trying, nerve-testing, sensational conditions which broke out in 1907, when Wall Street was plunged into panic and ruin.

From the time the storm of 1907 cleared up Wiggin stood out as a coming financial giant. His counsel was widely sought. The most important directorates in the country opened their portals to him. His interest was courted in ambitious new projects. The esteem of the old-school leaders for Wiggin was shared by the younger school then coming to the front. Achievement after achievement, success after success, failed to affect his character, failed to enlarge his head.

He is to-day only fifty, and is planning and doing bigger things than ever before. For example, being impressed by the opportunities about to unfold throughout the world for the United States and her forward-looking, forehanded citizens, he recently inaugurated a movement which led to the formation of the American Foreign Banking Corporation by wide-awake financial institutions throughout the country, its chief purpose being to aid in enabling America to gain leadership in the international commerce of the world.

The man chosen as active head of this progressive organization was not found in New York. The far-seeing eye and long arm of Al. Wiggins went clear across the continent, to San Francisco, for the ideal president. Why? "Because," said Mr. Wiggin, "after we had all laid our heads together and investigated various possibilities, we concluded that Archibald Kains could fill the bill better than any other banker in the country. He had made a wonderful record as an energetic, dynamic, soundly balanced commercial banker, and the impression he made upon those best able to pass judgment was testified by his selection as governor of the Federal Reserve Bank of San Francisco. He has resigned that position to take up the international work. He has the requisite vision, brains, energy and judgment. His personality will inspire the confidence alike of American exporters and importers and foreign business men. He has the winning combination of character, ability, and the gift of making friends.

"Make good first and you will make friends." That sentence virtually epitomizes Mr. Wiggin's creed. The making good, however, and this is important, must be gone about in the right way. A glimpse of Wiggin's own method, together with an explanation of how he attracts so many friends among all classes, powerful and humble, old-school and new-school, is afforded by this brief comment made by Seward Prosser, president of the second largest trust company in America, and an intimate friend for many years:

"Al Wiggin makes friends because he has something to offer in return. He is tremendously loyal. He is generous to a fault. He can criticize a man's proposition without hurting him, because the man senses that Wiggin is doing what is right. He has unlimited courage, nothing is too big or to difficult for him to tackle; he has, of course, quite extraordinary ability. He has a slant of mind that enables him to work hard when he works, and then play hard when he plays—he gives himself up to it as whole-heartedly as a boy. In fact.

Al Wiggin is like a big, jovial, wholesome boy in many respects. He is a great believer in young men—the man he chose to succeed him as president of the Chase when he became chairman was only thirty-six. Although he has an abundance of good nature, he can be, and is, very firm in business. Few men can go through work with his rapidity. In short, he is not only able, but his unselfishness and geniality make him absolutely likable—lovable, even. He makes friends because he deserves to."

"How much does the gift of making friends weigh in appraising a man for a big job?" repeated Mr. Wiggin when I put the question to him. "Just this: you first call the roll of your own memory in an effort to think of a suitable candidate. Then, often, you lay the matter before your associates and ask them for suggestions."

"All a question of having friends. It is somebody's friend, or at least acquaintance, who is thought of," I interjected.

"Usually, but not always, not by any means. Most often the man named has attracted attention by doing something better than ordinary or has in some way made a record for himself. When you come to considering a man's fitness you first weigh his general character, then his ability and then his personality. If he possess the first two in unusual degree and his personality is mediocre, or neutral, so to speak, he may be the man; but if his personality is poor, or objectionable, he stands very little chance of being selected. We would not think of having a man on our officers' platform who had not in at least passable degree the gift of making friends. Where a man's duties bring him much in contact with other people his personality counts a great deal, for the man who makes friends gets on better, and paves the way for more opportunities, than the man who has failed to cultivate a reasonably attractive personality.

"But never forget that personality and the ability to make friends are not superficial matters. They are not simply a question of what goes by the name of 'manners.' They are deeper things. They have their roots in the very heart of a man. They are the man. To attract lasting friends a man has to be, not to seem. Let a man seek to cultivate merit, and he will not have to go out of his way to 'cultivate' friends.

"To be worth anything, a smile and a hearty handshake and a cordial greeting and all the best of it must spring from the right kind of character, the right kind of man, the right kind of make-up, or they will never get you 'there.'

"On the other hand, a fine character is not necessarily all-sufficient. Sometimes the very finest characters are the worst bores, and you feel like fleeing from them whenever you see them approach. They haven't the right personality; they repel rather than attract friends."

"There is an idea that some men holding conspicuously important jobs in the financial district were picked because they happened to be friends of the financial powers that be," I suggested.

"Nothing to that!" Mr. Wiggin instantly replied. "They weren't selected for big jobs because they happened to be friendly with certain financial leaders, but they 'happened to be friendly' with these leaders because the leaders had seen in them the making of big men, fit to swing big jobs. If there are a few exceptions, they simply prove the rule. Leaders interested in many organizations and enterprises must all the time be alert to spot executive timber.

"You don't imagine for a moment, do you, that Harry Davison was selected by the late Mr Morgan as a partner because he was a friend of Mr. Morgan's? Mr. Morgan picked him as a partner and a friend because he was of the right calibre. And, in turn, do you think Seward Prosser was made president of the Bankers' Trust just because he was a friend of Davison's? He was a friend of Davison's for the same reason that he was made president of the Bankers'—because he had shown that he could deliver the goods. Again, Harvey Gibson didn't follow Prosser as president of the Liberty National because he was a close friend of Prosser's. He was a close friend of Prosser's and was made president because he was made of the right stuff and had built up a remarkable record at a very early age.

"There are men who are delightful friends and companions for yachting cruises or house parties or the like, but as for choosing them to fill an executive business position! They are bully social friends, but because of that qualification no one would think of entrusting them with a big job.

"The day when it was considered necessary to dine and wine and entertain a customer or prospective customer to gain his friendship and his business is past. What is wanted to-day is not the glad hand and a hilarious greeting, but service, the most efficient, business-like service possible.

"When a top-notch job has to be filled those responsible nowadays scan the whole country for the very best man. No financial or industrial or other business leader could long stay a leader were he to select as his lieutenants other than the very ablest men available. Were he to pitchfork personal friends into vital positions, without due regard to their qualifications, he would invite failure both for himself and his enterprises. The reason is sometimes—in fact, often—happens that a heavyweight job is given to a friend of someone at the top is because the someone at the top usually chooses as his friends heavyweight fellows. To get in the swim, qualify as a strong, capable, courageous swimmer. Never mind whether you are in New York or Texas, in Chicago or on the Pacific Coast, if you prove yourself a real swimmer, able to breast stormy breakers and come out on top, sooner or later you are likely to attract the notice of somebody who will make a mental note of you and think of you when an opening arises which you are pretty sure to be able to fill successfully.

"New York banks, for instance, are steadily combing the country for aggressive, progressive, brainy young vice-presidents. Not long ago we drew upon Boston for our own president. The Guaranty Trust, the largest in America, has just annexed perhaps the ablest young banker in California. The American International Corporation recently engaged as vice-president the president of the Boston Elevated Railways. The City Bank has drawn executives from the four quarters of the country. The same process is going on in other lines.

"How can a man in a smaller town bring himself to the attention of financial or industrial magnates? First, the fellow who is ambitious must infuse his wishbone into his backbone. He must master his job absolutely. He must learn to box his business compass backward and forward. In the earlier stages he may have to make his own moves—'calls' don't always come to even the most brilliant fellows who are still in the lower ranks. He may find it expedient to look for a place in a city of at least fair size. Then let him, by dint of industry and brain-sweat, carve out a niche for himself; let him make his mark, let him establish a record, and ten to one the barriers to success will give way before him. He'll arrive. Remember, while ten-thousand-dollar and twenty-five-thousand-dollar jobs are less numerous in other cities than they are in such places as New York and Chicago and Boston and San Francisco, there is less competition, and, therefore, more chance of drawing out, drawing ahead of the crowd and reaching a point well up in the procession. Then there is this to be said: A great many broad-gauge business men throughout the country do not hesitate nowadays, when they come across a fellow of outstanding worth, to speak of him to metropolitan men of large affairs. In this way the door to advancement is often opened. If a man prove himself very, very big, either he will find the right size of job or the right size of job will seek and find him. This will come about all the quicker if he has a magnetic personality, a personality that rivets friends.

"The right attitude toward this matter of making friends? Perhaps I can best illustrate it by giving you the attitude of our bank. We meet everyone with this thought, this attitude dominant in our minds: We want to do what you want us to do if we are justified in doing it. Our desire is to accommodate you. Show us why we should do it and we will be happy to do it. We want to help, to be of service. That is the angle from which we start.

"James J. Hill—his son is now one of our directors, succeeding his father—used to tell people he met through his territory: 'If you want any business done in New York, just you open an account with the Chase Bank and get the bank to do it for you. They will do it better than anybody else.' Then he would impress upon us: 'I put business your way because I depend upon you to do it in a way that will keep it.'"

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

342. **Crude Asbestos.**—A Lancashire correspondent asks for names of Canadian shippers of crude asbestos.

343. **Binder twine.**—A Scottish firm desires to get into touch with Canadian manufacturers of binder twine.

350. **Pine.**—A Manchester firm can purchase large consignments of engineers' pine. Particulars, prices and quantities obtainable solicited.

351. **Pulp.**—An influential firm in Manchester wishes to hear from a mill in a position to export large quantities of pulp.

352. **Machinery and tools.**—A Manchester firm is in a position to represent manufacturers of heavy machinery, plumbers' supplies and engineers' tools.

354. **Toys.**—A Bristol concern desires to obtain the agency for a good Canadian firm of toy manufacturers.

361. **Doors.**—A Cardiff concern wishes to enter into communication with a firm in Canada with a view to importing ready-made doors from the Dominion.

388. **Pulp boards.**—A Bristol firm wishes to be put in touch with a house in Canada manufacturing pulp boards for interior work.

395. **Pin wire.**—A Brimscome firm is desirous of receiving quotations on 100 tons of milk steel pin wire, comprising .22, .026, .028, .030, .032, .034 and .036 sizes. Delivery is preferred in 10 or 20-ton lots.

396. **Hairpin wire.**—A concern in Gloucestershire is open to place an order with a Canadian firm for 100 tons of .052, .040 and .030 hairpin wire. Delivery in 10 or 20-ton lots preferred.

402. **Manure and hay forks.**—A Bristol firm wishes to buy manure and hay forks from a manufacturer in Canada.

403. **Handles.**—A concern in Bristol desires to hear from a Canadian firm able to export hay and manure fork handles.

IT'S YOU

If you want to work for the kind of a firm,
Like the kind of a firm you like,
You needn't slip your clothes in a grip,
and start on a long, long, hike
You'll only find what you left behind.
For there's nothing that's really new;
It's a knock for yourself when you knock your firm—
It isn't your firm—it's you.

—"Hardware World."

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

LECTROFLATER

The Black & Decker Mfg. Co., Baltimore, Md., are manufacturing a new Lectroflater outfit, consisting, it is stated, of a one-half horsepower Black & Decker electric air compressor, having a capacity of two cubic feet of free

Lectroflater .

air per minute, together with a cylindrical pressed steel reservoir 14 in. x 30 in., mounted on three wheels and provided with a handle so that the whole can be wheeled about as circumstances require. The reservoir holds sufficient air at one filling, it is stated, to inflate five average tires from flat to full pressure, or ten tires from 40 to 80 pounds.

This outfit, it is stated, is complete with switch, electric cable, attachment plug, pressure gauge, safety valve, 25 feet of hose, tire connector, and all piping and wiring, ready to run as soon as uncrated.

The motor, it is stated, develops a full half horsepower and operates at will on alternating current of 60 cycles or less and direct current. Motor, gears, and compressor, including cylinder walls and piston, are, it is stated, grease-lubricated by capillarity. Current consumption, it is claimed, is about one-tenth of one cent per tire.

SHAYDOLITE

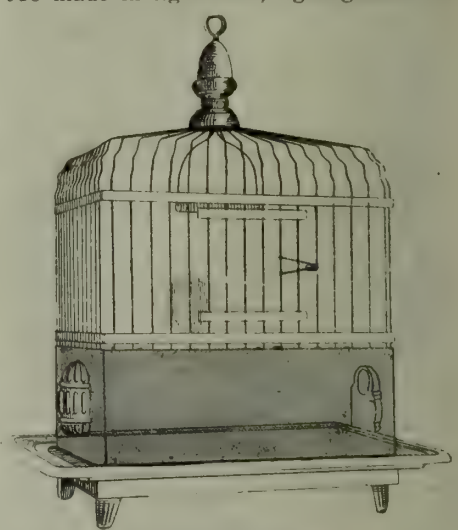
"Shaydolite," manufactured by Griffiths Bros. and Co., Bermondsey, London, S.E., and handled in Canada by the Spielman Agencies, Read Building, St. Alexander Street, Montreal, produces, it is stated, varied and beautiful effects in electric light decorations. It is stated it can be used for either inside or outside work. It is claimed that "Shaydolite" will give all the glory of stained glass effects at a small cost, and is especially useful for electrical decorations in theatres, music halls, and similar places. It is supplied in a number of colors.

VICTORY LOCK

The new Victory Lock for Ford cars, which is being manufactured by the Virtue and Liberty Motor Sales, Ltd., of 531 Yonge St., Toronto, can, it is claimed, be installed in two minutes. The case, it is stated, is made of tough grain aluminum, highly polished. The manufacturers claim that when the key is removed the carburetor is absolutely protected and that the switch cannot be turned or the lock taken off. Every

Victory Lock

screw, it is stated, is covered, and is impossible to get at without using the key.



OIL STOVE WITHOUT WICK

The Detroit Vapor Stove Company of Detroit, Michigan, is marketing the Detroit vapor oil stoves. This stove, it is said, works like a gas stove and has no wicks. The hot, smokeless fire burns directly against the bottom of the cooking utensils. There are no asbestos rings. The makers state that the burners are made of heavy grey annealed iron, weighing eight and a half pounds each, so they will last many years. There is a fuel tank in back of the shelf and the valves are all in front of the stove. The stoves are complete in themselves, no pressure tanks or piping being necessary. The Detroit Vapor stoves are said to be very economical as the burner becomes red hot, consequently consuming all fuel without waste or odor. They burn the cheaper grades of fuel as well as the best. The burner mixes the air freely with the fuel, and, like a modern carburetor, forms a gas containing the maximum amount of air. Patented heat condensers hold all heat to the cooking utensil.

These stoves are absolutely safe, it is said, there being no possibility of an explosion. The fuel flows to the burner through heavy wrought iron pipes. The joints are both threaded and soldered. Children cannot open the valves, as they lock automatically the moment they are turned off. The fuel flows directly into the burner and there is no chance for it to accumulate, it is stated, and the tank can be refilled while the stove is burning. All the steel parts of the stove are treated, it is stated, with a coat of enamel, which is baked on with an intense degree of heat. The valves are made of special brass bronze. The valve stem is of nickel alloy, which cannot rust or corrode. These stoves are easily cleaned, there being no fancy parts to catch dirt. The burners lift out easily and the stoves have a sanitary base, which permits sweeping underneath without moving the stove. The lift-out grates make it easy to get at the burners.

COLORED BIRD CAGES

Japanned bird cages in assorted sizes and colors are being manufactured by the E. T. Wright Co., Ltd., of Hamilton, Ont. Each cage, it is stated, has brass wire guards, three perches, one swing and two clear glass seed cups. The cages are made in light blue, light green and

Colored Bird Cage

old rose. The sizes of the bodies of the various cages, it is stated, are 10 by 7 inches, 10½ by 7½ inches, and 11 by 8 inches.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

LOWER prices have been named on steel plate this week, and a decline in prices of black steel sheets has been made in some quarters also. Warehouse stocks are much better now, supplies coming through from the mills in good time. Prices now are down to a pretty close basis, late arrivals with war stocks bringing average down appreciably. Galvanized sheets have undergone no change in price, and stocks are now in very good shape.

Boiler tubes have undergone a revision downward, the decline amounting to 10 to 12 per cent. This price applies to both warehouse and mill shipments, the lower quotations ruling for some time on mill shipments being overcome in this present price adjustment. Warehouse stocks are very good, and deliveries from the mills coming through quite promptly.

Manila rope is again in the limelight this week, with a further advance of 2c per pound. Conditions at primary points, as applied to hemp, are strong, and this is responsible for the movement to higher levels made on the manila grades. Sisal rope and lath yarn are unchanged.

Ingot metals furnish one thrill at least in an advance in the price of pig lead. Very low prices were named last week on this metal, but these have now reacted, and a stronger undertone is noticeable. Tin is inclined to be weak. There is little stock around, and trading is within rather a narrow compass. Copper at primary points has broken badly, and quotations locally are really only nominal.

Higher prices have been reached on cistern pumps this week. Combination padlocks and night latches have also registered an advance, and other lines to follow the upward trend are milk scales and seine twine. Steel rivets have registered a decline through a change in the discount.

Linseed oil is higher, prices advancing from 3c to 10c per gallon. The stronger market on flax seed is directly responsible. Turpentine is in better demand at unchanged prices.

MONTREAL MARKETS

MONTREAL, Feb. 27.—There are not a great variety of changes this week, although there are a few declines. Among these are picture wire, small iron rivets, ingot lead. The advances are two, one of a cent per gallon for coal oil, and the other a new advance for rope of two cents per pound. The latter was not altogether a surprise, for the hemp market has been steadily advancing over recent weeks. Shoe thread also has been revised in price.

The markets, in a general way, are steady and rather quiet. At the same time the country appears to be in good condition, for orders from outside are up to expectations. Even auto accessory bookings have totalled large with some, and there is evidence that in a few weeks business will be much nearer normal.

Small Rivets Down; Picture Wire, Thread

Montreal.

RIVETS, THREAD, WIRE. — Small iron rivets of all kinds are lower in price. This is effective through a change of the discount from 25 per cent. as formerly to 35 per cent. and 5 per cent.

New net prices are given on shoe thread, these being as follows: No. 8 x 1 oz., $3.20; 10 x 1 oz., $3.30; 15 x 1 oz., $3.40; 8 x 2 oz., $3.20; 10 x 2 oz., $3.30; 15 x 2 oz., $3.40; and 20 x 2 oz., $3.50.

Tinned picture wire is revised downward, the prices being as follows: No. 0 x 25 yds., doz., $1.05; 1 x 25 yds., $1.55; 2 x 25, $2; 3 x 25, $2.70; and 4 x 25, $3.45.

Sap Supplies Move; Stoves Are Quiet

Montreal.

WARES, STOVES.—Among the various wares, sap buckets have had the run for some weeks. A much larger sale was experienced for these this year than last, it is stated, one firm reporting 50 per cent. increase in the volume of business.

Other wares are rather quiet and the basis is unchanged.

The stove market is very quiet at present and sales are not expected to be large for the immediate future.

Nails at $5.00; *Not Going Fast*

Montreal.

NAILS AND WIRE.—Even at the reduced basis of $5, wire nails are not a big seller yet. There is some movement to country accounts in a limited way, but little interest has developed among the city hardware men. Bookings have been made to some extent, however, and if there be any evidence of building, the sale will improve. Cut nails are $5.35 per keg.

The price of smooth steel wire remains at the price recently established of $5.75 per 100 lbs.

Rope Up Again; Advance is 2c

Montreal.

ROPE.—Another advance is made this week in the price of rope. This is not altogether a surprise, for, as pointed out in last week's HARDWARE AND METAL, the hemp market was of such

strength as to presage a further change, or a firmness at least. Pure manila is now selling at 7½c base, British manila at 33c and sisal at 27½c per pound.

Coal Oil Up 1c; *Fuel Oil at* 9c

Montreal.

OILS AND GASOLINE.—An advance of one cent per gallon is made for coal oil of all kinds. This makes Royalite price 20c here, and that for Palacine and Electroline 23c. There is a steady demand from country points for these lines.

Fuel oil is somewhat easier and the price now is 9c per gallon.

Gasoline is in steady seasonable demand at 34c.

Steel Bars and Iron Are Held

Montreal.

IRON AND STEEL.—The market is held without change, and from the country a fair volume of orders are coming to hand. City business is light and there is not likely to be much improvement for a few weeks.

Common bar iron, per 100 lbs.	$4 30
Refined iron, per 100 lbs.	5 30
Mild steel	4 30
Iron finish machinery steel	4 35
Norway iron	12 00
Single reeled machinery steel	6 00
Spring steel	6 00
Sleigh shoe steel	4 30
Tire steel	4 50
Toe calk steel, per 100 lbs.	5 20
Band steel	4 30
Harrow tooth steel	4 35
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Sheets Move Slowly; Basis is Held

Montreal.

SHEETS.—The undertone of the sheet market is steadier. With the present basis of selling a more reasonable figure has been reached and the buying ought to be freer. The season is against a heavy selling just now, however, and it may be a few weeks before there will be much improvement.

	Per 100 lbs.	
BLACK SHEETS—		
10 gauge	$7 00	$7 10
12 gauge	7 10	7 15
14 gauge	6 85	7 00
16 gauge	6 95	7 05
18-20 gauge	7 10	7 25
22-24 gauge	7 15	7 35
26 gauge	7 20	7 40
28 gauge	7 35	7 50
GALVANIZED SHEETS—

26 gauge	....	9 00
22 and 24 gauge	....	8 85
20 gauge	....	8 65
18 gauge	....	8 65
16 gauge	....	8 50

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Some Solder Orders; Lead Lines Held

Montreal.

LEAD PRODUCTS.—There is no change this week in the price basis for these lines, and solder, at the recent changes made, is selling slowly, but steadily. It is not improbable that, with the weakness in pig lead, there may be further declines in the near future.

Lead pipe, lb.		$0 12
Lead pipe (cut lengths)		0 13
Lead waste pipe, lb.	0 13	....
Lead traps and bends	**Net list.**

Little Demand For Old Material

Montreal.

OLD MATERIAL. — The continued dearth of orders makes this market a very uninteresting one and there is not likely, say the dealers, to be much movement for a while yet. The undertone of prices is inclined to weakness, and there may be revision downward at any time.

Dealers' Buying Prices:		
Pipe scrap	15 00	16 00
Stove plate, per ton	17 00	18 00
No. 2 busheling	12 00	12 50

No. 1 busheling		11 00
No. 2 busheling		7 50
Country mixed scrap		10 50

Lead is Weaker; Spelter Scarcer

Montreal.

INGOT METALS.—The ingot markets are still unsettled, although one or two lines have come down to a more reasonable basis and have changed but little of late. Lead is weaker and spelter rather scarce. There is some uncertainty with regard to tin and the copper market is not clearly defined.

COPPER. — Much uncertainty surrounds this metal and there is room for an improvement in the volume of business. Price is rather nominal and quotation remains at 23c for best grades.

TIN.—There is no receding from the artificial fixed price in the United States and as a consequence there is no movement of value. Locally supplies are selling at around 61c.

SPELTER.—Some scarcity of this line is reported and there is not a bit of change in price, which remains at 9c per lb.

LEAD.—Weakness again shows in this ingot and while sales are not large, there is always a little doing. Price has softened to 7½-8c.

ANTIMONY.—The ruling quotation on this for what little business there is remains at 8½c.

ALUMINUM.—Price on this remains unchanged at 40c.

PIG IRON.—A base quotation on this is given at $50 per ton.

Brush Prices Likely to Hold; No Reduction in Costs Noted

THROUGH the kindness of a large manufacturer of paint brushes, HARDWARE AND METAL has secured a couple of extracts taken from what is rated as a leading brush manufacturing magazine, which would indicate that a decline in prices on brush lines is not likely in the near future. They are reproduced herewith:

"The British Brush Manufacturers' Association has issued a circular to the trade, expressing the view that existing conditions for some time to come will not admit of any reduction in the selling price of brushes. The war bonus is still being paid to the workers, prices of raw material are still running high, and in some instances have increased during the past month, so that conditions generally do not admit of any reduction in the cost of manufacture."

No Reduction in Costs

"Conditions in Russia, such as all are familiar with, make the Russian bristle very hard to obtain and the demand great. In fact some raw material will be no easier to obtain during the next year than it has been the past three, and before the manufacturers can reduce the cost of brushes, the raw material must first come down. Some predict higher prices on brushes during 1919."

Prices on Tampico are very strong, with big local demand, and European buyers are taking everything offered.

The buyers who are holding for lower prices will be disappointed.

With raw materials purchased at high prices, and with no reduction in sight, no manufacturer can safely sell at pre-war prices."

TORONTO MARKETS

TORONTO, Feb. 27—Revised prices are in evidence again this week on steel plate and black steel sheets, the tendency being to lower levels. Manila rope has advanced a further 2c per pound. Fuel oil is down again and new prices are ruling on boiler tubes which provide for a reduction of ten to twelve per cent. The old material list has undergone another change, prices being lower on many lines.

Rivets and Burrs Register Decline

Toronto.

RIVETS AND BURRS.—New discounts for steel rivets and burrs have been issued this week which provide for a decline from previous figures. The old discount of 25 per cent. has been changed now to 35 and 5 per cent. from list.

Chisel Prices Under Revision

Toronto.

CHISELS.—New prices have been issued this week on cold chisels, round nose chisels, diamond point chisels and cape chisels. The figures now attained on these lines are as follows: Cold chisels, No. 330½ x ⅜ x 5 in., $2.10 per dozen; ½ x 6 in., $2.35; ⅝ x 6½ in., $2.80; ¾ x 7 in., $4.10; ⅞ x 8 in., $5.40; 1 x 8½ in., $7.00; round nose chisels, No. 331 x ¼ in., $2.40 per dozen; ⅜ in., $3.00; ½ in., $4.00; ⅝ in., $5.15; ¾ in., $7.20.

Diamond point chisels, No. 332 x ⅜ in., $3.00 per dozen; ½ in., $4.00; ⅝ in., $5.15.

Cape chisels, No. 335 x ¼ in., $2.40 per dozen; 5-16 in., $2.70; ⅜ in., $3.00; ½ in., $4.00; ⅝ in., $5.15.

Nails Hold Unchanged; Wire

Toronto.

NAILS, WIRE.—No further change has been made in the prices on wire nails from the decline of 55c recorded last week. The base price to-day is $4.95 per 100 pounds. Cut nails are unchanged at $5.35 per 100 pounds base.

The base price on smooth steel wire is now $5.75 per 100 pounds and new prices reached as a result of the decline of 50c last week on some of the other lines follow: Oiled and annealed wire, 10 ga., $5.91 per 100 pounds; 11 ga., $5.97; 12 ga., $6.05.

Manila Rope Goes Up 2c

Toronto.

CORDAGE.—Another advance in the price of manila rope has been made this week, quotations now showing a further increase of 2c per pound. On the present basis of quoting, prices are as follows: pure manila, 37½c per pound; British manila, 33c; New Zealand hemp, 33c. There has been no change made in sisal rope or lath yarn, the base price on sisal rope being 27½c per pound, and on sisal lath yarn 27½c per pound.

Fuel Oil Goes to Lower Levels

Toronto.

OILS, GASOLINE. — A further decline has been made in fuel oil this week, quotations in barrels now being made at 8½c per gallon and in tank cars at 7 7-10c per gallon.

There has been no further change in coal oil prices from advance of 1c made last week, quotations ranging from 19½c to 22½c per gallon, according to grade. Gasoline is steady and unchanged at 33c per gallon. There is a very fair amount of business being done.

Wares Steady; Stoves Unchanged

Toronto.

STOVES, WARES.—There seems to be a very fair amount of sorting business being done in the various lines of tinware and enamelware and whereas individual orders are not large, the aggregate is looked on as satisfactory.

Stoves show no appreciable changes and quotations are ruling at steady levels. Activity in coal oil, gas, gasoline and electric lines will soon be in full swing and indications point to a good season for these.

BRIEFS FROM THE WEEK'S MARKETS

Steel rivets declined this week, the discount now being 35 and 5 per cent., replacing the former figure of 25 per cent.

* * *

Cistern pumps show an advance of about 20 per cent. at Winnipeg. Tank pumps are up another $1.00.

* * *

Manila grades of rope advanced another 2c per pound this week. Sisal rope and lath yarn show no change.

* * *

Steel plate declined to $5.50 base per 100 pounds this week. Black steel sheets are also down slightly in some quarters. Galvanized are unchanged.

* * *

Linseed oil made an advance of from 3c to 10c per gallon this week.

* * *

The glass situation is considered very strong, an advance being made in plate glass in United States markets, and window glass remaining at very firm figures.

* * *

Pig lead registered an advance this week. It is the first of the ingot metals to react.

New Developments Lacking in Bars

Toronto.

IRON AND STEEL.—New developments are conspicuous by their absence in relation to iron and steel bars. There is some business being done but this is not large. Prices hold at unchanged levels which are shown herewith.

Common bar iron	$4 75	$5 00
Common bar steel	5 00	5 25
Refined iron	5 15	5 40
Angle base	5 25	5 50
Horseshoe iron	5 00	5 25
Tire steel	5 15	5 40
Mild steel	5 00	5 25
Norway iron	11 00	13 00
Toe caulk steel	5 90	6 15
Sleigh shoe steel	5 00	5 25
Band steel, No. 10	5 25	5 50
Do., No. 12	5 50	5 75
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

More Inquiries For Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—Manufacturers of corrugated sheets and related lines report a better inquiry for goods and that these may develop into orders seems reasonably certain. The outlook is considered much improved and whereas immediate business is not large, the future gives promise of a big volume of orders.

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Plates, Black Sheets Decline

Toronto.

SHEETS, PLATES.—Lower prices have been reached this work on steel plate and some slight reductions have been made also in black steel sheets. The base price on plates is down to $5.50 per 100 pounds. Warehouse war stocks are pretty well down and with the new material coming in at the lower level, this brings down the average of all the material in stock and the consumer is able to get the advantage of the lower rates. Warehouses are doing a very good business now and with general lines, in some instances February showing an increase over the same period a year ago. Range of quotations today follows:

BLACK SHEETS—	Per 100 lbs.	
10 gauge	....	$6 00
12 gauge	....	6 05
14 gauge	6 10	6 15

16 gauge	6 20	6 25
18-20 gauge	6 30	6 80
22-24 gauge	6 35	6 85
26 gauge	6 40	6 90
28 gauge	6 50	7 00
3-16 inch plate	....	5 75
¼-inch boiler plate	....	5 50

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—

10¾ oz.	8 50	$9 00
U.S. 28	8 20	8 75
U.S. 26	7 90	8 45
22 and 24	7 75	8 30
18 and 20	7 60	8 30
16	7 45	8 00

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Wrought Pipe Outlook Unchanged

Toronto.

WROUGHT PIPE. — No material change has been noted in the situation on pipe. Manufacturers report some inquiry which may well be expected to develop into orders and outlook is considered very bright for good business when the season opens at an early date.

Boiler Tubes Revised Downward

Toronto.

BOILER TUBES.—Lower prices have been named on boiler tubes this week, wholesalers' stocks showing some improvement and the basis being revised to what is now a pretty close price. The reductions average about ten to twelve per cent. There have been two prices ruling on tubes, one from warehouse which was about ten per cent. or so higher than a mill delivery. Now the same price applies all the way around.

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1 inch	$28 00	$.....
1¼ inch	32 00	.....
1½ inch	35 00	28 00
1¾ inch	35 00	28 00
2 inch	40 00	28 00
2¼ inch	43 00	30 00
2½ inch	45 00	35 00
3 inch	52 00	40 00
3¼ inch	.....	47 00
3½ inch	62 00	48 00
4 inch	70 00	60 00

Lead Products Hold, Solder Too

Toronto.

LEAD AND ZINC PRODUCTS.—The market on lead products is holding steadily and a somewhat firmer undertone is noticeable as the metal has reacted from low levels and moved up somewhat.

Solder is ruling at unchanged figures, the firmer lead market and weak tin market being factors just a little hard to determine in their effect on prices. Quotations named to the trade are being made at following figures:

Lead pipe, lb.	....	$0 12
Lead waste pipe, lb.	....	0 13
Lead traps and bends	....	Net list
Lead wool, lb.	..	0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½
Cut sheets ½ to ¾c lb. extra and cut sheets to size. 1c lb. extra.		
Solder, guaranteed, lb.	$0 37	$0 39
Solder, strictly, lb.	0 33	0 37
Solder, commercial, lb.	0 31	0 36
Solder, wiping, lb.	0 30	0 32½
Solder, wire, lb.	0 45½	0 50
Zinc sheets, per lb.	....	0 20

Prices on Old Materials Decline

Toronto.

OLD MATERIALS. — Lower prices have been named on many items, this being in line with information supplied through HARDWARE AND METAL last issue. Conditions in the trade are quiet and prices named are really only nominal. The basis prevailing to-day is as follows:

Dealers' Buying Prices—		
Tea lead	....	0 03½
Heavy lead pipe	0 04	0 04½
Pipe scrap	....	8 00
Stove plate, per ton	....	10 00
No. 2 busheling	....	8 00
Yellow brass	0 08	0 08½
Red brass	0 13	0 14
Light brass	....	....
Scrap zinc	....	0 05
Heavy copper	....	0 14½
Wrought iron, No. 1, per gr. ton	....	18 00
No. 1 machinery cast	....	20 00
Heavy melting steel	....	13 00
Old rubbers, boots and shoes	0 06	0 06¼
Overshoes, lumbermen's rubber boots	....	0 04½
Bicycle tires	....	0 04½
Automobile tires	0 03½	0 04

Waste, Oakum Ruling Steadily

Toronto.

WASTE, OAKUM.—There have been no new developments in the situation in regard to cotton waste or oakum. There is a fair amount of business being done and prices are maintained at levels mentioned in current market quotations.

Lead Stiffens; Copper Weak

Toronto.

INGOT METALS.—The lead market is showing some strength and prices have reacted somewhat from low levels reached a week or two ago. Copper is weak and tin is little changed. The feeling prevails that prices cannot get much lower considering costs to-day.

COPPER.—Quotations are really only nominal, the tendency still being downward with apparently little regard for the cost. Prices named are around 20c per pound, but a lower basis could probably be secured by an actual buyer going into the market. The primary markets have broken badly.

TIN.—There is apparently little stock available and not a great deal of activity is noticeable. Prices rule around 58c to 60c per pound, but may go slightly lower.

SPELTER.—The situation is without any particular feature of interest. Supplies are small but only a fair amount of trading is being done. The price seems fairly steady at around 8½c per pound.

LEAD.—After reaching very low levels, the market on lead has reached somewhat and 7c is considered a low figure to-day with 7½c per pound, thought to be more in line. There seems to be some inquiry but trade is still somewhat small.

ALUMINUM. — The sign "nothing doing" still largely overshadows the outlook on this metal. Commercial interests are not buying and everyone seems to be waiting for the other fellow to start. Quotations are nominally held at around 55c per pound.

ANTIMONY—Quietness, in fact fullness, it is generally noted is the situation in antimony. Prices have held without change at about 8½c per pound.

LONDON MARKETS

LONDON, Ont., Feb. 27.—Price changes are again quite numerous this week, and perhaps the leading item noted is that of rope, which in the manila grades has advanced 2c per pound. Linseed oil has undergone a sharp revision upwards also, prices to-day being 12c per gallon above those of last week. One line of 22 calibre rifles has been revised upwards, the advance ranging from 25 cents to 50 cents each. Milk scales, tack hammers, coil door springs, combination padlocks, seine twine, and some lines of night latches are among the list of goods to register advances. A new discount has been issued on canvas belting, which shows a decline of about 10 per cent. The markets otherwise are quite steady, and business here is considered very fair.

Advance Made In 22 Cal. Rifles

London, Ont.

RIFLES.—New prices have been named this week on Stevens' rifles, which provide for an advance of from 25 to 50 cents each. The new quotations which are now being made to the trade on these lines are given as follows: Little Scout, No. 14½ x 22 cal., $5.50 each; Crack Shot. No. 26 x 22 cal., $6.50; No. 26 x 32 cal., $6.50; Marksman, No. 12 x 22 cal., $8; No. 12 x 32 cal., $8; Favorite, No. 17 x 22 cal., $9.75; 25 cal., $9.75; 32 cal., $9.75; Repeater, No. 70 x 22 cal., $16.40.

Combination Padlocks; Night Latches Up

London, Ont.

PADLOCKS, NIGHT LATCHES.—New prices have been issued on combination padlocks this week. These provide for an advance over former figures which will be shown by the following quotations: Style E, $1.35 each; style B, $1.25 each, and style D, $1.10 each. There has been a change also in Miller's night latches, No. 64, which are now quoted at $7.50 per dozen, this being an advance over previous quotations.

Door Springs Move Higher

London, Ont.

DOOR SPRINGS. — Revisions have been made this week in the price of door springs, and these show an advance over prices formerly in effect. The Torrey door spring is now quoted at a new price of $2.25 per dozen. A new price has also been named on the Sargent coil door spring, the No. 161 selling at $2.35 per dozen, and the No. 162 at $2.80.

Higher Prices On Milk Scales

London, Ont.

MILK SCALES.—Milk scales have come in for revision at the hands of the wholesalers, and the new prices which are now being quoted represent an advance over figures formerly in effect. The new prices which are now being quoted to the trade are for the No. 260 by 30 lb., $4.15 each, and the No. 270 by 60 lb., $4.90 each.

Manila Rope Advances 2c lb.

London, Ont.

ROPE.—A further advance has been made this week in the price of manila rope which goes up another 2c per pound. On the present basis, pure manila is quoted at 37½ cents base per pound; British manila, 33c; New Zealand hemp, 33c, and sisal, which is unchanged, at 27½c base. The increasing strength of the hemp market is mainly responsible for this move to higher levels on the better grades of rope.

Seine Twine Revised Upward

London, Ont.

SEINE TWINE.—Seine twine has come in for revision upwards this week, the new prices which are now being named to the trade ranging at the following figures: No. 15 and smaller, in 1 lb. cones, per pound, 88c; ¼ lb. cones, 89c; No. 18 and larger, in 1 lb. cones, 87c; ¼ lb. cones, 88c.

Tack Hammers Up; Solder Declines

London, Ont.

TACK HAMMERS, SOLDER.—Revised prices have been issued this week on Sargent tack hammers, the No. 12 plain now selling at $1.50 per dozen and the No. 9 Magnetic selling at $2.60 per dozen. Solder has declined and is now quoted for the half and half at 33c per pound.

Canvas Belting Declines 10%

London, Ont.

CANVAS BELTING.—A new discount has been issued on Maple Leaf canvas belting which provides for a decline of approximately 10 per cent. The new discount from which net prices are derived is now 50 per cent. off list.

Nails, Wire Holding Steady

London, Ont.

NAILS, WIRE.—The market on wire nails seems to have steadied down somewhat and prices to the trade are steady at the decline of 55c per keg made last week. The base on wire nails is now $4.95 per 100 pounds f.o.b. London, and $5.10 per 100 pounds f.o.b. Windsor, Walkerville and Sandwich. Cut nails are unchanged at $5.35 per 100 pounds base London. Steel wire is now based at $5.75 per 100 pounds and new net prices which have been named on the oiled and annealed wire are for No. 10, $5.91 per 100 pounds, No. 11, $5.97, and No. 12, $6.05.

Oil in Stock; Roofing Nails Hold

London, Ont.

OIL, ROOFING NAILS.—Wholesalers report that they now have a stock of the handy cans 3 in 1 oil, which they found it difficult to get for some time. The new price which is being quoted on this line is $2.25 per dozen. There has been no change reported in the price of the large head American roofing nails, these being quoted in kegs at $10 per 100 pounds and in 25-lb. boxes at $10.50 per 100 pounds.

Sap Supplies Show Activity

London, Ont.

SAP SUPPLIES.—There is a very fair demand in evidence for all lines of sap supplies. Prices are ruling quite steadily. Quotations which are being named to the trade are for the sap pails, 2-gal. straight, $22.50 per 100, and for the 10-quart Flaring, $22.50 per 100. Sap spiles, Eureka, are being quoted at $13.25 per thousand, or in small lots at $1.45 per 100. Tinned sap spiles are quoted at $2.25 per 100, and the Warner sap spile is quoted at $3.50 per 100.

Linseed Oil Up 10c; Turpentine

London, Ont.

LINSEED OIL, TURPENTINE.—The continued strength of the flax seed market which has been apparent during the past two or three weeks has resulted in an advance in the price if linseed oil of 10 cents per gallon. The market seems quite steady at this basis, and it may be that the figures prevailing a couple of weeks ago will be the lowest that are possible for some time to come. The quotations which are now being named to the trade are shown herewith: 1 to 2 bbls., raw, $1.60, boiled $1.63 per gal.; 3 to 5 bbls, raw $1.59, boiled $1.62; 6 to 9 bbls., raw $1.57, boiled $1.60. Less bbls. add 10c per gallon. There has been no change in the situation on turpentine The demand is with rather narrow channels, and prices are holding steady and without any change. The quotations being named to the trade to-day are given below: 1-bbl lots $1.05 per gal.; 2 to 4 bbl. lots $1.04; 5 gal. lots $1.15.

WINNIPEG MARKETS

WINNIPEG, Feb. 27.—Market prices during the past week again show a weaker tendency in some lines, while others register advances. Among the former, formaldehyde leads with a drop from 51c a pound to 32c a pound, while eavetrough, conductor pipe, conductor pipe elbows and corrugated sheets show a decline of approximately 5 per cent. The only line to advance is cistern pumps, force pumps and tank pumps, which move up from 5 to 20 per cent.

Business is reported heavy, as dealers have held back from ordering as early as former years, with the result that jobbers will have heavy shipments going out from now until the middle of March.

The bonspiel which has just closed has proven a great success, with many of the Western hardware men competing, and as usual a fair share of the prizes will go to points further West.

New Prices on Farmaldehyde; Lower

Winnipeg.

FORMALDEHYDE. — Prices on formaldehyde which were recently advanced to 51c per pound in barrel lots have been reduced during the week to a 32c base, a drop of 19c per pound. This is in line with information received and published as HARDWARE AND METAL went to press last week. To-day's new prices on the different sizes are repeated herewith, ranging as follows: 400 lb. barrels, 32c lb.; 200 lb. kegs, 33c lb.; 100 pound kegs, 34c lb.; 10 lb. jugs, $3.75 each; 5 lb. jugs, $200 each; 2 lb. jugs, 85c each.

Higher Prices on Cistern Pumps, Etc.

Winnipeg.

CISTERN PUMPS, ETC.—Cistern pumps, force pumps and tank pumps have been revised to higher levels during the week, the former advancing approximately 20 per cent. over former quo-

tations, while tank pumps advance $1.00 over last year's prices. To-day's selling prices are given as follows: Cistern pumps, No. 1001 x 1, $2.45; 2, $2.90; 3, $3.20; 4, $3.85 each. House force pumps, No. 1006, $6.20 each; tank pumps, $11 each.

Eavetrough, Conductor Pipe Show Decline

Winnipeg.

EAVETROUGH, CONDUCTOR PIPE —Prices on eavetrough and conductor pipe have undergone a revision downward during the week following the recent reductions in galvanized sheets, and are now quoted at 15 per cent. off the list. Net prices now ruling as a result of the change are as follows:

Eavetrough, Half Round—8 inch, $6.40; 10 inch, $6.80; 12 inch, $8; 15 inch, $10.95; 18 inch, $14.05 per 100 feet.

Eavetrough, O.G. Pattern—8 inch, $6.10; 10 inch, $7.15; 12 inch, $8.35; 15 inch, $11.50; 18 inch, $14.90 per 100 feet.

Conductor Pipe, Round or Corrugated—2 inch, $7.15; 3 inch, $8.65; 4 inch, $11.40; 5 inch, $15.50; 6 inch, $18.80 per 100 feet.

Conductor Pipe Elbows—2 inch, $1.70; 3 inch, $1.95; 4 inch, $3.15; 5 inch, $7.90; 6 inch, $9.25 per dozen.

Lower Prices on Corrugated Sheets

Winnipeg.

CORRUGATED SHEETS. — Corrugated sheets both painted and galvanized have been revised in price, showing a decline. Prices now ruling to the trade are at the following levels:

Corrugated Sheets	Galv.	Painted
	Per 100 sq. feet.	
28 gauge	$8 70	$6 30
26 gauge	10.15	7.45
24 gauge	12.85	9 25
22 gauge	15 30	12 15
20 gauge	18 00	14 85
18 gauge	23.40	19 35

Easier Feeling in Copper Belt Rivets

Winnipeg.

COPPER BELT RIVETS.—Prices on copper belt rivets hold firm at former market quotations, but recent weakness of the copper market will no doubt affect prices in the near future. To-day's prices are confirmed as follows:

Copper Belt Rivets—No. 7, 65c; No. 8, 66c; No. 9, 69c; No. 10, 71c; No. 12, 76c a lb.

Copper Burrs—No. 7, 65c; No. 8, 66c; No. 9, 69c; No. 10, 71c; No. 12, 76c a lb.

Assorted Rivets and Burrs—No. 8, 74c; No. 10, 79c a lb.

Wrenches Moving; Holding Steadily

Winnipeg.

WRENCHES.—Prices on all lines of wrenches continue firm with a good demand reported, even at the high prices now ruling. To-day's market prices are confirmed as follows: Agricultural, 6 inch, $6.70; 8 inch, $8.00; 10 inch, $9.40; 12 inch, $12.00; 15 inch, $16 80 per dozen. Perfect handle, 6 inch, $15.00; 8 inch, $18.00; 10 inch, $21.00; 12 inch, $27.00; 15 inch, $36.00 per dozen. Pipe wrenches, "Stillson," 6 inch, $1.05; 8 inch, $1.20; 10 inch, $1.30; 14 inch, $1.85; 18 inch, $2.60; 24 inch, $3.80; 36 inch, $7.50 each. "Trimo," 10 inch, $1.50; 14 inch, $2.10; 18 inch, $3.00; 24 inch, $4.35 each.

Turpentine Holds at Unchanged Levels

Winnipeg.

TURPENTINE.—Prices on turpentine show no change during the week, holding firm at former figures. Stocks are reported to be fair and will no doubt be sufficient to supply all demands which are at present below normal. To-day's market prices are confirmed as follows: Barrel lots, $1.25 gal.; ½ barrel lots, $1.28 gal.; 5 gal. lots, $1.30 gal.; 1 gal. lots, $1.30 gal., plus the usual extras for containers.

Wrot. Iron Pipe Holds Unchanged

Winnipeg.

WROUGHT IRON PIPE.—Wrought iron pipe prices which recently declined are reported steady at present levels and no immediate change is anticipated. Stocks are reported well assorted with a good demand. To-day's ruling prices are confirmed as follows:

WROUGHT IRON PIPE.

Inch	Black	Galvanized
	Per 100 Feet.	
¼	$ 5.40	$7.74
⅜	5.50	7.88
½	7.38	9.10
¾	9.32	11.60
1	13.77	17.20
1¼	18.63	23.22
1½	22.28	27.77
2	30.00	37.40
2½	48.10	59.80
3	63.87	78.20
3½	81.80	.....
4	96.90	.....

Linseed Oil Holding Steadily

Winnipeg.

LINSEED OIL.—Linseed oil prices show no change during the week holding firm at former quotations with the usual demand. To-day's ruling prices are as follows: Raw linseed oil, $1.80 gal.; boiled linseed oil, $1.83 gal., in single barrels.

PITTSBURG MARKETS

PITTSBURGH, Feb. 27.—Buying demand in steel products is lighter than a week ago, if such a thing is possible. Mills state that practically nothing is coming in by way of new business except small "pick up" orders to piece out on something or other. Of regular orders from jobbers or manufacturing consumers there are practically none. Scarcely any steel, and no tonnage that amounts to anything, is being bought for construction purposes. This last named fact is illustrated by the monthly report of the Bridge Builders' and Structural Society, which showed that the bookings of fabricated steel jobs during January represented only 12 per cent. of the fabricating capacity for a month, this being a new low record and breaking the record of 20 per cent. bookings in November, 1914.

Conditions at the Mills

From what the mills report one could hardly estimate that current bookings are equal to 20 per cent., perhaps not 15 per cent. of the capacity, yet mill operations are, as a rule, ranging from 60 to 80 per cent. of capacity. The explanation of the divergence is that the mills are running chiefly on old orders, but as these old orders are running out rapidly there would soon be practically no work for the mills. When a mill operates at 60 or 70 per cent. of capacity the cost per ton is much above normal, but when it operates at less than 40 per cent. the cost is intolerable, so something will have to be done.

Upon the termination of the war the mills realized that it would be some time, possibly many months, before construction work, involving the use of steel, would start on a large scale and they were content to wait. They expected that meanwhile there would be a moderate demand for steel from everyday users, sufficient to maintain some sort of an operation, particularly with the aid of banked up demand that had accumulated during the period of war-time restriction in the distribution of steel. The accumulated demand has now carried the mills for about three months and apparently that is about all it is going to.

When the mills made their slight reductions from Government prices last December they rather thought there might be occasion to make a further reduction April 1, carrying out the principle of a quarterly consideration of prices the War Industries Board had adopted for the period of Government control. There was some talk, whether in earnest or merely for its temporary effect, that the December reductions were the last and that buyers would have to take hold at the slightly reduced prices. At any rate buyers have not done so and show no disposition to do so. At any time, of course, the mills would willingly make a substantial reduction in prices for the purpose of starting the market in full swing, which would mean getting investment buyers in also, the buyers who put up building, bridges, power stations and such like works of permanent construction, but there is no hope of getting such investment buyers in so soon, as even if the steel were cheap enough to satisfy them the cost of erection, in labor and in the materials outside of steel that are needed, is altogether too high. The question for the steel mills at this time, therefore, is whether it would pay to reduce prices merely to stimulate the everyday buyer again, the jobber and ordinary manufacturing consumer. Confronted with an operation of far under 50 per cent. the mills are likely to conclude that it really will pay to make substantial reductions even though this

will not of itself start construction work again.

Reductions on the Way?

Rumor has it that the steel producers have about made up their minds that substantial reductions, not like those of say $4 or $5 a ton last December, will have to be made, and should be made before the regular period of spring buying. It appears to be a common opinion that the lead in making reductions should be taken by one of the independents rather than by the Steel Corporation, and the prediction is that reductions will be announced the middle or latter part of March. One guesser makes it that the reduction on merchant steel bars will be $14 a net ton, from $2.70 to $2.00, but that represents the extreme of the guesses.

It has been the desire of the mills to avoid any moves towards wage reductions, both because it is not considered fair to reduce wages until there has been a substantial reduction in the cost of living and because of the existing labor unrest. Just how extensive is this unrest is a matter of doubt, some observers claiming it is serious, others that it is not. It is all opinion, there being no important concrete facts upon which to base a conclusion. An item of interest in this connection, however, is the fact that three merchant blast furnaces in the Shenango valley, each acting by itself, put the matter of wages before their men, saying they could not continue to pay time and a half for overtime according to "the basic eight-hour day" principle adopted by the iron and steel trade generally last October, and giving the men time to decide whether they would prefer to work eight hours a day or 12 hours, at the straight hourly rate, and without any confusion the men decided to work 12 hours at the straight rate. Thus they will be paid per day 12 times the hour rate, which is about 42 cents, instead of 14 times that rate.

There has been a sort of mutual understanding that the matter of wage reductions would not be broached before July 1 at the earliest, but if heavy reductions in steel prices are made next month, the matter of wages will probably be brought up at that time.

As a rule buyers have no definite ideas as to the prices that would be acceptable to them and that would cause them to buy freely. Of all incentives to buying in the steel market the most cogent have always been the fear of high prices coming and the fear of deliveries being difficult to obtain. There is no conceivable reduction that would cause buyers to begin fearing at once that the next change would be an advance. As to deliveries, jobbers and manufacturing consumers do not need to carry their normal stocks, since mill shipment on new orders can be obtained almost instantly. Previous buying movements have always been supported in large part by the fact that mills were falling behind in deliveries.

One definite fact in this connectio has, however, come out in the past week. Several large oil and gas interests have given to pipe mills details of pipe lines they are ready to start laying at once provided they can get the pipe at certain prices, and the prices they name are only say 10 to 20 per cent. below existing quotations. Here, at any rate, is a definite offer to begin construction work provided certain things are done as to prices. This is exceptional, but it may be a harbinger, like the first bird of spring.

Mills are operating at widely varying rates, but on the whole at lower rates than a week or a fortnight ago. A few small plants are closed entirely, while the large plants generally are running at 60 to 80 per cent. of capacity. The steel industry as a whole is probably doing between 65 and 70 per cent., but if things go on as at present they will soon be below 50 per cent.

A CORRECTION

In last week's report of the Hamilton convention it was stated in one part of the article on "The Troubles of a Merchant and How to Stop Them," that the address was given by J. H. Dowling and in another by S. F. Fannon. The latter was correct.

EXPLANATION

On page 11 of last week's issue of HARWARE AND METAL an electro was inadvertently left out of the advertisement of the Wilt Twist Drill Co. of Canada, Limited, Walkerville, Ont. Advertisement appears in correct form in this issue.

"LIQUID VENEER" MAKERS CHARGED WITH UNFAIR PRACTICES

The Buffalo Specialty Co., Buffalo, makers of "Liquid Veneer," etc., has been charged with "stifling and suppressing competition" by the Federal Trade Commission, which also charges that the company "has discriminated in price between different purchasers of commodities handled by it."

It is charged that these practices are in violation of three Federal laws: the Trade Commission act, the Clayton act, and the Act of Sept. 26, 1914, against unfair methods of competition in interstate commerce. Hearing has been set for March 1st.

Current Events in Photograph

Remains of Sir Wilfrid Lying in State

The funeral of the Liberal leader, held at Ottawa, was one of the most largely attended public funerals ever held in Canada. During the time that the remains lay in state thousands of people from all parts of the country visited the hall. The floral offerings, as may be seen from the photo, were unusually beautiful and came from all parts of the Dominion.

Lots of Business If You Go After It

Business in Every District For Aggressive Paint and Varnish Dealer—Some Figures Which Show the Enormous Turnover

EVERYONE connected with the Canadian paint and varnish trade admits, without argument, that more paint and varnish could be used in Canada. That there is vast opportunity for extensive trade development in which manufacturers, jobbers, painters, retail paint sellers, and those connected directly or indirectly with the trade may share the benefit, is a natural corollary of this fact.

But with general statements of this nature, it is difficult to gain any conception of the extent to which the trade might be developed, or the amount of business that lies dormant in this possibility.

In this article we shall endeavor to point out graphically, in figures, the present situation and to estimate conservatively the possible scope and value that the paint and varnish trade might have if more aggressive selling and distributing methods were adopted and utilized by the trade in general.

At a time when reconstruction, replacement and rehabilitation are being given so much consideration, these figures may also form some measure of guidance for the part the paint and varnish trade might take in this important work.

Some Statistics

We have in Canada a population approximating 8,000,000 people in round numbers. With the average of 5 people to the family, this gives us 1,600,000 families, which figure furnishes the approximate number of dwellings in the Dominion. The 1911 census enumerated 711,000 farms, each one of which will average at least one barn, one stock-shed and other necessary buildings for the protection of stock and crops.

In this we do not take into account churches, schools, stores, warehouses, factories, railway buildings, or other public buildings necessary to our social and economic welfare. It is not our intention to go into too many ramifications, but some conception of the numerity of these may be gained from the fact that Ontario has 5,375 school districts, each with one or more schools, while stores of all kinds throughout Canada aggregate something like 52,939. The Postal census of 1915 enumerates 21,306 industrial establishments in Canada, which would indicate probably the number of buildings necessary for the carrying out of their operations. A very conservative estimate, and which will serve our purpose, would place the number of buildings of all kinds in Canada at not less than 2,500,000.

Now every structure of every description provides prospective use for paints and varnishes.

Making a quick estimate, with the above figure as a basis, we can see at a glance one possibility for the paint trade. We can estimate conservatively that each one of these buildings could use on the average $10 worth of paint. (We use manufacturers' selling values, not retail values. in all of our estimates). This would mean the possibility of selling $25,000,000 worth of paints, which is actually two and a half times greater than the total production and importation of paints and varnishes and colors for all purposes in Canada during either of the years 1910 or 1915.

During 1910, Canadian paint and varnish manufacturers produced $8,041,154 worth of paints, varnishes, colors and other finishing materials of all kinds. During 1915, there was produced $8,316,175 worth, showing practically no increase in five years. In each of these two years Canada imported around $1,500,000 worth. In order to embrace any overlooked item, and to establish round numbers for convenience, we are placing Canada's total consumption for both 1910 and 1915 at $10,000,000.

Gallonage Decreased

Taking into consideration increased prices, and the neglect that has been shown in painting throughout the country, we are pretty safe in saying that the actual gallonage produced for the decoration and protection of property has decreased rather than increased during the war.

Our figures, therefore, show that in both 1910 and 1915 only $1.25 worth of paints and varnishes were manufactured and imported for every man, woman and child in the country. The average on our estimated number of homes (not considering the other buildings enumerated) amounts to only $6.25.

But it is probable that anywhere from 60 per cent. to 80 per cent. of this amount was used by manufacturers for finishing their products. Assuming that 70 per cent. was used for this purpose, it would only leave $3,000,000 produced for the decoration and protection of property. An average of $1.88 per home or 37½c per capita.

Based on our estimate of the total number of buildings. it would mean an average annual consumption of $1.20 per structure. These figures put some meaning into the paint man's claim that the use of paint is being neglected in Canada.

BENJAMIN MOORE & CO
NEW YORK & CHICAGO
Moore's
Paints
READY
MIXED
Every Can is Full of Quality and Customer Satisfaction.
Dealers selling *Moore's Ready Mixed Paints* are well aware of the unstinted satisfaction they always give the customer. The high quality and splendid covering capacity of "Moore's" are factors in the making of better paint sales, worthy of every dealer's consideration. "Moore" profits are worth while.
Write for our agency proposition. It will put you on the road to "better business."
BENJAMIN MOORE & CO., Ltd.
WEST TORONTO -- ONTARIO

Now let us see what might be done—and we shall estimate conservatively.

$12,000,000 Annually

Let us assume that each one of our 1,600,000 dwellings has average dimensions of 25 ft. x 30 ft. and seven rooms. Thirty dollars would be a very low estimate for the necessary paint and varnish to finish these specifications adequately inside and out, yet it would total $48,000,000 annually. Of course, an annual paint-up is expecting rather much, though repainting every four years is not beyond reason. On a four-year basis, then, there is an average possibility annually of $12,000,000, as compared with the actual $3,000,000 during the two years from which we have taken our figures.

Let us further assume that one barn on each of Canada's 711,000 farms is capable of using at least ten gallons of barn paint at say, $1.25 per gallon. This would mean a possible production of $8,880,000. Repainting of the barn every 8 years would distribute this amount to $1,110,000 annually. The fact of the matter is that probably 90 per cent. of Canada's barns have never been painted, which offers an immediate opportunity in the next two or three years of over $7,900,000 production of barn paint.

Room For Expansion

We might continue to calculate ad infinitum on other paint selling possibilities, but the estimates in hand should be sufficient to prove our argument, that there is abundant room for the expansion of the paint and varnish trade. With a possibility of an annual production of $12,000,000 for dwellings; $1,110,000 for barns, and $7,000,000 for manufacturing purposes, we have a total of over $20,000,000 possible annual production, or more than double the production and importation of 1910 and 1915. We believe we are within reason and our rights to say that three times the production of these years is possible.

We do not purpose to deal with how advertising, selling or distributing methods might be adopted to accomplish this objective, except to point out that by raising paints and varnishes from the level of luxuries in the minds of the people to that of a necessity for the protection and preservation of property, a great deal might be accomplished.

Failed to Realize

In many ways it would seem that the paint and varnish trade has failed to realize a proper sense of its relative merit as compared with other industries. In 1915, our per capita production for all Canadian paint and varnish manufacturers was $1.03 in all lines. Comparisons with the per capita production of Canadian manufacturers in other industries would indicate the trade does not rank as high as it ought, considering the service that paints and varnishes render in protection and conservation.

Undoubtedly the industry should occupy a higher scale than it does, considering the service that paints and varnishes can render in decoration and preservation and the extent to which they are also used for finishing other manufactured products.

We quote production figures on a per capita basis of 8,000,000 people taken from the Government Census of Industries of 1916:—

	Per Capita
Manufactured Foods of all kinds	$48.62
Textiles of all kinds	18.08
Timber, Lumber and Re-manufactured Timber Products	15.42
Iron and Steel Products	15.05
Leather Goods	5.92
Boots and Shoes	4.26
Malts and Liquors	4.00
Men's Custom and Manufactured Clothing	3.72
Tobacco	3.62
Women's Manufactured Clothing	3.26
Automobiles	3.04
Rubber Goods	1.71
Furniture	1.22
Drugs and Patent Medicines	1.18
Paints and Varnishes	1.03
Hats, Caps and Furs	.94
Soft Drinks	.35
Jewelry	.27

Considering our estimate that 70 per

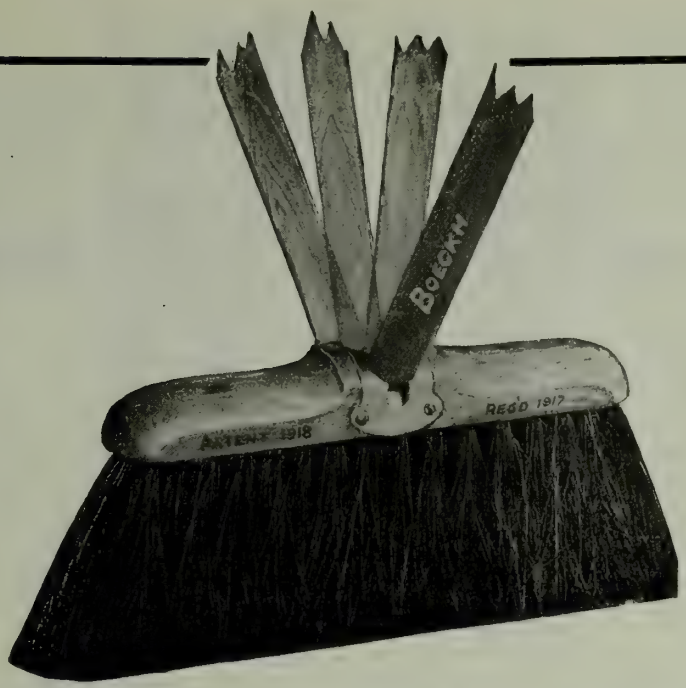
The Brush Department

Handling Higher Grade Brushes Has Resulted in Increased Sales

Dealer Says People Are Glad to Pay a Little More When They They Know They Are Getting an Article That Will Give Every Satisfaction



SELL more brushes by selling better brushes and by letting the people know that you handle only brushes that can be depended upon is the plan that a Western Ontario dealer is working successfully. Ever since he put his plan into effect his brush sales have been steadily increasing.

"Where I used to carry only medium priced and very cheap brushes," he stated to HARDWARE AND METAL, "I now carry only really high-grade brushes and very, very cheap brushes. I have a few really cheap brushes which I keep for those who want a brush to fix up stove pipes or some similar job where a good brush is not needed. The rest of my stock is made up of quality brushes. I have found that it pays and pays well to sell brushes that give satisfaction. People do not mind paying a few cents more for a brush if they know that they are not going to have any trouble with it. When I used to handle the medium priced brushes people would come back and tell me that the bristles came out and stuck in the paint. They did not like this. It often meant a most unsatisfactory job and was trying on their temper. The brushes I have been stocking now I can guarantee will give satisfaction. They are a quality article and when a man comes into the store to get some paint and brushes I have brushes that I am not afraid to talk about and not afraid to guarantee to the limit. I am selling more brushes than ever and there are no comebacks. I find that people tell one another also. They know if they want a good brush they can get it at my store and I have made many sales to people who have been sent in by satisfied customers."

This dealer keeps his brushes well displayed and finds that this also helps him to sell more goods. People he says very often come in to buy some other line and when they see the brushes remember that they are planning some work at home in which they will need a brush and take one home with them. He also says that he finds it pays to have a good variety. He finds that customers like to look over a stock and while they generally buy very largely on his recommendation they like to look over the brushes and ask questions about their various uses. He emphasizes the question of quality all the time and tells them frankly that he is charging them a little more but is giving them an article that will work smoothly and give all round satisfaction.

The brushes in this man's store are always clean and presentable. This is another point to which he attributes increased sales. People he says buy more readily when shown clean fresh stock. Women especially do not like to purchase brushes that show every indication of having lain around the store and been handled a great deal.

Last but not least this dealer is not afraid to include brushes in his window displays. He has found by experience that if people know you have the goods to sell and see it in your store they will very often buy. He attributes many sales of brushes to having kept the goods not only displayed but attractively displayed.

A BOECKH DISPLAY PAYS

PAINTING and house-cleaning time will soon be here. People are now ready to buy brushes to beautify and clean their homes after the winter months. Have a "Paint Up and Clean Up Week." Impress your customers with the fact that brushes of known quality are as important as good paint.

Display

BOECKH'S

Steel Grip—Rubber Set and Household Brushes

in your windows. Let your customers know that you stock these brushes.

Boeckh's Paint and Household Brushes are the product of over sixty years' experience in the brush-making art. Every brush bearing the Boeckh trade-mark is guaranteed to be absolutely dependable.

We will supply you with window cards to help make your display attractive and profitable. Write for them—they are free.

Make your windows pull brush sales, by displaying Boeckh's.

The Boeckh Company, Ltd.

TORONTO, ONTARIO

cent. of our paint and varnish production is for the finishing of other manufactured products, this would leave us a per capita production for property protection of only 31c, which is admittedly low, without resorting to comparisons of any nature.

Some Comparisons

Taken from the insurance standpoint, the paint trade has been a strong advocate of paints and varnishes as insurance against decay and deterioration. We have been told that property loss through lack of paint is greater than loss by fire, which will make it of interest to see to what extent paint insurance has been sold for this purpose. Against our production of $1.03 per capita for paint insurance, the fire insurance people have sold $4.41 per capita in annual premiums or $388.84 in new or renewed policies. Again, allowing for manufacturing uses of paint and varnishes, we find only 31c out of our $1.03 spent on property protection. Only a little over 7 per cent. spent on paint insurance for property against that for fire insurance, which covers a less aggregate loss, and which is not inevitable as with property unprotected by paint. As insurance brokers, the paint trade has a considerable distance to travel yet.

Some Big Figures

The promotion of the use of more paint and varnish would also assist to strengthen the position of the painting trade and place it on a more important level. It is not out of the way to estimate that each one of our 1,600,000 dwellings would require, on an average, $50 worth of labor for decoration and protection. If each was repainted every four years, it would provide an annual labor bill of $20,000,000, which ranks very well in comparison with the total annual wage bills of other industries during 1915. Amongst the highest of these, we find that the timber, lumber and remanufactured timber industries paid $28,900,000; iron and steel paid $27,000,000; textiles paid $27,000,000, and the combined food industries $22,000,000. There are no available figures showing what has been paid for painting labor, but it is quite safe to assume that it has not been anywhere near this figure.

In providing an opportunity for a greater amount of labor by extending the greater use of paints and varnishes, the trade has, therefore, almost unlimited room to take a prominent part in the rehabilitation of the industrial workers into a worthy peace time pursuit.

General Conditions

While these figures give a survey of the Dominion, as a whole, this general condition exists more or less intensely in every locality. It might be asked by a retail paint seller to what extent it applies to his own locality, and how he might cope with it. The following figures do not apply to any one locality, but they serve as an example of how each retailer may sum up his own district insofar as present and possible paint and varnish consumption are concerned.

Let us take, for an example, a town of 6,000 people. It is quite likely to be the buying centre of from 2,000 to 3,000 more from the rural districts. Say 9,000 altogether. On the basis of 5 to the family, this means 1,800 dwellings, and approximately 500 farms. Dwellings and barns, together with stores, factories, churches and schools, will bring the possible number of structures up to 2,500. On our estimate of 37½c per capita, as the present buying capacity, manufacturers' invoices entering the town would approximate $3,375 annually. This figure, the paint dealer can check against his own figures and what he knows of his competitor's business. His possibilities can be roughtly estimated, as has been done in former paragraphs. 500 barns at $15.00 each total $7,500. The remaining 2,000 buildings painted every four years at an average cost of $30.00 for materials, would amount to $15,000, a total of $22,500, which will be admitted, is some paint business.

Great Possibilities

The writer does not attempt to say that this reckoning would apply to every town, but if it conveys the idea that we desire to bring home regarding the greater possibility of the use of paints and varnishes we shall have achieved our purpose. Every dealer is free to wield his pencil on the problem as he sees fit—and there is plenty of scope for wielding it.

A good deal of this estimating may seen to be theoretical and Utopian. We do not believe that it is altogether so. It is an effort to put in concrete, comprehensible form a condition that the whole trade has recognized in a more or less hazy way. If this generally recognized state of affairs in the paint trade becomes astounding when summed up in cold figures, the trade has only itself to blame for its former complacency.

Apparently what is needed are more aggressive advertising and selling methods by manufacturer, retail seller, painter and jobber individually and collectively in co-operation. It is our hope that these figures will, in some light measure, serve to show a way towards this accomplishment.

MAKES EMPLOYEES STOCKHOLDERS

To encourage thrift and create greater interest on the part of its employees in the welfare of the company, the National Lead Co. of New York has purchased in the market and is offering to officers and employees, 5,600 shares of its common stock at a price of $60 a share. Payment for the stock may be made in small instalments, but in the event of subscribers paying in full, the certificates are to be retained by the company for at least three years in order to prevent speculations and to continue the relationship of stockholder on the part of the employee.

FAVOR ELIMINATION

At the annual convention of the National Association of Paint Jobbers, held in Chicago, the following resolution was unanimously adopted:

"Whereas, the War Trade Board has seen fit to remove the restrictions concerning sizes and colors of paints and varnishes, and

"Whereas, we believe it is to the interest of the entire paint and varnish trade, as well as the ultimate consumer to have certain of these rulings continued, therefore

"Be it resolved that the National Association of Paint Jobbers place itself on record as favoring the continued elimination of half-gallon and pint cans of prepared house paints, flat wall paint and barn paints; and also of half-gallon cans of clear varnish.

"Be it further resolved, that we strongly approve the continuance of the present reduced color cards in all lines."

A DISPLAY THAT PULLED

Walter H. Cottingham, president of the Sherwin-Williams Paint Co., was speaking the other day of the difficulties they had to overcome in helping the British merchants to sell goods and do more business. They finally succeeded in getting the leading retailer in a provincial city in England, who was handling their goods, to display them in their window according to a design prepared by the Sherwin-Williams expert window dresser. A few days later they received a violent protest from the merchant, who wanted the display taken out because they were bothered with too many buyers coming into the store.

BOSTON VARNISH COMPANY'S NEW VICE-PRESIDENT

At the annual meeting of the directors of the Boston Varnish Company, C. H. Tewksbury was elected second vice-president, in recognition of his nineteen years of successful efforts. The honor conferred upon Mr. Tewksbury will in no way affect his present sphere of activity, and he will continue to direct the affairs of the Chicago branch.

CLAIMS NEW FLAXSEED WILL YIELD MORE OIL

Burbank, the California naturalist, has developed a new variety of flaxseed, of which he says: "I have now to offer the most remarkable flax ever produced. The seeds of the 'Burbank' are of nearly double the size of any other, are of a beautiful, limpid white, and yield twelve per cent. more oil per pound of seed. The oil is more readily extracted and with less waste. The plants are fully as productive as the ordinary flax." It will take several years to grow enough to use commercially as the amount Burbank has to offer is very small.

An application for a winding-up order has been made for the Preston Chair Co., Ltd., Preston, Ont.

Varnish Value

TRUE varnish value consists in quality—plus. That is to say, a varnish to be 100% efficient must be the right varnish, for the right use, for the right price. Anything less than this is a handicap to the user and an unnecessary addition to the cost of any finishing operation.

During 61 years' experience we have developed Finishes for every known purpose, and our practical knowledge of the varied needs of consumers enables us to supply varnishes and their allied products exactly adapted for the uses intended.

Berry Brothers' label can always be depended upon as a safe guide to satisfactory varnish values.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, February 27.—Another advance was made this week for linseed oil. This is the only item in the regular paint list showing change, although new prices just announced for Paris green show a substantial reduction from the opening prices of 1918. These will be found elsewhere and are immediately effective.

There is plenty of turpentine in the market now, and prices are held steadily without change. Mixed paints are quiet for the present.

Three to Five Cent Oil Advance

Montreal.

LINSEED OIL.—Strength in seed markets has again served to firm the linseed oil markets, and prices are from three cents to five cents above the quotations of last week. Low base for raw is $1.52 and for boiled, $1.54½ on 1-barrel lots, with usual differentials. There is not a great deal doing, and orders are mostly for small lots.

LINSEED OIL

Raw, Imp. Gallon—	
1 to 4 bbls.	$1 52 $1 53
5 to 9 bbls.	1 52 1 52
10 to 25 bbls.	1 51 1 52
Boiled, Imp. Gallon—	
1 to 4 bbls.	1 54½ 1 57½
5 to 9 bbls.	1 54½ 1 54½
10 to 25 bbls.	1 54½ 1 53½

Turpentine Holds; Sales Slow

Montreal.

TURPENTINE.—A steady condition marks the turpentine market, and there is little new. Stocks in this market are ample at the present time, and as the season will not open for awhile yet there is little likelihood of heavy demand for two or three weeks.

Turpentine—		Imp. gal.
1 to 4 barrels	$1 00	$1 05
Small lots	1 07	1 17

(Packages extra).

More Putty Sold; Undertone Steady

Montreal.

PUTTY.—There is a steady sale for putty, seasonably speaking, and a fair quantity is going forward. In fact there has been more activity than is usual for mid-winter. The strengthening of the oil market has served to strengthen the undertone somewhat.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

White Lead in Oil Not Moving Fast

Montreal.

WHITE LEAD IN OIL.—There is very little present business for this commodity. The selling, some think, will be slow until actual spring painting develops, and in the meantime prices are holding steady as follows: 5-ton lots, per 100 pounds, $15.50; 1-ton lots, $16, and smaller lots, $16.35.

Paints Are Held Without Change

Montreal.

PAINTS, ETC.—Mixed paints and specialties are rather unchanged in the matter of movement. This is fair, from a seasonable basis, and while ordering is carefully done, there is every indication that the season will be a good one. Prices are firm and the undertone steady both on paints and specialties.

Insecticides Will Be Big Sellers

Montreal.

INSECTICIDES, PARIS GREEN, ETC.—There is every indication that the coming season will be a good one for insecticides. Prices are out on Paris green and will be found in special panel elsewhere. It is of interest to note that there is quite a decline from the prices obtaining for 1918, and all bookings made to date will be filled on the basis now fixed.

TORONTO

TORONTO, Feb. 27.—Higher prices are again in evidence on linseed oil this week, advances ranging from 3 to 10c per gallon. Turpentine is holding at unchanged figures, with inquiries improving. Mixed paint orders are moving forward a little more freely and outlook is considered quite promising. White lead in oil and putty are steady.

Linseed Oil Moves Higher

Toronto.

LINSEED OIL.—Higher prices are generally in effect this week. The flaxseed market has shown considerable strength in the last couple of weeks and seems to be steady at advanced figures, with the result that linseed oil has firmed in sympathy. Supplies are considered ample, and whereas there is not a heavy movement to the trade there is a better feeling and improved demand. Range of quotations to-day follows:

Linseed Oil—	Raw	Imp. gal.
1 to 2 barrels, gal.	$1 53	$1 60
3 to 5 barrels, gal.	1 54	1 59
10 bbls. and over	1 52	1 57
	Boiled	Imp. gal.
1 to 2 barrels, gal.	$1 55½	$1 63
3 to 5 barrels, gal.	1 54½	1 62
10 barrels and over	1 52½	1 60

Turpentine Holds At Unchanged Levels

Toronto.

TURPENTINE.—There is very little doing in turpentine at primary points, and a continued tendency is shown on the part of consumers to force down the price in face of delayed shipments abroad. However, it is recognized in the trade that if factors and producers hold steady for another 30 or 60 days they will eventually unload on an advancing market. Inquiries locally are improving. Arrivals are ample and shipments under present conditions quite satisfactory.

Turpentine—	Per	Imp. Gal.
1 barrel (barrel included)	$1 04	$1 05
2 to 4 barrels (barrels included)	1 03	1 04
5 gallon lots	1 14	1 15

Mixed Paints Going Forward

Toronto.

MIXED PAINTS.—Manufacturers are shipping mixed paints in fairly good quantities and outlook is considered very good. Orders are not large, but a nice assortment is being specified for. It is thought smaller orders, the hand-to-mouth attitude of buying, will largely prevail for some time yet.

Plate Glass Up; Window Glass Firm

Toronto.

GLASS, PUTTY.—The United States manufacturers of polished plate glass have advanced their prices this week on a varying scale ranging as high as 10c

THOUSANDS of Canadian Homes are being "Painted up" to welcome the boys back.

Consider then the value of the B-H publicity, which is daily winning new converts to B-H products.

B-H agents are now carrying a full stock to meet this demand.

There's an attractive agency proposition waiting for a progressive dealer in any locality where we are not represented.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

per foot advance on cut sizes. This is equivalent to over 20 per cent. The impression prevails among the American manufacturers that there will be no European plate glass come into United States or Canada this year. There has been considerable stiffening of the window glass price and present factory discounts of 77 per cent. base are being firmly held. This is not due to any active demand for glass at the moment, but a knowledge that jobbers and retailers have practically no glass and there is a great deal of building in prospect for this year, which will absorb all of the diminished product made during the present fire.

Putty remains in an unchanged position this week. Prices are steadily maintained, though business is within rather narrow compass.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

Better Inquiry For White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—There is a somewhat improved inquiry for white lead in oil, though still representing a small tonnage would indicate a better outlook. Prices have held firm and without change, the advance in the price of pig lead being a factor to strengthen the undertone of the market. Pure white lead in oil is quoted at $16 30 per hundred pounds in ton lots; at $16.65 per hundred pounds in less than ton lots. The various brands are shown in current market quotations.

THE EXTENSION OF TRADE

Continued from page 44

One of the most important phases of the extension of the Trade Commissioner Service is the fact that the British Government has offered the facilities of that service to the other Governments of the British Empire. In the majority of, if not in all cases, the offer has been accepted wholly or in part. The Canadian Government, for instance, has accepted the facilities of our service at all points, in various countries, at which it has not a Trade Commissioner of its own. The Government of India has accepted the service in its entirety. It may be said, therefore, that this is one of the first practical commercial steps being taken by the Imperial Government and by the Governments of the Dominions to link the various units of the British Empire. The resolution of General Smuts of South Africa, at the Imperial War Conference in 1917, recommended that these Governments should co-operate so as to make the Trade Commissioner Service as useful as possible to the British Empire as a whole, especially for the promotion of inter-Imperial Trade.

To Extend Trade

The work of the Trade Commissioners, as you will have noted, is primarily to increase Great Britain's share of the import trade of Canada. If, for example, Canada is buying a considerable volume of merchandise from abroad, each year, we want to see that John Bull obtains a large share of the business.

We recognize that the progress which Canadian manufacturers have made during the past few years will be exceeded by the manufacturing developments of this country during the future. This is a welcome and gratifying feature, because as each unit of the British Empire becomes stronger industrially and agriculturally, each developing its resources, so will the great British Empire grow in stability, prosperity and influence.

Incidentally, we are endeavoring to drive effective spikes into German and Austrian trade in Ontario. This will help to prevent enemy countries from entrenching themselves again in the resources of the British Empire.

To Make It Easier

We propose to try to make it easier for citizens of the British Empire to do business in their own lands than for enemy countries to do business in our Empire. In this work, and, indeed, in our work generally, we are meeting with the greatest possible sympathy and co-operation on the part of the business community and of the general public in Ontario where there is such a well defined patriotic sentiment. When the war is over, therefore, I think we may feel assured that, despite the great war burden which the Old Country has carried for four years, she will emerge, with her Overseas Dominions, still stronger, more vigorous, more aggressive, giving her competitors a good run for their money in the world's markets.

I appreciate the opportunity you have given me to explain the nature of the work of our Trade Commissioner Service.

NEW PRICES FOR 1919 ON PARIS GREEN LOWER

The manufacturers have just announced 1919 prices on Paris Green and the same are effective at once, and for the various sized packages are as follows:

In barrels about 600 lbs., 48c per lb.

Kegs, about 250 lbs., 48½c per lb.

In 50 lb. drums, 49c per lb.

In 25 lb. drums, 50c per lb.

In 1 lb. papers, packed 100 lbs. in a case, 52c per lb.

In ½ lb. papers, packed 100 lbs. in a case, 54c per lb.

Terms: 1 per cent., 15 days net 30.

These prices are f.o.b., Montreal, Toronto, Hamilton, London, Ottawa, Quebec, Moncton, St. John, Halifax.

The relative prices last year were as follows: 60¼c, 60¾c, 61¼c, 62¼c, 64¼c, 66¼c. There is, therefore, a substantial decline.

For points Winnipeg and West, prices are somewhat higher, according to location, and Prince Edward Island prices are one-quarter cent higher.

Must Ratify Orders Taken by Travellers

Orders taken by a traveling salesman, or "drummer," for the purchase of goods are not effective unless accepted and ratified by his principal, according to a recent decision by the Appellate Division of the New York Supreme Court for the First Department. In the case in which this decision was rendered, Senner & Caplan Company vs. Gera Mills, it appeared that the plaintiff, a New York corporation engaged in the manufacture of ladies' dresses, gave to a traveling salesman of the defendant, a New Jersey corporation manufacturing dress goods, three separate orders for quantities of serge upon a credit of seventy days. It was the defendant's custom to submit such orders to its merchandise and credit departments before accepting them, and there was no evidence that they had ever been passed upon by the latter. The plaintiff claimed, however, that the defendant had ratified the orders by the delivery of a small portion of the first order, but the defendant showed that this delivery and a subsequent one of a portion of the third order were made solely for the accommodation of the plaintiff, and upon its insistence that it must have some goods with which to carry on its business. It furthermore appeared that the defendant demanded and received payment in cash for the first delivery, upon which under the order it was to have seventy days' credit, and that on the next business day after the goods were shipped. The court, reversing judgments of two lower courts, held that the plaintiff's complaint in an action to recover damages for failure to fill the orders as given should be dismissed on the ground that it had failed to establish an acceptance of the orders by the defendant. The court held that a traveling salesman is at most a solicitor of orders, which must be accepted and ratified by his principal before they become effective; that such acceptance and ratification is not established by showing that deliveries have been made to the buyer where such deliveries have been made by way of special accommodation and not under the conditions set forth in the orders, and that in such cases no duty rests upon the seller to notify the buyer within a reasonable time that he will not accept the same. Acceptance of the orders by the concern for which the salesman acts is therefore under this decision necessary to make them ripen into contracts.

TOO LATE TO CLASSIFY

OWING TO THE SERIOUS ILLNESS OF THE proprietor, which has necessitated his removal to a Southern climate, I am offering for sale that well-known and established business in the town of Oshawa now being carried on by Glenn A. Henry & Co. This is a straight hardware business—no tinshop,—and has been conducted on practically a cash basis. It has always been a good paying business and would not be on the market were it not for Mr. Henry's failing health. Stock will run from $10,000 to $12,000. Here is a first-class proposition for someone. Wire or write, W. E. N. Sinclair, Barrister, Solicitor, etc., Oshawa, Ont.

MARTIN-SENOUR
PAINTS AND VARNISHES

MADE IN CANADA

SOLD ON MERIT

THE GREATEST SATISFACTION A MERCHANT CAN HAVE

is to know positively every time he sells an article that he has provided his customer with absolute satisfaction. The MARTIN-SENOUR DEALER AGENT is certain of this every time he sells a can of 100% PURE PAINT or any other MARTIN-SENOUR PRODUCT. He knows that he has provided his customer with 100% Efficiency and 100% Satisfaction, because 100% PURE stands for highest quality and lasting service.

It also gives the Dealer-Agent great satisfaction to know that the story of 100% PURE QUALITY and SERVICE is not only widely heralded throughout the country from Coast to Coast, but it is truthfully told in such a way and through such numerous sales helps as to make it the easiest and most profitable to sell.

Sure Paint and Truthful Advertising make for 100% Satisfaction.

If you are not now one of our Satisfied Dealer-Agents, better write for our proposition to-day.

The "One Minute" Washer

With Gasoline Engine or Motor Attachment

The "One Minute" Washer, with the new features and attachments here illustrated, makes an ideal apparatus that will appeal to every housewife who enters your store.

No doubt there are many of your customers who possess the "One Minute" Hand Power Washer, who already know and appreciate its great washing qualities. It's your privilege to suggest to them the convenience of this new attachment.

Consists of a shafting with a double pulley and lever shaft that throws the power belt from the drive pulley to an idler. Runs Washer and Wringer separately. Any engine or other motor power unit can be used on this apparatus.

The added convenience, plus time and energy saved, is well worth the small cost of installation.

We make Hand, Electric, Gasoline and Water Power **"One Minute" Washers.** If you are not selling them, may we prove to you why it will be extremely profitable to do so? Write us about our attractive agency proposition for your district.

On C·C·M· BICYCLES

"MASSEY," "CLEVELAND," "RED BIRD," "COLUMBIA," "PERFECT"

Owing to the high cost of both materials and labor, it is doubtful if there will be any appreciable decline in bicycle prices even by summer.

The loss of even one sale through lack of stock would offset any probable reduction in the cost of a good many bicycles.

And with transportation so slow, it is well to order as far in advance as possible.

Lowe Brothers Paints

A Good Construction Year Is Always A Good Paint Year

1919 promises to be the biggest construction year since 1911.

The return of our boys and the necessity of providing them with plenty of work has spurred the Canadian people and Government into a program of general construction that will keep every man in the country busy for several years to come. This program has already started and will be well under way by spring. Here are a few of the works planned:—

HOUSE BUILDING—The Government is helping to finance the biggest house building contract in the history of the country.

GOVERNMENT BUILDINGS, POST OFFICES, ETC.—New ones to be built, old ones to be overhauled.

HARBOR AND CANAL WORKS—Big appropriations already made.

RAILWAY RECONSTRUCTION—An immense appropriation has been voted for the enlargement and improvement of the Government railways.

HIGHWAY AND ROAD MAKING—This year a number of great motor highways will be started, old ones rebuilt.

THE REPAINTING OF PRIVATE HOMES—In anticipation of the return of the boys from France.

With this program in sight—are you downhearted?

LOWE BROTHERS, LIMITED - Toronto, Ont.

Dayton, New York, Boston, Chicago, Kansas City, Minneapolis, Atlanta.

MEAKINS

Brushes

FOR EVERY USE

With a complete stock of **Meakins' Brushes** you will always be in a position to meet any demands your customers may make upon you.

We offer you a wide range of **High Quality Brushes** that represent good values.

Every **Meakins' Brush** is Rubberset. The Bristles **"cannot loosen"** to try the temper of the user. An excellent selling feature.

Our Brushes render unusual customers' satisfaction. A factor appreciated by every Dealer. There are good profits in them, too.

Write for a complete catalogue. Order through your jobber.

Gregg Plow Eveners Pull Big Business

Gregg Plow Eveners, like Gregg Wagon Sets, Neck-yokes and Hitches, are built for service. They are guaranteed against defective materials and workmanship.

Send for copy of catalogue describing our full line.

Any jobber in the Canadian West can supply you with Gregg Goods.

Gregg Mfg. Co., Limited

WINNIPEG

The MacLean Business and Class Publications in Canada

TO SELL or buy from Canada such lines as machinery, hardware, food products, dry goods, books and stationery, paper, printing machinery and supplies and general merchandise of almost every description, raw or manufactured, use or consult the MacLean Business and Class Publications, as per list below. For special information, write the publishers. Concerning the quality of the MacLean publications, let this copy of CANADIAN GROCER which you hold in your hands speak for all. The MacLean list of 14 publications is as follows:—

THE CANADIAN GROCER (Est. 1886)
HARDWARE AND METAL (Est. 1889)
DRY GOODS REVIEW (Est. 1889)
MEN'S WEAR REVIEW (Est. 1898)
CANADIAN MACHINERY (Est. 1905)
THE POWER HOUSE (Est. 1907)
BOOKSELLER AND STATIONER (Est. 1884)
THE SANITARY ENGINEER (Est. 1907)
MARINE ENGINEERING OF CANADA (Est. 1910)
CANADIAN FOUNDRYMAN (Est. 1909)
PRINTER AND PUBLISHER (Est. 1892)
THE FINANCIAL POST (Est. 1907)
MACLEAN'S MAGAZINE (Est. 1896)
THE FARMER'S MAGAZINE (Est. 1910)

This fact may interest you: namely, the MacLean organization is the largest concern of its kind in the British Empire. The output of its mechanical department every working day is the equivalent of a 112-page publication of the size and type of this copy of CANADIAN GROCER.

Our London Office, 88 Fleet Street, E.C.

Also at: NEW YORK, BOSTON, CHICAGO, MONTREAL, WINNIPEG

For over 20 years the MacLean Publishing Company has maintained a fully staffed London office, and has rendered British and Continental manufacturers, shippers, and traders an invaluable service in many directions.

Specimen copies of the MacLean publications will be cheerfully forwarded to all asking for them. Address us at London or Toronto.

MacLean Publishing Company, Limited

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

It's Like a Rolling Snowball!

REMEMBER the big snowballs you used to make when you were a boy — how they grew bigger and bigger at every turn?

Well, that's just the way with "61" Floor Varnish in Colors. It "turns over" quickly and P&L dealers are increasing their sales at every turn!

It's that 70-year-old Pratt & Lambert reputation for quality backed up by powerful nation-wide advertising that keeps that ball rolling and kicking up cash in its wake.

Are you in on this? Have you stocked "61" in Colors?

If you're not one of these dealers, let us show you how to get your share of this steady business! Write for particulars of Introductory Assortment.

The Most Popular Poison
—and the Most Effective

Pure Paris Green is the oldest and the most generally used of all spray poisons. Paris Green is the most effective agency for killing potato bugs and, consequently, is the easiest to sell.

You do not need to explain or to argue when selling Paris Green. When the potato bugs arrive the farmer and the gardener do not want to experiment with any of the new "bug powders" that come and go on the market—they want Paris Green, because they know Paris Green will kill potato bugs.

Paris Green is the most economical spray poison to use — not in first cost, but in results—in the killing of bugs—and hence the preserving of the potato crop.

Munro's Pure Paris Green is a superior product. It is a rich green, fine, light and fluffy, strictly pure, conforming to Government standard, and comes well and strongly packed.

The Trade Mark behind the "Hardware House of Quality."

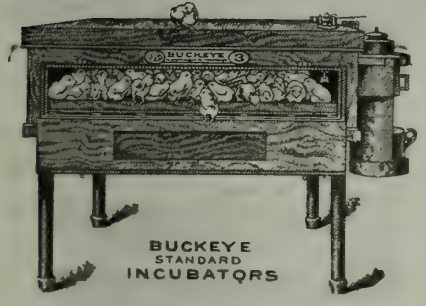
DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada.

Ashdowns have grown to be the largest Wholesale Hardware Dealers in Canada. There must be a reason.

Early in the history of the West we realized that the Hardware Dealer of the Western provinces had problems to contend with not met with elsewhere.

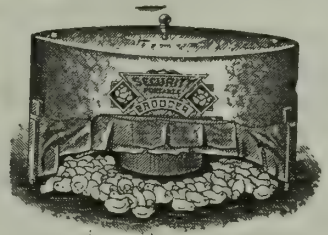
His problems have been ours, too. We know his needs, and with our warehouses situated in **Winnipeg, Saskatoon and Calgary** as to be handy to any Western dealer, we are in a position to-day to render him a very valuable service.



Courteous treatment, quick service and quality in the lines we sell has ever been our aim.

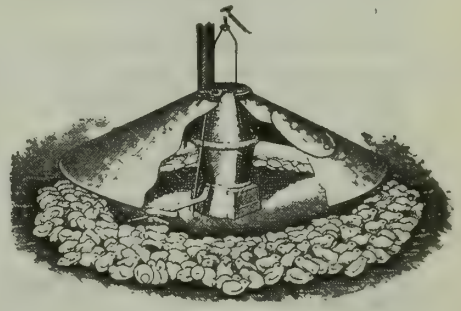
The fact that we are sole distributors for some of the most famous Hardware lines bespeaks something of the confidence manufacturers are putting in us.

Here is one of them—



Buckeye Incubators and Brooders

Buckeye Incubators are unquestionably the most successful hatching devices that have ever been placed on the market. Each and every machine is sold under an **absolute guarantee** to hatch more chicks than any other incubator manufactured.



Buckeye Incubators made in seven capacities. 65, 120, 175, 200, 250, 350 and 600 eggs.

The Buckeye Incubators and Brooders need no introduction to the trade. They are unquestionably the most dependable and most widely advertised lines on the market. We consider ourselves most fortunate in securing these machines for our trade.

The Buckeye Oil Burning Brooders are simple in construction and the most inexperienced person can operate them with absolutely satisfactory results.

The Buckeye Coal Burning Brooder grows three chicks where one grew before and saves one-half the expense and nine-tenths of the trouble.

There is nothing to know about incubators in order to sell them. We furnish complete operating instructions with each incubator, and guarantee results.

SEND US AN ORDER NOW FOR A SAMPLE TO PUT ON YOUR FLOOR TO ENABLE YOU TO INTRODUCE THE LINE TO YOUR CUSTOMERS FOR THIS SPRING'S BUSINESS.

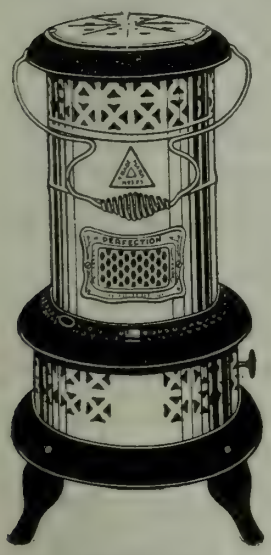
THE NEW PERFECTION KEROSENE WATER HEATER is solving the hot water problem for many a rural home.

The "New Perfection" Cook Stoves and Heaters

ALL YEAR 'ROUND SELLERS IN RURAL CANADA -- STOCK THEM THIS SPRING

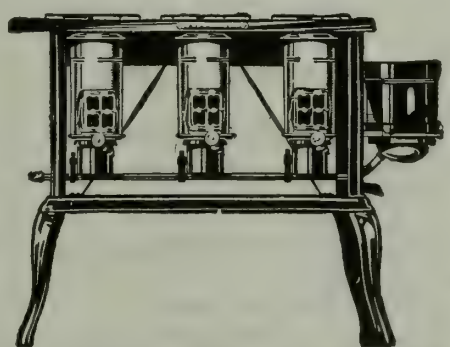
NO. 61. NEW PERFECTION STOVE. It has the regular New Perfection burner. Oil reservoir surrounds the burner. Glass indicator to see oil level.



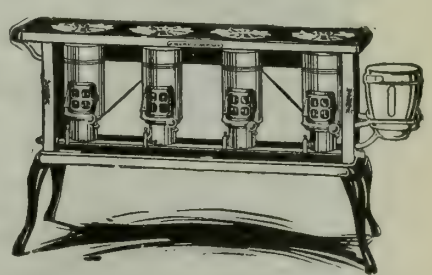
PERFECTION ONE AND TWO-BURNER OVEN. Made with glass swing door, and blue enamel door frame.

With the housecleaning season in sight the demand should start for this line of stoves and heaters in rural and suburban districts.

The New Perfection stoves and heaters are rapidly becoming all-year-round sellers. There's no reason why they should not be used in the rural home the same as gas is used in the cities—every day of the year.



Order your spring and summer stock the next time the "Rice Lewis" representative calls, or write to us direct.



1918 PERFECTION OIL HEATER in four sizes and styles. We carry in stock Nos. 520, 525, 530, and the blue enamelled line, No. 630. We also carry a stock of wicks.

Rice Lewis & Son, Limited

Victoria Street, TORONTO

NO. 33. NEW PERFECTION COOK STOVES, with or without cabinet. One of the most popular stoves in the Perfection line, for medium size family. We also carry No. 32 Perfection Cook Stove which is the two-burner type.

NO. 34. NEW PERFECTION COOK STOVE. This is the four-burner type, especially designed for large family.

We carry wicks of the New Perfection Cook Stoves in stock at all times.

We also carry No. 32 Perfection Cook Stove, which is the two burner type

"Would you step on a cockroach—or would you refrain from staining the floor?"—*Roosevelt*

THE "ethics" of business call for courtesy between competitors—and the "ethics" of advertising also demand "truth in advertising." After observing the former, we find it absolutely necessary to "step on" some of the false claims and untrue propaganda of several separator manufacturers in an attempt to preserve a semblance of "truth" in their advertising.

We owe it to the dairy people of this country to present the real facts regarding cream separators. Propaganda based on the falsest of claims has been spread in an attempt to mislead American farmers. In presenting these facts, we stand ready to prove every assertion; they are based on actual records of dairy history.

Official records show that the first cream separator was invented by the French, and that patent No. 105,716 was granted to the company of Fives-Lille, of France, November 19, 1874, for a "system of continuous centrifugal separation." A little later the Danes developed the cream separator and were the first to introduce cream separators into America. Four years later, in 1878, a Swedish concern took advantage of the French invention and built a cream separator.

Looking for American business, this concern contracted with Mr. P. M. Sharples, an inventive genius of West Chester, Pa., to manufacture, install, and repair their machines in America. The first machines were decidedly impractical and unfitted for efficient use in American dairies and creameries.

Mr. Sharples attempted for a few years to make of this foreign machine a satisfactory separator, and during this time invented all the great improvements that have since been used by this type of machine. Among his invented improvements were the discs in the bowl, the splash oiling system, the detached spindle, the lowering of the supply can, and the concave bottom bowl, which permitted a *part* of the weight of the bowl to be suspended below the bearing. The complication of the machine, however, soon caused him to give up this manufacturing contract entirely, and, with true American ingenuity, he built a real American separator, adapted to American dairy needs and entirely different in that it was a most simple and efficient machine.

The Sharples factories are the oldest and largest separator factories in America. They have always been entirely American-owned. During the thirty-eight years of its existence, The Sharples Separator Company has manufactured more separators than any other factory in America, and the output of the Sharples factory to-day exceeds that of any other separator factory in the world. More Sharples machines are being sold than any other, and a much larger percentage of those sold are to-day in actual use.

Every American dairyman should know these facts, and has the right to, and should, on buying a machine, ask the following questions of any separator manufacturer:

"Will your separator skim clean and deliver a cream of even density at any speed at which it may be turned? Is the bowl free from troublesome discs or blades? Has the separator an entirely automatic oiling system and do you guarantee your separator for durability to the extent that you guarantee a repair expense not to exceed $2.00 per year?

"Is your separator built in American factories, by American manufacturers, by American labor, of American material, and entirely owned by Americans? Is it truly an American separator, encumbered by no suspicion of taint of Hun propaganda?

It is due to Mr. Sharples' untiring efforts during the thirty-eight years of his separator manufacturing experience—not to any foreign makers or inventors—that the American farmer owes the modern efficient cream separator. The Sharples Suction-Feed Separator is the perfected machine; all other separators are to-day where Sharples left off years ago—old style, bucket bowl, fixed feed machines.

We say, without fear of contradiction, that the modern Sharples Suction-feed Separator

—is the ONLY separator in the world that skims clean and delivers a cream of even density at widely varying speeds;

—is the ONLY separator in the world with a controlled varying capacity;

—is the ONLY separator in the world with a knee-low supply can, easy to fill;

—is the ONLY separator in the world with a perfect automatic splash oiling system, not a single oil cup;

—is the ONLY separator in the world with a hollow tubular bowl—no discs to wash.

S-W Old Dutch Auto Enamel

For Ford Cars

Will Bring You Many New Customers

A quick, durable finish for weatherworn cars — something to make the old car look fresh and new, without laying it up two or three weeks in a paint shop.

Makes Old Cars Like New in 4 Days

S-W Old Dutch Auto Enamel is easy to apply and produces a smooth, glossy finish that is durable and lasting.

Three weeks in the shop of an expert could not give a better looking job. Economical. Saves doing without one's car for so long.

S-W Old Dutch Auto Enamel is a customer-maker and a money-maker for every dealer. Get your stock in now. Send for a supply of our folders or let us send one to each of your customers.

If you are not a S-W agent, write for particulars and get in line for big spring trade.

A Right Quality Product for Every Purpose

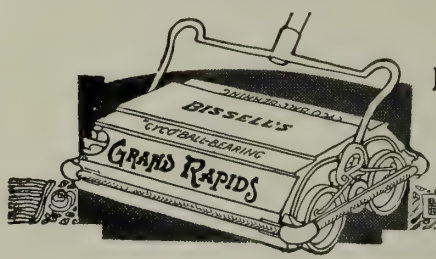
How Up-to-Date Women Sweep

Not with a broom—mercy no! That would be stirring up dust, and dangerous germs, as well as breaking your back.

Neither do you need a vacuum cleaner for the daily sweeping.

Up-to-date women use the Bissell Carpet Sweeper, the reliable, efficient, convenient sweeper, that no well managed home can get along without.

Just run it over your rugs and carpets with the handle held at an easy slant. Be sure the dust-pan is empty, and that the brush is clean—not matted up with hairs, thread, etc.



The Bissell, thus used, will take up all the surface dust and pick up all sorts and kinds of small litter with dispatch. There won't be a lot of dust in the room, and the work takes but a few minutes. There is no wasted effort, no weary arms, nor injury to carpets.

For the periodical, thorough cleaning, use Bissell's Vacuum Sweeper. Has more powerful suction than the average electric. It gets both the surface dust and the dirt which is tramped in. Bissell's Carpet Sweeper and the Bissell "Vac" are the efficient home cleaning equipment.

BISSELL SWEEPERS

Bissell's "Cyco" Ball-Bearing Carpet Sweepers are $4.25 to $7.50; Vacuum Sweepers, $8.00 to $14.50—depending upon style and locality.

At dealers everywhere. Booklet, "The Care of Rugs and Carpets," upon request.

BISSELL CARPET SWEEPER CO.
Oldest and Largest Sweeper Makers
Grand Rapids, Michigan
Made in Canada, too (414)

This is one of our advertisements running in the Spring issues of the national periodicals. The list of mediums includes the big women's publications, the Literary Digest, Saturday Evening Post, and several journals of large circulation, concentrated in the smaller towns. This advertising is well supported by the high grade advertising material, we furnish for use in your store, consisting of show cards, window displays, and circulars, also, attractive newspaper cuts of general pictorial value. Write for Spring Offer.

BISSELL CARPET SWEEPER CO.

GRAND RAPIDS, MICH.

New York—25 Warren St. Made in Canada, too.

Talk No. One Hundred and Eighty-Seven

There's nothing to be gained now by holding back your Spring order for "PREMIER" GALVANIZED STEEL SHEETS—"Time is the essence" of many contracts and repair jobs. Be sure you get your supply in good season, now that price is down.

TINKER TOM.

Look for Talk No. 188 next week.

DOMINION SHEET METAL CORPORATION, Limited

The Most Popular Ratchet Combination

The "Keystone" Reversible Ratchet combination No. 200 has been proven by many hardware dealers to be the best seller in their localities It consists of ratchet for taper shank drills, sleeve for square shank drills, and short boiler socket for square shank drills, sockets are interchangeable. All working parts are enclosed, preventing dust and grit from clogging up mechanism.

"KEYSTONE" Drilling Post or "OLD MAN"

Sales of Keystone Ratchets open the way to sales of Keystone drilling posts—the time-saving brace.

"Keystone" tools are known the world over for high quality. Sell them for profit and prestige. Let us know if your jobber can't supply you.

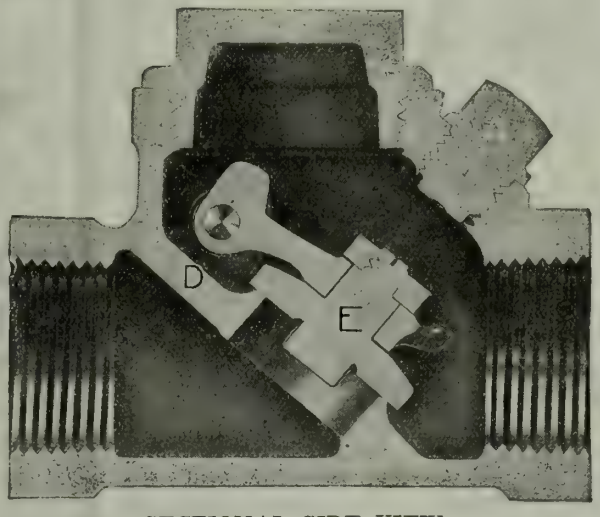
PENBERTHY



SWING CHECK VALVES

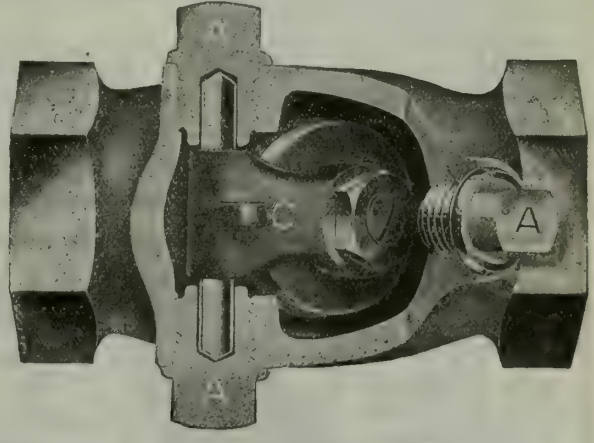
There is nothing safer than a **Penberthy Double Plug, Regrinding Swing Check Valve.**

The "Check Superior," that overcomes **valve prejudice** on steam lines.

It can always be relied upon to work.

SECTIONAL SIDE VIEW

Penberthy Swing Check Valves are substantially and strongly made. Possess a special wear resistant bronze composition disc. Have a liberal thickness of metal in both body and diaphragm.



Note the double plug feature; a decided advantage over all other makes. Allows all repairs to be made without removing the valve from the pipe line.

All genuine **Penberthy Checks** bear our trademark and the registered pressure, 200 lbs., is cast on each.

The **Penberthy** name is in itself a **"guarantee of quality."** Engineers, Steamfitters, Plumbers, Purchasing Agents know that.

Cash in on the **Penberthy Reputation** by stocking a line of **Penberthy Valves.**

Regrinding, Compodisk, Check and **Gate Valves**

SECTIONAL TOP VIEW

MANUFACTURERS OF HIGH GRADE BRASS VALVES

PENBERTHY INJECTOR CO,, LIMITED

Windsor, Ontario

MADE IN CANADA

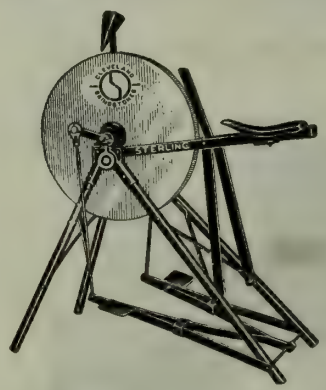
BUFFALO OILS

These are a few of our most staple lines, so well and favorably known throughout Western Canada, and are sold only through reliable merchants.

Special Cylinder Oil for Steam Engines

Harness Oil. Neatsfoot Oil

A Gas Engine Oil (for gasoline engines).



Tractorlene Oil (for oil burning engines).

Ideal Thresher's Machines Oil (for general use).

Automobile Oil and Transmission Greases.

PRAIRIE CITY OIL COMPANY, LIMITED, WINNIPEG

"HERE IT IS"

Cleveland Grindstones

We own and control 22 quarries, including the only quarry producing the genuine Berea stone, the rock by which all other grindstones for farm and general use are judged.

Through long experience we have the expert knowledge necessary to make intelligent and satisfactory selections of the proper grit best adapted to special requirements.

THE CLEVELAND STONE CO.

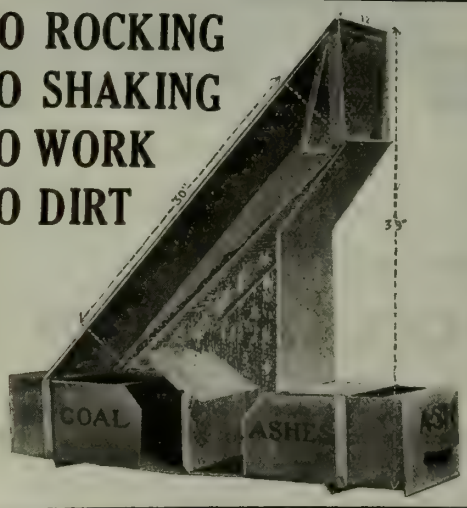
UNION BLDG. CLEVELAND, OHIO

Bissett & Webb, Limited, Winnipeg, Man.

Western Distributors

Presto

Ford BODY BRACE



Here is a good selling proposition—good because it really serves the Ford owner and saves him money. The Presto Body Brace and Running Board Support stops side sway, prevents broken springs, holds the body rigid and all mechanical parts in their natural position. **Stops rattling and sagging of running boards and keeps fenders from breaking away from running board.** Doubles the life of the car. Price to dealers in Canada, $3.33.

Write to-day for the Presto Dealer Proposition and catalog of 100 Presto accessories of well-known merit. You will recognize in Presto a real profit-winning, business-building line.

ASH-SIFTERS THAT MAKE SALES

Made of Galvanized Iron with Black Iron Doors, Self-Closing Doors, Removable Screens

This makes ash-sifting a pleasure instead of a horror; you can wear your best clothes and yet not get any dust on them.

It is dustless; you don't have to rock it or shake it; it is self-operating, a child can work it.

We guarantee that this ash sifter will give satisfaction or your money refunded. There are good profits in it for the dealer. Write us to-day for prices and information.

TRADE MARK "MORRISCA"

When you see the above Trade Mark on anything pertaining to Fishing Tackle you need have no hesitation in recommending it to your customers.

There is no possibility (except in a few articles) of prices for Fishing Tackle being reduced before next season, so that during the period of transition you would be well advised to place orders well ahead of your every-day requirements.

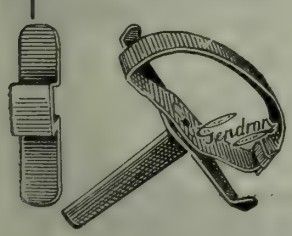
Orders for future delivery are now being booked, but owing to the great pressure we have had with Government work it will be some time yet before we are able to attain our pre-war output.

Our new General Catalogue is now in preparation, and we are placing on a Register the names of Fishing Tackle Dealers who will obtain a copy on publication. Have you sent in your name? If not, do so now.

In the meantime we invite and welcome your enquiries and will be pleased to quote you for anything we can supply. We are Wholesale only, and all enquiries from consumers direct are referred to the nearest retailer. We don't cut into his business.

Morris Carswell & Co., Ltd.
118 Howard Street, Glasgow, Scotland

The Never-Fail Oil Can for Kerosene



The Never-Fail is clean and convenient. It pumps the oil into a lamp without fuss or muss, and if the lamp becomes too full the pressure of a finger draws the oil back again. The Never-Fail is made of high-grade aluminum-finished galvanized ware, has a capacity of five Imperial gallons, and is absolutely guaranteed. You can't do better than put in a few Never-Fails on trial.

IN THE Financial Post THIS WEEK

IMPLEMENTS FOR IRELAND

REPRESENTATIVES of the Irish Co-operative Agricultural Society, now in Ottawa, have concluded arrangements for the purchase of a large quantity of agricultural machinery. This order was placed with the Frost & Wood Co. of Smiths Falls, Ontario, and will be put in hand at once. It is learned that other orders from the Co-operative Society—orders of considerable magnitude—will follow very shortly.

Francis H. Whitton of the Steel Co. of Canada on Keeping the Wheels Turning

"There may be justification for criticism in regard to dissatisfaction and strikes in time of plenty, but when it comes down to trade conditions as at the present time, caused by no fault of either the employer or employed, it is time for a consultation to diagnose the situation seriously and call on every source of possible assistance to provide a remedy and no one can escape the personal responsibility to play his part to the full. Our fighting men have proved their metal, our generals have led their forces to a successful issue and I say if our Canadian citizens will do their part in the same spirit through the whole ranks of manufacturers, consumers and distributors of Canadian products, the industrial forces, both employers and workmen, will put forth efforts that will result in Canadian commerce taking on life to a degree that will provide employment and build up business prosperity and confidence."

Besides the important article from which the above quotation is made, THE POST this week deals with the following amongst

The Big Annual Spring Buying and Directory Number of HARDWARE AND METAL

Canada's National Hardware Weekly

will appear on

March 22

The advertisements in HARDWARE AND METAL'S Annual Spring Number are salesmen who are right on the job when Canadian hardware merchants are placing the biggest orders of the year.

Hardware buyers in Canada hang up their copy of HARDWARE AND METAL'S Spring Number, close beside their desk. A cord is inserted in the upper left-hand corner for this purpose.

Impress buyers with the importance of your firm and the quality of your goods! Make the impression strong and lasting by using big space in the biggest and best annual issue of any Canadian trade paper.

There is scarcely a hardware store of importance in any part of Canada where you will not find HARDWARE AND METAL.

EXECUTOR'S SALE

by Tender of Commercial Property and an Old Established Hardware Business

In the matter of the Estate of the late Wm. Strachan of Ottawa, Hardware Merchant.

The valuable commercial property on the corner of Booth and Queen Streets West, Ottawa, Ontario, consisting of three stores, two apartments, two dwellings and a two-storey stone store house and stable in rear; also an exceptionally well-assorted stock of hardware.

This is a very prominent situation, being on a street railway transfer corner.

This business, established for thirty years, is without doubt one of the best hardware locations in Eastern Ontario. An exceptionally fine business has been done here, and it is an unusual opportunity for some live man.

Tenders will be received by me up to three o'clock P.M., on Saturday, the fifteenth day of March, 1919, for the purchase of the property and hardware stock, either en bloc or separately. The buildings, stock, etc., may be inspected any time up to the closing of the tenders.

A marked cheque for Five Thousand ($5,000.00) Dollars, payable to the Estate of Wm. Strachan, must accompany each tender.

The highest or any tender not necessarily accepted.

Cheques will be returned to unsuccessful tenderers.

Further information regarding terms, etc., may be obtained upon application at my office.

WM. A. COLE,
63 Sparks Street,
Ottawa, Ont.

Complete information about the day's business just as soon as you want it

That's what a modern National Cash Register will give you. At closing time a glance at your register will show many things.

1. Total amount of merchandise sold.
2. Total cash received for goods.
3. Amount of your charge sales.
4. Detailed record of cash received on account.
5. Detailed record of cash paid out.
6. Amount of each clerk's sales.
7. Number of customers each clerk waited on.
8. Total number of transactions made during the day.

All these figures are there before you—absolutely accurate and reliable because they have been recorded *by modern machinery*

You cannot afford to be without the valuable information that an up-to-date National Cash Register will give you.

A New Product, Easily Sold

Millions of pairs of Neōlin Soles in active service have proved Neōlin to be the hardest-wearing sole material made.

Neōlin Soles mean comfort, flexibility, waterproofness and long wear.

Over four hundred shoe manufacturers equip their product with Neōlin Soles.

Canadian men and women have proved Neōlin qualities for themselves. They have the confidence in it that comes from actual experience.

Now a master advertising campaign is driving home the merits of Neōlin Half-Soles — the half-soles with all Neōlin's advantages; that may be nailed or sewn on worn shoes.

Many of your thrifty customers who repair their own shoes have tested Neōlin. They will want Neōlin Half-Soles for their repair work. Others have heard of Neōlin economy and will welcome your suggestion that Neōlin Half-Soles will put new life into their worn shoes.

Get your share of this convincing advertising. Order a supply of Neōlin Half-Soles at once. Display them in your window. They will draw trade and add a new profit-maker to your business.

Neōlin Half Soles are packed in an attractive display carton containing a dozen assorted sizes. Order from your wholesaler.

HARDWARE AND METAL, March 1st, 1919. Volume XXXI., published every Saturday. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under the Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

Apply the Ideas You Learned At the Convention

From the addresses you heard at the Convention Meetings, and the informal talks with other hardware men around the corridors, you picked up a lot of ideas for improving your business.

Lose no time in putting these ideas into practice. Right now, while they are fresh in your memory, use those ideas to lay your plans for a bigger business in 1919 — and a more profitable business.

WHAT ARE YOU GOING TO DO ABOUT INCREASING YOUR SALES?

Here is a line on which you can practise your selling ideas with the best possible prospects of success.

O-Cedar is nationally used and advertised—your selling effort is reduced to a minimum.

O-Cedar carries a handsome profit, and *sells at the same prices everywhere.*

O-Cedar will fit into your advertising and display plans. We furnish free electros and display material to help you.

O-Cedar is a great repeater. The average family will buy once a month. Keep it constantly to the fore.

O-Cedar will help you to sell other goods, because it will keep people coming to your store.

Put your best efforts behind *O-Cedar* and watch it move!

REG. CAN. PAT. OFFICE

Soon be time for lawn and garden tools and —

GOODYEAR CORD HOSE

--the kink-free, trouble-proof hose, built for real service

Only a few weeks and the call of the back-yard garden will come—the green of the lawn will show the need of a thorough clean-up.

Don't wait until the call comes to place your order for garden needs, but have your stock ready to meet the demand.

Look over your carried-over stock of garden hose, lawn rakes, lawn mowers, grass shears, lawn rollers, garden rakes, hoes, spades, "D" handle spading forks, etc., and sort up.

Among other well-known lines we call your attention to the following:

LAWN MOWERS

Dille & Maguire, Taylor-Forbes and Philadelphia makes.

Goodyear Cord Hose

—the oversize hose (5/8") which gives 25% more water than 1/2" from the same house service.
—the hose that stands rough usage, such as dragging over rough sidewalks, around corners and trees.

Because—it is made for service; built of strong, pliant cords, each embedded in pure rubber—cannot crack, leak or kink. Made on the same construction plan as cord tires.

We also carry a full range of other well-known makes of garden hose.

J. D. Lawn Rake

—the rake that strips the dandelion and cleans the lawn without injury to the roots of the grass.

Ask the Rice Lewis representative for prices on the above lines when he calls or write direct

The Nationally Advertised Hack Saw

Star Hack Saws are being advertised nationally in a larger way than any other tool. The schedule of full page ads in the Saturday Evening Post is now being increased to double pages at a cost of $10,000 a piece—a yearly advertising appropriation on Star Blades of more than $100,000.

There are big possibilities in the sale of Star Blades to factories and smaller shops, to plumbers, steam-fitters, iron workers, electricians, garage men and every mechanic who cuts metal.

If you get behind the green box with the black label, Star Blades will move now as hack saws never moved before. Our advertising is making Star Hack Saws, for so many years the leading blades, more than ever the dominating hack saws.

Be sure you get your share of Star Blade profits.

Our popular handbook "How to Sell Tools" will be sent free for the asking.

The Value of Doing Things

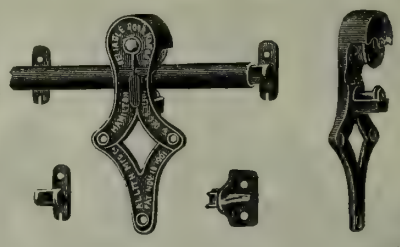
He who does things succeeds! That accounts for the great success of the—

PEERLESS STEAM COOKER

—it does things

Cooks Meat, Cake, Fish and Onions all at the one time, on the same burner without mixing the flavors. A whole meal in one operation.

The greatest Money, Time and Labor saver in the kitchen to-day. The initial cost is not large. It soon pays for itself in fuel saved.



We want you to know more about this wonderful cooker. Its substantial construction, its unique usefulness to the housewife and the splendid profits that are easily made by dealers in selling them.

Be the first to sell the *Peerless Steam Cooker* in your district. It will well repay you in customer's satisfaction and increased sales to your store. Our agency proposition is worthy of your careful investigation. Write us to-day for full information.

Onward Manufacturing Co., Kitchener, Ont.

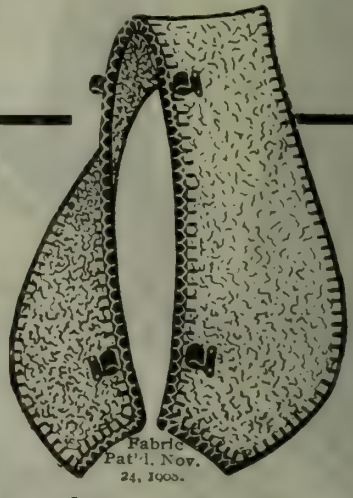
Reliable Barn and Factory Door Hanger

Cannot Bind on Track

Anywhere that a strong, really satisfactory door hanger is needed there is use for the "Reliable." It's true to its name—Reliable in every sense of the word, unbreakable, once it's on it never comes off, **never binds on the track** because of the lower wheel which keeps perfect contact with the round track no matter how the door is swung.



The "Reliable" is made of the best materials, in all sizes, 1 to 3, ranging from the light driving shed or narrow barn door to the extra large mill or warehouse door.

Richard H. Falkner, 34 Victoria St., Toronto, Ont., Representative; H. E. O. Bull, 184 Mance St., Montreal, Representative in Eastern Provinces; Marshall, Wells, Co., Ltd., Western Distributors.

Your enquiries will get prompt attention.

BARCALO

"S" Wrench

Simplicity

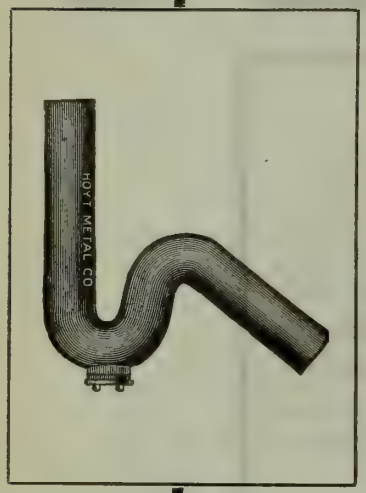
During our past twenty years' experience in the making and marketing of metal products we have made **Simplicity** a necessary quality—for an ideal "S" wrench. The absence of complicated parts in the Barcalo "S" wrench has made it a general favorite. Note the few parts, but four—a drop-forged movable jaw—screw—pin and solid bar. All combined to make a handy durable and useful tool for the Mechanic, Machinist and Garageman.

The Wrench

There are many things the Barcalo "S" wrench will do, that many other wrenches will not—there are splendid profits to be made by you in selling it and the customer's satisfaction created will mean an added **quality reputation** to your store.

Made in 6, 8, 10, 12 and 14 inch sizes.

Its Parts



Our guarantee is **your protection.** We supply without question a new wrench for every one proving unsatisfactory in any way. Write to-day for information and prices.

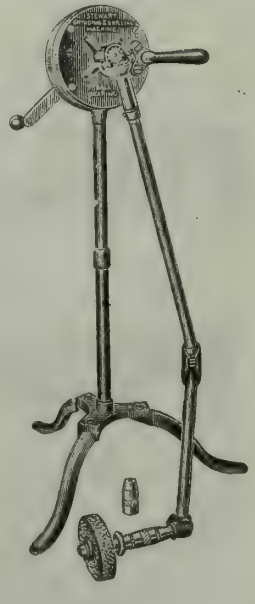
No. 5817—"Ideal" Regd. Rake

Now is the time to make a Farm-to-Farm Visiting Tour

There are any number of things to talk about to your farmer friends right now, and if you **go out to them,** you will not only make your visits directly profitable, but will strengthen friendships for all time.



Take with you a supply of **Stewart No. 1 Horse and Cow Clipping Machines, and Stewart No. 9 Sheep Shearing Machines.**

To **every** farmer you should sell a Stewart No. 1, for every farmer has horses and cows. Tell them how necessary it is for them to clip their horses just before the heavy spring work begins; how the horses will repay them for this humane act, by working better and growing stronger, with less likelihood of sickness and veterinary bills, because it is clammy sweat in long hair that makes horses catch cold. Also point out how much labor will be saved in currying each clipped horse.

Then tell the "missus" how all the big dairymen—especially those selling "certified" milk, clip all their cows around udders and flanks, about once a month the year round, so that with a few passes with a cloth before milking, the milker can make sure that no dirt or filth falls into the pail.

You sell this Horse-and-Cow Clipping Machine for $13.00 and make a substantial profit on each sale.

Stewart No. 9 Ball-Bearing Sheep-Shearing Machine

Explain to them how this machine gets on an average 15% more wool to the clip than hand-shearing, and how its use makes the whole clip worth more per pound because it is free from the short or "second" cuts that are unavoidable in hand-shearing.

You sell this machine at $19.00 and make a good profit on each sale.

Get in your order right away (direct or thru your jobber) for a stock of both machines, as all kinds of spring trade are opening up earlier than usual this spring.

Full descriptions of the above machines and a lot of good selling arguments will be found in our catalog. Send for it.

ST. CATHARINES ESTABLISHED 64 YEARS ONTARIO

Seed Savers

Your customers are interested in saving seed. Whenever practicable, they should *plant in hills*--not drills--and save the seed that would be wasted by planting in drills such crops as need to be thinned.

No. 306 Hill or Drill Seeder, furrowing, planting, covering, rolling and marking next row in one operation.

The hill-dropping feature of the Iron Age Combined Hill and Drill Seeders saves from a half to three-quarters of the seed that would be required by drilling, and it saves the labor of pulling out the extra plants.

Gardeners who know "what's what" say that Iron Age Garden Tools are the "best *buy*." And "the 'best *buy*' for the customer is the best *sale* for the dealer"—a rule you can well observe by offering your customers

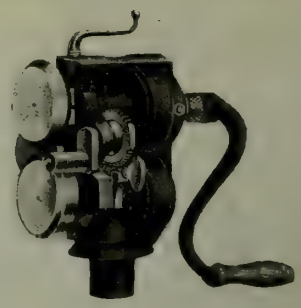
IRON AGE
GARDEN TOOLS

Labor Savers

All of us like fresh vegetables from our own gardens but none of us like the backaches which result from the use of the old-fashioned tools. Show your customers how easy it is to plant, ridge, furrow and cultivate in a *farm-like* way with Iron Age Garden Tools. Show them how market gardeners (experts) use Iron Age Seeders and Wheel Hoes. We'll send illustrated booklets that will help.

There are many kinds and sizes of Iron Age Garden Tools for use in the small home gardens, poultry farms, seed farms and truck gardens. Send to-day for catalogs, prices and terms.

Same tool does the cultivating, furrowing, ridging, weeding, hoeing, pulverizing, etc.



Made in Canada

The Bateman-Wilkinson Co., Ltd.

811 Symington Ave. Toronto, Canada

The Iron Age Line includes Potato Planters, Sprayers, Cultivators and Diggers; Corn Cultivators; Garden Seeders and Wheel Hoes; Truckers' Variety Machines; Harrows; Horse Hoes; Hay Rakes, Sulky Weeders; Field and Orchard Sprayers; Bucket and Barrel Sprayers; Fertilizer Distributors; Wilkinson Plows; Climax Ensilage Cutters, etc.

SMALL MACHINES

"Dependable and Accurate"

—it is dependability and accuracy that have built Dominion Ammunition sales for the dealer. From the beginning Dominion Ammunition has been subjected to inspection and tests that have brought it up to the highest of ammunition standards.

Dominion Ammunition

Above are shown two of the many processes that insure the dependability and accuracy of Dominion Ammunition —the individual inspection and the final machine test as to size.

is recognized by your customers because of its two cardinal points—**dependability and accuracy**—and they insist on having the ammunition that possesses them. Impress on them that the nimble fingers and quick eyes of scores of inspectors detect the slightest visible imperfection in Dominion Cartridges or Shotgun Shells. Intricate machinery tests the quality and quantity of loads and measures to a hair the calibre and size—all a part of the Dominion Service to guarantee ammunition that is "dependable and accurate."

Build your sales of Dominion Ammunition on this and benefit by the profit you make on these sales.

Order from your jobber to-day.

Paint Firms Start Advertising Campaign

Decision Reached is of National Scope—Will be Directed by Committee—Consumer to be Educated as to Advantages of Paint and Varnishes — Plans May be Extensive Later—Dealer Should Profit by Publicity

AT a meeting of the Canadian Paint, Oil and Varnish Association held in Montreal, it was agreed that the national campaign of publicity which has been under consideration, should be undertaken. A committee composed of George Henderson, president Brandram-Henderson Ltd., R. C. Misson, Montreal, manager of the Sherwin-Williams Company of Canada, Limited; A. T. Black, general manager of the Martin-Senour Co.; Mr. Mihell, of the Imperial Varnish and Color Co., and A. W. Poole, of McArthur-Irwin, Ltd., was appointed to look after the campaign. It was proposed that this committee should proceed with the necessary plans at once.

Plans May Be Extensive

At the present time the initial expenditure is to be about $15,000. HARDWARE AND METAL is informed that the amount is already amply subscribed, and the committee will therefore be in a position to undertake its work forthwith.

While the underlying thought is that of maintaining a large sale for all lines of mixed paints, specialties, and varnishes, and of creating a bigger sale, the additional idea of popularizing these lines and of giving the dealer as much assistance as possible will be carried out.

Some weeks ago HARDWARE AND METAL outlined some of the plans that were being adopted in the United States by the manufacturers there, relative to the greater use of these manufactured goods. It is in pursuit of a somewhat similar policy that the present campaign is being undertaken. Both consumer mediums and trade papers are being utilized in the effort to popularize paint and kindred products.

True vs. False Economy

"It will be pointed out in this campaign," said W. S. Fallis, managing director of the Sherwin-Williams Company of Canada, Ltd., "that there is economy in preserving buildings through the application of good paint, and that it is false economy to be without the preservative advantages of paint."

Mr. Fallis also pointed out that various information relative to the efforts of the paint and varnish makers in the United States would be collected by the committee. Plans already contemplated, will apply to the present season only, Mr. Fallis stated, but he thought the idea might be continued later and that a general publicity campaign might be continued for several years.

"It should do much in this, the reconstruction period," said Mr. Fallis. "There will be two objects before the committee, first, that of the value of keeping property in good condition, and secondly, that surroundings make home life liveable."

Ought to Help Dealer

This announcement, the paint firms believe, will be a most welcome one for the retail hardware trade from coast to coast as the campaign is to be a national one. When the experience of the paint and varnish men in the United States is secured and this collated, it will, it is believed, enable the Canadian trade to take advantage of ideas already in operation. For, as pointed out by A. W. Poole, of McArthur, Irwin, Ltd., "a great deal of investigation work has been undertaken, and this information will be, I am sure, at the disposal of the Canadian paint manufacturers."

WALTER B. RAMSAY

President of A. Ramsay & Son Co., Montreal, who will go to Europe shortly to secure export business.

The season ahead ought to be a good one. In accordance with the forward policy that the paint men have followed for many years, and in keeping with this, the present assistance toward wider publicity should be a definite and a direct assistance to the dealer. It will serve to help his own local effort to get business, and if the national advertising is watched closely, it will be possible to hook up with this in a timely and an effective manner. Details of the campaign will be worked out immediately.

GOING TO EUROPE

AS a result of the conference held in Ottawa recently with members of the Canadian Trade Commission, the Canadian Paint, Oil and Varnish manufacturers will send their representative to Europe with a view to obtaining actual export business. Walter B. Ramsay, vice-president of the association, and president of A. Ramsay and Son, Co., has been chosen to make this trip personally, and it is Mr. Ramsay's intention to sail early in March.

HARDWARE AND METAL is informed that it is essential to have an expert on the ground in order to secure this trade for Canada. Mr. Ramsay, having been in the paint and varnish manufacturing business for twenty-two years has definite knowledge of all phases of paint and varnish manufacture, and will be able to treat with the problems requiring decision on the ground.

On reaching London, Mr. Ramsay will report to the Canadian Trade Commission, where he will make his headquarters while in England, and he will here act in an advisory capacity in these particular lines, to this Commission. From this office, Mr. Ramsay will also work with the Trade Commissioners of France, Belgium, Italy, the Balkan States, and Siberia.

The Commission is hopeful that a more

permanent trade may be established in the Balkan States and Siberia, as these countries are chiefly of an agricultural nature, and in pre-war times they depended largely on Austrian and German manufacturers to supply their wants. It is hoped that, since the Canadian Government has, or is about to establish, credits with these various countries, a great deal of the trade will be brought to Canada to keep factories spinning at full speed. The receipt of these orders should go far in assisting the big scheme of rehabilitation, enabling returned men to be absorbed readily in permanent positions, with profit to themselves and the country at large. This very matter has had the consideration of large manufacturers, and this is one of the practical results they wish to accomplish.

Steel Situation in the United States is Puzzle to Many

MANY of the closest observers of conditions in the steel trade in the United States are completly puzzled over the present situation and prospects.

Apparently one of two things must be the case. Either more steel is being made than is actually being consumed, or when a reasonably full demand develops it will be absolutely impossible to meet it. The best information is to the effect that the United States Steel Corporation is operating at about 90 per cent. of capacity. That disposes of the case of about half the steel industry. Among the independents, comprising the other half, a close estimate cannot be made because the rates of operation vary so widely. Some small independent steel producers are closed entirely, while the majority of the large independents appear to be operating at rates ranging generally from 60 to 80 per cent. A fair guess for the whole industry would be 75 to 80 per cent. of capacity as the present rate of operation. The actual report of steel ingot production in January indicated a rate of 85 per cent. of capacity as the month's production, so that 75 to 80 per cent. at present would not represent a high rate relative to what occurred in January.

Ultimate Consumption

This covers production, and there is practically no doubt that the condition is substantially as stated. As to the rate of actual ultimate consumption there are few exceptions to the rule that ultimate consumption is at a low rate. As with many rules the exceptions furnish an excellent test. The most conspicuous exception is the automobile trade, which is taking steel at full normal rate, but the automobile trade at the outside cannot engage as much as 5 per cent. of the total steel-making capacity. Next come the agricultural implement makers, who are operating at a fairly good rate, but it is understood that they have fair stocks of steel, which they are reducing.

Not Very Busy

No other ultimate consumer is particularly busy. Apparently the Fleet Corporation is not taking as much steel as during the late months of the war, having a stock it desires to reduce. The car shops are almost idle. At least three-fourths of the 100,000 car orders placed by the Railroad Administration last April are in abeyance. It is regarded as an item of importance that the Pennsylvania Railroad has instructed the Cambria Steel Company to proceed to fill an order for 3,000 cars recently placed, while it is rumored that releases have been given as to certain cars ordered some time ago for France. These items indicate a very low rate of steel consumption by car shops in general rather than a high rate.

Export Trade Light

Before the war the United States had at least a fair export trade, while now that trade appears to be quite light.

The steel-making capacity of the country has increased during the war, or since the end of 1913, by 40 per cent. Assuming present production at the lowest estimated percentage of present capacity, 75 per cent., and capacity at 140 per cent. of that of 1913, the tonnage output at present would be 105 per cent. of capacity in 1913. If exports are as heavy as before the war, therefore, one has it that steel is being made at a rate in excess of the best rate of production at any time before the war or, substantially, at fully the best consumption rate ever attained before the war, when at various times all the consuming lines were very active.

WORKING THE STEEL PLANT

"Construction work at the Canadian Steel Corporation plant at Objibway, Ont., is proceeding, and when conditions again become normal the work will go ahead faster," said general manager W. B. Perley to HARDWARE AND METAL.

It will be several years before the construction work is completed and the plant in a position to commence operations, he said, but as soon as labor and material costs return to normal, the work will be rushed to completion as rapidly as possible.

PRESIDENT OF SHERWIN-WILLIAMS CO. IN ENGLAND

Walter H. Cottingham, president of the Sherwin-Williams Co., Ltd., is at present in England. Mr. Cottingham is visiting the English factory of his company, and will investigate conditions there and very probably will look into export matters before his return. It is Mr. Cottingham's first trip in three years, but in this interval the English business, Mr. W. S. Fallis, Canadian managing-director pointed out, had made steady progress.

PIG IRON PRICES.

As Related to After-War Periods.

Here are some interesting statistics regarding the course of the Pig Iron market after recent Wars, and we submit same, believing it will be of interest to you, as it has to us.

ADVANCE IN PIG IRON PRICES AFTER WARS

Russo-Japanese War

War declared	February 10, 1904	Valley Bessemer	$ 12.64
War ended	September 9, 1905	" "	14.95
Price	May 1907	" "	23.28

Spanish War

Really began	January, 1898	Valley Bessemer	$ 9.12
War declared	April, 1898	" "	9.66
War ended	August, 1898	" "	9.68
Price	December, 1900	" "	24.20

Franco-Prussian War

War declared	July 10, 1870	No. 1 F'dry Phila.	$ 32.75
War ended	May, 1871	" "	35.50
Price	June, 1872	" "	53.37

Civil War

	October, 1862	No. 1 F'dry Phil.	$ 18.61
	August, 1864	" " (Gold Basis)	29.44
Average year	1866	" "	46.67

Shortage of Pig Iron Capacity Shown by Comparison with Steel

	January 1, 1914	January 1, 1919	Increase
Steel	37,000,000	52,500,000	36 per cent.
Pig Iron	40,000,000	44,000,000	Only 10 per cent.

This is also shown by a comparison of production with the doubling of output each ten years, in million tons, as follows:

10-Year Periods	Tons Made	The Doubling Rule
1850-9	6.4	6.2
1860-9	10.5	12.4
1870-9	21.9	34.7
1880-9	51.5	49.5
1890-9	93.5	98.9
1900-9	197.8	197.8
1910-9	....	395.6
1910-8	281.8	
1919 say	44.0	
Less 1910-9		325.8

Apparent Shortage January 1, 1920, say in million Tons, 70.

"Plenty of Credit" Led to Extravagance

Calgary Dealers Are Now Operating on a Nearer-to-Cash Basis Than Before—Former System Often Led to Reckless Buying, Says One Hardware Man—Little Credit, Judiciously Given, May Help Business, Says Another

"THE credit business has changed considerably during the past two or three years," said W. J. Illsey, manager of the retail establishment of the J. H. Ashdown Hardware Co., Ltd., Calgary, to HARDWARE AND METAL.

"Where it used to be two-thirds credit and a third cash, it is now just the opposite. That is of course much more satisfactory, and it is a condition of affairs that has been brought about by the people themselves. During the war everyone has learnt the lesson that the system of plenty of credit led them into extravagant expenditure which they could not really afford. Of course we have no closed books now, and if any of our friends want a little credit we are always willing to extend it.

Accommodate Contractors

"There is, of course, more credit given when contractors are at work, as they require goods from week to week, and it is more convenient to them to pay an account monthly. However, when all is said and done there is nothing like having the cash in the till. You know where you are at every Saturday night, and you can start off on Monday morning with a clean sheet. No, the credit business is nothing like it used to be."

Reckless Buying

T. R. Stuart, of the T. R. Stuart Hardware Co., has much the same story to tell. He finds that people who formerly asked and took credit now pay the cash. The former system led them quite easily into reckless buying. This went very well in pre-war days when real estate boomed, and houses sprung up in the night, and business blocks stood where a vacant lot was the week before. Then, as prices started to creep up and the income was left panting in the rear, credit was despised and gazed upon askance, and democratic cash has taken the place of autocratic credit.

Mr. Stuart pointed out that it was the general collapse of the building industry that hit the hardware trade hardest, for with the building went the credit, and there were a number of those accounts that never showed up. When the general rule is credit and not cash, he says, it is a sure thing that the hardware man, or any other merchant for the matter of that, is going to protect himself so far as he is able, so the customer pays more for the goods than he does if he pays the cash. Mr. Stuart still carries along any accounts that are necessary with his regular customers, but cash is the main theme with the T. R. Stuart Hardware Co.

May Help Trade

"A little credit judiciously given is a help to business," was the opinion of G. L. Chesney, who conducts a busy hardware store on Crescent Heights. He does not say that such a plan is advisable in a very large city, but where a hardware man gets acquainted with his customers, has perhaps known them for several years, his faith in human nature is still strong enough to give them a little accommodation.

"No," said Mr. Chesney, "I would not favor cutting out credit entirely. As a general rule cash is the only sound basis, but many people of the class I have in mind will only ask for credit for 30 days, and as a rule there is no trouble. Of course, a merchant must watch carefully and must be a good collector. If his accounts are rendered monthly the small amounts are generally easy to get in. It is a reminder to the customer, and it is easier for him to pay then, than it is for him to have to double the amount at the end of another month, when he has run up another little bill.

May be Arranged

"In the case of large amounts, where a customer wants a furnace," he will probably arrange to pay half or a quarter cash, and the balance in monthly instalments. That is quite satisfactory to me, and I see no sense in holding to a hard and fast rule of cash on the nail in such a case. Up here on the hill I know so many of my customers personally, who have so often paid me cash, that it would be foolish for me to refuse credit for a few dollars when occasion requires."

"Cash With Order" Plan Being Tried By Alberta Firm

A "CASH WITH ORDER" plan is being inaugurated at Innisfail, Alberta, by the Watt Hardware Company, which has just taken over the business of the Day Hardware Company. The firm's announcement on the front page of the local paper is as follows:

Opening Announcement

We beg to advise that we have taken over the business formerly conducted by The Day Hardware Co. We would heartily appreciate a continuance of the patronage extended to them and hope by fair dealing and courteous treatment to merit your approval.

Our policy will be to give the public the best value for their money possible and we will endeavor at all times to keep a complete stock of hardware, etc., to meet your requirements.

We believe that a cash business will meet with the approval of the Innisfail district if a liberal allowance is made for cash purchases. We are inaugurating a "Cash with Order" proposition and are prepared to offer inducements on this basis that we feel will appeal to the people of Innisfail and district.

We extend a cordial invitation to all to call in and inspect our stock and give us a trial.

It Pays to Pay Cash at
THE WATT HARDWARE COMPANY
Innisfail, Alberta

Regina Paint Dealers Expect Big Business

The Regina correspondent of HARDWARE AND METAL writes as follows: "Paint is one of the departments in hardware stores which is getting all kinds of attention these days, every hardware merchant in the city is preparing for a rush on paint in the spring. Owing to the war many people have left painting alone, consequently many houses are very much in need of a few coats of good paint, saying nothing about garage and barns. The sun in this Western country in summer time is very hard on paint, also the cold winters, and I believe I am safe in saying that houses in this country should be painted every three or four years at least two coats, and it is up to the merchant to explain how economical it is going to be for every owner to paint this year. Many new residences were built late last fall and will have to be painted early this spring, so the merchant who is prepared and does the early advertising is the one who is going to have the best paint sales."

OPEN WINNIPEG WAREHOUSE

Scythes & Co., fishing supplies, twines and manufacturers of waste, Toronto, have opened a branch office and warehouse in Winnipeg, where a full stock will be carried to take care of Western business. The Winnipeg branch will be in charge of R. L. Scythe. Representatives with headquarters at Winnipeg will cover the three prairie provinces and through to the coast for the company. The Winnipeg branch is located at 143 Smith street.

What Hardware Men Are Doing

How Hardware Firms All Over the Dominion Are Going After Spring Business—Alberta Firm, in Offering Specials For Cash, Says Credit Prices Are Ten Per Cent. Higher

BOX BROS., Belmont, Manitoba, are featuring the following: "Mounted grindstone with roller bearings. Time saved. One man can do the work of two. Prices, $7.00." The firm is also advertising coal oil, coal oil and gasoline lamps, wrenches and oilers, harness, power and hand clippers.

* * *

J. B. SMALLWOOD, Maryfield, Sask., advertises as follows: "Do you know that we have a large stock of shelf and heavy hardware suitable for every requirement in the home or on the farm, and at very reasonable prices. Here are a few items: cook stoves, heaters, washing machines, churns, gasoline and oil lamps and lanterns, pans and pails of every description, cut glass, table and pocket cutlery."

* * *

"REDUCED Prices For Heavy Fencing" is the headlines of the ad. of "Lawrie, the Hardwareman," Forest, Ont. After quoting prices on eight lines, he continues: "Every rod absolutely guaranteed or money refunded. Order early." The remainder of the ad. is occupied by two specials, cold blast lanterns at $1.00 each and hand made axe handles at 35 cents.

* * *

MACNAB BROS., Orillia, Ont., tell their customers in large display type in an ad. 6½ by 5 inches that "New designs in wall paper, embracing all the new patterns for 1919, are just in." Below, in large type also, with a rule set above and below the announcement comes "We Sell Ouija Boards."

* * *

W. H. CUDDY, Strathroy, Ont., advertises as follows: "We are now prepared to book orders for your fence requirements for this season for ten days as follows: all prices guaranteed at time of delivery." Then follows an illustration of the fencing and description and prices.

* * *

MACLACHLAN HARDWARE CO., Armstrong, B.C., is boosting indoor painting by the following ad: "—— is ready for use. It dries over night with a high gloss that withstands soap, water and weather. Use it for all interior decorating on furniture or floors. Use it for all exterior finishings and decorating, such as carriages, automobiles, wagons and machinery." Then follows a list of sizes and prices.

* * *

"SPRING cleaning will very soon be here," says the ad. of W. A. Gabb, Rocanville, Sask., in display type. This is followed by "We are ready for any demand," also in display and the following: "Everything necessary from a scrub brush to a brand new home. Brushes of every kind in many varieties, Paints, Oils, Varnishes, Stains, Alabastine in all shades. Washing machines, wringers, wash tubs and wash boards."

* * *

D. F. SMITH, Shelburne, Ont., says in his advertising space: "Will the person who borrowed a brace from me nearly two years ago kindly return the same?"

* * *

MOSHER & BISHOP, Jubilee Hardware, Melfort, Sask., announce that they have just added to their stock a complete line of sewing machines. "They are backed by our Jubilee guarantee," says the ad. "Money refunded if not satisfactory." Three styles of machines are listed with prices and all details. The lower section of the ad. is taken up with a bargain sale of aluminum ware.

"HERE is a Money Saving Chance to Purchase Automobile Tires" is the heading of the advertisement of Chalmers Hardware, Deloraine, Manitoba. Below is listed three sizes of tires guaranteed for 3,500 miles. A section of the ad. below this is occupied by a cut and description of a range the firm is featuring and in two smaller sections at the bottom are details regarding a special on coal oil heaters and automobile oil.

* * *

JACKSON BROS., LTD., of Pincher Creek, Alberta, offer for strictly cash prices a number of specials in harness. "These prices and values defy competition," says the ad. "Compare prices anywhere in the West. Call in and examine the goods and be convinced. Credit prices are ten per cent. higher."

* * *

"ARE You Going to Paint?" is the heading in display type of the ad. of the Fulton Hardware Co., Ltd., of Enderby, B.C. "We carry the largest and most complete stock of paints and oils in the Northern Okanagan," continues the announcement. "We have paint for the home, farm, implements, cars, barns and everything that needs paint. Paint and varnish brushes. Every want in hardware can be supplied by us at the lowest prices."

* * *

"KEEPING Yourself Fit" is a simple matter, says the Ashdown Hardware Co., of Calgary, in display type. An illustration of a shower outfit in use followed by directions for use, for taking physical exercise, etc., complete the ad.

* * *

MILLS HARDWARE CO., LIMITED, Hamilton, Ont., heads an ad 11 inches wide by 12½ inches deep "Mills Hardware News" in display and below "Some Wash Day Specials," also in display. The ad is most attractively arranged and illustrated and among other things offered are washers, electric, power and hand; wringers, tubs, boilers, wash boards, electric irons, wire and rope clothes-lines, ironing boards and wash benches. A description of each article is given and the price in large figures. In connection with the washers, buyers are urged to come into the store and see a demonstration of the machines in action.

* * *

SUMNER HARDWARE CO., Moncton, New Brunswick, is featuring "Lanterns at a Bargain" in its advertising. Cold blast, brass fount, painted lanterns, regular $1.50 to $1.75 are offered for a few days at $1.00. Climax tin lanterns, regular 75 cents, are offered at 50 cents. "See Our Window" concludes the ad.

* * *

R. CHESTNUT & SONS, Fredericton, N.B., in heavy display type advertise as follows: "Solid comfort after using the —— Safety Razor. Take a razor home for thirty days, give it a fair trial and if not satisfactory return it. No charge to you at all unless you decide to keep it. Absolutely guaranteed to give you perfect satisfaction."

* * *

ASHDOWN HARDWARE CO., Calgary, heads an ad offering clocks with the caption: "Right on Time Every Time" in display followed by "That is the way to success. Late-comers are not the ones to receive the better jobs. Our alarm clocks keep you right on time." Four good sized illustrations of clocks accompanied by some descriptive matter and the price in large figures complete the announcement.

OBJECT TO TAXING OF MAIL ORDER BUSINESS

THAT Border Cities merchants have little fear of the competition of the mail order houses located in the larger cities of Canada and the United States, was indicated at a meeting of the executive of the Retail Merchants' Association at Windsor, Ont., when, after considerable discussion, a resolution, introduced by Director George H. Wilkinson, was unanimously adopted, objecting to the efforts of the Provincial organization to secure legislation imposing different community taxes on mail order business.

Members of the directorate expressed themselves as disapproving the action proposed by the Provincial body as un-British in that it was founded on a person or business being taxed twice on one transaction.

It is expected that the proposed recommendations to the Ontario Legislature in connection with taxing of mail order firms will be drafted in committee on Thursday next. The question has aroused a great deal of interest among retailers all over the province and especially in those sections where the mail order firms have been expanding their business. A number of retailers, it is stated, have been taking the matter up with their members and urging that some action be taken at the present session of the Legislature.

WILL FIGHT DEMAND OF RAILWAYS REGARDING BOND

AS a result of protests that have been made by manufacturers all over the Dominion the proposal of the railways to put circular No. 97, as detailed in last week's issue of HARDWARE AND METAL into effect, has been again postponed. This time the date for establishing credits with the railways covering transportation charges is set as June 1, and in a circular sent out by the Canadian Railway Board, the reason for postponement is given that there was not sufficient time allowed for shippers to arrange for bonding by March 1. According to information given to HARDWARE AND METAL, the manufacturers are going to stand absolutely pat on this matter of bonding. As stated in HARDWARE AND METAL last week, they object to the railways' proposal of giving any bond and do not see the necessity for such a demand. The manufacturers declare that they absolutely will not furnish any bonds and will ask that the clause relating to this matter be eliminated altogether. A meeting will probably be held during the coming week to take this matter up with the Canadian Railway Board and urge that the bond section of the proposed regulations be discarded as unworkable. It is stated that the retailers may also take some action to co-operate with the manufacturers.

HOTELS MUST BUY FROM RETAILERS ONLY IN FUTURE

AT a meeting of the Regina retail merchants, a vote was taken on the question of closing at six o'clock on Saturday evenings and the decision in favor of the move was unanimous. Committees were appointed to circulate petitions in all trades and an effort will be made to have a by-law passed which will make this hour general. Regina wholesalers and retailers have completed an important agreement by which in future the hotels from now on must buy from retailers only. The Provincial Retail Merchants' Association convention will be held in Regina on May 13, 14 and 15, and steps are being taken to provide something in the nature of a merchandising course, lectures and training for the use of merchants and their associates.

Current Events in Photograph

Bomb-Proof Sheds for Hun U-Boats

The destruction wrought by the Allied airmen in the vicinity of Bruges, especially where the German U-boat fleet was quartered, was so great that the Huns spent large sums of money in constructing the bomb-proof sheds shown in the picture. These were built for no other reason than to minimize the losses caused by the aviators.

London Hardwaremen Hold Banquet

Trade Representatives Talk on Business Subjects at Second Annual Banquet of Retail Hardware Men

UPWARDS of 100 hardwaremen and trade representatives attended the second annual banquet of the retail hardwaremen of London, Ontario, which was held on Thursday evening, of last week. A splendid dinner was provided and the programme of music and toasts which followed helped to make a pleasant and profitable evening for all those who were present. The good fellowship displayed at the banquet was evidence of the splendid co-operative spirit which exists between the hardware merchants of London, despite the fact that they are keen business competitors.

The London hardware merchants not only meet to discuss trade problems, but they also put on social events which help to cement the splendid spirit of friendship which exists between the various branches of the trade in that city. The annual picnic which is held at Port Stanley is one of the outstanding events of the trade, and as a result of each picnic there is a big cash surplus which is used for charitable purposes. For instance, the hardware merchants of London have given seven cows to the Byron Sanitarium with proceeds which have been secured from annual picnics.

Toast to Canada

Following the dinner, Thos. A. Jones, of the Cowan Hardware Company, acted as toast master, and the toasts were drunk in ginger ale, which was accepted as a substitute for the regulation toast drink of former days with good grace by everybody present. Following the toast to the King, Toast Master Jones called upon Geo. D. Davis, manager of HARDWARE AND METAL, and Chas. W. Maguire, manager of the London branch of the Imperial Oil Company to respond to the toast of Canada and the British Empire. In the course of his remarks, Mr. Davis stated that the advent of peace had brought new problems to Canada and the British Empire, and that every business man who has the best interests of the Empire at heart should take an active part in assisting to solve the vital problems which are confronting business to-day.

A Great Future

"For many years past we have been told of the great undeveloped wealth which abounds in Canada, of the tremendous area of our country, and of the great future which the country has in store for us. These things are all true," stated Mr. Davis, "and Canadians to-day are more firmly convinced than ever before that there is a great future ahead for Canada, but in our enthusiasm over the future outlook, let us not overlook the present day problems which are looming up in every direction. The rapidity or slowness with which Canada will benefit by her wonderful resources depends largely upon the action of Canadian business men at the present time and in the immediate future. We have reached a period in the history of Canada when it is absolutely necessary for every manufacturer, wholesaler and retailer, and in fact for every Canadian, to take an active part in keeping the wheels of industry turning and provide employment and prosperity for the people. The big question is: How are we going to best succeed with the task before us? And among the many answers we hear one outstanding reply, and that is for co-operation. We all agree that co-operation is one of the chief essentials, but if our co-operation is to count for anything it must be given wholeheartedly. We are to-day more familiar with the benefits of co-operation than we have ever been in the past. We have seen the results of co-operation between the allied nations. International co-operation for the protection of small nations as well as the large nations is an outcome of the war, and as nations we are beginning to understand each other better.

Solution of Problem

"When we in Canada understand each other better, when the East and the West understand each other better, when the Canadian hardware manufacturers, wholesalers and retailers understand each other better, then, and not till then will we achieve the goal which will place the hardware industry of Canada upon the pinnacle where it belongs. Canadian hardware manufacturers, wholesalers and retailers, travellers, and retail salesmen are all interdependent, and the sooner we realize that our interests are inseparably bound up together the sooner will we commence taking the strides which are necessary to enable us to do our part in building up one of the greatest, if not the greatest industry in Canada."

Lesson to Europe

Mr. Maguire suggested two truths which the guests might with profit take home with them to think over. The first was that the sanity of the people of the North American Continent, which had made it possible for two peoples to live next to each other during practically the whole time of their existence as nations without a gun to guard the boundary line on either side, was a lesson to the people of Europe, and a lesson which, as indicated in the move toward a league of nations, had been taken to heart. The second was that British justice and fair play had made of the British Empire the greatest empire in the world's history. This was particularly evidenced by the fact that the people of South Africa, with whom Britain was at war not so many years ago, had fought side by side with the Mother Country in the Great War.

In the absence of Mayor Sommerville, Alderman Moorhead responded to the toast to the City of London. Alderman Moorhead, who incidentally has a son who is a travelling salesman for a London hardware house, stated that the Association represented at the banquet was one which, besides being of great advantage to its members, had a potentiality for immense good to the city as a whole. Mr. Moorhead asked the guests to do everything they could in every possible way to boost the city of London.

Speak for Themselves

Mr. E. A. Dennis, of the Dennis Wire and Iron Goods Company, Limited, responded to the toast, "Made-in-London Goods." Mr. Dennis stated that the products of London manufacturers would speak for themselves in any part of the world. He further stated that the city of London is in need of new industries, and that despite the high tax rate, it is an ideal city both as a home and manufacturing centre. Mr. Dennis referred to the many substantial industries in London which had grown up from small beginnings, and urged all those present to do all they possibly could towards securing new industries for the city. Mr. Dennis referred to the hardware merchants as the shrewdest and best merchants of any line in Canada, and also referred to the splendid stores throughout Canada, to the splendid display methods, and the splendid manner in which the hardware merchants push the sale of such a wide range of products. One moment, stated Mr. Dennis, you will find a hardware salesman selling a keg of nails or a wire fence, and the next moment he is waiting upon an entirely different class of customers, and is perhaps selling cut glass or silverware. Mr. Dennis referred to the necessary training and the thorough knowledge which is required of a good salesman in order to be successful in selling the great range of goods which is found in a modern store.

Replying to the toast of the manufacturing interests, Mr. Adam Taylor, of the Taylor, Forbes Company, Guelph, Ont., referred to the erroneous comparisons which are frequently made between Canadian and United States products. Mr. Taylor gave several examples of how Canadian manufacturers were at a disadvantage in so far as the purchase of many lines of raw materials are concerned. Mr. Taylor also referred to some of the conditions which exist in certain parts of the United States in so far as child labor is concerned. Despite these handicaps, the speaker stated that Canadian manufacturers in many lines were turning out goods equal to the best of any other country, and urged his hearers to at least give Canadian firms the preference when conditions are equal and Canadian goods are of as good quality and finish as foreign products.

Look After the Boys

Mr. James A. Hossack, sales manager of the Lufkin Rule Company of Canada, Ltd., Windsor, Ont., in replying to the toast of the manufacturing interests, referred to the promises made to the boys who have gone to the front, and urged

upon his hearers the necessity of keeping Canadian factories busy, and in this way finding employment for the thousands of soldiers returning to this country at the present time. In referring to prices, Mr. Hossack stated that he could not see where prices on hardware commodities, and especially on the products made by his company could come down, even though there might be some slight reductions in the prices of raw material. Mr. Hossack pointed out that the labor cost is the greatest item in most manufactured products at the present time, and until there was a reduction in the cost of living we could not expect to see any marked reductions in the cost of labor. Mr. Hossack referred to the retailers as the people who market the goods of the manufacturers, and to a certain extent they are partners with the manufacturers in keeping the wheels of business running in Canada. Mr. Hossack stated that the way in which to keep business running at the present time is by wearing out the soles of our boots and not the seats of our pants. The speaker also urged that all conditions being equal the trade should give Canadian manufacturers the preference in order to assist in building up home industries.

Objects to Article

The speaker also referred to a report which recently appeared in the weekly bulletin of the Trade and Commerce Department at Ottawa. This article, stated Mr. Hossack appeared without any comments from this department, and in his opinion it was directly opposite to what he thought should be expecter of a department such as the Department of Trade and Commerce at Ottawa. The speaker claimed that the firms referred to in the article are not assisting in any way to build up Canada or Canadian industries, and that in his opinion the department should reprimand any manufacturer or wholesaler who would undertake to co-operate with Japanese to the extent indicated in this article. Mr. Hossack read the extracts from the February 10 issue of the "Weekly Bulletin" of the Department of Trade and Commerce as follows:

Boosting Foreigners

"On the title page of the 'Weekly Bulletin' this week appears an illustration of toys made in Japan in imitation of German toys. These toys were made particularly for sale in Canada, but they are likely to compete in all the markets of the world. Immediately after the outbreak of the war several large department stores of Canada sent buyers to Japan with samples of German toys with a view to getting them imitated by the Japanese. One wholesale house in Western Canada made a collection of over 8,000 German articles. Shortly after the outbreak of the war, the head of the firm took a trip through Canada, picking up German articles wherever he could find them in the retail stores. He afterwards went to Chicago and New York and bought German articles there. He then shipped the whole collection to a firm in Yokohama, Japan, asking them to get Japanese manufacturers to imitate them. In the case of one German jack knife which he sent over to Japan, the first Japanese imitation of it was not satisfactory. The Canadian wholesale merchants sent it back with a criticism. A second knife was returned from Japan which was better than the first, but not entirely satisfactory. The knife went back and forth eight times. Finally a quantity of jack knives were shipped to Canada which the Canadian importer states were superior to the German article and cheaper. The Japanese were very ready to receive criticisms and endeavored to satisfy the Canadian importer."

Against Canada

Did you ever hear, asked Mr. Hossack, of a Canadian wholesaler ever sending an article to a Canadian manufacturer or to have it copied and to have it passed back and forth, each time with suggestions and criticisms in order to have it made up to meet the requirements of the Canadian trade? You never have, and I never have, stated the speaker, and the firm that will do a thing like this without giving a similar opportunity to Canadian manufacturers is certainly not working in the best interests of our country. "Can you imagine any firm putting themselves to this trouble for a Canadian manufacturer, or did you ever hear of a foreign manufacturing firm doing this for use?"

Replying to the toast to the wholesale interests, Mr. S. Ray, of D. H. Howden & Company, stated that the hardware business is a profession requiring close study and application by hardware merchants and retail salesmen. Mr. Ray is of the opinion that prices will not decline to any extent for some time in the future, and that we will never again see pre-war prices for hardware. Further, the speaker hoped that there would never be pre-war prices, and that in the years to come the hardware trade would realize a legitimate profit on their goods instead of selling them at a loss, especially on staple lines as they did in pre-war days. The hardware merchant, stated Mr. Ray, gave more value for the money expended than the merchant in any other line of business.

Tells of Conditions

Mr. O. N. Parent, of Canadian Yale and Towne Ltd., St. Catharines, Ont., also spoke briefly on conditions at the present time. Mr. Parent stated that there is unquestionably a bright outlook for Canada, but it will be necessary for all branches of the trade to work together for the common good. Mr. Parent stated that one of the disadvantages connected with manufacturing in Canada is that we have not in this country a population sufficiently large to enable us to get the output of goods or the volume such as that of the United States or other countries where they had a much greater population.

William O'Dell, of O'Dell hardware, moved a vote of thanks to the visitors who had taken part in the evening's programme. Fred Crooks, of the Ohio Varnish Company, Cleveland, Ohio, told a number of stories, but these have been banned by the censor. The London Harpers and George A. Steer the entertainer and elocutionist provided a good programme of music.

Those largely responsible for the success of the banquet are: Thos. A. Jones, president London Retail Hardware Association; Thos. H. Purdom Jr., Purdom Hardware Co., secretary of the association, and Charles A. Craig, who, while not a retailer, is called the "Official Booster" of hardware activities in London, and who has always taken an active part in the social events of the London hardware trade.

Says Well Dressed Windows Will Sell Goods at Higher Prices

The Calgary correspondent of HARDWARE AND METAL says:

"There is nothing like a well dressed window to catch the passing trade, and it is astonishing how it will enable hardware men to get prices that he cannot obtain while the goods remain in the store and packed away on the shelves. He can get a higher price for goods displayed in the window than he can when they are marked at a lower figure in the store.

P. H. Holzworth of the Hall Hardware has had some interesting experiences along this line. To HARDWARE AND METAL he said: "We had a good line of English graniteware in the store marked down considerably below the usual price, and it was an undoubted bargain for the money. It failed to move to our satisfaction and I dressed the window with it, but marked it at the original selling price, laying more stress on the good quality of the goods.

"In a very short time that line was gone, at the price the goods was originally marked at. We did the same thing with a line of flashlights that we wanted to get out of the way, and they sold quickly. Our recent showing of aluminumware brought us good results, though this was not a case of marking up the price.

"This week we have been showing locks, but of course they have not moved like the other stuff did. I did not expect it of course, for the building trade is inactive at present. The window of fasteners and locks was more in the nature of sowing seed, for we have often found that a window display of this nature will fix itself in the memory of those interested, and they will come back later and ask for those same goods."

Tendencies Firm For Roofing

Scarcity of Various Material and High Wages Combine to Make Market Steady—This Should be Big Year—Hardware Dealer Ought to Sell More Roofings and Papers—Specialties Show Good Profits

"THERE are no surplus stocks of old rag clippings from which to make felt. The large dealers have none and the smaller handlers have very small stocks. Altogether there is very little surplus," said D. P. Hatch, sales manager of the Barrett Company, Montreal, in discussing the outlook for the immediate future on prepared roofings, with HARDWARE AND METAL.

"There has been no reduction in the cost of labor. There is not likely to be any while foodstuffs are high in price, and as all material used to date has been produced at high cost, there is nothing to indicate near declines of price."

The Rush Season

The manufacturer, in anticipation of an average amount of business requires to work at full speed during the winter months. It is necessary to do this because of the rush of orders that come in the early part of the roofing season and in the height of it.

"We have been working, in part, night and day," said Mr. Hatch, "and this is necessary so that we may have the stock to fill orders later. The dealer should, in order to secure his needs early, place his order for roofing so that he may not be disappointed later. For when the movement begins it soon reduces large stocks that have been made in advance.

Should be a Big Year

Mr. Hatch was of the opinion that this season should be a big one. There has been general prosperity for the farmer and he is a large user of prepared roofings, as well as of building papers and specialties that may be considered kindred products. Someone is bound to get the business and the hardware dealer should be a big factor in the distribution of this line, with profit to himself.

In the desire to increase his production during the past three or four years, the farmer has probably not paid as much attention to the protection of his barns and sheds as he should. He has deferred building. Many of these buildings will require attention this year,—in fact much must be done. It is therefore to be expected that the season ahead will show much interest in the matter of sales for these several lines, and the aggressive retailer will reap the benefit of his initiative and energy in reaching out for his legitimate share of what may be secured.

"There is no reason why the dealer should not get a large part of the business that goes to the mail order house," said Mr. Hatch. "The hardware dealer should be able to sell more of these lines. What he needs is more energy in reaching out for business; it is to be had if gone after properly."

Mr. Hatch believes that the hardware dealer ought to go after the big business. There is business in every community that can be developed and the dealer is in a position to get a big share of this. If he applies himself to the situation in his own particular district, he will very probably be surprised at the results to be secured.

For instance, his customer John Smith will erect a new barn or an implement shed this spring. He must have a roof for it, and will want a good one. To stand a change of getting the contract for this roofing the hardware dealer will need to be on the job early. It is none too soon now to check up on possible customers for this line. To make up a list of prospects now and write them personal letters, or better still, to call upon them personally, ought to be the best of business. And there is this to remember, that the mail order house catalog is there, very probably, ahead of you. It is also probable that the local lumber dealer has put in a bid for this business. All the more reason why the hardware man should make a stronger claim for it. It will be essential, in view of these facts if he wants the business, that he claim it early and go after it with the determination to land it.

Car Lots Using Helps

Mr. Hatch believes that there is wisdom in buying roofing and building papers and also other kindred products in car lots. This means a saving in freight. It means better delivery and the arrival of goods in better condition. "It does not take a great deal of these lines to make a 30,000 pound car," said Mr. Hatch, "and there is much advantage in ordering this way. There is a saving of freight that is considerable, and by selecting different lines, the dealer should be able to buy in this way to advantage."

These days, when such splendid lines are being made of various specialties, the dealer can develop a department for the sale of roofings, building papers, roof paints, cements and coatings. There is good money in these and as the same are put up in popular sizes such as gallons, five gallons and ten gallon packages, as well as in barrels, there should be no difficulty in getting these placed with one's trade. Once the roofing is sold, or after it has been on for a time, it ought to be treated to a coat of paint. It will be up to the hardware dealer to suggest this and in doing so he can enclose, in a personal letter to the owner, some of the attractive advertising mater that is put out by the manufacturer for his purpose, and which he will gladly supply.

It should be a good time to begin. The season will soon be here. Is your stock complete and can you not develop a greater sale, not for roofing and paper only, but for the various paints, cements, pitch, coal tar and other specialties that will serve to make a large and important department in the modern hardware store?

Hoping For Repeal of Industrial Profits Tax

Manufacturers of the Border Cities are expecting a repeal of the legislation imposing a war tax on all industrial profits in excess of 7 per cent. While no definite assurance has been given that this action will be taken, such a course was presaged by Hon. F. B. Carvell, during his address on the national debt, and the possible avenues through which it might be reduced when he suggested that while a greatly increased revenue was not only desirable, but imperative, he favored reducing the industrial profits tax.

Just what effect this would have on Canadian industry generally is indicated in the brisk action on the Detroit stock exchange on the day following the Carvell address, when practically all Canadian industrial stocks quoted, experienced a phenomenal advance. Dealing in Canadian Ford Motor Company was in the lead, and a sensational rise of 20 points was registered.

P. W. Grandjean, financial expert of the Ford Motor Company of Canada, interviewed by HARDWARE AND METAL, said he confidently expected a repeal of the legislation, as forecasted in the remarks of Mr. Carvell.

"The law in the first place," he declared, "was put through to appease public sentiment, which objected to the vast profits being accumulated by war profiteers, but while it was partially successful in this respect it also seriously hampered all Canadian industry, and while the larger concerns were affected, the burden fell heaviest on the smaller firms, which through extensive war and domestic orders were in a position to extend their plants, but were unable to do so because of the industrial profits tax, no allowance being made nor credit allowed for profits turned back into extensions."

Changes made in the directorate of the William Hamilton Company at Peterboro' included the retirement of J. C. Smith as president and of George G. Gladman, general manager and secretary-treasurer. There was a vacancy on the Board due to the death in action in France last summer of Ross Cameron. The new Board comprises Daniel Smith, of Kingston; Philip Talcott, of Bloomfield; Peter Westby, Louis Potvin and R. Munroe, of Peterboro'. Daniel Smith is the new president.

Business at the Capital is Showing Steady Improvement

By T. M. FRASER, Ottawa Representative of the MacLean Papers

AFTER the first of the year, business generally was inclined to be dull in the Ottawa district and particularly in the capital. Latterly it has picked up considerably; and the retail trade here appears to be satisfied. The unusually open winter has interfered with the stove trade, although buying at the first of the season was good. Collections have been fairly satisfactory.

It is the intention of the Gray-Harvey Company, about the first of May, to open up a wholesale sales room at 69 William street. The wholesale end of this firm's business has expanded rapidly and they now cover a territory within a hundred mile radius of Ottawa. Their new sales room will be in charge of A. J. Bedard, who was with Lewis Brothers of Montreal for some years and lately has been with the Cochrane Hardware Company, of Sault Ste. Marie.

W. A. Rankin, the Bank street hardware dealer, in conversation with the Ottawa representative of HARDWARE AND METAL, said that the building trade in Ottawa was looking up considerably. For some time this part of the firm's business has taken second place to the household trade; but, with the opening of spring, and the fact that the scarcity of houses here makes building absolutely necessary, preparations are being made for a good trade in builders' hardware. Such houses as have been built here recently have been almost altogether for selling; but the high price of lots in Ottawa has to a certain extent discouraged home-building. A 25 or 33 foot lot, reasonably near a car line, cannot be had here for less than eight hundred dollars, and it is pretty hard to get even a small house built for less than $3,500.00.

"We have been making a specialty of kitchen ware," said H. P. Plaunt, of the Plaunt Hardware Company. "Builders' hardware has been quiet. Building will have to begin again, but I am afraid it will not be for some little time. High prices of lumber and labor will have a tendency to keep the small man from building. The hardware end of it should not affect him greatly. There is not more than $125 worth of hardware in the average small house, and this is comparatively a small item. The mild winter has had a bad effect on the stove business, although it was good at the first of the season. Business has been picking up lately, and the outlook is not unfavorable."

The Making of Prepared Roofing

NOTE.—Through the courtesy of the sales manager, Mr. D. P. Hatch, of the Barrett Company, Montreal, HARDWARE AND METAL was shown the interesting operation through which felt passes in being treated and made into modern ready or prepared roofing. The same as reproduced herewith will be of interest to the hardware trade generally.

THE heavy felt used in the preparation of modern "ready roofing" comes from the mills in large rolls. These are of varying weight, according to the ply of roofing desired, and the treatment is practically the same, the heavier weights of felt absorbing a greater quantity, of course, of the wear-resisting asphalt.

An operator opens the roll of felt and this is passed over a huge roller. This roller is of steel and is kept at a high temperature. The purpose of this heated roller or huge drum is to eliminate all moisture that may have been absorbed by the porous felt, so that when the felt has passed over a second roller, also heated, it is ready for the first treatment of asphalt. This is applied in heated condition as the felt is passed along through a big tank containing asphalt.

More Rolling

Caught between rollers again, more asphalt is introduced as the felt passes onward through these rolls, the asphalt being thoroughly forced into the felt and becoming a part of it, the amount of asphalt taken in depending upon the weight of felt used.

As the felt passes through these rollers, it is given the "ridged" finish that appears on the surface and the rollers are made so that the finish obtained may be altered, this being done by the operator.

Passing onward, and the process being an uninterrupted one, the roofing is caught up and a solution of talc is applied to prevent the roofing from sticking as the same is rolled up. The supply or continuous sheet of roofing is taken up through a contrivance near the ceiling of the factory and which is so arranged that any delay by the operator at the farther end, who attends to the power-winding or spinning of the roll on which the roofing is rolled, may be automatically taken care of.

Cuts the Roll

This operator cuts the roll at a given place, at the ring of a bell, automatically set to ring when the proper weight has been rolled up. The roll is taken by another operator and immediately weighed. Should it be of incorrect weight the same is set aside as "seconds."

The operation is now all but completed. The last operator takes the roll of roofing, cuts a wrapper for it and quickly cements it securely. The small tin of cement and a package of nails are now taken from an endless carrier and placed within the centre of the roll, and with the end caps placed the same are securely bolted with the wire rod running from end to end, the label is put on and the roofing is ready for shipment.

Duty Merchants Owe To Their Home Paper

THE "Collingwood Bulletin," discussing the duty merchants owe to their home paper, says:

"Business men, and particularly those engaged in the retail trade, might well take note of what has happened in the Windsor newspaper field. There, the merchants are now brought into competition with the Detroit houses. In Collingwood the competitors are the Toronto mail-order houses, not too far away to have a serious effect on the home trade if permitted to get a firm hold. In Windsor the "Border Cities' Star" was purchased by a newspaper man from the West. He determined to devote his newspaper to building up the city by building up the home trade for the home merchants. He announced a departure from the policy of his predecessor inasmuch as he would not accept advertising from Detroit stores. The challenge was made to the home merchants to play their part—and they have failed. Instead of supporting the "Border Cities' Star" they held back, refrained from doing their share, with the result that the newspaper lost money and was driven back to the old policy of opening its columns to the Detroit stores, thus permitting them to re-enter the field at an annual cost to the merchants of Windsor of many thousands of dollars in loss of business. They refused to make their advertising appropriations such as would keep the field for themselves. They tore down the wall of protection which had been voluntarily raised by the newspaper. They failed to recognize that the "Star" was palying a big game, which it did until the breaking point. They hid behind the pride and policy of the newspaper. They counted on its loyalty keeping out the competition and rewarded it by "doling out only enough business to keep it so near starvation that there was nothing but agony in the difference." How many merchants in Collingwood recognize what the press of the town is doing to keep out outside competition? Week after week home buying is the gospel preached. Week after week outside advertising that would mean a bigger revenue to the newpaper is brushed aside. Week after week merchants are noticed hiding behind the loyalty of the Press. It cannot, in these strenuous times, when the graveyard of newspapers is being steadily added to, go on for ever. The Collingwood Press is no different from that of Windsor. It is maintained by its income, which, if not earned at home, must be secured elsewhere. A change of attitude on the part of many will avoid the reaching of the breaking point with its obvious sequel, the pressure right here in Collingwood of the outside competition. With those in business the matter wholly rests. Upon them lies the responsibility. The "Border Cities' Star" did not wish to turn back. Neither does the "Collingwood Press."

EDITORIAL COMMENT

ONE of the surest ways to get new customers is to get acquainted and keep acquainted with the people of your community.

* * *

LIFE is a selling problem and every man is his own line of goods.

THE POLITICAL HORIZON

POLITICAL events that may have an effect on the general business conditions of the whole country seem imminent. Many business men are asking what will happen if the United Farmers and the Labor Party join hands. Just what will happen is hard to say, but it would seem that some very radical changes would of necessity follow. In Ontario, many are wondering what is going to happen to the Hearst Government. Here again the United Farmers and Labor may unite. There are those who believe that a general political storm is brewing and that after it breaks and things readjust themselves again conditions generally will be much more settled.

RESULTS OF PUBICITY

THERE is nothing mysterious or wonderful about the big business built up by the mail order houses. On the contrary, their plan of action is very simple. They get the goods and then they take good care to let everybody for hundreds of miles around know about it. They make sure that everybody in every possible home they can reach knows all about the goods. They do this by advertising. There are hundreds of newspapers which will not accept mail order advertising and the mail order house tries to get around this disadvantage by its catalogues. This is another form of advertising. Advertising, however, is the whole secret of the selling success of these firms and there is a big lesson right here that the home merchant can learn and turn into profits. The mail order house realizes that it is terribly handicapped in the efforts it has to make to get business in many sections. The home town merchants if they are on the job can demonstrate the merchandise they have to offer. People can come in and talk things over with them and see the goods and compare sizes and prices. The mail order house, hundreds of miles away, cannot do this. Its only salesman is its newspaper ad. or its catalogue description. It depends on these for the big percentage of its sales. One of the quickest and surest ways of destroying mail order competition is to fight it with its own weapons. The merchant who advertises and advertises intelligently, who has the goods and who is prepared to give service in his store can oust the mail order firms from his field every time. The mail order firm knows this and is tireless in its efforts to find out the towns where the merchants either do not advertise at all or use such small ads that they are non-effective. It is useless to try to accomplish with a toothpick a job that requires a crowbar. The mail order firm, when it comes to advertising, is prepared not only to use a crowbar, but to supply a travelling crane if the effort is worth while and it has demonstrated that it pays and pays well.

MAY BE BETTER SALESMEN

SOME one has said that the best school of salesmanship is the school of hard knocks and experience. It would appear that this is being proven by the fact that young men who went overseas and returned are now better at selling than they were before. It is pointed out that two of the disabilities common in young salesmen before the war were timidity and fright and lack of force. In many cases there was added to this inability to understand or read human nature. This last was very often the result of inexperience, and of not having rubbed sides with the great buying public sufficiently to size people up quickly. It is stated that the conditions the youths had to face every day from the very start of their training was calculated to overcome these troubles To start with they were up against an entirely new set of conditions, and almost every minute they were meeting new men. They had to rely upon themselves very often, and on their own judgment depended a lot of their progress. In the case of young officers, who came in thousands from the business houses of Canada, it is stated this was especially noticeable. Some of them, when they first started and had to give commands, were almost frightened at the sound of their own voices. A few weeks though in the army and they developed confidence. The same was true of the men. The hard training, regular hours and the outdoor activity resulted in physical changes that wrought wonders in giving many of them the force they were lacking before. It is said there is no education like travel. This has also been exemplified in the case of the boys who have been "over there." They have

learned new languages, they have seen how other people do things, they have broadened out and they are coming back to their positions with a vigor they did not have before, and with a confidence and force that would have taken years of experience to have acquired in the ordinary way. They will bring to Canadian trade an added vim that may go a long way in increasing business.

NEEDS CAREFUL HANDLING

IN Canada as in many other countries there is just now a great deal of discussion of existing conditions, and of prospective conditions, suggestive that the country is confronted with economic and financial problems. The solution of these may rest in the solution of the general psychological problem. Canada is very prosperous, but would be still more prosperous if everybody did a fair day's work every day. Economic and financial conditions would take care of themselves. At present the psychological condition is wrong, and the mental attitude of many employers and employed is wrong. Many want too much for the service rendered the public. The right remedies cannot be selected until the nature and cause of the wrong condition is recognized fairly and squarely.

Wrong conditions can often best be met and remedied by straight thinking and decided action. One of the chief troubles to-day is what is in men's minds. Many are not disposed to work very much. They feel they can take life easy and make a good living. Poor labor performance is often brought about by there being more positions than men. Sometimes the surplus of positions is created by spending public funds, gathered by millions. To borrow money and mortgage the future in order to preserve an unsound situation is questionable policy, especially as an economic expedient.

There is very serious danger of this situation being attacked from wrong angles. If a remedy is to be applied, the causes of the present situation should be carefully considered, or some of the remedies proposed come dangerously near being repetitions of the causes.

WORLD'S GOLD OUTPUT

THE world's gold output for 1918 totalled $405,000,000, a reduction of $23,000,000 over the figures of the previous year when the value of the gold produced was $428,380,000. The reduction took place in the United States, as despite war activities other countries fully maintained their production. At the opening of the year the world's stock of gold was placed at $9,675,000,000. Of this amount the United States owns $3,080,510,000 or approximately thirty-one per cent. Canada as a producer of gold is steadily climbing, but not so rapidly as in some other lines of mineral production.

VIEWS OF OTHERS

NOW that the cordage industry is threatened with an indefinite continuance of Governmental interference with its affairs through the operations of the new Philippine Government development corporation, members of the trade can profitably devote more time to the consideration of how officialdom operates. It will be clear from such a study that, however badly private enterprise operates in a given case, Governmental operation is worse. —*Cordage Trade Journal.*

* * *

OPTIMISM will insure our prosperity. It is easy to precipitate a feeling of demoralization, and no more difficult to develop a sentiment of confidence and serenity. The question of keeping our prosperity depends much upon the attitude and speech of men.—Judge Gary.

* * *

WE are in a period of temporary uncertainty; but there is nothing alarming about that. We have had to change cars and are waiting for the next train. We haven't lost any baggage. We had to get out of the war business sooner or later, and the sooner the better.—George E. Roberts, National City Bank of New York.

* * *

SIX tons of catalogues from a Toronto mail-order house is being mailed out from the Brockville post office this week. No doubt this district will receive its usual supply. We advise our readers to see what our merchants can offer them before sending away their orders and we advise our merchants to let the people of the community know what they have to offer by the same means as the mail-order people employ — advertising. — *The Review*, Carp, Ont.

* * *

WHEN a certain person is asked, or a particular group of persons are asked, to deflate their charges, can and will assurance be given that similar deflation will proceed all along the line? Each person may have a different view as to how much others should deflate, but at any rate he is going to demand an equal effort on the part of all, or he personally will be indisposed to take up his part.

Without this completely general co-operation not much can be expected. A little deflation might occur, but not the whole amount that would be for the best interests of all.—*American Metal Market.*

* * *

IF municipalities wait for prices to go down before they start to build they will be in no position to carry out such a programme when that time arrives. It is much more of a hardship on a community to thrust an ambitious scheme of public improvement on its property owners in the face of stagnation and panicky conditions than it is when conditions are what they are to-day with money circulating freely and with everyone employed and with no one feeling the pinch of hunger or privation. The way to maintain good times is to keep business going. Money is made, in a business way, by spending it, not by saving it.—Brantford *Expositor.*

* * *

SOME wholesalers, while foreseeing higher prices for stoves as a result of the advance in molders' wages and present demand for iron, are not discouraged by the outlook. In fact, many are willing to take an optimistic view and insist that it is a hopeful sign. When prices decline, they point out, it shakes the confidence of retail buyers and consumers and may cause them to withhold buying, expecting still greater reduction. With an advancing market, buyers are more willing to operate and the trade feels that, when it is realized prices are going higher buyers wil come into the market freely.

Stocks carried over by retailers for next year are believed to be small, as many in the business found it impossible to get the quantity of goods desired in 1918 and will, according to wholesalers, buy heavily when large supplies are available. With these indications, a great demand for stoves in the coming fall is expected.—Indianapolis *Commercial.*

EVENTS IN THE TRADE

Business Changes

Fergus, Ont.—John G. Tweddle has purchased the hardware business of A. E. Nichols.

Walkerton, Ont.—J. H. Tolchard has purchased the hardware and tinsmithing business of Paterson Bros.

Fire Losses

The premises of the Great West Saddlery Co. at Olds, Alberta, were destroyed in a fire that caused a loss of $50,000 in the business section.

The hardware store of L. J. A. Beauchemin was completely destroyed in a fire which razed a business block at Shawinigan Falls, Quebec. Mr. Beauchemin's loss is about $20,000.

Obituary

The death occurred very suddenly at Montreal from apoplexy of John H. Sticht. For some years he was general superintendent of the H. R. Ives Co., Queen St., manufacturers of various hardware lines.

Mr. Sticht was a master mechanic in structural iron work, and followed this for the greater part of his life. On leaving the H. R. Ives Company in 1908 he effected a partnership with A. C. Hutchison, and this was continued for five years. Mr. Sticht continued in his chosen work, establishing another business at Longueuil, opposite Montreal.

T. McOuat, aged 69, whose death occurred at Lachute Mills, Quebec, was the founder of the firm of T. McOuat & Son, founders and machinists and dealers in shelf and heavy hardware. Mr. McOuat had been ill for two years. The business will be carried on by his son, A. A. McOuat.

M. A. Schaffner, who has represented the Sherwin-Williams Company of Canada, Limited, at Saskatoon for five years, died suddenly on Monday, of influenza. Mr. Schaffner came from Truro, N.S., and he sold S. W. P. in that province before going to Western Canada.

The death occurred at Atlantic City of M. K. McMullin, president of the American Window Glass Company of Pittsburgh.

Personals

H. C. Dimock, who has been in charge of the retail sporting goods department of Rice Lewis & Son, has been appointed manager of the retail store. Mr. Dimock was formerly in the hardware business at Windsor, Nova Scotia.

W. Beaton, of the staff of Mackenzie, Milne & Co., Limited, Sarnia, is ill with influenza.

John Walton, of Mackenzie, Milne & Co., Limited, Sarnia, was in Toronto over the week-end.

James A. Hossack, sales manager Lufkin Rule Co., of Canada, Ltd., Windsor, Ont., has left for a business trip to the Maritime provinces.

Mr. W. E. Clarke, advertising manager of The Pedlar People Ltd., Oshawa, Ont., is in charge of the firm's exhibit at the Lyons Fair, being held at Lyons, France.

Trade Notes

The Cleveland Pneumatic Tool Co. has been registered at Montreal.

The Acme Wool and Waste Supply Co. has been registered in Montreal.

The Estevan Hardware Co., Estevan, Sask., has moved into new premises.

Allaire & Lajoie, hardware and paints, have been registered at Coaticook, Que

The Quebec Asbestos and Chrome Co has been registered at Rock Island, Que.

Adam Turnbull, hardware dealer, of Briercrest, Sask., is disposing of his business.

Paquet and Bonnier have been appointed liquidators of Fauteux, Limitee, Montreal.

The Canadian Kron Scale Co. has been registered at Montreal by William M. Thorpe.

F. Bacon & Co., hardware, has been registered at Montreal by Wilfrid A. Dansereau and Francis A. McDonald.

Rorke & McDermott, Dodsland, Sask., have opened a harness repair department in connection with their hardware store.

The Wright Hardware Co., Hamilton, Ont., have acquired the right to manufacture and sell in Ontario, Gibson's flannel damper.

Wm. Craven, until recently in the warehouse of the McClary Mfg. Co., at Hamilton, has joined the sales staff of Arcade Limited

W. A. Gabb, Rocanville, Sask., is opening a tinsmithing department in connection with his hardware store in charge of Alfred Hamel.

The Alberta Foundry and Machine Company, of Medicine Hat, Alberta, is enlarging its plant and will go into the manufacture of light farm tractors.

John G. Tweddle, traveller for Beatty Bros., has purchased the hardware business of A. E. Nichols at Fergus, Ont., and gets possession about June 1. Mr. Nichols will continue his coal and wood business, as well as being local manager of the Bell Telephone Company.

The Premier Paint and Varnish Company has been registered at Montreal by Wm. H. Evans, John H. Schislmerick, John R. McCarty, and Elbert Mapas.

Councillor Wm. Patterson, hardware dealer, Walkerton, Ont., has exchanged his business for a farm, and J. Herbert Tolchard, of Eden Grove, is the new owner.

Tanton and Midmore, hardware, Wilcox, Sask., will in future be known as Midmore and Downton, R. Midmore and H. A. Downton having purchased the Tanton shares in the business.

The Winnipeg Steel Granary and Culvert Company, Ltd., of Winnipeg, Man., will hereafter be known as Crossen Metal Works, Limited. The change in name involves no change in personnel or management.

L. P. Woodhams, for some time manager of the Lumber Manufacturers' yard at Kerrobert, Sask., is severing his connection with the firm and will go into business at Elbow, having purchased a hardware there.

J. A. Klassen, who has been handling auto accessories on the road in Manitoba and Sasketchewan for several years, has joined the staff of D. Ackland & Son, Ltd., and will call on the trade in the interests of their auto accessory department.

Montreal News

Mr. Walker, of Peck, Stow and Wilcox, was in Montreal this week.

Thos. Mortimer, manufacturers' representative of Toronto, was in Montreal this week.

James Kinsman, of North Bros. Mfg. Co., Philadelphia, Pa., was in Montreal this week.

Geo. W. Everts, with Harmon and Dixon, New York, called this week on the Montreal trade.

W. G. Harris Jr., of the Canada Metal Company, Ltd., Toronto, spent the week-end in Montreal.

C. G. Evans, representing W. J. Dennis Co. of Chicago, was in Montreal calling on the trade this week.

Prescott W. Robinson, who has been in Western Canada for some time, returned to the city this week.

Charles Ross, sales manager of the Crown Cycle and Motor Co., Montreal, was married in Montreal this week.

George Caverhill, of Caverhill, Learmont and Co., Ltd., and Mrs. Caverhill, are spending several days in New York.

A. Lemieux, hardware merchant of Henryville, Que., is a patient in the Notre Dame Hospital, Montreal.

Mr. Hurtubise, of the North American Hardware Supply, Montreal, is at Manitowoc, Wis., this week, on business with the Aluminum Goods Mfg. Co.

The Sherwin-Williams Co. of Canada, Ltd., has made improvements in its executive office arrangements. The stenographic department will be more closely grouped, while department heads will have separate offices.

Winnipeg News

Mr. Brownstone of Niverville, Man., was a visitor in the city this week.

Mr. Brown of the Plum Coulee Hardware Co., Plum Coulee, Man., spent a few days in the city this week.

Mr. Gross of the Champion Tool Co., Meadville, Pa., was in town during the week calling on the jobbing trade.

J. McDonald and F. Baker, formerly manager and traveller respectively for the Calgary Paint and Glass Co., have opened up a business in Calgary and will handle paints, etc.

The Calgary Paint & Glass Co. will in future be known as the Winnipeg Paint & Glass Co., and travellers from the Winnipeg branch are now working the territory.

Incorporations

Preston & Schwarz, Limited, Galt, Ont., have been granted a provincial charter. The company is capitalized at $40,000, and plans to manufacture taps, dies, wood, iron, steel and metal products.

Reflex Manufacturing Company, Limited, head office, Parry Sound, Ont., capital $40,000, plans to manufacture and deal in polishes, veneers, paints and varnishes.

The Canadian Renulife Electric Company, Limited, head office, Windsor, Ont., capital $40,000, plans to manufacture and deal in electrical appliances.

National Paper Goods Company, Limited, head office, Hamilton, Ont., capital $300,000, plans to manufacture and deal in paper boxes, paper supplies, twine and shipping cases.

Industrial Varnish Works, Limited, capital $100,000, head office, Hamilton, Ont., plans to manufacture and deal in varnishes, paints and oils.

Clay Products Agency, Limited, capital $100,000, head office, Toronto, plans to manufacture and deal in builders' supplies.

Ferro Alloys Iron and Coke Company, Limited, head office, Toronto, capital $100,000, plans to manufacture and deal in steel, alloys, machinery and mechanical appliances.

Bowlby and Gluns, Limited, capital $40,000, head office, Windsor, Ont., plans to manufacture and deal in auto accessories, motorcycles, tires, rubber goods, oils, etc.

Thermos Heating Systems, Limited, head office, Toronto, capital $1,000,000, plans to manufacture and deal in boilers, heaters, stoves heating apparatus and accessories.

The Montreal Brush Manufacturing Co., Limited, capital $50,000, head office, Montreal plans to manufacture and deal in brushes and brooms of all kinds.

T. Eaton Co. Acquire Guelph Stove Factory

Guelph Stove Company Changes Hands—New Owners Will Greatly Increase Capacity of Plant

THE T. Eaton Co., Toronto, with branches in various parts of Canada, have purchased the Guelph Stove Company, Ltd., Guelph, Ont. The deal, it is understood, was put through on Thursday of last week and the new owners are now in charge of the plant and the business will be continued without any interruption. The purchase of the property and plant situated on York Road also involves the Guelph Stove Co.'s old premises on Paisley street, which have been lying idle since the new plant was put into operation in 1912. It is understood that the new owners will greatly increase the capacity of the plant as soon as possible, and that approximately $100,000 will be expended on extensions and improvements. The purchase of the plant and property also includes all the patent rights owned by the company. It will continue to be known as the Guelph Stove Co., Ltd.

Wm. M. Crawford Joins General Sales Staff

Wm. M. Crawford, who opened up the Western territory for the Sheet Metal Products Co., Toronto, and in late years acting in capacity of sales manager for Winnipeg branch, has returned East and joined the general sales staff of the company in Toronto. Mr. Crawford has been associated with the company for about 35 years and is a well-known figure to the Western trade. His successor in Winnipeg has not yet been named.

WM. M. CRAWFORD

Winnipeg Sales Manager for many years of the Sheet Metal Products Company. He has joined the general sales staff at Toronto.

Regina Notes

Mr. Turner, representing the Hall Zryd Foundry Co., of Hespeler, Ont., is calling on the trade in this district.

A provincial builders' exchange has been formed in the city with W. Wilson, Regina, president, and R. Shannon of Saskatoon, vice-president.

Mr. Cunningham of Windsor, Ont., demonstrated a stove manufactured by his firm at Armstrong, Smyth and Dowswell's store this week for McKenzie Bros., Winnipeg.

The Continental Oil Co. has purchased forty acres of land in North Regina and expects to erect a million dollar plant. Work is to commence shortly, it is stated.

A. E. Maclean, formerly of Peart Bros.' hardware, who enlisted with the 46th Battalion, has arrived at his home in Seaforth, Ont., where he will get his discharge. He will soon return to the West again.

ARTHUR C. LARIVIERE VICTIM OF PNEUMONIA

Arthur C. Lariviere, vice-president of Lariviere Incorporee, Montreal, died suddenly in Montreal. Mr. Lariviere's illness lasted less than a week, and the end came with startling suddenness. The immediate cause of death was bronchial pneumonia.

Mr. Lariviere was a son of Fred C. Lariviere, president of Lariviere Incorporee, and was born in Montreal in 1887.

He graduated from Mount St. Louis Academy in 1907, and in September of that year entered the employ of the firm. Taking a real interest in the hardware business, Mr. Lariviere studied the different departments, and five years ago he was made vice-president. His special interest for some time past was centred around the auto accessory department, which he developed materially.

Mr. Lariviere was a member of the Knights of Columbus, a life member of the Chambre du Commerce, and was an expert chess player, taking part in some of the city tournaments. He also was very fond of music, and played the violin and cornet. He leaves his wife and four small children, one brother, Aime, and a sister, Mrs. J. A. Villeneuve.

Trade Commissioner May Appoint Experts To Settle Disputes Over Consignments of Goods

THE Senior British Trade Commissioner in Canada and Newfoundland (Mr. G. T. Milne, 367 Beaver Hall Square, Montreal) has been notified by the Imperial Department of Overseas Trade in London that he is empowered to appoint an expert to examine and report upon consignments of goods from the United Kingdom, in respect of which a dispute has arisen, and to certify the signature of such experts as authentic. The commissioner will, however, only intervene when requested to do so by both parties to the dispute.

The kind of disputes in which the Commissioner may intervene, are those regarding goods which are alleged to be not up to sample, or which have arrived in a damaged condition owing to faulty package. The Commissioner is not authorized to deal with claims under insurance policies for goods damaged during the voyage.

As the official trade representative in Canada and Newfoundland of the Indian Government, the Commissioner is also authorized to act in regard to disputes relative to shipments from India.

The remuneration of experts appointed by the Commissioner is a matter for the parties to the dispute. No fee will be charged for his services.

The British Trade Commissioner at Toronto (Mr. F. W. Field, 257 Confederation Life Bldg., Toronto) is empowered to act in disputes arising out of shipments to Toronto and to other centres in Ontario.

Auto Accessory Dealers of Ontario Meeting in Toronto

THE second annual convention of the Automobile and Accessory Department of the Ontario Branch of the Retail Merchants' Association of Canada was held in Toronto on Thursday and Friday. There were delegates from various parts of the province in attendance. An exhibit of auto accessories and tires in the basement of the Foresters' Hall where the sessions were held attracted much attention. The program was as follows:

THURSDAY

10.15 a.m.—Official Welcome and Reception.
Sir Wm. Hearst, Premier of Ontario.
His Worship Mayor T. L. Church.
Members of the Board of Control.
B. W. Zieman, Esq., President, Retail Merchants' Association of Canada.
Trade Representatives.

10.45 a.m.—Opening Session — Chairman's remarks. S. H. Rowed, Esq., London.
Address—W. C. Miller, Secretary.

11.15 a.m.—Receiving Resolutions. Fifteen Minute Talks by the following speakers:
1. "Present Day Problems," W. H. Moore, Esq.
2. "The Tire Situation as I See It," A. Sharp, Esq.
3. "Modernizing Your Garage," W. T. McBride, Esq.
Queries and discussions on the above subjects.

2.00 p.m.—General Session. Business Resumed.
Reading of Correspondence.

2.15 p.m.—Appointment of Committees.
1. Committee on Resolutions.
2. Committee on Legislation.
3. Committee re Question Box.
4. Committee on Membership.

2.30 p.m.—Fifteen Minute Talks by the following speakers:
1. "The Future of the Motor Truck," A. D. Gorrie, Esq.
2. "Revenue from Accessories," W. H. Wilkinson, Esq.
Queries and discussions on the above subjects.

3.00 p.m.—Address, John C. Kirkwood, Esq., Business Counsel.
"Getting plus profits out of business."
1. What it Costs in Dollars and Cents to do Business.
2. Cost in Percentage Form.
3. Lowering the Percentage of the Cost of Doing Business.
4. Getting All the Profit You Want.
Queries and discussions on the above subjects.

4.00 p.m.—Consideration of Resolutions.

4.30 p.m.—Address: "Workmens Compensation," G. A. Kingston, Esq., Commissioner.

5.00 p.m. Fifteen Minute Talks by the following speakers:
1. "Car Storage and Method of Handling," G. B. Baby, Esq.
2. "Second Hand Car Problems," Percy Breakey, Esq.
Queries and discussions on the above subjects

5.30 p.m. Address, H. M. Powell, Esq., Imperial Oil Co.

5.45 p.m. Address, W. A. McLean, Esq., Deputy Minister of Highways, Province of Ontario.

6.00 p.m.—Adjournment.

7.30 p.m.—Theatre Party.

FRIDAY

9.00 a.m.—Opening of Question Box and discussion thereon.

9.30 a.m.—Election of Officers. Installation.

9.45 a.m.—Address, T. P. Phelan, Esq., K.C., Solicitor, Ontario Motor League

10.15 a.m.—Fifteen Minute Talks by the following speakers:
1. "Automobile Insurance," J. W. McKenzie, Esq.
2. "Unfair Competition," W. H. Hodgins, Esq.
Queries and discussion on the above subjects.

10.45 a.m.—Address, Hartley Dewart, Esq., K.C., M.P.P.

11.30 a.m.—Consideration of Proposed Legislation.

12.30 p.m.—Complimentary Luncheon.

2.00 p.m.—General Business resumed.
Conference with Automobile and Accessory Manufacturers and Wholesale Jobbers.

3.00 p.m.—Address, J. C. Kirkwood, Esq., Business Counsel.
"Restoring a Sick Business to Health."
1. When Business is in a Run Down Condition.
2. Putting a Sick Business on Its Feet.
3. Giving a Business Abounding Health.
Queries and discussions on the above subjects.

3.45 p.m.—Reports of Committees.

4.00 p.m.—Unfinished Business.
New Business.

4.15 p.m.—Address "Why the 10 per cent. Tax Should be Removed," W. G. Robertson, Esq.

4.45 p.m.—Fifteen Minute Talks by the following speakers:
1. "Service," Mr. Goering, Hamilton.
2. "The Value of the Trade Papers to the Dealer," W. F. Prendergast.
Queries and discussions on the above subjects.

5.15 p.m.—Address, "Reporting Delinquent Debtors," E. Newton, Esq.

5.30 p.m.—Arranging date and place of next meeting.

5.45 p.m.—General Session continued until completion of business.

Urges Hardwaremen to Buy Goods Made at Home

Discussing the resolution passed by the Retail Hardware Association of Ontario, at the recent meeting in Hamilton, the Manitoba Free Press of Winnipeg says under the heading "Canadian Hardware for Canadian people":

"The Retail Hardware Association of Canada, which met recently in Hamilton, adopted the following resolution:

'That this Association recommend the retailers to sell as far as possible Made-in-Canada products and thereby assist in creating employment for Canadian citizens.'

"The qualifying phrase 'as far as possible' went in for two reasons, first, because not all articles of stock hardware are manufactured in this country, and secondly, because some Canadian consumers are prejudiced in favor of American goods. Some importations is necessary, but a good deal of it is unreasonable.

"The goods manufactured in Canada are sound and durable. Is it too much to ask those consumers who have a cloudy preference for foreign products to suppress them for a time in the general interests of Canada? It is important that Canadian factories be kept running, so that Canadian workmen may be maintained in employment.

"When the time came for Canadians to invest heavily in war bonds the people were willing and eager to do their part. It is a patriotic duty to-day for private buyers to ease the country over the reconstruction period by keeping Canadian workmen busy. They can do so by asking for goods Made-in-Canada."

OPENING FOR CANADIAN TOYS

According to official information there is an opening for Canadian made toys in China. A report says:

"The Chinese children, in common with those of other races, like toys. China, being an old country, possesses toys only of the most ancient type, very simple, and without mechanical devices. Chinese toys are also crudely designed and made of cheap material, such as mud, bamboo, wood, and paper; therefore they are offered on the market at small prices. In the past, toys were mostly peddled by the poor, and even made and sold by beggars.

"There are certain seasons when toys are in greatest demand, this being no exception to the custom in other countries. The best time for their sale is the New Year holidays. Appropriate toys are also sold for other festal times and seasons.

"German competition has been completely shut out on account of the war, and the extremely high price at which American toys must be sold precludes their purchase by any but the wealthier classes of people. The Spanish industry has made great progress, but would not be able to compete with the industries of other countries under normal conditions. At present Spanish, British, and American toys are found on sale."

British List of Restricted Hardware Imports

THE Canadian Trade Commission has compiled from the latest information obtainable lists of articles which are prohibited from importation into the United Kingdom except under license. Considerable difficulty has hitherto been experienced by exporters in finding a properly classified guide, as the British authorities had never consolidated the numerous proclamations which from time to time were issued for the regulation of their imports. A list, complete up to January 24, 1918, was published, but since then many changes have been made as circumstances required. Additions and deletions were made, and in some cases articles taken off the list were restored. In the compilation given below, list "A" includes articles, alphabetically arranged, that may only be imported into the United Kingdom under license, and list "C" those articles for which a general license for an indefinite period has been issued.

Royal proclamations altering these restrictions may be made at any time, but any changes of this nature will be announced in due course by the Canadian Trade Commission. Articles not included in the lists may be regarded as not subject to import restriction.

Further information on specific points will be furnished to intending exporters by the Canadian Trade Commission, Ottawa, while it should be noted that consignees in the United Kingdom should make application for the requisite import licenses where necessary to the Controller, Department of Import Restrictions, 22 Carlisle Place, London, S.W.1.

"A"

Abrasive wheels. Aluminium, manufactures of Aluminium powder. Baths of metal. Binder or reaper twine. Brass rods and brass wire. Brooms and brushes. Carbons for arc lamps. Carbons for searchlights. Carpet sweepers. Cartridges of all kinds and parts thereof. Cash registers. Cement. Chinaware, earthenware and pottery. Clocks and parts thereof. Cutlery. Cycles other than motorcycles. Electrical motors. Electric dry cells and carbons therefor. Electric hand-lamps and torches. Electric meters. Fire extinguishers. Fuses, fuse components and parts. Furniture, manufactured joinery and other wood manufactures. Glass, window and sheet, plate and tableware. Glass, other manufactures. Gloves. Gum, copal. Gum, kauri. Guns, carbines and rifles of all kinds. Hardware and hollow-ware. Incandescent gas mantles. Jute, raw. Kerosene (including white spirit), gas oil, and distillates from which any of the preceding can be produced. Lacquered wares. Lawnmowers. Leather, manufactures of, other than belting, boots and shoes and gloves. Machinery, agricultural and dairy. Machine tools and machinery driven by power and suitable for use in cutting, stamping or working metal. Machinery, driven by power and suitable for use in cutting, working or operating on wood, including: sawing machines of all descriptions, general joiners, mortise, tenon and boring machines, lathes and rounding machines, box and cask-making machines and all machines accessory thereto; scraping and sandpapering machines, wheelright machinery, firewood making and bundling machinery, wood, wool fibre and pulp machinery, saw sharpening and setting machines, saw stretchers and brazing apparatus, all machines for grinding, planing or moulding irons. Magnetos. Mats and matting. Measuring tapes and rules of all descriptions, including verniers. Micrometers. Mops. Motor cars, chassis, motorcycles and parts and accessories of motor cars and motorcycles (other than tires). Motor spirit (including aviation spirit.) Oilcloth. Painters' colors and pigments. Photographic apparatus. Plated and gilt wares. Red prussiate of potash. Revolvers and pistols. Rubber, manufactures of. Sewing machines. Slide rules for engineers and draughtsmen. Soya beans. Stoves and ranges. Time-recording instruments of all kinds, and movements and parts thereof. Toys, games and playing cards. Treadle lathes of 3-in. centres and over. Vacuum cleaners. Weighing machines, scales and balances of all descriptions not otherwise prohibited. Woods, the following, viz.:—Hardwoods, furniture woods and veneers. Wood manufactures (except lacquered wares). All other woods. Wringers and mangles.

"C"

The following is a list of restricted articles placed under general license indefinitely:

Gloves of leather. Incandescent gas mantles. Brooms. Brushes.

Lawn Mower Grinder

James Cowan & Co., London, Ont.—Will you tell us who manufactures the Ideal lawn mower grinder?

The Ideal lawn mower grinder is manufactured by the Root-Heath Mfg. Co., Plymouth, Ohio.—Ed.

Stoves, Church Bells

Cochrane Hdwe., Ltd., Sault Ste. Marie, Ont.—Who is the maker of the Standard Sovereign cook stove? Where can we secure church bells?

As far as we can learn, the Standard Sovereign cook stove is the product of the Hamilton Stove & Heater Co., Hamilton. Church bells are made by Bevin Bros., East Hampton, Conn.; J. B. Foote Foundry Co., Fredericktown, Ohio; American Bell and Foundry Co., Northville, Mich.—Ed.

Valve Discs

Fraser Hardware Co., Galt, Ont.—Please inform us who makes, or whether we can secure Bakilite valve discs.

The Bakilite valve disc is now made by the Electrical Hard Molding Co., Weston, Ont., from whom you can secure all details.—Ed.

Paper Balers

McKinley E. Northwood, Ltd., Ottawa, Can.—Where can we secure paper balers?

Balers for baling paper can be secured from the Climax Baler Co., Hamilton, Can.—Ed.

Chemical Closets

Ralph & Wilson, Dundas, Ont.—Kindly mail us names and addresses of Canadian firms manufacturing chemical closets.

Canadian firms manufacturing chemical closets are the Steel Trough & Machine Co., Ltd., Tweed, Ont., and the Wakyte Mfg. Co., Ltd., Winnipeg.—Ed.

Dairy Thermometers

Walter S. Fairweather, Sussex, N.B.—Would you please advise where we could procure dairy thermometers?

Dairy thermometers are manufactured by the Taylor Instrument Co., Rochester, N.Y., and distributed through Canada from their branch at Toronto. They state they are in a position to make deliveries of certain types now.—Ed.

Vacuum Cleaners

Liesemer & Kalbfleisch, Mildmay, Ont.—Kindly give us name of the maker or jobber of the Frantz Premier electric sweeper.

The Frantz Premier Vacuum Cleaner is distributed to the trade by the Frantz Premier Vacuum Cleaner Co., Ltd., 28 Adelaide Street E., Toronto.—Ed.

OWL METAL CO., LTD., ERECTING ADDITION TO FACTORY

Upon the death of E. H. Bissett, president of Bissett & Webb, Ltd., who controlled the stock in the Owl Metal Co., Ltd., Winnipeg, the estate sold his interest to E. G. and L. R. Barrett, of the Vulcan Iron Works, Winnipeg. More capital has thereby been influenced, and the firm intends to operate on a much larger scale than heretofore, and are now erecting an addition to their present factory.

They intend to recover metals from scrap and metal by-products, converting brass and bronze filings, turnings, borings, into ingots after refining.

Their white metal department for the manufacture of solders for tinsmiths and plumbers, and machine type metals for newspapers and printers, is also being largely extended. They expect the enlarged plant will be ready for operation by April 1. The plant which has been bought is the very latest for the refining and casting of metals.

As a result of this re-organization, the whole of the stock in the Owl Metal Co. will be held by well-known Western men. J. J. Broadhurst continues as secretary-treasurer and manager.

Trade Inquiries

480. **Ploughs.**—A concern in Gloucester, England, desires to import riding ploughs for three furrows reducible to two furrows when the soil is heavy, to be used with two or three horses.

481. **Hay loaders.**—A Gloucester, England, house wants hay loaders.

482. **Lawnmowers.** — Lawnmowers with blades 8 inches to 1 inches are wanted by a concern in Gloucester, England.

483. **Hand and horse hoes.** — A firm in Gloucester, England, is prepared to import horse and hand hoes.

484. **Oil cookers.**—A Gloucester, England, firm desires to be put in touch with Canadian manufacturers of oil cooking stoves.

485. **Vacuum cleaners.** — A concern in Gloucester, England, is prepared to handle a good vacuum cleaner.

527. **Mandrill and pick handles.**—These handles are desired by an importer in Bristol.

529. **Steps.**—A Bristol importer of woodenware would be glad to hear from a manufacturer of light steps with from three to nine treads and about 10 inches between the treads.

531. **Broom handles.**—A Bristol concern would be glad to hear from a Canadian exporter of broom handles made of spruce or alder, 50-inch by 1⅛-inch and 50-inch by 1¼-inch.

THE CLERKS DEPARTMENT

"If You Lack Backbone, You're No Executive," Says Charles Piez—"Moral Courage Counts"

"If You Have All the Other Qualifications—Resourcefulness, Personality, Vision, Technical Knowledge, Judgment, and All the Mental Speed in the World—and You Lack Backbone to Make Your Own Decisions on Your Own Responsibility, You're No Executive," He Says

"ONE of the rising young men of America," is the way Charles M. Schwab describes Charles Piez. After leaving Columbia University School of Mines, Piez went to work for the Link Belt Company and is now its president. He is a director in a number of great corporations and vice-president and general manager of the Emergency Fleet Corporation. In the "American Magazine" he discusses executive ability as follows:

Executive ability is a quality all of us talk about without having any very clear idea as to just what it consists of. Yet it has certain clearly defined hallmarks; signs of something far deeper than mere externals—of character, in which, it seems to me, executive ability has its base.

The two most striking and important traits in men of executive ability, as I have analyzed things, are moral courage and self-reliance. Clear vision, resourcefulness, quick thinking, knowledge of human nature—these are important, but it has been my experience that they build themselves naturally on the groundwork of moral courage and self-reliance, and that if those two qualities do not exist the man is not, and never will be, a really great executive.

Inspires Others

It is the moral courage, the self-reliance, that is in them, shining from their eyes that makes us look up to them and obey them. Their confidence in themselves inspires us with confidence in them and in our own ability to accomplish what they want done. Their dynamic force is transmitted to us.

Some men need only a single contract with a great executive mind to arouse their own forces. Such men keep going and developing of their own volition, and perhaps become great executives themselves. Others run at high speed for a while after being in contact with the executive mind. But they are like poor storage batteries. They must go frequently to the dynamo to be recharged with confidence and energy. This is the type of man who follows his favorite boss from job to job. He does not feel equal to the task of standing on his own feet.

Will Win Out

The man who can organize the brains of other men, who has the faculty of inspiring them to the accomplishment of an undertaking, and the moral courage to battle through to victory without shifting responsibility or crying quits, is the man who has executive ability.

This is as true of a section foreman handling a gang of men, or an office man or woman in charge of a group of clerks, or a department chief in any business, as it is of the greatest executive of the biggest organization in the world.

The bigger the job, however, the deeper and broader must be the executive, because of the larger number of men he must influence. I have seen men who were splendid executives on small jobs, but who failed utterly on big ones. They were not afraid of the little affairs, but they hesitated to take any big plunge for fear they would get in over their heads and not come up. They did not realize that the same principles, the courage and self-reliance that had stood them in good stead on the smaller job would carry them to victory on the larger one.

Gave Him Chance

A case in point is that of a young man of my acquaintance who held a small job in a big company, doing minor office work. He was upon his toes every minute. He went ahead and did things and did them right. The officers of the company watched him carefully, and when there was an opening in the selling end they gave him a chance at it. He jumped into an unworked territory, and in a year or two he had the territory so well organized that when he asked for a branch office of his own, he got it, hands down.

Eventually the head of one of the subsidiary companies decided to get out, and this young fellow was advanced to fill the vacancy, a much bigger and more important post than he had held before.

Trouble Starts

Everything seemed to be going smoothly when, one day about six months after taking over the plant, the young fellow walked into headquarters looking much troubled. He sought out the president, and said:

"Things are not going as they should out there. I went to the superintendent the other day to offer him a thousand-dollar increase, and he informed me that he was sorry but he couldn't take it. The man whose place I took intends to start a plant of his own and he's going with him."

"Well," said the president, "what did you do?"

"I haven't done anything," replied the manager. I don't know what to do."

"Don't know what to do!" exploded the president. "Here's the man, who has been with us for years, telling you straight out that he's going to leave us and go with a competing company. Why didn't you tell him to get out?"

"But," objected the manager, "there are six more of our most important men he is taking with him."

Clean Them Out

"Well, why in blazes didn't you clean them all out?"

"Why, great heavens, Mr. Blank, I can't run a business that way."

"Nor any other way," said the president. "That is where you have shown your weakness. Whether you settled the trouble with the men, or let them go, is somewhat beside the point. The point is that you did not handle the situation. Your backbone crumbled. You couldn't see it through. If you had fired the whole bunch, then come to me and said that things blew up down there and that you did so-and-so, though you might have been mistaken in your action, you would have proved yourself fit to be an executive."

Not at the Top

The world is full of half-executives and near-executives. You will find them half way, three quarters up, or near the top, but not at the top. At any rate, not for long. You wonder why, but the answer is simple; these men lack the moral courage to stand on their own

legs and fight their own battles on their own responsibility. Hence they stay forever near the real executive in an advisory capacity.

Let me say right here, as strongly and emphatically as it can possibly be said, that the foundation stone of all executive ability is moral courage. If you have all the other qualifications—resourcefulness, personality, vision, technical knowledge, judgment and all the mental speed in the world—and you lack the moral courage, the backbone, to make your own decisions on your own responsibility, you're no executive.

The Two Reasons

Next to lack of moral courage, there are two main reasons why most men fail as executives. One is that they get "too much ego in their cosmos," which is commonly known as "the swell head." The other is that they can't stand criticism. In a sense, these two are the same, but I mention them both, because some men with swelled heads can stand certain forms of criticism.

I know of a certain young fellow who started in with an engineering firm as an office boy. He developed rapidly and was given more and more responsible work. He had a winning personality—everything, in fact, to make him a big executive except for one thing; he could not stand criticism.

Could Not Stand It

This trait cropped up in the boy once in a while, but his employers thought so well of him generally that they tried to educate him out of that one fault. Eventually he became head of the firm's bureau of estimate, which figured the cost of all jobs. One day a stenographer happened to find a $2,000 blunder in some of this man's figures! It was reported to his chief and later came to the president's attention. When confronted with the error the young man was furious.

"That stenographer had no business to question my figures!" he stormed. "He should have said nothing about it."

"But you admit, don't you, that there was an error?" the president asked. Yes, the young man admitted that. "And still you think the stenographer should have said nothing, and that the firm should have pocketed the loss rather than that your dignity should be offended?" Yes, the young man thought that was right. Well, the president talked to him, explaining how he was jeopardizing his chances of becoming a big executive by acting that way, and gradually the matter was forgotten.

Was Under Cost

About a year later, however this man turned in an estimate of $20,000 on a certain job in the Middle West. One of his superiors who handled his figures further along the line realized at once that the estimate was far under the actual cost, but he passed it on to the engineers without comment, to see what would happen. Sure enough, back came the engineers with their own estimate, placing the job nearer $40,000 than $20,000. The matter was placed before the president and he called the young man in. Imagine his astonishment when the young man said:

"I know what you did—you wanted to get me in bad on this job. You've got a grudge against me and you fixed those engineers to make my figures out wrong. The figures I gave them were correct, and I'm getting a raw deal."

Was Soon Let Go

The president held his temper and replied:

"Very well, Mr. Blank, go out and pick out your own engineers; get them to estimate that job and see what you find."

This was a proposition that couldn't very well be turned down so the young man got the estimates. No one of them came within thousands of dollars of his figures. When he finally came in with the admission that he was wrong, the president said:

"I am very sorry, but we have come to the parting of the ways. You lack the courage to take just criticism. You can never rise to the top of this business nor anywhere near it, simply on that account. You are smart and able in many ways, but you are no executive in the broad, practical sense of the word. I have no doubt that you would do very well in a small business of your own, and that is what I advise you to get into."

That is precisely what the man did. To-day he has a very prosperous small business, making perhaps two thousand dollars more a year than he made on his salary in the old position. He has had fifteen years to build a big business, but he has not done it.

Not an Indication

Another very common error is to think that, merely because a man has made a lot of money and has a good-sized business, he is a great executive. Some of the most successful business men in this country are not blessed with executive ability. They have men around them who possess executive ability, but they themselves don't have it.

I know a man who has made nearly half a million dollars in a business he built for himself, but who is no more an executive than a three-months-old baby.

This man was for years a toolmaker in the plant of a certain engineering firm. He was a crackajack, too. An emergency arose and a foreman was needed for the machine shop at once. On the strength of his long and splendid record in the tool department, and for lack of a more promising candidate, this toolmaker was given a chance at the job. He was almost as dismal a failure as a foreman as he had been a brilliant success as a toolmaker. He hadn't the slightest idea of co-ordination, organization, or direction. He could do one job to perfection, but when you gave him several he could not "follow through."

Started for Himself

This man had long wanted to go into business for himself. When he found he couldn't swing the foreman's job, he actually quit and started a shop of his own. Offhand, it might seem that it was impossible for him to succeed. Not at all. He started in to build special machinery on order. He worked for inventors and engineers with new ideas. Many men had tried the same thing, and failed because, while they could build the machinery they could not get any money out of the inventors.

This chap realized that and he adopted a very simple expedient. When men said they wanted such and such machinery built, he would say:

"Certainly, I can build it but I don't know how much it will cost. You give me $500 on deposit. If the job costs less than that I will refund the balance. If $500 worth of work does not complete it, you give me more, and I'll go on with the work."

He never deviated from that rule. Cash in advance always. That man to-day, as I said, is rich. And he has his own business. But it is not because he is any more of an executive than he was when he failed on the foremanship. He merely combined mechanical ingenuity with financial shrewdness.

So I would not at all say that executive ability is indispensable to money-making success. Many men can and do succeed in a business whose affairs they can keep under their hats. But executive ability is essential to big success in a big way.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

465. **Wood-pulp and papermaking machinery.**—A Genoese firm of representatives would handle Canadian wood-pulp and papermaking machinery.

466. **Fish, lumber, asbestos, mica and zinc.**—An important firm in Genoa, Italy, which acts as commission agents is desirous to open up trade with Canada in codfish, tinned fish, lumber, asbestos, mica and zinc.

467. **Grain, lumber and metals.**—A firm of commission agents of Naples wishes to hear from Canadian exporters of grain, lumber and metals.

468. **Food products and tools.**—A firm of commission agents of Milan inquires for Canadian food products and tools.

469. **Metals.**—An important firm of metal merchants in Milan desires connections with Canadian firms exporting minerals, metals and other metal alloys.

470. **Shovels and barbed wire.**—A firm of merchants in St. John's, Newfoundland, wishes to get into immediate communication with Canadian manufacturers of long-handled square and pointed shovels and manufacturers of barbed wire.

477. **Lamp glasses.**—A firm in Gloucester is prepared to act as agents for a Canadian house manufacturing lamp glasses of all kinds.

479. **Tractors.** — Canadian manufacturers of tractors, using paraffin or crude oil for preference, who desire to export same, are asked to communicate with a firm in Gloucester, England.

(Continued on page 66)

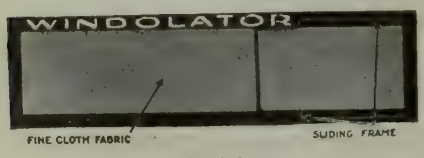
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

DOMINION BATTERY CO., LIMITED, PERFECTS NEW SHIPPING CASE FOR BATTERIES

Dominion Battery are now offering to the trade a very convenient case that holds fifty batteries and will be made up of assorted types if desired.

The case shown in the accompanying illustration will, it is said, take a comparatively small space. It can be conveniently handled and conveniently stored.



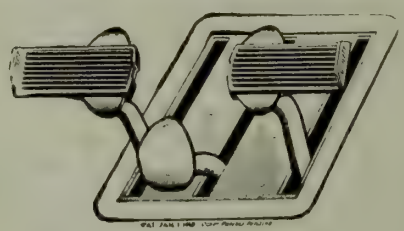
Batteries

According to W. M. Turnley, general manager of the Dominion Battery Co., Limited, the case was decided upon to meet the demand from the trade for less than barrel lots from districts where the demand for dry cells and ignition batteries is still limited. A dealer can thus order a fifty battery case and avoid any possibility of the batteries becoming old on his hands.

Most large dealers will undoubtedly continue to order in barrel lots, but because of the convenience of the case and the fact that an assortment of types can be obtained in it, the new package it is claimed will recommend itself to even some of the larger dealers. There is an additional charge of one cent a battery over the barrel lot prices when packed in this style case.

WINDOLATOR

Windolator is the name of a cloth fabric health screen being manufactured by The Prismolite Company, 74 East Gay St., Columbus, Ohio. In all seasons of the year it is claimed it stops the drafts, and keeps out dirt and rain as well as prying observation. It lets in nothing but fresh air and light, it is stated.



Windolator

The construction, it is stated, is a simple light frame holding a special cloth fabric so as to act as a diaphragm against everything but still air. It is adjustable, it is claimed, to fit different windows and comes in four sizes.

SURE GRIP PEDAL

The Utility Sure Grip pedal manufactured by the Hill Pump Valve Co., Archer avenue, Chicago, is designed, it is stated, to transform the small, smooth brake and clutch pedals of Ford cars into non-sliding pedals of standard size.

A new simple and very novel method of attaching these pedals has been devised, it is stated, and as a result, it is claimed, they can be installed in a few seconds by anyone without drilling holes or using tools of any kind.

Sure Grip Pedals

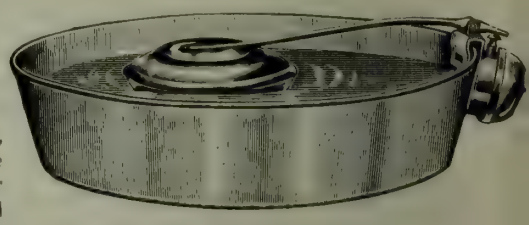
The pedals, it is stated, are equipped with heavy rubber pads, edged completely around with non-rusting metal, giving them a very attractive appearance.

The improved Utility Sure Grip Pedal will, it is stated, prevent any chance of feet slipping, particularly when the shoes are wet when one is driving in low gear or applying the brakes.

GILL PISTON RING

The Brown Engineering Corporation, Limited, 415 King St. W., Toronto, have secured the manufacturing rights for Canada for Gill piston rings, perfected by the Gill Manufacturing Company, of Chicago. Gill piston rings, it is claimed, are made from single piece castings of special fine gray iron and are machined to absolute accuracy. It is stated that they can open from 1-8 to 3-16 of an inch before loss of compression can occur, thereby adjusting themselves to oversize or out of round cylinders. The Gill rings, it is claimed, effect a saving in gasoline and lubricating oil, add power to a motor and prolong the life of a car. They are also made for tractors. Their use, it is claimed, decreases fuel consumption, prevents smoking and lessens carbon troubles and produce maximum power.

THE SUPER SPARK



The Vlit Manufacturing Co., 223 McGill St., Montreal, have been appointed selling agents for the Super Spark. This plug always giving a uniform spark. It is stated that it is very easily attached and that it creates a rush of high pressure current which surges across the spark gap, increasing voltage and decreasing the amperage. This it is stated eliminates the heat that causes carbonizing, arcing and eating away of points, prevents the porcelain from cracking and breaking and gives a quicker, stronger spark. The Super Spark is guaranteed for two years.

Super Spark

PAN ALARM

A refrigerator pan alarm, which, it is claimed, is a safeguard against ruined linoleum and watersoaked and stained floors, is being put on the market by the Homer and Wilson Stamping and Tool Works, Hamilton, Ont. The device consists of a float and alarm attachment, and when the water in the refrigerator pan reaches a height where it is time the pan was emptied, it is stated, the alarm bell rings.

Pan Alarm

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

A FURTHER readjustment of prices on black steel sheets has been made this week, and jobbers now indicate they are down to rock bottom in relation to to-day's cost. Dealers should be able to work up small business to advantage now, though heavy buying is not advocated until conditions at the mills seem a bit more settled.

There is a feeling among the big buyers particularly that lower prices should prevail on sheets, and the first of April, ending the first quarter of the year, is looked forward to as date when a further decline may be made. If a lower price schedule is arrived at it seems likely many jobs now being held back will be given out, and wheels of industry start humming again.

In line with declines recorded in other wire products, such as nails, smooth steel wire and annealed wire, a lowering of the price of wire fence staples has been made. To-day's prices on both bright and galvanized staples are 25c per 100 pounds below former figures.

All lines of woodenware are firm, and manufacturers of clothes pins report a heavy export business, which is being done at prices about 10 per cent. above those jobbers here have been paying. The trend of quotations locally then is not hard to determine. Stepladders and extension ladders show an upward movement, prices advancing 1c per foot.

The downward move in ingot metals seems to have pretty well reached the bottom for the present. There is quite active buying of copper at prices prevailing to-day, and lead has firmed up, with spelter stronger in sympathy. Tin is also slightly firmer. The next two or three months are active ones for the various metals, and it does not seem as though any appreciable change is a prospect before summer.

Grindstone fixtures, tire savers, wall paper cleaner, door springs, are lines to register advances this week. Brass and copper sheets, rods and tubes have gone to lower levels, and waxing brushes are also down from former figures.

Linseed oil has moved higher again and seems slated for a further increase before the peak is reached. Argentine seed is still withheld from the United States markets, and crushers there are facing a situation with regard to supplies which may mean a shortage of flax seed. The Canadian seed market is working in sympathy with United States markets, and the higher prices have been reflected in the quotations on linseed oil, which moves up from 5c to 6c per gallon.

MONTREAL MARKETS

MONTREAL, March 6.—Declines for the week in this market are made on bright and galvanized staples, which are down 25c per keg. One line of vises also is revised downward, the decline approximating about 5 per cent. Some lines of cast shelf goods are revised in price and reductions are effected of from 5 to 10 per cent. Steel snow shovel prices are out for next season, and the change made means a reduction from an advance of 7½ per cent. on the list before to a straight discount now of 12½ per cent. This is for the better grades. Snow shovel handles also are down from $6 to $4 per dozen. Black sheets are reduced $1 per 100 pounds in one quarter, and copper, tin and antimony are all easier.

There is a firmer lead market, and pruning shears are scheduled to advance about 5 per cent., while horse clippers are very firm and are expected to hold at present prices. Trade is moderately good from the country.

Five Per Cent. Drop in Various Vises

Montreal.

VISES.—Declines amounting to about 5 per cent. are registered on vises in one quarter and the following new prices are prevailing. These apply to the Parker line: No. 229, $15; No. 239, $18.50; No. 240, $23; No. 259, $32; No. 269, $43.50; No. 279, $62; No. 371, $18; No. 371½, $21.50; $372, $25; No. 373, $32; No. 271, $22.50; No. 271½, $27; No. 272, $31.50; No. 273, $39; No. 702, $8.80; No. 703, $10.25; No. 704, $12.50; No. 705, $15; No. 706, $18.50, and No. 708, $36.

Cast Shelf Goods Down; Shears Up

Montreal.

SHELF GOODS, PRUNING SHEARS.—Declines ranging from 5 per cent. to 10 per cent. have been made in some lines of Taylor-Forbes manufacture, these being mostly cast japanned and similar goods. The prices on pruning shears are expected to advance about 5 per cent.

Snow Shovels Down; Handles Lower

Montreal.

SNOW SHOVELS, HANDLES.—A reduction has been made in the price of best grades of snow shovels. The former discount was list plus 7½ per cent. and this has been changed to 12½ per cent. discount from the list. Snow shovel handles have been reduced from $6 to $4 per dozen, this line of handles only being affected in the change.

Electric Stoves May be Sellers

Montreal.

STOVES AND WARES.—There is little doing in stoves and ranges, but a considerable enquiry has developed for electric ranges. It is fully expected that this season will be one of the best on record. Wares of all kinds are steady and unchanged, and there has been much activity in sap supplies, tinned iron being in heavy demand for making up certain lines such as sap pans, evaporators, etc.

Nail Orders Fair; Staples Are Down

Montreal.

NAILS AND WIRE.—Staples have declined 25c per keg, the bright selling at $5.50 in keg lots and the galvanized at $6.25. Wire nail sales are frequent but small, and there is no change in the basis which holds at $5, with cut at $5.35 per 100 pounds. Smooth steel wire is unchanged at $5.75 per 100 pounds base.

Rope Sales Better; Undertone Firm

Montreal.

ROPE AND CORDAGE.—There is a larger demand for rope in some respects, and it would appear that the trade is anxious to secure its needs before prices are any higher. It is pointed out that the declines made recently were not the result of appreciably lower material but that there was a price war on which had to fight itself out. In any case, prices for hemp are now high, and while deliveries are better, the higher costs are prevailing for material now being purchased. Prices are: Pure manila, 37½c; British manila, 33c and sisal 27½c per pound, base.

Gasoline Steady; Coal Oil Holding

Montreal.

COAL OIL, GASOLINE.—The market is steady for coal oil, and the different grades are selling at the advance of last week; Royalite is priced at 20c and Palacine and Electroline at 23c per gallon. Gasoline is 34c per gallon.

Light Sales Iron And Steel Bars

Montreal.

IRON AND STEEL.—The basis is held on these lines and there is but a routine amount of business, the dealers buying as required and refraining from any stocking up.

Common bar iron, per 100 lbs.	$4 30
Refined iron, per 100 lbs.	5 30
Mild steel	4 30
Iron finish machinery steel	4 35
Norway iron	12 00
Single reeled machinery steel	6 00
Spring steel	6 00
Sleigh shoe steel	4 30
Tire steel	4 50
Toe calk steel, per 100 lbs.	5 20
Band steel	4 30
Harrow tooth steel	4 35
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

BRIEFS FROM THE WEEK'S MARKETS

Staples have declined 25c per keg.

* * *

Waxing brushes have declined in some quarters this week.

* * *

Brass and copper sheets, rods and tubes show further declines this week.

* * *

Turpentine registered a decline of 1c per gallon in some quarters this week.

* * *

Stepladders show an advance of 1c per foot this week. It has been said they were meant to go up.

* * *

"Five per cent. drop in various vises," reads a Montreal market item. Note that it is not spelled VICES.

* * *

Linseed oil has moved up considerably during the past week, the upward trend of flaxseed being reflected in the oil.

* * *

Ingot metals seem to rule on a pretty fair basis now in line with production costs and not much change in present basis is looked for for some time to come.

* * *

Black steel sheets are generally under revision downward now and basis established is considered rock bottom until mills make some further concessions. They may do this around April 1.

Black Sheets Down; Galvanized Hold

Montreal.

SHEETS AND PLATES.—A decline of $1 per hundred has been made in one quarter on black steel sheets. The market is much easier and the outlook does not indicate that there will be a great deal of heavy buying at present. There is a reported improvement in the demand for tin plates, and especially for tinned iron, one jobber stating that this was quite scarce.

	Per 100 lbs.	
BLACK SHEETS—		
10 gauge	$6 00	$7 00
12 gauge	6 10	7 15
14 gauge	5 85	7 00
16 gauge	5 95	7 05
18-20 gauge	6 10	7 25
22-24 gauge	6 15	7 35
26 gauge	7 20	7 40
28 gauge	6 35	7 50
GALVANIZED SHEETS—		
10¾ oz.		$9 75
28 gauge		9 25
26 gauge		9 00
22 and 24 gauge		8 85
20 gauge		8 65
18 gauge		8 65
16 gauge		8 50

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Firming of Pig Lead Firms Lead Products

Montreal.

LEAD PRODUCTS.—The firming of the market for pig lead has had a steadying effect on the manufactured lines of lead such as lead pipe, lead wool, sheets, etc., but there are no changes. Solder is also steady and without change.

Lead pipe, lb.	$0 12
Lead pipe (cut lengths)	0 13
Lead waste pipe, lb.	0 13
Lead traps and bends	Net list.
Lead wool, lb.	0 14
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 12
Lead sheets, 4 to 8 lbs., s. ft.	0 11
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c. lb. extra.	
Solder, guaranteed, lb.	0 38
Solder, strictly, lb.	0 35½
Solder, commercial, lb.	0 33¼
Solder, wiping, lb.	0 31 0 33
Solder wire (8 gauge)—	
40-60	0 44
45-55	0 47¾
50-50	0 61½
Zinc sheets, casks	0 17
Do., broken lots	0 18

Old Metals Are Marking Time

Montreal.

OLD MATERIAL.—There is very little doing in this line, and nothing active is looked for at present. Supplies in dealers hands are fair of some commodities, while others are light in point of supply. The outlook is for readjustments to lower levels.

Dealers' Buying Prices:		
Pipe scrap	15 00	16 00
Stove plate, per ton	17 00	18 00
No. 2 busheling	12 00	12 50
Old rubbers, boots and shoes	0 06½	0 07
Overshoes, lumbermen's rubber boots		0 05½
Bicycle tires		0 04
Automobile tires	0 04	0 04½
Yellow brass	0 10	0 11
Red brass	0 14	0 15
Light brass		0 08
Scrap zinc		0 05¾
Heavy copper	0 18	0 19
Wrought iron, No. 1, per gr. ton	18 00	19 00
No. 1 machinery cast		30 00
Heavy melting steel		15 00
Auto tires	0 04	
Bicycle tires	0 02½	
	Per gross ton.	
No. 1 railroad wrought		$15 00
No. 2 railroad wrought		8 00
Pipes and flues		8 00
No. 1 busheling		11 00
No. 2 busheling		7 50
Country mixed scrap		10 50

Copper, Tin, Antimony Are Quoted Down

Montreal.

INGOT METALS.—There is interest this week in the further declines of copper, antimony and tin, while lead is firming again. There is not a great deal doing.

COPPER.—Declining markets in the States seem to be the order of the day, and the market here is down in sympathy. At 20c per pound sales are being effected, and there may be lower prices still.

TIN.—While tin has been fluctuating in London, a reaction of about £20 taking place during the week of an upward nature, the position here is lower, and 59c per pound is the ruling quotation.

SPELTER.—This metal is extremely quiet and the price holds at 9c per pound.

LEAD.—There has been a firming of

the lead market, and while the price remains at 7½ to 8 cents per pound there may be a firming of the basis here.

ANTIMONY.—This is quiet, and with stocks large there is a tendency to quote less; 8c per pound is being quoted.

ALUMINUM.—The ruling price is 40c per pound, and trading is not large.

PIG IRON.—A price of $50 per ton is quoted for this.

TORONTO MARKETS

TORONTO, March 6.—Lower prices are generally in effect this week on black sheets, jobbers now operating on a very close margin. New prices have been named on fence staples, which show a decline of 25c per 100 pounds. Snow shovels are also revised downward, with other lines unchanged. Revised prices have been issued on door springs, spark plugs, and cotton waste is generally below figures prevailing recently. Woodenware is firm, with some lines moving up and others tending upward.

Spark Plugs Under Revision

Toronto.

SPARK PLUGS.—Prices have come in for revision this week on the Hercules spark plugs and the figures now being named to the trade are given out as follows: Junior spark plugs, 1-100, 50c each; 100-150, 47½c each; 150- and up, 45c each. Giant spark plugs, 1-50, 80c each; 50-100, 77½c each; 100 and up, 75c each.

Wooden Ware Tending Higher

Toronto.

WOODENWARE.—Manufacturers of clothes pins report a big export business, with prices for overseas about 10 per cent. above present jobbers' prices. This may mean that higher levels will be named on clothes pins locally—at least present basis will be held for some time to come.

The latest price list issued on clothes bars, step ladders and kindred lines shows a slight advance in some of these products. Clothes bars are up $1.00 per dozen to the following figures: No. 4, $10.00 per dozen; No. 5, $12.00; No. 6, $14.00.

Step ladders at the following figures now quoted are up 1c per foot: Perfect, 6 to 10 ft., 32c per foot; Hercules, 4 to 10 ft., 34c; Hercules, 12 and 14 ft., 39c; Faultless, 4 to 10 ft., 30c; Ontario, 4 to 10 ft., 27c; Shelf Lock, 4 to 8 ft., 22c. Extension ladders are also slightly higher, roped and straight, 20 to 32 ft. being quoted at 24c per ft., and 36 to 40 ft., 27c per foot.

Brass and Copper Sheets, Rods Down

Toronto.

BRASS, COPPER RODS, SHEETS.—Lower prices are again in evidence on brass and copper rods, sheets and tube, and quotations now named to the trade are given as follows: Copper sheets, 36c per pound base; copper rods, 36c per pound base; copper tubes, 44c per pound base; brass sheets, 35c per pound base; brass rods, 34c per pound base; brass tube, 42c per pound base.

Door Springs Show Changes

Toronto.

DOOR SPRINGS.—There has been a further change in the price of Perfection door springs, and the new figures show quite an advance over those in effect pre-war. Figures quoted to-day are: No. 51, 70c doz.; No. 52, 80c doz.; No. 53, 95c doz.; No. 54, $1.00 doz.; No. 55, $1.35 doz.

Fence Staples Decline 25c

Toronto.

FENCE STAPLES.—In line with the lower levels reached on some other wire products, wire fence staples show a decline of 25c per 100 pounds this week. The quotations which are being made to the trade are at the following figures: Bright, $5.50 per 100 pounds; galvanized, $6.25 per 100 pounds.

Nails Hold; Wire Unchanged

Toronto.

NAILS, WIRE.—There has been a steady market during the week on wire nails, and whereas business is within rather narrow channels, there is some business being handled. Prices show no change from recent decline, the base figure to-day being $4.95 per 100 pounds. Cut nails are steady and unchanged at $5.35 per 100 pounds base.

Smooth steel wire shows little activity, prices holding at decline of 50c recorded a couple of weeks ago, making base price $5.75 per 100 pounds.

Cotton Waste Generally Lower

Toronto.

COTTON WASTE, OAKUM.—Practically all lines of cotton waste are now selling at lower price levels, quotations being revised a couple of weeks ago on some lines. New prices on some of the other numbers, which are also lower, are shown herewith: White, XXX, 19c per pound; XX, 18c; X, 16½c; XC, 15c; Japanese, 14c; colored, No. 5, 15c per pound; No. 1, 13½c; No. 7, 12c; No. 1A, 10¾c; No. 1B, 9½c.

Rope Holds at Unchanged Figures

Toronto.

CORDAGE—After two or three weeks of fluctuating markets, a somewhat steadier feeling is shown in respect to rope. The hemp market is holding quite firm, consequently market on rope is well held at present figures. Prices are now based at the following figures: Pure manila, 37½c per pound; British manila, 33c; New Zealand hemp, 33c; sisal, 27½c; sisal lath yarn, 27½c.

Paraffine Oil Down; Others Steady

Toronto.

OILS, GASOLINE.—A lower price has been named on paraffine oil, the list now being 24c per gallon, less 15 per cent. Paraffine has shown two declines of 1c each, making prices to-day 2c below former figures. Candles show no change as yet.

Coal oil remains steady with a fairly active demand in progress. Quotations range from 19½c to 22½c per gallon, according to quality. Gasoline is without change, business being maintained at a large volume and prices steady at 33c per gallon.

Stoves Unchanged; Wares Holding

Toronto.

STOVES, WARES.—There has been no material change in the situation on stoves and ranges this week. Business is within rather a narrow compass just now and prices are holding steadily. Some factors report that retailers have cancelled quite a number of their bookings on oil stoves in anticipation of lower prices, which manufacturers cannot see as yet. However, this trade will probably be handled by a more frequent handling of orders, as there should be a very good season ahead.

A very satisfactory business is shown in all lines of wares, and manufacturers are well satisfied with amount of business coming to hand.

Excitement in Bars Missing

Toronto.

IRON AND STEEL.—There is little excitement shown in the market on iron and steel bars. Prices are holding at unchanged levels, and business as yet is pretty quiet.

Common bar iron	$4 75	$5 00
Common bar steel	5 00	5 25
Refined iron	5 15	5 40
Angle base	5 25	5 50
Horseshoe iron	5 00	5 25
Tire steel	5 15	5 40
Mild steel	5 00	5 25
Norway iron	11 00	13 00
Toe caulk steel	5 90	6 15
Sleigh shoe steel	5 00	5 25

Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Corrugated Sheets Holding Steadily

Toronto.

CORRUGATED SHEETS.—The situation is without further change as far as corrugated sheets are concerned. There are some very nice inquiries for business coming to hand, and it seems as though trade would open up splendidly in another month or so, when weather conditions are more settled for building trade to get started. Quotations this week range as follows:

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Further Adjustments in Black Sheets

Toronto.

SHEETS, PLATES.—A further readjustment of prices has been made this week in black sheets, and jobbers state they are positively down to rock bottom, when working on to-day's cost. There is no reason why dealers should hold back on little sorting business, though heavy buying is not advocated until the mills seem a bit more settled in their attitude. Any further adjustments will be small compared with those already made and will likely come gradually.

There is a feeling in the market and in the trade generally that a cut is likely to come in steel prices. When? Perhaps on either side of April first. That, at least, is the opinion of one Toronto dealer whose guesses are seldom far off the mark. There seems to be a growing belief that prices of material are holding back considerable work that might otherwise be gone on with. Just how much more business would be booked at a lower steel price is, of course, problematical, but several of the dealers are quite certain that the coming of a lower figure would bring a lot of buying to the market.

Business, though, is good for the warehouses, and is showing up much better than last month. The turnover in several places is at least fifty per cent. above the work last February, although it must be remembered that transportations are much better this year.

Some of the warehouse men are anxious for lower prices. They have in many cases pretty well cleaned out their high-price war material and are ready to take advantage of the cuts made from now on. One of the warehouse men, speaking to-day of prices, ventured the opinion with some degree of certainty that the first of April would see a 2.60 price on plate, against the present 3c.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 50	$6 00
12 gauge	5 55	6 05
14 gauge	5 60	6 10
16 gauge	5 70	6 20
18-20 gauge	....	6 30
22-24 gauge	....	6 35
26 gauge	....	6 40
28 gauge	....	6 50
3-16 inch plate	....	5 75
¼-inch boiler plate	....	5 50

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	8 50	$9 00
U.S. 28	8 20	8 75
U.S. 26	7 90	8 45
22 and 24	7 75	8 30
18 and 20	7 60	8 30
16	7 45	8 00

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Wrought Pipe, Boiler Tubes Hold

Toronto.

WROUGHT PIPE, BOILER TUBES.—There have been no new developments in the market on wrought pipe this week, the feeling generally holding that present prices seem likely to hold until early summer. There is a fair amount of business being done, but buyers are only specifying for their immediate requirements. Prices are shown in current market quotations.

Boiler tubes are holding at lower figures established last week. Jobbers report sales as very good, and that they are now able to secure deliveries quite promptly from the mills. Range of quotations follows:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1 inch	$28 00	$.....
1¼ inch	32 00	.....
1½ inch	35 00	28 00
1¾ inch	35 00	28 00
2 inch	40 00	28 00
2¼ inch	43 00	30 00
2½ inch	45 00	35 00
3 inch	52 00	40 00
3¼ inch	.....	47 00
3½ inch	62 00	48 00
4 inch	70 00	60 00

GOVERNMENT SUPPLIES ON MARKET AT LOW PRICES

It is understood that there has been a large amount of many lines of goods handled by the hardware trade sold at the auctions of the Imperial Munitions Board, and that these goods have passed into the hands of buyers at very low prices.

Screen wire cloth, oil heaters, paint and rope, are only a few of the lines which, it is indicated, have been bought at the auctions already held, and that some of these lines are already being offered to the trade, is understood to be the case. The prices which can be named on these goods are, as far as can be learned, absurdly low, when compared with present market values.

Market on Lead Products Firmer

Toronto.

LEAD AND ZINC PRODUCTS.—There is a firmer undertone noted in the market on manufactured lead products this week. This has not resulted in a quotable change upward, but it has stopped the downward movement, too. Both tin and lead seem to have strengthened somewhat, and it looks as though markets will hold quite steadily for the next two or three months. Range of prices to-day follows:

Lead pipe, lb.	....	$0 12
Lead waste pipe, lb.	....	0 13
Lead traps and bends	....	Net list
Lead wool, lb.	....	0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	$0 37	$0 39
Solder, strictly, lb.	0 33	0 37
Solder, commercial, lb.	0 31	0 36
Solder, wiping, lb.	0 30	0 32½
Solder, wire, lb.	0 45½	0 50
Zinc sheets, per lb.	....	0 20

Old Materials in Stagnant Condition

Toronto.

OLD MATERIALS.—The scrap market is stagnant. That really describes the situation. Dealers state that they are losing money on the present volume of business with a practically fixed overhead. Some of the larger yards go so far as to state that they are out of the market entirely for the present so far as buying goes, and there is undoubtedly a feeling that prices will scrape lower yet before the actual bottom of the market is touched.

Dealers' Buying Prices—		
Tea lead	....	0 03½
Heavy lead pipe	0 04	0 04½
Pipe scrap	....	8 00
Stove plate, per ton	....	10 00
No. 2 busheling	....	8 00

Bicycle tires	....	0 04½
Automobile tires	0 03½	0 04

Downward Move in Ingot Metals Halts

Toronto.

INGOT METALS.—In view of what present-day costs must be it can be estimated that all ingot metals are pretty well down to a pre-war basis. It would appear that there can be no industries using large quantities who will really be in a much more favorable position to buy than at present. Three big consuming months are at hand, which may be expected to steady, if not stiffen, the markets, and whereas the summer may see some slight reaction from present levels, the declines cannot be as great as those already affected by any means.

COPPER.—Copper seems to have reached an attractive basis of selling now and there is more business being placed. Prices locally range around 20c per pound, and outlook seems much better than it has for some time.

TIN.—A better demand is in evidence on tin and the market rules with a

slightly firmer undertone. Quotations range around 60c per pound, with supplies ample to meet requirements.

SULPHUR.—There have been no new developments in the market on this metal. The price is held at about 8½c per pound, with only a fair amount of business passing.

LEAD.—The market is firmer and prices have advanced again slightly. Locally quotations are being made around 7½c per pound. There is some business being handled and outlook seems satisfactory.

ALUMINUM. — Open market conditions now prevail on this metal, but this has made little apparent difference as yet, buying interest being lacking. Quotations nominally range around 50c per pound.

ANTIMONY.—The market is purely a routine affair. Price holds around 8½c per pound with little activity to move stocks.

Snow Shovels Register Decline

Toronto.

SNOW SHOVELS.—Lower prices have been named on snow shovels, the quotations to-day being substantially below those formerly in effect. Retail prices have been ruling at 7½ per cent. advance on list; to-day the quotations to the trade are netted from a discount of 12½ per cent. from list. Snow shovel handles have been revised downward too, the price of $6 per dozen which has been in effect, being superseded by a $4 quotation to-day.

LONDON MARKETS

LONDON, March 6.—A lower price has been named on wire fence staples this week of 25c per 100 pounds. Iron rivets and burrs are lower, whereas grindstone fixtures, wall paper cleaner and tire savers are higher. Linseed oil has undergone a further revision upward. New prices on paris green show a decline of 12¼c per pound.

Business in London is reported seasonably good on most lines except builders' hardware, which is quiet at present. The prospects seem good, however, for a good sale on this line later in the season.

Iron Rivets and Burrs Go Lower

London, Ont.

IRON RIVETS AND BURRS.—The discount on iron rivets and burrs has been revised to make net prices lower. The new base discount is 35 and 5 per cent. off list, with the usual extras for coppered or tinned.

The new net prices on 5-lb. packages coppered iron rivets and burrs assorted figured at the discount of 35 and 5 per cent. off list are: No. 8 x ½ lb. pkgs., $1.36 per package; No. 8 x ¼ lb. pkgs., $1.48; No. 10 x ½ lb. pkgs., $1.45.

Wire Fence Staples Decline; Nails

London, Ont.

FENCE STAPLES, NAILS.—A decline of 25c per 100 pounds has been recorded in wire fence staples this week. The present price on bright is $5.50 per 100 pounds, and on galvanized $6.25.

Nails show no further change from recent decline, the wire being quoted at $4.95 per 100 pounds base, and cut at $5.35.

Grindstone Fixtures Up; Tree Pruners

London, Ont.

GRINDSTONES, FIXTURES. — New prices issued on grindstone fixtures provide for an advance in price. The present selling basis named to the trade is for the 15-inch, $7.75 per dozen sets, and 17-inch, $8.25 per dozen sets.

Tree pruners are moving forward fairly well, prices showing no change from following levels: Waters, 6 ft., $13.50 doz.; 8 ft., $14.00 doz.; 10 ft., $15.00; 12 ft., $16.25 doz. Rochdale, No. 35, $12.25 doz.; No. 38, $15.75 doz.

Tire Saver Higher; Rope Firm

London, Ont.

TIRE SAVERS.—Higher prices have been reached on tire savers, the Richards-Wilcox line being quoted to the trade at $4.50 per set.

Rope is holding firm at recent advances. The market on hemp is strong, and under present conditions no decline is anticipated. Quotations being made are for pure manila, 37½c lb. base; British manila, 33c; New Zealand hemp, 33c; sisal, 27½c.

Paris Green Drops 12¼c

London, Ont.

PARIS GREEN.—New prices issued on Paris green show a decline of 12¼c per pound from those prevailing last year. The present basis of quoting is at the following levels:

½-lb. pkgs., 54c lb.; 1-lb. pkgs., 52c lb.; 25-lb. drums, 50c lb.; 50-lb. drums, 49c lb.; 100-lb. drums, 49c lb.; 250-lb. kegs, 48½c lb.; 600-lb. bbls., 48c lb.

Wall Paper Cleaner Advances

London, Ont.

WALL PAPER CLEANER. — Wall paper cleaner is being quoted at new prices which provide for an advance over previous figures. The selling price of the Climax to-day is $1.85 per dozen.

Spring Lines Show Activity

London, Ont.

SPRING LINES.—More activity is noted in the movement of many spring lines, screen wire cloth, poultry netting and lawn mowers now going forward to the trade in fair volume. Prices show no change, poultry netting being quoted for the 1 and 2 inch mesh at 15 per cent. from standard list.

Screen wire cloth, black, is moving out to the trade at $3.25 per 100 sq. ft. in 100 ft. rolls, and $3.30 in 50 ft. rolls. Lawn mower discounts remain at following figures: Daisy, 35 per cent. off list; Star, 35 per cent.; Woodyatt, 35 per cent.; Empress, 35 per cent.

Glass, Putty, White Lead in Oil Unchanged

London, Ont.

GLASS, PUTTY, WHITE LEAD IN OIL.—Window glass is holding firm at unchanged discounts, single and double diamond being quoted at 25 per cent. from list in full boxes, and for cut lights, 10 per cent. The volume of business just

Try this on the A.P.M.

Shepard, in London "Punch"

now is small.

Putty is not very active and prices show no tendency to change. The range of quotations is given as follows: Standard, 100-lb. drums, $6.75 per 100 lbs.; 25-lb. drums, $7.00 per 100 lbs.; pure, 100-lb. drums, $8.75; 25-lb. drums, $9.00 per 100 lbs.

White lead in oil shows a little more life, but actual volume of business is still small. In ton lots, the pure is quoted at $16.30 per 100 pounds, and less than tons, $16.65, unchanged figures.

Linseed Oil Up; Turpentine Holds

London, Ont.

LINSEED OIL, TURPENTINE. — Higher prices have again been named on linseed oil this week, the strengthening flax market being responsible. Quotations now being made are shown below and indications seem to be that a firm market will rule for some little time.

Turpentine is holding steadily, though Southern markets are heavy. The absence of export business, along with the fact that new crop will soon be offering, may mean a weaker market. Higher prices seem improbable just at present. Quotations appear below:

Linseed Oil—	Raw	Boiled
1 to 2 bbls	$1 65	$1 68
3 to 5 bbls.	1 64	1 67
6 to 9 bbls.	1 62	1 65
Less barrels add 10 cents gallon.		
Turpentine—		Per gal.
1 bbl. lots		$1 05
2 to 4 barrel lots		1 04
5 gal. lots		1 15

WINNIPEG MARKETS

WINNIPEG, March 6.—Price changes during the past week are very few and show quite a contrast to the past few months. Generally markets appear quite firm in practically all lines. The only lines under revision during the week are rope, which advanced 2c per pound on pure and British manila, while conductor pipe elbows show a decline.

Business is reported very good, and spring orders are moving out very freely, with very few back orders compared to the last couple of years, as manufacturers are again getting back to a pre-war basis and shipments are coming through in very good time.

Sanitary Closets Show Revision

Winnipeg.

SANITARY CLOSETS, ETC.—Prices have just been issued for the coming season on Wakyte sanitary closets, new style, and many other articles manufactured by the same firm. The various lines, with new prices, are given as follows: Wakyte sanitary closets: No. 0, $3.85; No. 2, $7.75; No. 3, $5.85; Special, $5.25 each.

Powder chemical, 70c package; liquid chemical, 75c gal.; barrel trucks, $6.25 each; handy store trucks, $2.75 each; kitchen racks, 26 inch, 65c each; 36 inch, 75c each.

Conductor Pipe Elbows Decline

Winnipeg.

CONDUCTOR PIPE ELBOWS. — A slight revision has occurred in the prices of conductor pipe elbows, which have declined to lower levels, being quoted today at 20 per cent. off the list.

Firm Market on Window Glass

Winnipeg.

WINDOW GLASS. — Window glass prices are reported very firm, with about the usual demand, while stocks are reported below normal. The outlook for the coming season would indicate firm prices. To-day's markets are confirmed below:

Window Glass—Up to 25 inches, per 100 feet, single, $15.50; double, $19.50; 26 to 40, $16.50, $22; 41 to 50, $19.50, $25; 51 to 60, $20.50, $25.50; 61 to 70, $21.50, $27.

Further Increase 2c in Best Rope

Winnipeg.

CORDAGE.—Rope prices have again advanced during the week, the increase being 2c per pound on pure manila, British manila and African hemp, while sisal and lath yarn hold firm at former levels. This latest advance brings all prices back to the former high-water levels and indications point to firm markets. Prices now rling are given herewith: Pure manila rope, base, 39c pound; British manila rope, base, 34¼c; African hemp rope, base, 34¼c; sisal rope, base, 28¼c; lath yarn base, base, 28¼c.

Iron Rivets and Burrs Tend Downward

Winnipeg.

IRON RIVETS AND BURRS.—Prices on iron rivets and burrs are still holding at former quotations of 15 per cent. off the list. However, recent reports indicate that a reduction may be expected in the near future.

Shovels, Spades Remain Unchanged

Winnipeg.

SHOVELS, SCOOPS.—Shovels, spades and scoops hold firm at former prices, while the demand is reported to be good. To-day's ruling prices are confirmed as follows:

Shovels and Spades—Fox and Olds: D.H. sqr. point, $15.05 per dozen; D. H. rd. point, $15.05; Long H, sq. point, $15.05; Long H, rd. point, $15.05.

"Bull Dog and Jones": D.H. rd. point, $16.30 per dozen; D.H. sq. point, $16.30; Long H., rd. point, $16.30; Long H., sq. point, $16.30.

Scoops also hold firm at former prices, which are herewith confirmed:

Black Cat and Crescent Scoops: No. 4, $19.00; No. 6, $19.50; No. 8, $20; No. 10, $20.50 dozen.

Moose and Jones Scoops: No. 4, $19.90; No. 6, $20.90; No. 8, $21.04 dozen.

Lawn Mowers Show Activity

Winnipeg.

LAWN MOWERS. — Lawn mower prices continue firm at former quotations, with the demand for spring reported about normal. Prices now ruling are confirmed as follows:

Woodyatt, 14 inch, $8.50; 16 inch, $9.00 each. Empress, 14 inch, $11.00; 16 inch, $11.50. Daisy, 14 inch, $6.60. Star, 14 inch, $7.50; 16 inch, $8.00.

Wares Hold Steady Position

Winnipeg.

WARES.—Tinware and enamelware prices which have held firm for the past year, show no disposition to change to lower levels, as any reductions in material is, it is indicated, offset by the high wages ruling. To-day's ruling prices are herewith confirmed:

Enamelware — Scotch Grey, 40% discount; Colonial, Imperial and Pearl, 20% disct.; Premier, Canada and Diamond ware, 12½% advance on list; whiteware, 40% discount.

Japanned Tinware, ordinary, list plus 40%; japanned tinware, white, list plus 50%; stamped ware, plain, 40% discount; retinned, 33 1-3% discount; pieced tinware, ordinary, list plus 65%; with copper bottoms, list plus 85%; sheet iron ware, list plus 30%.

Galvanized tubs and pails, light, list plus 40%.

Galvanized tubs and pails, heavy, list plus 30%.

Japanned Coal Hods—List plus 50%.

Galvanized Coal Hods—List plus 60%.

Linseed Oil Remains Unchanged

Winnipeg.

LINSEED OIL.—Linseed oil prices continue firm on the local market, with only a fair demand and stocks well assorted. To-day's ruling prices are given as follows: Raw linseed oil, $1.80 gal.; boiled linseed oil, $1.83 gal.; in 5 gal. cans the advance is 7c per gallon, plus the price of container.

Turpentine Holds at Steady Levels

Winnipeg.

TURPENTINE. — Turpentine prices show no change during the week, and prices are confirmed as follows: Barrel lots, $1.25 gal.; ½ barrels, $1.28 gal.; 5 gal. lots, $1.30 gal.; 1 gal. lots, $1.30 gal., plus the usual extras for containers.

PITTSBURG MARKETS

PITTSBURGH, Mar. 6—The iron and steel market situation has become much more interesting, but chiefly because it is more puzzling. The high rate of mill operation is difficult, if not impossible, of explanation, but it must be accepted as a fact, and as a fact what it portends is a matter of doubt. It may mean that too much steel is being made now, or it may mean that the country's steel-absorbing power has so greatly increased that it is going to be very easy to find employment for all the capacity. Then as to prices, the steel mills are talking more strongly than formerly about the improbability of there being reductions, at least in the near future, when it rather appears that the market is about to decline, and is indeed on the very verge. The steel producers would prefer that declines should come as a surprise to buyers, for anticipated declines lead to postponement of buying.

High Operating Rate

The average rate of steel mill operation is fully 75 per cent. Considering the extreme dullness in nearly all lines of consumption this is a remarkable rate. particularly when one considers that during the war, or since 1914, the steel making capacity has increased 40 per cent. It stood at about 35,000,000 gross tons of steel ingots per annum at the end of 1913—also at the end of 1914 as there was no new construction to speak of in that year—while now it is 49,000,000 tons, actual commercial, not rated, capacity. Thus a 75 per cent. operation now would mean the same tonnage as a 105 per cent. operation in 1913, but as a matter of fact the mills did not run full throughout 1913, and produced only 30,280,130 tons of ingots in the year, against 30.284,682 tons in 1912, each year showing 5,000,000 tons more output than the best preceding year.

In detail, as to operating rates, it may be said that the Steel Corporation easily leads. Difficult as it has been for the trade to believe it, the Steel Corporation has been operating at more than 90 per cent. of capacity. Among the large independents the rate has commonly been in the neighborhood of 65 per cent. in the past fortnight, but a few are running at higher than that. Then among the small independents there is the most remarkable diversity. For instance, one small steel producer in Pittsburgh and another in Buffalo are closed entirely, while there are several small independents that are operating at 90 per cent. or more. This divergence is due chiefly to differences in the classes of trade served, and in general there are great differences due to the fact that some mills have cultivated a regular line of customers while others have gone out to sell where there was the most money to be obtained, a policy that is very profitable at one time and correspondingly unprofitable at another. The average operating rate in January was 85 per cent., as shown by the American Iron and Steel Institute statistics, as quoted in this report a fortnight ago.

Contrasted with this high operating rate, with an output comparable to the best rate attained before the war when all consuming lines were busy and taking as much steel as anybody thought they could take, is the present stagnation in the consuming markets. The only specific instance of great activity is the automobile trade, and it cannot possibly engage 5 per cent. of the steel producing capacity. The agricultural implement factories are working fairly well, but are understood to be depending largely upon stocks. It has come out as to both steel and coal that various industries, essential and otherwise, had much larger stocks at the end of the war than would be suggested by the fears they expressed that war-time regulations would make trouble. The regular building trades are doing nothing, jobbers are ordering only from hand to mouth, and manufacturing consumers as a rule are but slightly employed.

Explanations offered for the apparently contradictory showing are along two lines, one being that the Steel Corporation is building up stocks, which would account for a little tonnage, but not a great deal, while the other is that war-time construction is still largely in progress, though when it comes to citing details few can be mentioned. There is the Government's nitro plant in West Virginia and of course there is considerable shipbuilding.

Price Prospects

To one familiar with the finesse the steel trade has displayed over a period of many years it would appear that the steel producers are planning to exhibit a necessity as a virtue. Last week a number of prominent steel producers were meeting in New York and according to the authorized version they "discovered" that George N. Peek, recently named by Secretary Redfield as chairman of "The Industrial Board of the Department of Commerce" was in town, and accordingly they invited him in, to explain Secretary Redfield's plan for the deflation of war-time prices. Indications are that the steel producers are going to make a show of resisting the movement, but will gracefully yield at the last moment. The bald fact, however, is that when the steel producers last December tried to secure the sanction of the War Industries Board for the price reductions they desired to make, and failed, as the board would not even permit the schedule of reductions to be read into its minutes, they were even then hoping that some means would be found, about April 1, to secure any kind of Government sanction obtainable for a further reduction, the whole object being to make such and such a reduction and no more. If ordinary price cutting began it would become indiscriminate and there would be no way to put a peg in. Now the desired opportunity is very nicely presented, but if it were embraced with open arms Secretary Redfield's board would ask for reductions greater than the steel producers want to make, hence there is going to be a show of resistance, and there will be whatever delay can be occasioned. By reason of the Sherman law the producers would not feel free, in ordinary circumstances, even to have a general meeting to discuss prices, but now there is ample justification for calling a general meeting, to discuss Secretary Redfield's proposal. The meeting will accordingly be held in the near future. The procedure will probably be the same as that which worked so nicely last December. The meeting then did not consider prices in detail, but gave its committee power to act, by submitting reduced prices to the War Industries Board, and they adopted the reduced prices, no more and no less, even though the committee recommendations did not actually get before the War Industries Board and when, moreover, they had not even been presented at the meeting. This next meeting likewise will in all probability agree upon something without knowing just what it is, but when the suggestion or recommendation is announced, whether by Secretary Redfield's board or otherwise, they will adopt the prices and each producer individually will endeavor to adhere to those prices and not go below them. Last December's reductions averaged about $4 a ton on the full line, seeing that wire products were not reduced at all, but the next reductions will probably average considerably more, possibly even more than $10 a ton or half a cent a pound.

Are Oiled Floor Lawful?

A case of interest to merchants and others who oil their floors. Mary E. J. Stewart of Stirling brought an action against George Reynolds, boot and shoe merchant of that village, for damage for injuries alleged to have been occasioned by slipping on the defendant's oiled floor in his shop, which occupied the Supreme Court at Belleville. The plaintiff went into the defendant's shop in July last to look at boots and on leaving the store forgot a loaf of bread. She returned for it and in doing so fell on the floor, breaking her arm in two places, injuring her knee, side and other parts of her body. She claimed it was because the oil made the floor slippery. Mr. Mikel for the defendant contended that as she came into the store entirely for her own purpose—getting her bread—she must use the floor as she found it, and even if she were there as a customer she was only entitled to be protected against "unusual dangers," and there were no unusual dangers as she knew the floor was oiled and it was a usual and proper thing to oil floors. The case was dismissed and plaintiff ordered to pay defendant's costs. Those who use oil on their floors will now be relieved from anxiety in that respect.

March Displays of Indoor Specialities

The Dealer Who Goes After Business Early is the Man Who Gets the Profits—Big Season is Expected This Year

THE early bird gets the worm—also a running start on the day's work, larger returns for his effort, and several other advantages that contribute to success. Simmons, of "Keen Kutter" fame, when an apprentice in a hardware store, requested the use of the front door key, because the janitor could not start the day early enough for him.

For the paint dealer, the paint season will start just when he starts it.

Putting his paint department into shape early in the season will give him a running start in the development of his paint and varnish trade when the active outdoor painting demand commences.

March displays of indoor paint and varnish specialties both in the store and in his windows, enables him to make a quick getaway in the race for the larger outside painting business.

Works Two Ways

It works two ways. He starts early thoughts of painting in the minds of his trade, who naturally are inclined to be drawn to the store that is first in the field. Early planning and preparedness in the store avoids last minute arrangements.

Early preparation means more careful thought can be given to the season's plans and their execution. These plans, when started this way, are more likely to be cumulative and result in bigger business, and more profitable effort.

The above idea was the principle that Charles Haines worked on in his paint department, and we have Charley's word for it that it was worth while.

"I noticed," said Charley, "in social evenings amongst my friends, that along in March, whenever the women folks started talking about domestic affairs, there was sure to be more or less discussion about plans for house-cleaning and general household renovation. Here was a business tip for me. And believe me, when I get a business tip from a bunch of women, I never let up till I run it into the ground for both its hide and hair.

"Thinks I, if these women are beginning to get the house-cleaning fever already, it's up to me to keep pace with them, and start something in paints and varnishes.

Used the Tip

"I tucked the tip in my memory box for ready reference and started a still hunt for other evidence to justify an early venture in displaying paints and varnishes," continued Haines, in relating his experience.

"And I got evidence enough to make me eligible for a job with a detective agency," he smiled.

"A hard winter's wear on floors begins to show itself in March, and a woman's desire to get the bareness covered up shows itself in proportion; so down went preparations for suggestion No. 1—Inside floor paints, floor varnishes, and floor varnish stains.

"Floor linoleum is a thing that is used a great deal and gets plenty of abuse in the winter from melting snow and constant scrubbing. I know from experience in my own home, and from what I found out in the homes of others, that a nice glossy linoleum gets a short cut to a woman's interest in a good varnish, so down went suggestion No. 2—Linoleum and oilcloth varnishes.

"Children in a home are also an indirect cause for early business. Where they are more or less confined within doors on account of inclement weather they have got to let loose with their energy somehow and the furniture and woodwork suffer in consequence. This means a demand for varnish stains or furniture varnish.

Shows its Effects

"The constant heat on radiators begins to show its effects pretty well in March, which appeared to offer a first-rate chance for displaying aluminum paint and radiator enamels.

"The high prices for furniture since the war began have caused a pretty thorough cleaning out of attics, and the digging up of old discarded pieces, and which has brought a pretty steady demand for furniture varnishes, varnish stains, enamel and bedstead enamels. Just why this demand should be unusual in March I never found out until I started my investigation. Women begin to plan the re-arrangement of their homes for the summer, and in doing so, find that they can use some discarded piece of furniture rather than buy new. It all helps the paint and varnish business, so I prepared to play up to this idea.

"Fact of the matter was," exclaimed Haines. "I gathered so many hints for starting early in the season that I was convinced I would be a fool for not doing so, rather than for doing so.

Window Displays

"Of course you will notice that these were all for in-

(Continued on page 64)

There's Something To A Name!

Every hardware dealer sells paint. Some more—some less.

The dealers handling "Moore's" are invariably selling more and more paint all the time. The name "Moore" is their assurance of increased paint sales.

A display of Moore's Paints and Varnishes in your window or on your shelves affords your prospect such a complete line of highest quality guaranteed paints and varnishes to choose from that an ultimate sale is always assured.

Moore's Paints dry hard but retain sufficient elasticity to prevent cracking or peeling. Thus they combine tip-top appearance with unbeatable wear.

The Moore Agency proposition will interest you. Write for particulars.

Benjamin Moore & Co., Ltd.

West Toronto
Ontario

door use, but there appeared to be enough business in sight from these to warrant the undertaking, so we went to it, and planned a couple of window displays based on the suggestions I had gathered.

"But here's the main reason why I think we pull our early season's start off so successfully. We keep pace with the ideas that were beginning to hatch in the minds of the women folks. In March when the winter's social activities begin to wane and the first tinge of spring begins to be felt, the women begin to get the first hazy ideas of what they would like to do to change things around in the home. By displaying our indoor specialties and doing a little advertising, we bring these ideas to a head and they begin to get busy.

"Just like the man in a candy shop next door to a public school. When the melting snow reveals the first bare spot in the street, he sticks a box of marbles in his window, which suggests to the small boy rustling up pennies to start his first game of dibs."

In listening to Haines' story, we could not refrain from asking how this early start affected the rest of his seasons business.

All to the Good

'All to the good!" he exclaimed enthusiastically. "It promotes more business all round. You see, if a woman can get all these little things fixed up early, she gets them off her hands and off her mind, and this leaves her lots of time for other work. Naturally, if she has the renovating bug big in her bonnet, she turns to painting up a bedroom or two; or her dining room, or kitchen; or perhaps the whole house. The chances are, if she is left to fixing up the furniture and painting up the house all at one time, one or the other goes by the board. Spread your painting season over as much time as possible, and get a larger volume of business in the long run.

"And another thing; painting up one thing suggests painting up something else. Like a chain prayer, you never know how far it's going or where it's going. I've seen people come into the store early in the season intending only to paint up the inside floors, and before summer comes they end up with painting the whole house, inside and out.

Only Half Done

"When people leave everything to be done in a bunch, there is bound to be something left undone, or else many things are only half done. If they spread out these operations over a longer period of time, they are done more thoroughly, and they lead to more things being done than they intended. This applies to household painting as with everything else.

"As for outside painting," continued Haines, "we found that by promoting early inside painting it encouraged and left time for thinking about the outside of the house. When a woman can get everything set to rights inside, it makes her discontented with outside appearances if her home shows any neglect in this way. Several instances I know of, where there was no intention of painting the outside of the house, the owners came to it through the fact that they had gone through the house thoroughly early in the season. An early start with inside specialties certainly paves the way to a larger volume of business for outside use.

"How did it affect arrangements in your store?" was the next question we ventured.

Get Busy Early

"If there's any chance of getting our paint department in shape a day earlier than the previous year, we do it," answered Haines. "Some fellows seem to think that if they place their spring order in the fall and get it delivered anywhere along in March, they've done all that is necessary. I climbed out of that rut long ago. We get our stock in just as soon after Christmas as stock-taking will let us, and we hustle it on to the shelves. My season's plans are late if I don't have them out before the middle of February. The latter part of February we arrange our indoor specialty advertising and plan our window displays. Just as soon as that 'spring feeling' begins to show itself in March we commence operations.

"We make every effort to keep pace with the thoughts of the women as they work their way towards the spring clean-up. In fact, we are getting so that we can anticipate them, and are very often able to lead their buying inclinations our way. Our early starting methods have increased spring business in indoor specialties, and as I have said, this has made it easier for us to sell outside goods, and in greater volume."

Early Starting

The writer has always favored early closing, but is an enthusiast on early starting. Personal experience and observation have proven beyond a doubt that early starting has been a mighty factor towards the success of many a man and many a business. In younger and more athletic days, when able to step off in a hundred dash, I found that more than half the race was in getting away from the mark with the gun. An old timer, who took me in hand, spent 75 per cent. of his time on this part of the running.

"And so it is in the paint business, whether you start early in the day or early in the season. Getting off the mark with the gun is more than half the battle. The man who leaves the arranging of his plans and his stock until the demand begins, works under the handicap of a late start."

Kept Pace With Them

Which brings us back to Simmons, referred to at the outset, and also in an earlier issue of HARDWARE AND METAL. The reason why he desired to open the store of his employer at 6.30 a.m., instead of waiting for the janitor to do so at 7.30 a.m., was that he found the farmers of the community astir in town at the earlier hour. He wanted to be on the move when they were on the move. By stepping off the mark at the crack of the gun, Simmons soon became a partner in the store that he opened at 6.30, instead of 7.30.

Indoor paint and varnish specialties displayed in March, or February if need be, give the paint dealer an early start in the season's paint business. They increase the volume of business for the year. They are not a handicap, but a help in developing bigger business and better service to your trade.

USES FOLDER

An enterprising dealer who believes in going out after business is using a small folder as one of his plans. On the outside are the words "Of Special Interest to the Home of Mr. ——" Inside are the name and address and a space for body color, trim and sash. Then "We Estimate the Cost as follows:

Approximate cost of paint for (....) coats .....

Approximate cost of paint, including labor to apply same for (..) coats ...."

On the opposite page is the following tactfully worded suggestion.

"We are pleased to submit the color suggestion as shown on this card for your approval.

The color scheme is designed from personal observation of your residence and surroundings as best suited to set off or distinguish your house in its particular location.

We realize that correct color schemes are a problem for those who do not make this a lifelong study, and therefore feel that we are not encroaching upon your good taste if we submit the correct scheme and approximate cost unsolicited.

We did not take the liberty of trespassing upon your property in order to take exact measurements, therefore the estimates are only approximate.

The color scheme, however, is correct both from the standpoint best suited for the architecture and artistic color harmony as viewed from the street and as others see the pleasing effects.

The suggestion of painting is made by me because I frankly believe the house needs painting this year for protection as much as it does for its artistic appearance.

If further information is desired and exact estimates required I am cheerfully at your command.

Our telephone number is 22.

Yours truly."

CATALOGUES AND BOOKLETS

Catalogue No. 21A, issued by the Samson Cordage Works, 88 Broad St., Boston, contains twenty-three pages and lists with illustrations of solid braided rope, sash cords, clothes lines, signal cords, arc lamp and trolley cords, couplings, snaps, grips, lariats and small lines. Copies may be obtained by readers of HARDWARE AND METAL upon request.

MANY a retail business got its start on a career of prosperity, by being linked to the B-H line.

Not that the mere acceptance of the B-H Agency places a dealer on the high road to prosperity.

But this it will do—

It will label your store as a good store to trade with—bring to your store that large section of the people in your community who have come to know the merit of B-H Products, and who are ready to place complete confidence in any dealer who sells such products.

After that, it is up to you.

It must be admitted, however, that to gain the confidence of the better class of trade is a mighty big step in the direction of a prosperous business.

It is because their alliance with

B-H PRODUCTS

is daily winning such confidence for them, that the B-H Agents attribute much of their success to the fact that they had the foresight to select the right Paint and Varnish line.

Government "Restraint of Trade"

THE Government is becoming increasingly stringent in its attitude toward every form of what is termed "price-fixing." Many trade practices which were openly encouraged during the war are now being closely scrutinized, with an inconsistency and sangfroid which are comparable to the famous "smile on the face of the tiger." Having urged the industries of the United States to adopt methods which would standardize costs and prices to an extent sufficient to allow a reasonable profit and thereby doing a genuine service to all branches of industry, and following this up with the Webb Law allowing combinations for export, the Government should be most careful how they undo the good work begun.

The attorney-general has taken the ground in a recent appeal that a resale price contract is in restraint of trade. This is contrary to a number of precedents which have been established by court decisions and directly contrary to recent legislation and the trend of popular opinion. It is very much to be hoped that a reactionary official may not be permitted to tear down the good constructive work which has been accomplished in permitting manufacturers to protect their own brands from unfair competitive price cutting. If the new federal incorporation act urged by many able men in the export trade becomes a law, we shall have the Government actually incorporating combinations of competitive companies for foreign commerce as is already done by the states under the Webb Law with full federal authorization. It is hard to reconcile this position with the strained construction of the Sherman Law apparently demanded by the attorney-general.

All the American business man wants is a reasonable opportunity to allow business to develop along modern and progressive lines. He does not want a monopoly; he delights in fair competition, but he does want a commensense and consistent attitude adopted and maintained by the authorities so that he may not have to spend the major part of his time with his attorney trying to determine whether his simplest and most natural actions may not contravene some official view of a reactionary and harmful public policy. The real harmful "restraint of trade" seems to be that which originates in official circles.—"Paint, Oil and Drug Review."

Firm Largely Supported By Farmers May Rival Grain Growers

WITH more than 700 farmers as shareholders, the Dauntless Manufacturing Company of Redcliff, Alberta, looms large as a possible rival of the United Grain Growers for the support of the agriculturists of the province. This company has just completed a large plant at Redcliff, and while it is beginning business in the iron rather than the grain world, its scope goes so far as to manufacture farm and other implements. Already there is a feeling among many farmers that many from the ranks of the U. G. G. will eventually tie up, so to say, with the new farmers' organization.

A meeting of those interested in the Calgary district is to be held very shortly, when the meeting will be addressed by W. D. Brown, president, and the whole matter of iron manufacture and its possibilities in helping the province from an industrial standpoint will be gone into. Calgary headquarters may be established later and while the location of the plant at Redcliff, because of the advantage of natural gas as fuel, means the general office in that town, it is the aim to establish warehouses and agencies at several Alberta points, one in Lethbridge, one in Edmonton and one in Calgary.

The administration is on the basis of co-operation to a certain extent at least, the voting power resting with all the shareholders, being on the basis of one vote for one man. This method of incorporation does away, it is claimed, with the possibility of what is known as the "freeze out" among corporation methods, for the men having a large holding have no more to say in its management than the man with the small holdings.

The executive officers are planning a provincial wide campaign by means of which they hope to line up as many members as has the U. G. G. or the U. F. A.

Trade Inquiries

486. **Enamelware.**—All kinds of enamelware as used in house or hospital required by a firm in Gloucester, England.

487. **Garden tools.** — A Gloucester, England, firm is prepared to purchase all kinds of garden tools, spades, forks, shovels, etc.

488. **Hay forks.**—A Gloucester, England, firm wants hay forks.

489. **Binder twine.**—Canadian firms in a position to export binder twine are asked to communicate with a firm in Gloucester, England.

490. **Barbed wire.**—A firm in Gloucester, England, wishes to hear from Canadian exporters of barbed wire, thickly set 4-point.

491. **Fancy fencing.**—A Gloucester, England, firm desires to import fancy fencing.

492. **Wire fencing.**—A Gloucester, England, firm desires to import wire fencing.

493. **Spokes.**—A Cheltenham firm desires to import spokes of all sizes for cart and carriage wheels.

404. **Wire nails, bolts and nuts.** — Will Canadian manufacturers of bolts, nuts and wire nails, with supplies either now or in the future for export, write to a firm in Cheltenham?

495. **Files.**—A Cheltenham concern wishes to import files.

496. **Brushes.**—A Cheltenham firm would be glad to hear from a Canadian exporter of brushes.

497. **Brooms.** — A firm in Cheltenham wants to import brooms.

498. **Handles.**—A Cheltenham firm is prepared to purchase hay fork, spade and handles of all kinds.

500. **Coffin furnishings.** — A Cheltenham firm desires to buy coffin furnishings of brass and imitation brass.

501. **Closet seats.**—A Cheltenham house wants to be put in touch with Canadian exporters of closet seats.

502. **Enamelware.** — A Cheltenham firm wishes to purchase enamelware.

503. **Bolts and nuts, etc.**—A firm in Gloucester, England, would be glad to get into communication with a Canadian manufacturer of bolts and nuts, etc.; they want cup square ¾-inch by 3-16-inch to 12-inch by ½-inch; bright motor hex, round hex, general assortment bright washers, taper pins (bright steel), set screws and split washers.

504. **Barbed wire.**—A Gloucester, England, firm asks for quotations on from 15 to 20-ton lots of barbed wire, 4-point, thick set in ¼-cwt. and ½-cwt. reels, principally the latter.

505. **Wire nails.**—Will Canadian manufacturers of wire nails with supplies for present or future delivery communicate with a firm in Gloucester? Rounds and ovals in all sizes, ¾-inch to 6-inch required in 1-cwt. gross paper-lined bags and not kegs.

512. **Small churns.** — A Gloucester, England, firm has a market for small churns.

513. **Strainers.** — A firm in Gloucester, England, desires to buy strainers of tinned sheet metal.

515. **Limewashing and spraying machines.** — A Gloucester, England, firm has a sale for these machines, for spraying potatoes, fruit trees, plants and shrubs; also stationary lime washer. Will Canadian exporters communicate?

516. **Clothes pegs.**—A Bristol firm desires to import clothes pegs.

517. **Horse nails.**—A firm in Gloucester, England, wants to purchase horseshoe nails.

518. **Hay fork handles.**—A Bristol house desires to make connections for after-war trade with a Canadian manufacturer of hay fork handles.

519. **Hoe handles** are required by a firm in Bristol.

520. **Rake handles.**—A Bristol firm is in a position to purchase straight rake handles, 1⅛ inch in diameter by 4 to 8 feet in length.

521. **Manure fork handles.** — A firm in Bristol wants bent and straight manure fork handles of 4 feet, 4½ feet and 5 feet in length by 1¼ inch in diameter.

522. **Navvy pick handles, 36-inch, 39-inch** and 42-inch in length, are wanted by a Bristol firm. Mostly the 36-inch required.

523. **Hammer and sledge handles.**—A firm in Bristol desires to import these handles in the usual sizes.

524. **Hatchet handles** required, 14-inch, 16-inch, 18-inch, 20-inch and 24-inch in length, by a Bristol importer.

525. **Felling axe handles.**—A Bristol importer desires to purchase fawn foot felling axe handles.

526. **Spade, fork and shovel handles** required by Bristol concern.

TOO LATE TO CLASSIFY

FOR SALE

HARDWARE BUSINESS FOR SALE, IN thriving Ontario city; $14,000 stock and fixtures at a bargain. Good reasons for selling. Apply Box 219, Hardware and Metal.

FOR SALE—A BATTERY OF SIX BOWSER pumps and tanks, together or separately. Also set Cameron & Campbell's drawers, nail bins and tool cabinet. Box 201, Hardware and Metal.

A Quality—economy trade mark

IN all wood finishing operations the matter of durability should be carefully considered by the varnish buyer, as upon this depends the ultimate cost to the user.

The question is not only how the finish will look, but how long will it last.

The long wearing period of Berry Brothers' Varnishes, Enamels, and Stains permits economy without any sacrifice of beauty or utility.

The "Berry" trademark is a valuable sales help for the dealer because it is so widely known and trusted by all varnish buyers.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, March 6.—There is another advance this week of two cents per gallon for linseed oil. Seed markets are much firmer, the difference within the week amounting to eight cents. Further increases of prices are not improbable.

There is no change for turpentine, but the market undertone is not as firm as it was and there may be some revision in the near future.

White lead and putty and also glass are ruling steady and firm, while there has been more enquiry of late for mixed paints and shipments are expected to be made early this year.

Stronger Linseed Oil Markets; Up 2c

Montreal.

LINSEED OIL.—The market is a stronger one again this week, and it gives no indication of lowering. Prices are up two cents over last week. The position of flaxseed is stiffer, and this is attributable to a dearth of seed stocks, United States markets being reported as working on limited supplies.

LINSEED OIL

	Raw Imp. Gallon—	
1 to 4 bbls.	$1 54	$1 55
5 to 9 bbls.	1 53	1 55
10 to 25 bbls.	1 52	1 55
Boiled, Imp. Gallon—		
1 to 4 bbls.	1 56½	1 57½
5 to 9 bbls.	1 55½	1 57½
10 to 25 bbls.	1 54½	1 57½

No Turpentine Change; May Lower

Montreal.

TURPENTINE.—This is no higher and while the market has held, tendencies would appear to indicate a lower price basis, if the better basis in the producing points of the South continues. There is a fair movement and stocks are fully ample.

Turpentine—	Imp. gal.
1 to 4 barrels	$1 00 $1 05
Small lots	1 07 1 17

(Packages extra).

Basis For Putty Shows No Change

Montreal.

GLASS, PUTTY.—The undertone of the market is steady and without change, supplies are being distributed in a seasonable way. The supplies are quite satisfactory and sufficient to meet all needs

Glass is steady and the undertone firm, but unchanged.

Standard Putty—	Per 100 lbs. 5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Position Held on White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—With pig lead firmer, the position on white lead is maintained fully, and what limited business comes to hand is being filled on the basis of $15.50 per 100 pounds for five ton lots, and at $16 for ton lots, and $16.35 for lesser quantities.

Paint Selling is Promising Well

Montreal.

MIXED PAINTS.—There is a noticeable improvement in the movement of paints, and while the spring business will not open definitely for some time, manufacturers state that there is a desire upon the part of the retail trade to have their orders come along very soon.

TORONTO

TORONTO, March 6.—Linseed oil has advanced again this week, prices being up from 5c to 6c per gallon, and indications are that market is very firm. Turpentine is down 1c per gallon in some quarters, and the market in the South is rather heavy. Waxing brushes show a decline this week and new prices have been named in some quarters on glue. There seems to be a little more activity, but, generally, buying is on a pretty small scale.

Linseed Oil Moves Higher

Toronto.

LINSEED OIL.—Higher prices have been named on linseed oil again this week, this being a direct reflection of the stronger feeling in flaxseed. The market seems to be advancing steadily on seed, and there is no tendency showing now towards a reaction downward. The main factor seems to be that Argentine seed, which seemed likely to reach United States markets in large volume, is not coming, owing to tie-up of shipping through strikes, etc., and the United States crushers are facing a situation in regard to supplies which may show a serious shortage of seed. The Canadian markets have reacted in sympathy with conditions at United States points, and it seems that prices may go still higher before peak is reached. The range of quotations is quite wide this week, but the prices shown are up from 5c to 8c per gallon over those last Thursday.

Linseed Oil—		Raw Imp. gal.	
1 to 2 barrels, gal.	$1 59	$1 65	$1 68
3 to 5 barrels, gal.	1 58	1 64	1 67
10 bbls. and over	1 56	1 62	1 65
		Boiled Imp. gal.	
1 to 2 barrels, gal.	$1 61½	$1 68	$1 71
3 to 5 barrels, gal.	1 60½	1 67	1 70
10 barrels and over	1 58½	1 65	1 68

Turpentine Down 1c In Some Quarters

Toronto.

TURPENTINE.—Turpentine shows a slight decline in some quarters amounting to 1c per gallon. The markets in the South have developed remarkable heaviness, owing to absence of export movement and the fact that new crop turps will be distilled at an early date. There has been a substantial reduction of stocks during the past week, but this has not proved a factor to stiffen the markets as might have been expected. The wet weather prevailing throughout producing areas is adversely affecting situation as relative to the producers, new turpentine usually being offered around March 1, but indications are now that there will be little available before April 1, and a loss in production figures for the season may be shown. That, of course, is something for the future to show. Prices locally range as follows:

Turpentine—	Per Imp. Gal.	
1 barrel (barrel included)	$1 03	$1 05
2 to 4 barrels (barrel included)	1 02	1 04
5 gallon lots	1 13	1 15

Steadiness in Mixed Paint Situation

Toronto.

MIXED PAINTS. — Steadiness is shown in the situation on mixed paints, a very fair volume of orders being handled, though quantities are kept down to immediate requirements of the trade. Prices are maintained at unchanged levels and outlook for business seems very good.

CONCENTRATION

MEANS

LESS EFFORT

MORE SALES = INCREASED PROFITS

Have you as an up-to-date dealer ever stopped to consider what it means to handle a complete line of Paints and Varnishes all under the one label? Just consider for a moment and you will see that a satisfied purchaser of one product needs no persuasion whatever to buy another product under the same label.

PAINTS AND VARNISHES

are the result of many years experience and every one is the best it is possible to make. A real "ELASTICA" Sales Campaign has been planned for you—The kind that will bring customers right inside your store to buy "ELASTICA" goods.

If you are not now concentrating your efforts on the sale of "ELASTICA" Paints and Varnishes write today for our proposition

INTERNATIONAL VARNISH CO. LIMITED.

Vancouver Halifax TORONTO Montreal Winnipeg

White Lead in Oil Remains Steady

Toronto.

WHITE LEAD IN OIL.—New developments in respect to white lead in oil are lacking. There is some movement to the trade and the undertone to the market has strengthened a little owing to reaction of pig lead from low point reached and stronger feeling in linseed oil. Prices are ruling without change this week, pure white lead in oil being quoted at $16.30 per hundred pounds in ton lots; at $16.65 per hundred pounds in less than ton lots. The various brands are shown in current market quotations.

Glass Unchanged; Putty Holding

Toronto.

GLASS, PUTTY.—The situation in window glass shows little material change for the week. Business coming to hand just at present is rather small, but there seems reasonable assurance that there will be quite a lot of building activity this year and the result of such a condition will be reflected on glass. Prices are unchanged at discounts in current quotations.

Putty is quiet, prices holding firm and outlook that there will be only a fair movement until things open. This is not unusual by any means. Prices to-day are shown herewith:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices

Changes in Glue Prices

Toronto.

GLUE. — There have been some changes in the prices ruling on glue this week, quotations now named to the trade on sheet glue K.I.W. being 21c per pound, on G.S.W. 28c, and on ground glue W.B., 14c per pound.

Waxing Brushes Register Decline

Toronto.

WAXING BRUSHES.—Lower prices have been named this week on waxing brushes, the cheaper iron market bringing about this change, it is said, as bristles show no easing away. Quotations being made to the trade to-day are: 10 lb., $20.15 per dozen; 15 lb., $25.50; 20 lb., $30.40; 25 lb., $35.50.

MADE IN CANADA AUTOMOBILE IS PROGRAMME FOR PEACE TRADE

ANNOUNCEMENT has been made by T. A. Russell, concerning the reconstruction plans of the Russell Motor Car Co. These involve the construction of a made-in-Canada automobile by the Willys-Overland, Limited, and the reorganization of that industry. During the war passenger cars were assembled at the West Toronto plant of the Willys-Overland Company, and attention was concentrated on the manufacture of munitions. The machine tool equipment of the plant was wholly devoted to war work, including the manufacture of airplane engines. A peace program has now been developed that includes the manufacture of two models of automobiles, a popular-priced light four, equipped with electric lights and self-starter, and a higher-priced car, in which the Knight engine will be installed. Work will be commenced on the light four model almost immediately, and it is probable that it will be on the market by midsummer.

Will Make Gramophone Motors

The reconstruction plans of the Russell Motor Car Company as well have been brought to completion, at least in part. The headquarters of the automobile industry will be centred in the Willys-Overland plant, and the forward step marks the union of two organizations that were successful in two of the most intricate lines of war industry, namely, the manufacture of fuse parts and airplane engines. At the King street plant the manufacture of gramophone motors will be entered upon. This is an important line of manufacture which has not previously been established in Canada. Preliminary work has already been finished in connection with these motors, and after successful tests were made recently, the company is already entering on quantity production, which, it is expected, will be at the rate of 1,000 a month. This industry will supply an important part for Canadian-made gramophones, and the market is capable of great extension. Other lines of production at the Russell plant on King street will include gramophone and piano hardware, spark plugs and bicycle chains. None of the above articles has previously been manufactured in Canada, and the new ventures are more noteworthy for the reason that the commodities that will be turned out will widen the manufacturing field in Canada and will not be in competition with the products of existing industries.

The other products of the metals and stampings plant will comprise small stampings, including parts of electrical equipment and parts of safety razors that will be supplied to manufacturers.

Larger Bicycle Production

In connection with the Canada Cycle & Motor Co., Mr. Russell stated that production is being maintained at full capacity, and that there is a large market for the products of this industry which could not be taken advantage of during the war on account of other requirements. A representative will leave within the next month to secure business offering in Australia, which has been a profitable market in the past for bicycles, and which is believed to offer greater possibilities in the future.

The Willys-Overland plant will employ over 1,000 men, and will provide employment for practically all the executive and sales staff of this concern. Before and during the war some five models of assembled cars were handled. The fact that production will be confined to two models is significant of the policy of the company. The larger stampings will be secured in Canada from a company specializing in this department. This will mean that all the parts of the cars to be manufactured at the Willys-Overland plant will be made in Canada, with the possible exception of the springs.

Company Official Changes

Changes in the company include the retirement of Mr. F. J. Sleight, who has been general manager of the company, and who is leaving Canada about the first of May to take up important duties in connection with the Willys interests in the United States. Mr. Willys is retiring from the presidency of the Canadian company, and will become chairman of the Board of Directors. T. A. Russell, formerly vice-president of the company, will become president. It will require some months for the installation of machinery before the company can enter upon full production. The capital stock of Willys-Overland, Limited, is being increased considerably.

RAPID TOOL AND MACHINE CO. HAVE ADDED NEW LINES

F. E. Bedwell, sales manager for the Rapid Tool and Machine Company, Ltd., Montreal, stated to HARDWARE AND METAL that they will manufacture in the immediate future a number of lines heretofore made by Butterfield & Co. Among these lines are the Butterfield patterns of solid die plates for threading steam and water pipe, Armstrong adjustable stock and pipe dies, pipe cutters, pipe cutter wheels, and hinged pipe vises. They also have undertaken to manufacture parts for these various tools and are now engaged in readjusting their plant to handle this work.

WILL LIKELY SPEND HIS MONEY AT HOME AFTER THIS

An Alberta hardware firm has sent in a communication giving details about a resident of their own town who in February, 1918, sent a money order to a Winnipeg firm for $40 for goods, including hardware. The Winnipeg firm, it is stated, did not have the goods the Alberta man wanted and although he wrote them a number of times he got no answer. The Alberta hardware firm took the case up and got the man to put the matter in the hands of a solicitor. After eleven months and at a cost of $4.40 the Alberta man has got his money back.

Lowe Brothers Paints

Does the Paint You Sell Make a Permanent Customer of Each Casual Buyer?

DOES it give such satisfaction that he will always return to you for that particular brand? Has it increased his faith in your store?

Does it cause him to look with more favour on your general line of goods which he has formerly bought from your opposition?

Remember every can of paint you sell is an advertisement for you and your store—good or bad according to the satisfaction it gives the buyer.

Paint is not a thing that can be used once and then forgotten. It stands in front of your customer's eyes day after day and month after month, and if it breaks down, chalks, scales off or fades he blames not only the brand but the store where he bought it.

Sell the best paint—it will pay you. Sell Lowe Brothers' Paint—with the quality in the can and the reputation behind it.

C·C·M· BICYCLES are

"90% Made-in-Canada"

NOW that so many Canadians are looking for goods made in their own country, it is well to make sure that articles described as "Made-in-Canada" are really what they claim to be.
For example, a bicycle might claim to be "Made-in-Canada," although, as a matter of fact, it was merely put together here from cheap, foreign-made parts, most of the wages going to foreign workmen.

But C.C.M. bicycles are just what we say they are.
With the exception of the saddle, steel balls, and some of the chains and grips, they are made complete in Canada, from the steel tubing and other raw material.
The exceptionally high quality of C.C.M. bicycles makes them the most satisfactory line to handle in any case.

The principal C.C.M. nameplates are:

"MASSEY" "COLUMBIA" "BRANTFORD RED BIRD" "CLEVELAND" "PERFECT"

Profit—Safety—Convenience With the BOWSER.

Loss—Danger—Inconvenience Without the BOWSER.

No question about which is preferable

The two illustrations above are from actual photographs and vividly picture the advantages of a Bowser equipped oil room.

You can install this modern equipment and handle your paint oils with profit—safety—and convenience, and know that in the Bowser you get the best that money, expert workmanship and the experience of 32 years can produce.

Interesting literature will be sent on request. No obligation.

New Idea Warm Air Furnace

MORE HEATING SURFACE on every NEW IDEA FURNACE than any other furnace. Ash pit large and roomy, less chance of ashes banking up and burning out grates.

FIRE POT one piece, with deep flanges adding one-third more heating surface. Very heavy. Guaranteed for FIVE YEARS.

RADIATOR large, giving more surface than found in other furnaces.

NEW IDEA DUPLEX GRATES (Patented) take care of any size clinker from either Hard or Soft Coal. They operate so easily a child can operate them. They work so well that there are never any ashes worth sifting, saving the dirtiest work necessary in attending old-style furnaces.

New Idea Furnace made in seven sizes. And every one Guaranteed.

Get the NEW IDEA FURNACE AGENCY for 1919 and see your furnace business grow. They sell themselves and others. Write now for Agency.

"House Cleaning Days" Mean Greater Wa-Ko-Ver Sales

If you keep Wa-Ko-Ver well to the fore just now, in your windows and on your counter, the housewives' mind will become receptive to the Wa-Ko-Ver idea.

Wa-Ko-Ver beautifies all woodwork, and literally wears "like iron." Wherever there are worn floors and scratched woodwork you can safely recommend Wa-Ko-Ver Stain to restore the old-time freshness.

Write us a card and we'll be glad to tell how you can profitably represent us in selling Stephens' paints and varnishes.

"The Mysterious German Onions"

On nights when the German air raiders were out, they sent up strange, luminous balls behind their lines and anchored them above the clouds—globes of fire which could be seen for forty miles or more. What these "onions" were, or how they were kept in stationary position above the clouds, is still a profound mystery. The Allies never learned anything about them, but the Allied night bombing crews steered their course to the Rhineland by the luminous buoys thus provided.

What is known about the onions is told by Lieut. J. Vernon McKenzie in the course of an article, "Raiding the Rhineland," in MARCH MACLEAN'S. It is an intensely interesting article, telling all about the great reprisal campaign which implanted the fear of war in the German civilian heart.

"NO HOPE FOR THE WETS"

"Already the temperance forces are lined up to stop any possible break in the prohibition dam," writes J. K. Munro, in discussing what is going to happen at the coming session at Ottawa. He predicts that Union Government will hold together, but that the habit it has contracted of promising everything asked is going to make a lively session. He expects:

Dry legislation at the earliest possible moment.
The moral reform forces in control.
No change in the Divorce Law.
Tariff concessions made to the West.

The March number, in fact, is full of live, up-to-the-minute features.
The famous Canadian Ace, Lieut.-Colonel W. A. Bishop is on the cover.

Some of the outstanding articles and stories are:

The Transformation (a new serial)—By Frederic S. Isham.
A Canadian King-maker (the story of Lord Beaverbrook in Britain)—By Maurice Woods.
Fitting in the Returned Soldier—By George Pearson.
The Three Sapphires—By W. A. Fraser.
The Strange Adventure of the Nile Green Roadster—By Arthur Stringer.
Fakers—and Others—By E. Ward Smith.
Lend Me Your Title—By Onoto Watanna.
A Shady Deal—By Archie P. McKishnie.
The City of Lost Laughter—By Mary Josephine Benson.

The Voice of Canada Interpreted

A new department starts in this number given over to summarizing and presenting opinion in Canada on outstanding topics, as reflected in the press. In this issue the department is given over to a careful compilation of opinion on the problems of the returned soldier.

TINKER TOM'S TALKS.

Talk No. One Hundred and Eighty-Eight

Trough and pipe repair season is here—Get ready for the spring rains. Tell the maker you want your Eavestrough and Conductor made of "PREMIER" GALVANIZED STEEL SHEETS, soft for forming and heavily coated for durability. Costs you no more, and adds to your reputation.

TINKER TOM.

Look for Talk No. 189 next week.

DOMINION SHEET METAL CORPORATION, Limited
HAMILTON, CANADA

The Megantic Broom Mfg., Co., Ltd.

Manufacturers of Brooms and Clothes Pins

Lake Megantic, Que.

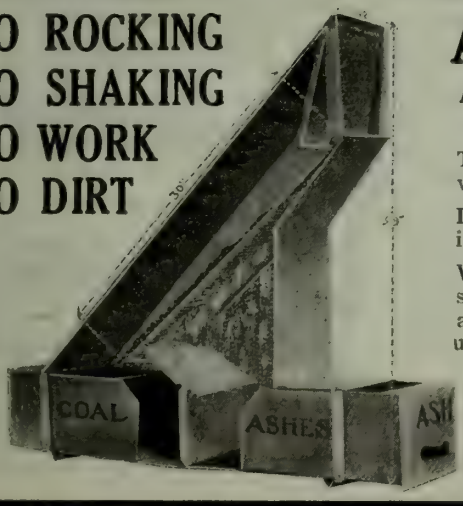
Our clothes pins are made and designed to **stay on the line.** And they do. Dealers know that by the way housewives are asking for them. Made of the best wood, that insures against splitting. Splendid profits and customers' satisfaction assured to the dealer selling them. Write our nearest agent.

AGENTS: Boivin & Grenier, Quebec. Delorme Frere, Montreal. J. Hunter White, St. John, N.B. H. D. Marshall, Ottawa. Harry Horne Co., Toronto. Tomlinson & O'Brien, Winnipeg. Oppenheimer Bros., Vancouver; McFarlane & Field, Hamilton, Canada.

CARTER'S

QUALITY
THE BEST

Your customers will need Red Lead to protect the iron work around their homes. The Painters want a Genuine Red Lead for their work. Are you prepared for this demand? If not, put in a good stock of



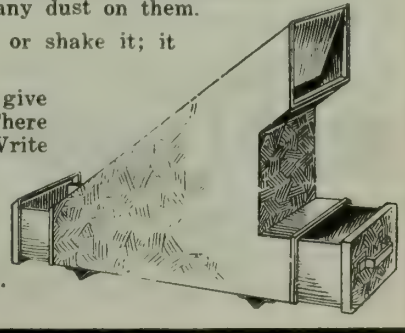
Carter's Genuine Dry Red Lead
and
Carter's Genuine Powdered Litharge

They are the best quality you can buy. Made in Canada from the best grade of Canadian Pig Lead.

Do you know the quality of these goods? Your customers know it and will insist on using Carter's Brands. Look over your requirements and order now.

Manufactured by
The Carter White Lead Company
of Canada Limited
91 Delorimier Ave. Montreal

NO ROCKING
NO SHAKING
NO WORK
NO DIRT



ASH-SIFTERS THAT MAKE SALES

Made of Galvanized Iron with Black Iron Doors, Self-Closing Doors, Removable Screens

This makes ash-sifting a pleasure instead of a horror; you can wear your best clothes and yet not get any dust on them.

It is dustless; you don't have to rock it or shake it; it is self-operating, a child can work it.

We guarantee that this ash sifter will give satisfaction or your money refunded. There are good profits in it for the dealer. Write us to-day for prices and information.

"The One-Minute" Motor Washer

Why you should sell the "One-Minute"

It will give the long service and satisfaction which the user has a right to expect from a Washer of Highest Grade. It has no delicate parts to get out of order and break.

It is extra durable and built for strength. The "One-Minute" Motor is made of brass. No rust—no wear-out.

SAVES — LABOR — TIME — and CLOTHES

Place one of these washers on your floor. Show your lady customers how they may dispense with the drudgery of washday by simply attaching the hose, turning the faucet and letting the "One-Minute" Motor do the rest.

We make Hand, Electric, Gasoline and Water Power **"One Minute" Washers.** If you are not selling them, may we prove to you why it will be extremely profitable to do so? Write us about our attractive agency proposition for your district.

Homestead Liquid Red

THE FARMER'S CHOICE

For painting barns, silos, fences, sheds and outbuildings, there is nothing like Homestead Liquid Red. Ready to use, works easily, covers well, durable, the finest thing in the world for preserving and weatherproofing wood in all rough buildings.

Your farmer neighbors know this Canada Paint product

There is sure to be an unusually large demand for it this spring. Stock up well with Homestead Liquid Red before spring painting begins. We furnish a special Barn and Fence-Painting Window, which should serve to remind the farmers in your locality that now is the time to put their buildings in shape.

While you are at it, get a full line of C. P. Products—Canada Paint—Sanitone for interior finish—C. P. Wagon and Implement Paint, Automobile finishes, Sun Waterproof Floor Varnish, Sun Varnish Stains, C. P. Concrete and Cement Paints, C. P. Insecticides and the other lines.

If you have not carried C. P. Products yet, write for our business-bringing agency proposition. It will give you the exclusive selling rights in your district, and bring you new customers every day.

"Delta" Files

—we'll help you sell them

TRADE MARK
DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

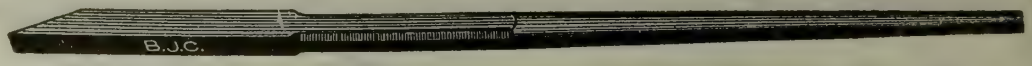
The Trade Mark behind the "Hardware House of Quality."

DIAMOND A BRAND
A
ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada.

SASKATOON WAREHOUSE

Another evidence of the efforts we are putting forth to render the Trade the very best service possible.



Just one year ago our Saskatoon Warehouse was destroyed by fire. By January of this year the building here illustrated was completed, stocked and ready to supply the Hardware Trade of Saskatchewan. This building is extremely modern in every respect. Mill construction—Equipped with Sprinkler System—Two Freight Elevators, Track Facilities—is six stories high, with a frontage of one hundred feet, and a depth of one hundred and twenty feet. Truly the Best Wholesale Hardware Building in Western Canada.

We have similar warehouses in Winnipeg and Calgary that serve their respective provinces. Here is surely convincing proof of the service the "Hardware House of Quality" gives the Western Hardware Dealer.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for Machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

REPRESENTATIVES WANTED EVERYWHERE

We have been manufacturing awnings for over FORTY years and honestly lay claim to being experts in our line. We guarantee QUALITY, FIT and WORKMANSHIP EQUAL to ANY and SUPERIOR to MOST awnings made by other manufacturers. Business in this line can be developed locally by agents in touch with new buildings and alterations. If we are not represented in your locality we are open to appoint an agent—preferably in the hardware trade. Good commissions. Samples and quotations on application.

The Greatest Cleanser and Abrasive On Earth!

AMERICAN STEEL WOOL cleans, smooths and polishes anything and everything. It does the work of pumice, sandpaper, pastes, powders or home cleansers and does it better, quicker and at a far lower cost. Below are a few of the purposes to which it is being applied with wonderful success.

AMERICAN STEEL WOOL

IN THE HOUSEHOLD:
Hotel, Institution and Public Building:
American Steel Wool is the housewife's best friend. Saves the hands—no gloves needed. Saves time and energy, too. It's the aluminum cleanser par excellence.
Grade No. 0 is used to thoroughly cleanse and impart a slick, shining polish to aluminum, Pyrex, copper, brass, glassware, enamel. Also to clean and polish crockery, bric-a-brac, marble ornaments and glassware. Gets into the corners and crevices of cut glass and leaves gleaming glassware. Excellent for removing rust, grease, food and scratch-marks from cutlery and chafing dishes, for polishing brass bells, ornaments, bath-room fixtures. Grade No. 00 is best for sprucing up a coat of enamel, paint or varnish, for removing stains and brightening up parquet floors, hard and iron floors. Grade No. 1 is invaluable for removing stains and water marks from porcelain bath tubs, basins, toilets, sinks and refrigerators. Use it for cleaning earthenware. Grade No. 2 for linoleum floors. Nos. 3 and 4 are just right for removing grease, soot, burnt food, rust and deposits of all kinds from stoves, gas and oil heaters, radiators, ovens, sinks, rough tubs, garbage cans, exposed pipes and flues. American Steel Wool beats everything for cleaning windows, glass doors, store fronts and show cases.

METAL INDUSTRIES:
For Japanning, Plating, Moulding, etc. American Steel Wool is rapidly displacing emery cloth, sandpaper and pumice.

IN THE PLATING ROOM:
American Steel Wool used on Nickel, Copper and Brass can be absolutely relied upon to make a clean all-round job. For taking off rust and tarnish on hollow ware it never fails to accomplish results. American Steel Wool is ideal for removing nickel from articles that have peeled and left a smooth surface to renickel. If there are brass signs, plates, railings, machine parts, use a wad of American Steel Wool to polish up.

FOR BUILDING TRADES:
Wood Work. American Steel Wool can't be beat for removing deep scratches, tool marks, stains and bruises. For rounding off and shaping woodwork. For smoothing rough surfaces. For rubbing down surfaces preparatory to painting, varnishing. For removing blisters from woodwork before applying first coat. For removing surface stains from parquet and hardwood floors, panelling and wainscotting.

IN THE FACTORY, SHOP AND GARAGE:
American Steel Wool is wonderful effective on all surfaces and on all materials, metals and non-metals. Invaluable wherever there are vats, caldrons, cisterns, kettles, hoppers, etc. Readily adapts itself to corners and crevices. Can be used to the last particle—thus its vast economy.

FOR RUBBER TIRE FACTORIES:
The value of American Steel Wool is attested by its use in the largest rubber factories in America, in making tires, also in cleaning moulds.

FOR RAIDROAD USES:
American Steel Wool can't be beat for cleaning signal lamps, also for polishing and brightening brass work, railings, car door knobs, windows, etc.

PAINTERS, VARNISHERS AND WOODWORKERS:
American Steel Wool is regarded as a necessity in fine cabinet work, such as pianos, graphophones, art and china cabinets, etc. It can't be excelled for cleaning, refinishing and reviving parquet and all hardwood floors. For removing old coats of paint, enamel, varnish, japan from boats, floors, bowling alleys, furniture, metal roofs, ceilings, automobiles, before giving a fresh coat of paint or varnish.

There's a Grade of American Steel Wool for Every Purpose.

American Steel Wool is available in fine grades from No. 0 for finer cleaning to Nos. 2-3 for rough work. Comes in small and large packages for household uses. Also sold in 100 pound bales for manufacturing and industrial uses.

Small Household Package

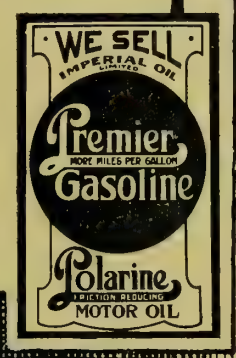
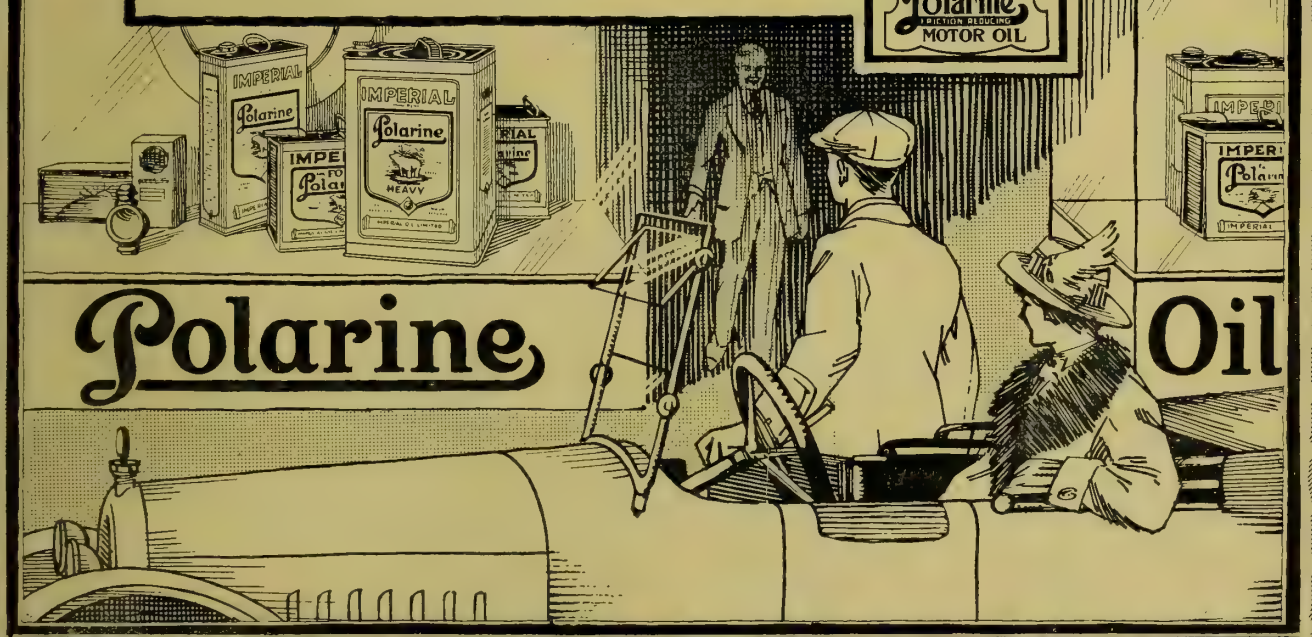
WHEN WRITING TO ADVERTISERS KINDLY MENTION THIS PAPER

More than 260,000 Customers

There are more than a quarter of a million motor vehicles in Canada. Most of these are lubricated by Polarine. Mark your store with the Red Ball Sign and put Polarine into your show windows. The results will speak for themselves. Stock the full Polarine line and give every customer the right lubricant. That is the way to create customers that come back.



Use the slogan "Polarine Makes a Good Car Better" and tie your store up to Polarine advertising. There is 33 1-3% or more profit in every Polarine sale you make.



Two grades of Polarine for cylinder and engine lubrication —Polarine and Polarine heavy. Polarine lubricants for every other bearing and moving part also.

Polarine comes in sealed cans, half gallon, one gallon and four-gallon and in twelve and a half-gallon steel kegs, half-barrels and barrels.

If you have not put in a stock of Polarine you should investigate our dealer proposition.

Write our Branch near you, or write us at 56 Church Street, Toronto, Ontario.

Turn Your Oil Losses Into Profits

In handling Motor Oils or any kind of oils, the old-fashioned way, barrel and spigot method, losses are inevitable.

There shrinkage, leakage, seepage, waste, in filling measures or cans. You cannot keep your oils clean, your store clean or yourself clean.

A Gilbert & Barker T-230 Outfit, single or in battery form, is a positive insurance against waste and inefficiency.

The installation of a G. & B. T-230 Outfit has made it possible for hundreds of dealers to build up a **profitable** business in oils.

If you have a T-230 it pays for itself—quickly.

If you haven't a T-230 you are paying for it in losses of oil, time, labor, business.

Last year your best investment was a Victory Bond—or a dozen.

To-day your best investment is a T-230—or a battery.

Bulletin 52 tells the story

Today is a better day than tomorrow—write

Your Farmer Customers Will Insist on

Champion

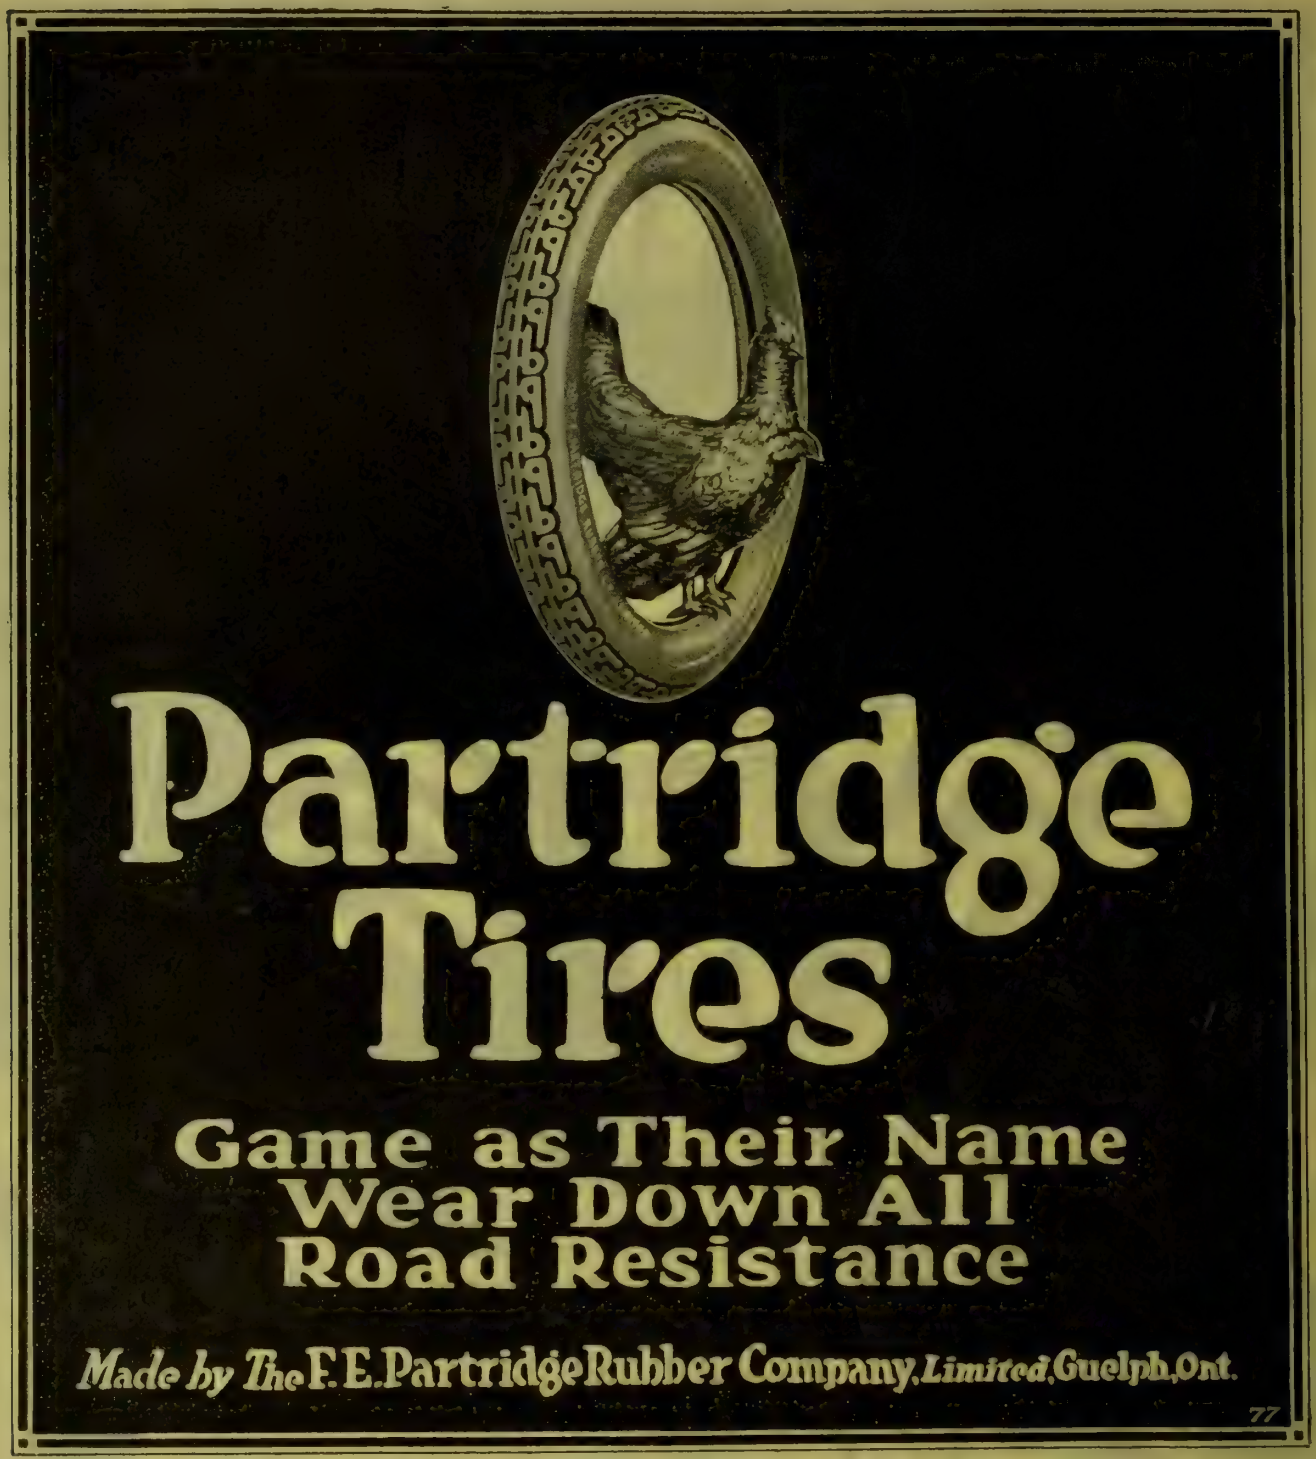
Fordson Tractor Plugs

Through the necessity for increased production and labor shortage the tractor has attained its rightful place in agriculture.

Fordson Tractors have taken their places in the agricultural life of Canada and wherever Fordson Tractors are used the proper spark plugs are Champion Fordson Tractor Plugs. Link up your business with this new and increasing element in the spark plug field.

Many of your farmer customers own Fords and other Champion-equipped cars and recognize in Champions the Spark plugs that give efficient, dependable and economical service.

It is only natural that they will insist on Champion Spark Plugs on their tractors. Add to your stock of Champion Fordson Plugs. They are equipment on Fordson Tractors and meet every requirement of other tractors using standard half-inch plugs.



Be ready for the tractor business which will bring to your store the farmers who are an important element in the motor accessory business. Order a supply of Fordson Tractor Plugs from your jobber that you may be able to give your customers a complete service.

HARRINGTON & RICHARDSON ARMS COMPANY

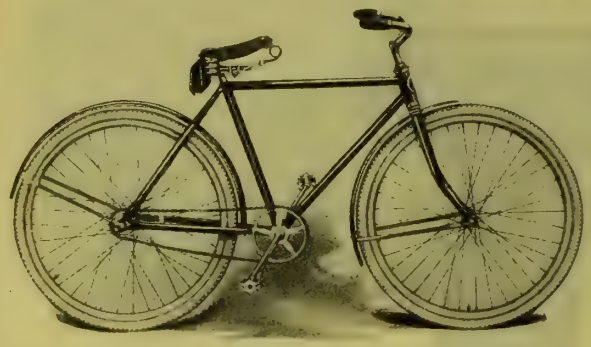
715 PARK AVENUE, WORCESTER, MASS., U.S.A.

It is Cheaper to Prevent Trouble than to Cure it

The BOYCE MOTOMETER installed on a car insures safety in operation. No driver, not even an expert, can absolutely guess at motor temperatures. And a Boyce Motometer installed on a car absolutely demonstrates this fact the first day it is installed.

It immediately detects motor troubles, such as overheated engines, lack of oil, radiator leaks, any defects in the circulating systems, improper carburetor adjustment, and like troubles, and gives warning in ample time to avoid serious injury, with its consequent expensive repairs.

WHEN THERE IS TROUBLE THE MOTOMETER SAYS—STOP!



Send for descriptive booklet, "What Every Car Owner Should Know," and complete information.

Ever-Tyte PISTON RINGS

B79

READ THIS GUARANTEE:—

We guarantee ***EVER-TYTE*** Piston Rings to produce higher compression, develop more power, and use less fuel and lubricating oil than any other piston ring; and we will return the full purchase price to any purchaser upon the return of rings, if they fail to meet the conditions of this guarantee after six months actual service—provided the cylinders are not scored, nor badly warped and the motor is fully equipped with ***EVER-TYTE Piston Rings.***

LANE'S HANDY AUTO RATCHET TOOLS

FORD SET

Contains—1 Handle, 7 inches in length; 2 Screw Driver Bits; 1 Extension Bar, 6 inches in length; 6 Sockets to fit all nuts and bolt heads on Ford cars, including the cylinder head. Put up in strong leatherette case. Weight 22 ounces.

STANDARD SET

Contains—1 Handle, 7 inches in length; 2 Screw Driver Bits; 7 Sockets to fit all size nuts in: U.S. Standard from ¼ inch bolt to ½ inch bolt; S.A.E. Standard from 5-16 inch bolt to 11-16 inch bolt. Cap screws from 5-16 inch bolt to ⅝ inch bolt. Put up in strong leatherette case. Weight 18 ounces.

The **"Standard"** and **"Ford"** Sets of the Lane **"Unique"** Ratchet Wrench and the Lane **"Super-Unique" Ratchet** Wrench Set, together with the Lane **"Unique"** Off-Set Ratchet Screw Driver, present unusual selling opportunities for the dealer.

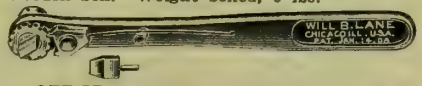
All Lane's Ratchet Tools are durable products. Machine-made, sockets turned from Grade "A" cold rolled steel, case hardened, Pawl and Ratchet Wheels milled, handles drop-forged and case hardened.

Their ability to perform tasks, where other wrenches fail, make them easy to sell.

Your jobber has them.

Manufactured by

WILL B. LANE



180 N. Dearborn St.

CHICAGO, ILL.

SUPER-UNIQUE SET

Contains—1 Drop Forged Handle, 9 inches in length; 1 Extension Bar, 8 inches in length with thimble attached; 15 Hexagon Sockets to fit all size nuts within 7-16 to 1¼ inches **broached opening.** The sockets fit all S.A.E. standards from ¼ to ⅞ inches. U.S. standards from 3-16 to ¾ inches (bolt). Cap screw sizes from ¼ to 1 inch. Put up in strong wooden box. Weight boxed, 6 lbs.

OFF-SET RATCHET SCREW DRIVER

Consists of—1 Six-inch Drop Forged Handle, polished and case-hardened; 2 Size accurately milled Screw Driver Bits made from the highest grade screw driver steel and oil tempered. Bits are interchangeable and can be removed and replaced in one second. This article is fully warranted. Weight in paper box, five ounces.

A LOGICAL SOLUTION OF MOTOR TROUBLES

Stock the **GILL Piston Ring** and thus be able to better serve your customers.

Made from single piece castings of special fine gray iron, accurately machined. The easiest piston ring on the market to-day to install. A self-fitting ring of sturdy construction, with a distinct joint forming a seal against the escape of gas, oil getting into the combustion chamber, and excessive carbon.

Gives maximum power at minimum cost.

For Tractors, Trucks and Pleasure Cars.

At all leading Wholesale Hardwares.

The Canadian General Electric Co. carry Gill Piston Rings at all their branches.

Manufactured in Canada by

Brown Engineering Corp., Ltd.

415-19 King St. West, Toronto, Ont.

ADVERTISING to be successful does not necessarily have to produce a basketful of inquiries every day.

The best advertising is the kind that leaves an indelible, ineffaceable impression of the goods advertised on the minds of the greatest possible number of probable buyers, present and future.

BUDDIE'S SPECIAL CAR

A profitable line that every dealer should handle.

Buddie's Special Car is so strong and durably made that it gives an unusual length of service to the purchaser. It has Steel Bearings, one-piece solid steel axles front and rear, bolts, nuts and washers are used in the making.

Finished in natural and red. Its attractive, well set up appearance makes it a general favorite. Shipped completely assembled, 6 or 12 to a crate.

WANTED

WANTED—HARDWARE BUSINESS IN LIVE town in good farming community. Stock about six thousand. State full particulars. Box 222, Hardware and Metal.

FOR SALE

1—NO. 8, 37" x 2" SLIP ROLL FORMER, Brown-Boggs make. Used about six months. W. J. Heaman, Exeter, Ont.

FOR SALE—HARDWARE BUSINESS RIGHT on the main street. Stock about $25,000.00. Building 25 x 120, two-storey. Can be leased for a term of years. Owner retiring. Apply Box 226, Hardware and Metal.

UNIVERSAL ELBOW PATTERNS CAN BE SET in one minute to make any size elbow up to 12 inches, at any angle. We have six of these patterns for sale at $10.00 each. Chapman & Flinn, Ltd., Amherst, N.S.

ONE POINT MATTRESS NEEDLES—9 IN., 1¼ gross, $3.90 gross; 10 in., 1¾ gross, $4.25 gross; 12 in., 2¼ gross, $4.95 gross; 14 in., 4½ gross, $5.90 gross. Any quantity, first quality. Des Rochers, Limited, 268 Centre Street, Montreal, P.Q.

TINSMITH AND PLUMBING BUSINESS IN small but growing town in Eastern Ontario. Population 1,400. Waterworks. No opposition. Good proposition for live man with small capital. Town is located on Lake Ontario. Box 224, Hardware and Metal.

GENERAL HARDWARE STOCK FOR SALE IN Sudbury. Old-established business of Purvis Bros., Ltd. Good general stock of shelf and heavy hardware, about $20,000.00, with twenty-nine years' good-will and fair dealing. Premises can be leased or bought. Retiring on account of failing health. Purvis Bros., Ltd., Sudbury, Ont.

OWING TO THE SERIOUS ILLNESS OF THE proprietor, which has necessitated his removal to a Southern climate, I am offering for sale that well-known and established business in the town of Oshawa now being carried on by Glenn A. Henry & Co. This is a straight hardware business —no tinshop,—and has been conducted on practically a cash basis. It has always been a good paying business and would not be on the market were it not for Mr. Henry's failing health. Stock will run from $10,000 to $12,000. Here is a first-class proposition for someone. Wire or write, W. E. N. Sinclair, Barrister, Solicitor, etc., Oshawa, Ont.

Getting Results

A large firm in a Western Canada city recently advertised in Hardware and Metal Want Ad. Page for a man to fill a responsible position—result 21 replies. This indicates that the want ad. page is followed closely. The man YOU want to reach is reading this page.

HOSKINS & SEWELL LTD., BIRMINGHAM, England, invite applications from established firms with Selling Organizations in Canada to act as their Agents for the sale of Brass Tubes for the Bedstead, Coach Fittings, Chandelier and Electrical Trades.

HELP WANTED

FOREMAN WANTED FOR TINSMITH AND plumbing shop in Maritime Provinces. Apply Box 208, Hardware and Metal.

EXECUTOR'S SALE

by Tender of Commercial Property and an Old Established Hardware Business

In the matter of the Estate of the late Wm. Strachan of Ottawa, Hardware Merchant.

The valuable commercial property on the corner of Booth and Queen Streets West, Ottawa, Ontario, consisting of three stores, two apartments, two dwellings and a two-storey stone store house and stable in rear; also an exceptionally well-assorted stock of hardware.

This is a very prominent situation, being on a street railway transfer corner.

This business, established for thirty years, is without doubt one of the best hardware locations in Eastern Ontario. An exceptionally fine business has been done here, and it is an unusual opportunity for some live man.

Tenders will be received by me up to three o'clock P.M., on Saturday, the fifteenth day of March, 1919, for the purchase of the property and hardware stock, either en bloc or separately. The buildings, stock, etc., may be inspected any time up to the closing of the tenders.

A marked cheque for Five Thousand ($5,000.00) Dollars, payable to the Estate of Wm. Strachan, must accompany each tender.

The highest or any tender not necessarily accepted.

Cheques will be returned to unsuccessful tenderers.

Further information regarding terms, etc., may be obtained upon application at my office.

WM. A. COLE,
63 Sparks Street,
Ottawa, Ont.

Hardware and Metal Subscribers

Buy for business as well as for private consumption. That is why one inquiry frequently pays for an entire year's advertising. Advertisers in HARDWARE AND METAL reach only the cream of the trade—the best and biggest buyers in Canada.

"EASY"
—all that its name implies

Its Name Sells It!

"EASY"
Electric Washer

Easy to Operate. You cannot make a mistake in attaching it to the socket or receptacle, place the clothes into the tub with water and soap and then pull the lever and your washing has started. Ten minutes later, reverse the lever, remove the cover, and your clothes are ready to be wrung.

Easy to Wring — You place the clothes in the wringer, and by the use of the lever the wringer can immediately start, stop or reverse. When you have finished your wringing, the machine is ready for the next batch of clothes.

Easy to Clean — There are no corners where dirt would gather, and the inner surface is as smooth as glass. A discharge valve is placed in the bottom of the tub so as the water can be drained and rinsed through without difficulty.

Easy to Understand — The two arms which are inside the tub are equipped with vacuum cups, which force the soapy water through the clothes, thus bringing the dirt out without the wear and tear that happens when you used the old-fashioned wash board. The motor which operates the washer is ⅛ H.P., and is protected from an overload by being belt-connected to the washer. The wringer is connected to the motor, and wash-day is a pleasure to a housewife with an "Easy" Electric Washer.

Easy to Sell — The neat appearance, the smooth running, and the above-mentioned points make the "Easy" Electric Washer the best proposition on the market to sell.

Write our nearest house for attractive proposition, descriptive literature, etc.

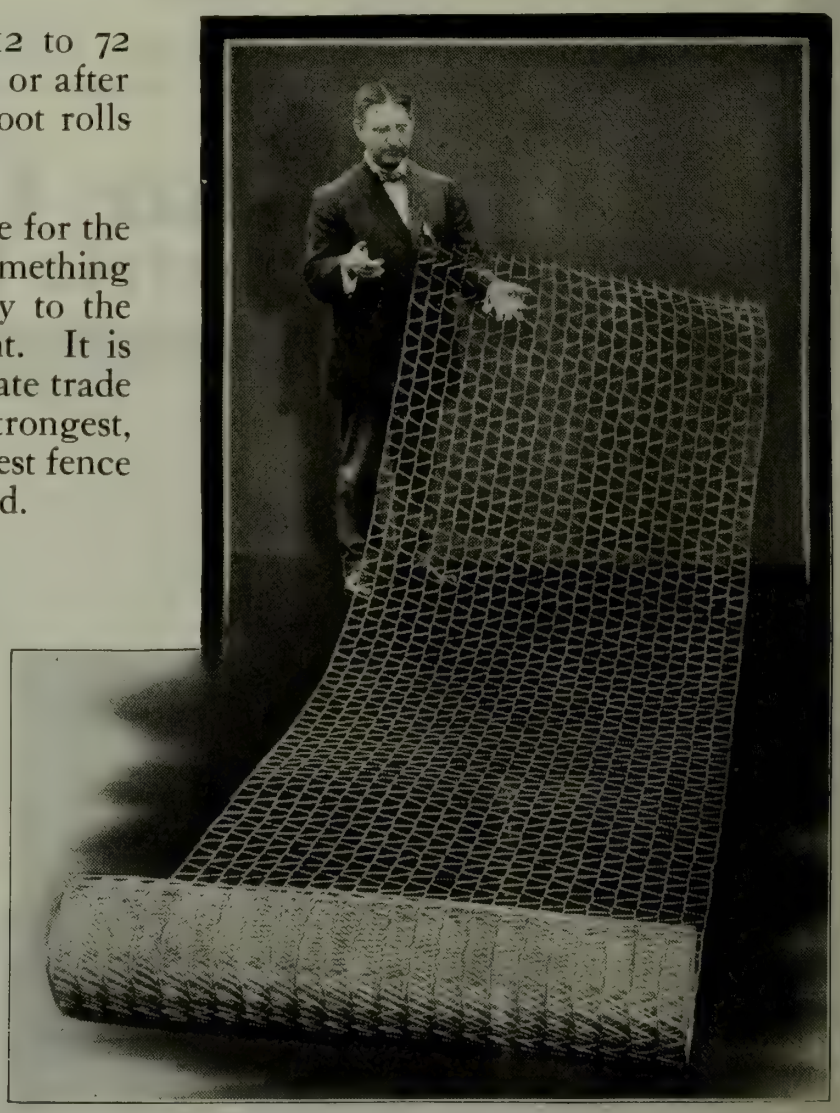
Polar Cub REG. U.S. PAT. OFF **Electric Fan**

$8.50 RETAIL



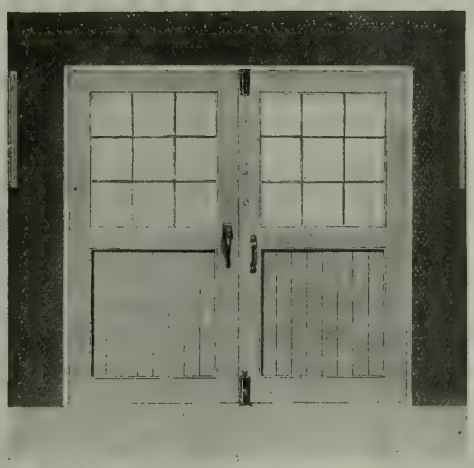
U. S. Poultry Fence

It's so stiff and satisfactory that it does not require top rail and base board or so many posts as the old style netting.

Guaranteed 5 or 6 times as strong and at least 100 per cent. better in every way. All parallel wires are of even length and all meshes of uniform size. They can't be otherwise the way it's made.

Made in heights from 12 to 72 inches. Galvanized before or after weaving. Put up in 150 foot rolls and sold by the square foot.

It's not merely a substitute for the old style netting. It's something much better for less money to the consumer and sells on sight. It is handled only by the legitimate trade —*the dealers*. It's the strongest, cheapest, most sightly and best fence for the purpose yet invented.



Rolls out flat and even, does not buckle or bulge.

Time to Order
FREEZERS

All of the three, LIGHTNING, GEM or BLIZZARD, have served the housewives of America for thirty years, and, like the cream they create, are in demand in all seasons.

They are built of the very best material and workmanship possible —their ingenious construction makes them easy to operate, quick freezing, and economical to both dealer and user.

The Blizzard, being simpler in construction and cheaper in price, makes it a good running-mate with either the Lightning or Gem. They sell themselves and stay sold! No come-backs or complaints.

This means easy net profits for you.

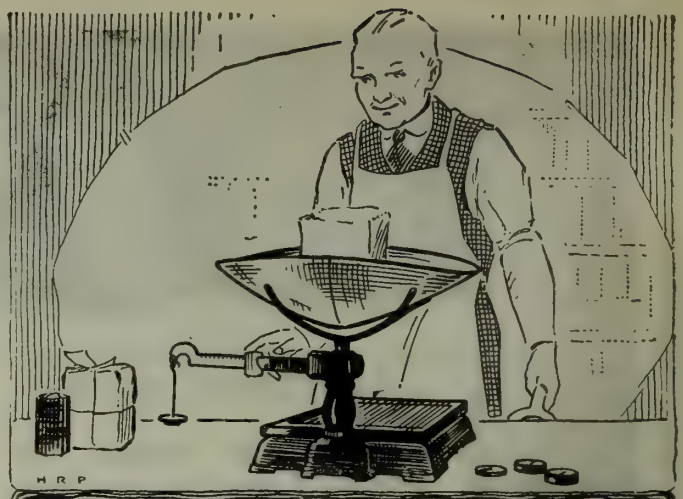
Williams' "Vulcan" Drop-Forged Lathe Dogs

WE have embodied in these "Stouthearts, built for a lifetime of strenuous service, the experience gained in the design and production of *Superior* Drop-Forged Machinists' Tools during nearly half a century. It is not too much to say that the automatic safety feature introduced by Williams' "Vulcan" *Safety* Lathe Dogs has revolutionized the general design of this class of lathe tool. Like many improvements originated by us in other lines of drop-forged tools, this safety feature has since been adopted as *Standard*—a fitting recognition of efficiency and usefulness.

Many shops regularly specify Williams' "Vulcan" *Safety* Lathe Dogs. Take advantage of this "good-will;" add it to your own prestige.

Bent and Straight Tail, 1 or 2 Screws, 16 sizes of ⅜ to 6 inches.



Machinists' Tools Booklets with your imprint, if desired.

Are You Selling Oil or Passing It Out?

How the Dealer Who is an Oil Authority Becomes Oil Headquarters

People heap confidence on the man who knows. And the man who *knows* sells goods easily, because people *believe* what he says.

This is especially true in selling oil. Light, medium, heavy oil—what do they mean? One man's opinion is as good as another's.

Repeat business is based on satisfied customers. If you *guess* at what you sell, you will have to *guess* at whether or not the customer comes back. If you know that the oil you sell is *correct*, you know that the customer will be satisfied. Those dealers who display the Gargoyle Mobiloils Chart of Recommendations sell oil on a scientific basis. They *know* that the grades of Gargoyle Mobiloils, when used as specified by these Charts, will give their customers the full benefits of Correct Lubrication.

To get the full sales benefit of these authoritative Charts you should sell the complete line of Gargoyle Mobiloils called for by the Charts. Then you will be able to correctly lubricate every make of automobile, tractor, or other automotive unit in your vicinity.

You will be able to take advantage of your entire market — not just a part of it. Quickly reputations grow under this scientific stimulus. And, as quickly, sales and profits grow with them. Once you are known as Correct Lubrication Headquarters — once people *know* that you *know* — you will discover what it means, in dollars and cents and satisfaction, to sell the complete line marked with the red Gargoyle.

GARGOYLE

Mobiloils

A grade for each type of motor

Turn Your Oil Losses Into Profits

In handling Motor Oils or any kind of oils, the old-fashioned way, barrel and spigot method, losses are inevitable.

There shrinkage, leakage, seepage, waste, in filling measures or cans. You cannot keep your oils clean, your store clean or yourself clean.

A Gilbert & Barker T-230 Outfit, single or in battery form, is a positive insurance against waste and inefficiency.

The installation of a G. & B. T-230 Outfit has made it possible for hundreds of dealers to build up a **profitable** business in oils.

If you have a T-230 it pays for itself—quickly.

If you haven't a T-230 you are paying for it in losses of oil, time, labor, business.

Last year your best investment was a Victory Bond—or a dozen.

To-day your best investment is a T-230—or a battery.

Bulletin 52 tells the story

Today is a better day than tomorrow—write

Sell This Complete Line

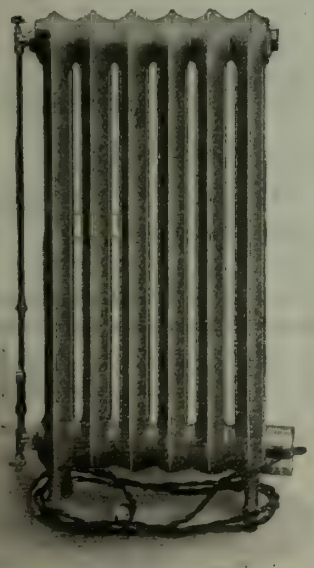
NOT all of your customers can afford the initial expense of an Electric Washing Machine, but, for those who can, there is nothing on the market so sure to please them as the "1900" Cataract Washer here shown. We do not limit you to this machine, however, as in our Agitator Electric we have a wood tub machine of exceptional merit that retails at a very moderate price.

Then, for the large class who want a good, reliable water power washer, our present "1900" line gives you a dependable machine which, by the mere turning of a tap, will do a week's washing quickly and thoroughly.

But if your biggest class of washing machine prospects want a hand machine, our "1900" Gravity Washer completes the list. It is radically different in design from other hand-washers, and intending buyers will quickly recognize its advantages.

So, you have all the washer styles you need in the "1900" lines. Each style is unequalled in its class, and our Agency Proposition gives you exclusive control in your town, if you mean business. A full line of high-grade wringers, too.

Don't carry a mixed-up line of washing machines any longer. Push the "1900" Washers exclusively and forget about competition.



Ask us to tell you about our Agency Proposition.

THE NINETEEN HUNDRED WASHER COMPANY

357 YONGE STREET, TORONTO

Prepare For Spring Trade

Your customers can save time and money by using our Electric Steam Radiators.
Hydro Electric P.C. Approval No. 101.

Spring and its uncertain weather will soon be here. Raining, windy or cold one day, very warm the next, warm in the day and perhaps extremely cool in the evening. It is neither convenient, comfortable nor economical to operate the furnace. One or two of our radiators will furnish all the heat when, where and as required at the minimum of cost and attention.

Clean, economical and guaranteed.

We offer attractive terms to legitimate dealers.

"The Mysterious German Onions"

On nights when the German air raiders were out, they sent up strange, luminous balls behind their lines and anchored them above the clouds—globes of fire which could be seen for forty miles or more. What these "onions" were, or how they were kept in stationary position above the clouds, is still a profound mystery. The Allies never learned anything about them, but the Allies night bombing crews steered their course to the Rhineland by the luminous buoys thus provided.

What is known about the onions is told by Lieut. J. Vernon McKenzie in the course of an article, "Raiding the Rhineland," in MARCH MACLEAN'S. It is an intensely interesting article, telling all about the great reprisal campaign which implanted the fear of war in the German civilian heart.

"NO HOPE FOR THE WETS"

"Already the temperance forces are lined up to stop any possible break in the prohibition dam," writes J. K. Munro, in discussing what is going to happen at the coming session at Ottawa. He predicts that Union Government will hold together, but that the habit it has contracted of promising everything asked is going to make a lively session. He expects:

Dry legislation at the earliest possible moment.
The moral reform forces in control.
No change in the Divorce Law.
Tariff concessions made to the West.

The March number, in fact, is full of live, up-to-the-minute features.
The famous Canadian Ace, Lieut.-Col. W. A. Bishop, is on the cover.

A Golden Field for Hardwaremen

Enormous Electrical Development All Over Canada Opens Unlimited Possibilities for Dealers Handling Various Specialties—A Profitable Line That in Many Instances Almost Sells Itself

A GOLDEN year is ahead for those handling electrical supplies. This sums up the view of those in touch with the development work that is planned. More electrical construction work they say is being called for than in many years. This is due to several reasons. An immense amount of electrical work, especially the larger projects, was held up on account of the concentration of efforts in other directions for war work and also the impossibility of getting materials with which to proceed. Before the war started requests for more power and still more power were being received by companies all over Canada.

Electricity has "sold" itself. It has caught the popular fancy. When you mention that such and such a work is being done by electricity, people at once picture to themselves a task being performed quickly, efficiently, and economically. This applies to any work, whether it is driving a sewing machine or furnishing the energy that keeps huge plants, employing thousands of men, in operation.

Stands for Satisfaction

"Doing it electrically" stands for satisfaction in the minds of the people. Electricity is more and more in demand every year because it is making good. The housewife who does her ironing with an electric iron laughs at the woman who uses the old-fashioned kitchen stove method which heats up the whole house and makes conditions in summer that are well nigh intolerable. The farmer who sees his neighbor doing quickly and easily a dozen tasks by means of an electric motor or some other device, wants one too. The farmer's wife who sees either her neighbor or the city friend doing her washing with a power machine in half the time and with the drudgery taken out of the work, will never rest content until she has a similar machine. The same applies all along the line.

Huge Opportunities

This is what is creating the enormous demands for electricity. Request after request for power lines has been coming in from the rural municipalities. Town after town is arranging to instal an electric power and lighting system, or, if it already has one, to enlarge it to meet the demands that are being made upon it for more power. In nearly all the big cities extensions are constantly being made to power lines and new equipment added to take care of more customers.

One of the greatest years for electrical construction in the history of the Dominion has commenced. The estimated expenditures for new power lines, for extensions to existing power lines, and power plants run into millions. The demand is for still more electricity. This opens a golden field to hardware men and many of them are dominating the sales of electrical specialties in their district. The field is one of the most promising in the country today not only for the present but for future business.

All this development means opportunities that are practically unlimited for the dealers who are handling electrical supplies. There is no question about it that electrical goods are a nice line to handle, a nice line to show in your windows, carry a good profit, and very often sell themselves. The demand for electrical goods is created because the various devices are making good. People who have used them like them and tell their friends about them, and an ever-widening circle is formed which offers immense business possibilities.

Control the Field

Hardware dealers are a big factor today in the electrical field. In many places they are the dominant factor. Many of the largest firms would far rather have their various specialties handled through the hardware stores than through the electrical dealers. This may seem strange, but the explanation is simple. They have found by actual experience that the hardware dealer is a keen, aggressive business man, and that he will push sales in every possible way. Many of the electrical dealers on the other hand are content to take what business comes to them. Where the hardware man advertises aggressively and puts on nice window displays, and places the electrical lines he is handling at various points in his store where everyone who comes in will see them, the electrical dealer very often is content with putting a couple of irons in the window and maybe not changing the window for a month. It is the easiest thing in the world for the hardware dealer to take away business from the electrical man under circumstances of this kind, and he has done it.

Are Not Worrying

Naturally there are a good many electrical dealers who regard the hardware men as interlopers in their field. What the electrical dealers think or say is not worrying the hardwareman in the least. They are going right ahead and are "cashing in" on a business that many of them find is growing very rapidly. There are hardware dealers who will tell you that it is not going to be very many years before every home will have an electric washing machine, just as every home has a sewing machine now. These men see the possibilities of the future and are preparing for it, and they will be the men who will reap the reward. In the meantime they are making some nice profits, showing a steady increase in their electrical business each season, and are constantly laying the foundation for an ever bigger trade.

Leads the Way

Because Ontario has led the way in

connection with its hydro power projects, naturally some of the biggest increases are shown in some of the Ontario centres. Already the Ontario Power Commission has more requests for new power lines than it can build in a long time. It not only has the requests for new lines, but also has been asked by scores of municipalities that already have power, for more power. The expenditures that are planned for meeting these demands run into the millions. It is perhaps a tribute to the business acumen of the hardware men of Ontario that they are selling more electrical goods than the regular electrical stores, including the Hydro stores.

Power on the Farms

Many farmers who reside in remote districts and in parts of Canada where they do not see any possibility of regular power lines being built for some time are meeting the situation by putting in their own power plants. It is stated to HARDWARE AND METAL that more farmers have put in their own plants in the past two years than in the previous fifty. This has been especially noticeable, it is stated, in the West and in some sections of Ontario where Hydro has not been obtainable. Many farmers are now lighting their homes and stables, pumping water, sawing wood, running churns, and doing other work by their own electric plants. The number of farmers who will use electricity is expected to increase every year. There is a big field here also for the hardware dealers. Many of them are acting not only as agents for these power plants but also for the electrical goods that are required after the plant is installed, such as lamps, washers, vacuum cleaners, toasters, etc.

Go After Business

One hardware dealer in an Ontario city where there is a hydro shop started in a short time ago to handle electric washers. In the past three months he had sold twenty-eight, and has a lot of good prospects. In the same city is a hardware store which has an electrical department which specializes in lamps and electrical specialties for the home. This store sells more goods than the hydro store in spite of efforts that have been made to prevent it by cutting prices and other means. Both the hardware men mentioned have built up their business in their respective lines by hard work and judicious advertising and window displays. In this they have had to meet the same methods by the Hydro store, but the hardware dealers are winning out in the race for trade. The same may be said generally of the hardware men who are handling electrical goods. In many places they completely dominate the trade and they are making good simply by going after business in a business-like way.

The M. J. O'Brien Co., Ltd., of Renfrew, Ont., has purchased the interests held by Thomas A. Low in the Renfrew Machinery Company.

Retailers Seeking Legislation to Cover Many Important Questions

PREPARATIONS are nearly complete for the big annual meeting of the Dominion Retail Merchants' Association, at Ottawa, and a large attendance is looked for. In this connection there will be a meeting of the members of Parliament, both of the Commons and the Senate, who are retailers, in order that they may acquire a full understanding of the questions which the Retail Merchants' Association will be asking to have legislation on. This meeting is called for Tuesday morning, March 18, in the Chateau Laurier.

On Wednesday morning, 19th, the Executive of the Dominion Board will meet the Cabinet, to place before and discuss with them the questions on which legislation which will be asked for this session. This will include the following matters:

1. The creation of an Inland Trade Commission, to handle all questions of internal trade; for example, such matters as excessive profits, conspiracy in restraint of trade, etc. In fact, almost anything which affects inland trade might properly come before such a commission, in the same way that railroad questions come before the Railroad Board.

2. If the War Profits tax is to be retained on business lines supposed to be luxuries, it should not be confined to a few, such as jewelry and automobiles, but applied to all luxuries, or to none.

3. All war tax stamps should be collected from the manufacturer and not from the retailer.

4. All who enter business should be compelled to keep proper books and accounts from the time of beginning business.

5. Certain amendments to proposed Bankruptcy Act.

6. A committee of the House should be appointed to deal with the mail order question, particularly that the payments on all mail order material shall cover the cost of carriage, and none of its cost be taken out of the revenue of the letter service.

7. Legislation fixing the weight of contents in cartons and other sealed containers.

8. Amendment to the Lords Day Act, making the purchaser equally guilty with the seller of goods in contravention of the Act.

The Ottawa branch of the R. M. A. will give a banquet to the visitors at the Chateau on Tuesday evening, March 18th.

Market in South Africa For Electrical Supplies

According to official reports there is a large and growing market in South Africa for electrical supplies and equipment. A share of this business is obtainable by Canada, it is stated. The British and South African *Export Gazette* says:

That the market in South Africa for machinery, cables, fittings, and other material for electric light and power purposes is one which is well worth looking after may be judged from the fact that for a recent five-year period the average annual value of such imports, exclusive of telephone and telegraph cable and wire, amounted to as much as $5,286,700.

Great as are the strides that have been made in electric development throughout the Union of South Africa, Rhodesia, and British and Portuguese East Africa, it is even yet only in its infancy; and when railway electrification is seriously taken in hand in the Union—as it seems certain to be at no very distant date—and the large new industrial equipments already projected are undertaken, the plant and material for which an urgent need will have been created must represent very much more in annual value than the gross total of all the electrical imports which South Africa has in the past drawn from other parts of the world.

Relatively small as the beginnings which have been made may be rated, however, there are to-day scattered throughout South Africa no fewer than 53 plants, each busily occupied in supplying electricity for power, lighting, heating, or cooking. The two most important plants in the country are that of the Johannesburg Municipality and that jointly owned by the Victoria Falls & Transvaal Power Co., and Rand Mines Power Supply Co.

ALL IMPORT RESTRICTION IN BRITAIN REMOVED

Sir Thomas White, in answer to some criticisms in the House recently stated that the British Government had withdrawn all restrictions on goods imported from other parts of the Empire. He read a report from Lloyd Harris of the Canadian Trade Commission in London: "In reply to questions in House this afternoon's Parliament, Secretary Board of Trade says: 'The Government had decided no import restrictions shall be or continue to be imposed on goods coming from any part of the Empire, without the assent of the Cabinet, which shall not be given unless some unforeseen necessity arises. It is not possible at present to remove all restrictions on all imports from foreign countries because of the state of exchange, but all raw materials will be free from import restrictions.'"

From the Canadian Trade Commission in London: "Board of Trade announced yesterday removal of all restrictions on imports from British Empire."

To Sell Washers Demonstrate Them

Actual Demonstration Goes Far in Convincing the Modern Housewife—This Business Must Be Gone After Aggressively—Advertise With Illustrated Helps—Once Sales Start They Multiply—Future Will See Big Growth

"WHAT are the best ways for the hardware dealer to develop a sale for electric washing machines?" was the query HARDWARE AND METAL put to C. M. Rief, manager of the "Time Saver Shop," Montreal.

Mr. Rief replied that there are splendid possibilities of building up a trade for these goods and while it requires salesmanship and initiative on the part of the hardware man, he can increase his sales and make good on the line.

One of the methods that has worked well with some dealers, Mr. Rief pointed out, was that of putting on a demonstration. This was a real live way of interesting the women. They are the ultimate buyers of a washing machine, really, and they have to be convinced. It is therefore necessary to show them the advantages of this big labor saver.

A Concrete Example

"One of our customers has been selling more electric washers lately than ever before." said Mr. Rief. "He is located in a Quebec city and I think that a demonstration put on lately did the work. Orders were received shortly after the demonstration was made. This man wired in for two electric washing machines early this week and later the same day he wired for another."

This is good business. It is worth while, for there is a fair profit and the repeat business is the kind that counts. And then, with a line like this, there is an increasing interest in selling as the movement grows. If the hardware dealer thought he could sell an average of one electric washing machine a month —where he sold none before—the likelihood is that he would take a healthy interest in making sales increase to one electric washer per week. And the chances are again that he would realize his aim. For when a 20th century hardware man gets warmed up to selling a special line of goods, he is bound to win.

Advertising—Dealer Helps

Of one thing Mr. Rief was sure. The hardware dealer should, and must advertise, also, he must advertise well. Some firms are willing to furnish distributors with newspaper cuts which can be used in the local papers. These are often very attractive.

"They are excellent to use with the reading matter of a regular advertisement," said Mr. Rief.

Probably one of the excellent points that ought to be made much of in developing sales for an electric washing machine, is the absence of backache and the removal of the "blue Monday" feeling which washday usually brings. Surely there is no better way of playing up this winning idea than by illustrating the appeal in the regular store advertising.

Then there are many helps in the way of lithographed cards and folders. These explain the advantages of the particular machine to which they refer. They go into detail. Perhaps the dealer might well make a closer study of this matter and be posted the better to speak 'knowingly" of the machine he wishes to sell.

Begin Now—New Sales Will Increase

It is now a good time to reach out for washer business. It will require time to develop prospects into buyers for the electric machine. They are an excellent thing but the housewife may not be won over to the idea of paying $75 for this labor saving device. It therefore will be necessary to begin early in order that sales may be developed in due time.

Have you electric power in your town or city? Do not let this business go to the electric dealer. Washing machines are decidedly a hardware line and the business of the future will be increasingly larger for electric machines. Get in on the business now and get the big end of it. The farmer has plenty of money and a strong, logical campaign, in which the maker will doubtless afford him real and effective co-operation in the way of helps, etc., should be in order at once. The money to be made will go to the energetic hardware dealer.

Warns Prospective Purchasers to Watch Terms of Bulk Sales Act

H. G. Kelly, Toronto manager of R. G. Dun & Co., in a recent interview pointed out the necessity of added care in operations pertaining to the purchase of stores in Ontario,—owing to the operations of the Bulk Sales Act that has recently come into force.

"It is possible," he said, "that many returned soldiers will, within the next few years, engage in business on their own account, in many cases buying out established ventures. It is to be feared that some of these transfers, particularly of small stores, etc., will be made in a more or less informal manner."

"It would be a great pity if any of these returned men, through not understanding legislation which has occurred in their absence, should lose their savings. I refer particularly to the Bulk Sales Act now in force in this Province.

"I have knowledge of several instances which have already occurred, where the transfer has been made without the knowledge of or attention to the provisions covering bulk sales of merchandise stocks. It is to be hoped that purchasers will protect themselves in these transactions, with good legal advice and guidance, which should be their only proper course."

Operations of Bulk Sales Act

Under the Bulk Sales Act, it is the duty of every person who buys any stock in bulk, for cash, or on credit, before closing the purchase, and before paying any part of the price in excess of $50, before giving any note or security for the price to demand and receive from the vendor a written statement verified by a statutory declaration of the vendor, containing the names and addresses of all the creditors of the vendor, and the amounts of the indebtedness or liability due and payable by the vendor to each of the creditors. If there be a failure to obtain the statement, the sale is deemed to be fraudulent and is void as against the creditors, unless all the creditors are paid in full out of the proceeds of the sale. The purchaser, upon obtaining the statement, shall either obtain a written waiver from the creditors of the vendor, or shall pay the whole of the purchase price, or deliver his notes or other documents securing the price into the hands of a trustee for distribution pro rata among the creditors of the vendor, subject to any preferences provided by law or by previous contract.

If the purchaser shall fail to observe the requirements in respect to the trusteeship, without obtaining the written waiver of the creditors, the sale is deemed fraudulent and is void as against the creditors of the vendor, unless all the creditors are paid in full out of the proceeds of the sale. Any sale or transfer of stock, or part thereof, out of the usual course of business or trade of the vendor, or whenever substantially the entire stock of the vendor is sold, or whenever an interest in the business or trade of the vendor is sold, or conveyed, the sale, transfer or conveyance is deemed "a sale in bulk," within the meaning of the Act. But if the vendor produces and delivers to the vendee a written waiver of the provisions of the Act from his creditors having claims of $50 and over, representing 60 per cent. in number and value of the claims of $50 and over, as shown by the statutory declaration, then the provisions of the Act do not apply.

DAYLIGHT SAVING MAY BE ADOPTED SHORTLY

IT is pretty nearly certain that Canada will follow the lead of the United States in connection with daylight saving. As yet, no definite announcement has been made from Ottawa, but word is expected at any time regarding the course to be followed. In the United States it has been decided to make daylight saving effective at 2 a.m. on Sunday, March 30, and all clocks will be turned ahead an hour. Opinion in Canada seems greatly divided. Merchants and manufacturers, their employees and those generally who reside in cities and towns have come out strongly for the measure. With comparatively few exceptions the people living in the country not only oppose the plan but declare they will not use it even if it is put into effect.

ACTIVITY IN BUILDING THROUGHOUT DOMINION

THERE is every indication that one of the greatest building years in the history of the Dominion is ahead. The activity is not in any sense local. From all parts of the country reports indicate that an enormous lot of work is planned. Inquiries for materials show that great quantities will be required, so much is this the case that in some sections there is already a shortage, particularly of bricks. This, however, will be only temporary, it is stated, and is already being relieved by importation of outside products where the home brick makers have been unable to meet the demands. All this opens to the hardware men of Canada a big field of opportunity and they are taking full advantage of it. Many firms have already sold large quantities of tools, builders' hardware, paints, etc., as the fine weather has enabled builders to proceed much earlier than they would have started ordinarily. Another factor in getting work under way has been the help that is now available. Those who are in closest touch with the building situation predict a steady and extensive building programme.

NEW BANKRUPTCY ACT GIVEN FIRST READING

LEGISLATION which will provide Canada with perhaps the most easily handled and the quickest working Bankruptcy Act in the world is expected to be passed very shortly by the Dominion Government now in session at Ottawa. The bill was given its first reading in the house this week after being introduced by Hon. Hugh Guthrie, Solicitor-General. In introducing it he explained that the terms of the new bill embody the principle that was introduced last session and referred to a special committee. No action was taken at that time owing to the session being too far advanced for the necessary consideration. In the meantime, however, the measure has been pretty generally distributed among commercial and mercantile associations throughout the country. Mr. Guthrie intimated that there are two radical changes in the bill which he will present and stated that he would give details regarding these when the bill came up for its second reading.

REDUCTIONS EXPECTED IN SOME RAW MATERIALS

REDUCTIONS are expected in several lines of raw material which enter largely into manufacturing costs and steel is expected to lead the way. It is regarded as extremely likely that a new schedule will become operative about April 1. There is a desire on the part of the mills to get as close as possible to the point where buyers will confidently come into the market, knowing that they are safe in making extensive purchases. One of the dangers seems to be that the reduction may not be made in such a manner as to preclude any danger of a price-cutting campaign. Were a war of this kind to start it might be very difficult to stop the movement and prices might easily be flattened to below costs. Scrap metal dealers are continuing their efforts to batter down prices and at one of the largest yards in the Dominion this week, it was stated, they did not make a single sale. This is the first time this has happened in the thirty years the firm has been in business. Warehouse men are most sincerely hoping that price talk will cease soon as they state that the present uncertainty is doing more than anything else to keep buyers out of the market in a large way.

BRITISH CUTLERY FIRMS SWAMPED WITH ORDERS

ADVICES from England state, that from the buyers' point of view the position of the cutlery trade instead of improving is growing worse and that makers, seeing no chance of an appreciable increase in output in the near future, are turning down important business from merchants in distant markets who are desirous of buying British goods to replace German made products. Apparently, owing to conditions, the British cutlers are indifferent to new business. While some of the large buyers are holding off owing to high prices, the rank and file of retailers, having cleared their comparatively small stocks during the holiday trade are sending in orders that the cutlery firms cannot possibly fill for some time. It is stated that there are enormous demands for stainless steel and that blade forgers who work for the trade are so fully engaged on this new line, that blades of ordinary steel are scarcely procurable. As far as prices are concerned, it is pointed out that not only have the high war wages become a standard in England, but they have been increased since the signing of the armistice.

CANADIAN GOODS ARE WANTED IN ENGLAND

CABLEGRAMS to the Canadian Trade Commission, Ottawa, state that the British Board of Trade regulations insist that only goods of British Empire origin shall be exempted from the rigid general restrictions which were imposed in continuation of wartime trade regulations.

"Canadian manufacturers and producers," the message adds, "should comprehend the importance of the fact that foreign goods cannot, therefore, reach England by way of Canada. The market here is now being opened, and Canadian manufacturers have a big opportunity, as stocks in everything are

very low. As this is business which does not involve Government credit, it is up to Canadian business men to make the necessary effort to get orders. Our business is to find the markets.

"The shipping situation is also easier, and prompt and good business may be looked for."

LIFTING RESTRICTIONS MAY JUMP TURPENTINE

REPORTS from the South indicate that the 1919 turpentine crop will be the latest in years. In all directions the woods are watersoaked as a result of excessive rains and the operators are unable to work. A dispatch from Savannah says:

Cables from London that Government restrictions on the importation of turpentine would be entirely lifted at the end of March and on rosins about the end of April is the best news that has come in a long time in its effect on the immediate future of both commodities.

Naturally this means a return to normal business relations between dealers on both sides of the Atlantic and a decided impetus in demand for both turpentine and rosins.

The adverse weather conditions are as opportune as the lifting of the Governmental restrictions in the United Kingdom.

The woods are watersoaked over a great part of the belt and no one now questions that April and May will see much smaller receipts than expected. It is not regarded as improbable that the receipts for the first two months of the new season will be less than the meagre receipts of the same months in 1918. Too much weight cannot be given to this important fact. With the business with the U. K. freed from Governmental interference and with the domestic requirements forcing themselves on the market as they must do in the spring months the fact that fresh supplies are to be decidedly limited will infuse a foundation of strength to the markets that may become permanent for the entire season.

MAY PREVENT STRIKES BY INDUSTRIAL COUNCIL

WORKERS at fourteen of the International Harvester Company's seventeen American plants, and at all three Canadian plants, have decided by majority vote to adopt the "Harvester Industrial Council" plan of employee representation submitted to them by the company. The proposition failed of approval at three plants located in Chicago.

Under the plan the employees will within a few days elect by popular vote their representatives on each "Works Council." The employer and employees will have equal voting power in the unit body, where will originate suggestions, requests or complaints relative to all matters of mutual interest, including wages, hours, working conditions and all welfare proposals.

Disagreements will be appealed to the company's president, thence to a General Council of all works affected, if need be. But arbitration by mutual consent will be the final resort.

FIREARMS STILL ON THE U.S. CONSERVATION LIST

THE latest revised export conservation list issued by the United States War Trade Board contains the following:

Ammunition, X-2[1]: Cartridges and shells, loaded and unloaded, X-2. Shot, in bulk, X-2. Coal[1]. Coke[1]. Explosives, X-2[1]. Firearms, all types, X-2[1]. It is expected this will take place next week.

Current Events in Photograph

The photo shows one of the British "K" class submarines, the largest underseas boats in the world. This one, which is 350 feet long, ran ashore in a fog on the coast of Lancashire. It was refloated and proceeded on its way undamaged next day. This type of boat, it will be noticed, carries a four-inch gun fore and aft as well as an anti-aircraft gun amidships.

Dept. Store Adopts Profit-Sharing

Robert Simpson Company, Toronto, Signalizes Its Majority By Profit-Sharing System The First of Its Kind in Canada—How It Compares With an American Scheme.

THE recent announcement of the Robert Simpson Company, Toronto, that they intended to signalize the consummation of 21 years of successful business life by the adoption of a profit sharing plan, whereby everyone connected with the company would share in its future, is another indication of the general tendency noted of late, to meet possible labor difficulties by developing the idea of mutual benefit.

The general idea of the scheme as announced by the president of the company, H. H. Fudger, was to assure the future of those who spent an appreciable number of years with the store. The system adopted would provide a competence for those whom advancing years compelled to leave the store's employ, or would secure the accumulation of a substantial reserve by those who spent many years in the store's service, and left it for other fields of activity.

The Plan Outlined

Briefly the idea is as follows: Any member of the staff who has had a year's service with the store, may participate in the benefits, or may refuse to do so at will. There is no element of compulsion in the scheme. The member of the staff desiring to participate, must deposit 5 per cent. of his or her wages. This sum however must not exceed $100. This limit is set, in order that the higher salaried employee should not benefit disproportionately. To these savings of the staff, the company would add annually a sum equal to five per cent. of its net earnings. This sum, augmented from year to year, to be invested for the benefit of the participating employees.

May Withdraw After Ten Years

Participators completing ten years of service would be permitted to withdraw with all interests and profits. Those leaving before completing their ten years' service would be entitled only to the amount of their deposits plus 5 per cent. interest; save in the case of a woman leaving after five years service to be married, who would be entitled to all the privileges that a ten years' connection with the firm would give, and in the case of death, when beneficiaries would benefit in accrued profits as though the deceased had completed the ten years' term.

The First Arrangement of its Kind in Canada

Mr. Fudger, in introducing the plan, stated that it was the first arrangement of its kind made in Canada by any large commercial or industrial corporation.

While the scheme is new to Canada there can be little doubt that it has been modelled on the scheme in operation in the Sears, Roebuck & Co. store, Chicago, and as the parallel in many instances is so close, and as the American concern has had the scheme in operation for nearly three years, a consideration of the results obtained there will be of interest.

Sears, Roebuck & Co. have between 30,000 and 40,000 employees, and the plan was begun to engender harmony and loyalty between employer and employee.

The Sears, Roebuck & Co. Plan

The plan as put into operation by this store on July 1, 1916, obligated the company to contribute 5 per cent. of its net earnings, without deduction of dividends to stockholders to an employees' profit sharing fund. The employee desiring to participate in the benefits was required to deposit 5 per cent. of his salary in the same fund, the amount deposited in no case to exceed $150. There is no obligation to join in the profit sharing plan, unless the employee desires, and no employee who has not served three years with the company is eligible. In a recently issued report of the plan 92 4-10 per cent. of those eligible are at present enrolled. Their holdings of the company's stock total 80,000 shares or 10 per cent. of the company's stock, 20,000 of these shares belonging to the fund, and the balance being the personal property of the employees. This is an interesting fact, indicating as it does the possibility of a gradual assumption of an even greater interest of the employees in the company, a development tending toward a practical socialistic scheme of an industry operated by and for the workers.

Profits cannot be withdrawn till the end of ten years, save in the case of young women leaving to be married. They can withdraw their share after five years of service or two years after entering. Those leaving at this time could not have invested more than $300, as $150 is the maximum that may be invested in any one year by any employee. Figures contained in the report of the fund indicate that during the month of January of this year 45 young women took advantage of the opportunity to get married, three times as many as in any previous January. Granting that these young women had contributed to the fund the maximum, they would have invested $375. They drew as their share in the fund $19.000, an average of over $425 each with a maximum of $644. In other words the depositor of the maximum $375 withdrew from the fund as her deposit and her share of the profits $644.

Plan a Great Success

The Sears, Roebuck fund after two and a half years' operation has at present a total of $3,012,123 credited to its members. Of this amount the employees contributed $656,299, the balance $2,355,824 represents the company's contribution plus dividends on the stock in which the fund is invested. At the present market value the 20,000 shares of stock held by the fund would show additional profits of considerably over $400,000. This amount is not included in the total given above.

Even this plan has scarcely been in operation long enough to draw any hard and fast conclusions regarding its probable outcome. The report however gives actual instances of what has been accomplished up to the present time. An employee earning $20 a week deposited $1 a week, a total of $130. This employee had on December 31, 1918, to his credit in the fund $593.52, invested in 3 8-10 shares of the company's stock, which at present value is equal to $643. In a like manner an employee who deposited $3 a week or $3.75 since the plan has been in operation on the same date was credited with 11 shares of the company's stock at a present par value of $1,900. These figures are of course based on present profits, but assuming that these profits will continue on a par with the past two and a half years the results for the different salaries and periods have been estimated by the trustees of the fund as follows:

Average salary per week	Membership period, years	Savings deposited by employee	Total est. accumulation of savings and profits
$15	5	$ 175.50	$ 901.22
	10	370.50	2,648.55
	15	565.50	5,787.53
	20	760.50	11,426.56
20	5	234.00	1,201.62
	10	494.00	3,531.40
	15	754.00	7,716.71
	20	1,014.00	15,235.41
25	5	292.50	1,502.02
	10	617.50	4,414.25
	15	942.50	9,645.89
	20	1,267.50	19,044.26

The amount contributed by Sears, Roebuck & Co. for each $1 saved by an employee is shown by the following table:

Period	Total Paid by Company	Company Paid for Each $1 Saved by Employee
1916 (Half)	$ 412,215.55	$3.09
1917	905,484.04	3.02
1918	1,077,883.19	3.26

The total contributions of the corporation amount to $2,355,824 for the period of two and a half years. The employees in the same time have paid in $656,229.

In the case of the Robert Simpson Company, the plan varies little from this one whose tangible results are already beginning to be observed. The Robert Simpson Company is not as large an organization as the Sears, Roebuck Company, but neither does it represent the same number of employees, while the net earnings are known to be large and there is little question that this innovation will work out in Canada on as favorable a basis for the participants, as it has done in the case of the American concern.

Broom Prices Will Remain High

No Declines Till New Crop of Corn Available in the Late Fall —Some Damaged Corn on Market—Retailer Should Protect Himself Against Inferior Grades of Brooms.

IN order to get an intelligent grasp of the broom situation as at present, it is necessary to go back a few years.

When war broke out in 1914 and for two years after, the broom manufacturers of Canada found themselves facing a situation unparalleled in the history of the business in this country. Everybody will admit that brooms could not be manufactured and sold at a profit on a retail basis of 25c. The consequence was, broom manufacturers had no surplus laid by to meet the conditions that arose. Prices of raw materials, labor, etc., went up but there was no consequent rise in prices. This kept on until the fall of 1916 when, because of a very serious shortage in broom corn, owing to the acreage being planted in grain, broom corn jumped from an average of $100 per ton to $400 and over per ton. This brought the manufacturer face to face with a situation which meant either an advance in price or a discontinued business.

Price Remains High

Since then the price of broom corn has remained high, while other materials such as handles, twine, wire, labor, etc., have kept advancing steadily.

This was the situation when in November the armistice was signed. Even in normal times the broom manufacturers of the United States and Canada use on an average of 50,000 tons of broom corn in a year. The total tonnage averaged for 1916-17-18 was only about 50,000 tons according to Government reports, so that there will be no surplus corn on hand when the new crop is harvested in the fall of 1919. Previous to 1916 there was always a surplus of 25 to 50 000 tons on hand to provide against a short yield.

A Strong Feeling in Broom Corn

Now this means that farmers or brokers holding corn will not sell at less than market price, for they know if they do not sell to-day, that the buyer must buy to-morrow and they are safe. Added to this the United States Government has guaranteed the farmers of that country a good price on wheat and reports show that the acreage on other crops is going to be rendered. This means less broom corn and consequently a high level of price for what is produced.

No Broom Products Have Yet Declined

The consequence of all this is that present prices must remain in effect until a new crop is harvested. No raw material entering into the manufacture of brooms has been reduced and labor is still commanding the same high war level.

It should be added that the broom corn districts of the United States have had considerable snow and rain during December, January and February. The broom corn mostly is without protection after being baled, consequently considerable corn has been damaged. Some of this damaged corn has reached the Canadian market in the shape of some cheap brooms and the trade should beware of these because the corn is very brittle, dark colored, and breaks off when sweeping.

President Wilson of the National Broom Manufacturers' Association of the United States, speaking on the subject recently, stated:

"Broom prices are based upon the present cost of high grade material and skilled labor.

"It is my conviction that there can be no reduction in the price of brooms until the price of material is reduced.

"Labor, and necessarily so, is the big factor in determining the cost of any manufactured product.

"The process of the readjustment of the wage scale and other essential emergencies of war times, will and should of a necessity be slow.

"The skilled workman, as you will agree, is no longer receiving war wages. He is well paid to be sure, but who would deny him just and reasonable compensation for his labor?

"Likewise the manufacturer of brooms is entitled to a reasonable profit for his labor and investment, and to obtain this there should be no reduction in prices.

"Without a sacrifice of quality it would be impossible to lower the cost of manufacturing under existing conditions.

"You cannot afford to manufacture and the customer cannot afford to buy other than on a quality basis."

Reports from Wichita, Kansas, the centre of the broom corn belt, point to a strong tendency in the market for the raw product.

High grade corn, it is stated, is firm and held at practically the same range as heretofore. The amount of this grade that can be secured from first hands is comparatively light and will have no influence on the present visible supply in warehouses, which supply is limited. The opinion is expressed that if manufacturers desire to uphold the quality of the high grade brooms all and more than the present supply will be required.

Galt Dealer Doubled His Sales Last Year

E. B. Litz, manager of the McMurtry Hardware Co., Galt, Ont., is anticipating a big business this spring in paints and has already inaugurated his campaign for trade in this line, having an attractive window display of floor-lac, varnish, stains and inside floor paint.

To HARDWARE AND METAL, Mr. Litz stated there was every prospect of the best business in paints in recent years. He explained that his sales in paints in 1918 were nearly double those of 1917 and accounted for this increased business as due to the advance in paints made in 1917, which had the result of causing people to hold back this work, in anticipation of a reduction in price but when this failed to come in 1918, the people went ahead and did necessary work and the firm enjoyed an exceptionally large business, especially exterior paints. There were however some people who still hesitated to do painting and now with the war over and no drop in the price of paint, they find themselves with buildings which positively require the attention of the paint brush this year if only for preservation purposes and therefore he anticipaptes a big demand. Labor conditions, with more help available will also mean more business.

Mr. Litz intends to specialize in paints this year and declared that the idea of his early window display was chiefly to remind the public of work they will have to do when the weather is favorable and incidentally also to hurry on indoor painting. As a result of this window display, sales of interior paints and varnishes are noticeable in the day's business.

Questioned as to business in auto finishes, Mr. Litz stated that the recent mild weather had created a desire with motorists to get on the road and many with their cars laid up for the winter, have purchased paints and finishes and are going over their machines in preparation for spring. He reports a good business in this department.

NEW FIRM BUYS PLANT OF SARNIA METAL PRODUCTS CO.

The H. H. Robertson Company of Canada, capitalized at $200,000, has purchased the plant of the Sarnia Metal Products Company at Sarnia, Ont., and plans to commence operations about May 1 on the manufacture of asbestos covered steel roofing and siding, also ventilators, gutter and down pipes, skylights and asphalt paint.

The officers of the new concern are: President, H. H. Robertson, Pittsburgh; vice-president, Jas. Playfair; secretary, R. I. Towers; treasurer, N. S. Gurd; managing director, C. McKenzie.

The new managing director was formerly with the hardware firm of Mackenzie, Milne & Co., Limited, of Sarnia.

Steel Men Favor Redfield Plan

Judge Gary Predicts Record Prosperity Will Come With the Signing of Peace—Co-operation Will Solve All Difficulties, is View of the Committee Appointed

UNANIMOUS approval of full co-operation with Secretary Redfield's plan for stabilizing basic industries was the verdict handed down by 150 leading interests in the iron and steel industry at the close of the meeting called by the American Iron and Steel Institute at New York. The whole subject matter was referred, with power, to a committee composed of the following: Elbert H. Gary, James A. Farrell, Charles M. Schwab, John A. Topping, Alva C. Dinkey, L. E. Block, James A. Burden, E. G. Grace, C. H. McCullough, Jr., H. G. Dalton, A. F. Husten, James A. Campbell and Willis L. King.

Will Co-operate

The advisability of co-operating with the Department of Commerce in the matter of stabilization was strongly advocated by Judge Gary in a preliminary speech in which, however, he stressed the fact that private interests had already accomplished much in the way of readjustment to a peace basis. Regarding the future Judge Gary was unqualifiedly optimistic, stating that when peace was finally an accomplished fact the steel industry would "enjoy the greatest prosperity in our experience."

Government Represented

George N. Peek, chairman of the Industrial Board of the Department of Commerce, was present and presented the details of Secretary Redfield's plan. His speech was attentively listened to and he was generously applauded. Regarding the proposed League of Nations, Judge Gary stated that "the sentiment in its favor is well nigh universal among the civilized people of all countries." Judge Gary also pointed out that no general meeting of the steel industry had been called since the memorable occasion of December 9, when it was practically decided to submit a scale of steel and iron prices revised on a slightly downward scale to the War Industries Board for approval. His speech follows:

"We have had no meeting nor occasion for a meeting of the iron and steel industry generally since December 9 last, when we gathered to discuss and decide what recommendation to make to the War Industries Board concerning prices, pursuant to the request of that Board or its Price Fixing Committee. Between the time the request was made and the day fixed for the meeting in Washington conditions changed and as a consequence, our report to the War Industries Board was made unnecessary, although the committee which had been designated by the steel interests appeared in Washington at the appointed time and place. Notwithstanding that at our meeting here there were at the beginning, differences of opinion concerning our proposed action, I think time has demonstrated that our final conclusion was wise.

Moderate Reductions

"Circumstances justified the decision to recommend moderate reductions in prices of our commodities, and perhaps the fact that we voluntarily made reductions tended to stabilize business conditions generally. At any rate, the disposition of the large number of men who attended the meeting to harmonize their views and to place their interests in the hands of a few men who had proved their efficiency by hard work, continued patience and painstaking effort, redounded to the credit of all who participated. Consideration by each for the welfare of all others and an effort to co-operate in advancing and protecting the interests of every one, so far as the minds of those who are connected with our industry, are concerned, and have been and will continue to be of great benefit as long as we are controlled by these principles.

"On this occasion we have met to discuss and consider the question of co-operation as presented to us by the Industrial Board of the Department of Commerce. This Board has been appointed by the Secretary of Commerce, for the purpose of conferring with the different lines of industry in the effort to stabilize business conditions generally throughout the country. The Secretary of Commerce, after consideration and investigation, reached the conclusion that during the transition period from a war basis to a peace basis there might be disturbances in business, with possible reactions, if not depressions, decreases in or interruptions to employment, and delays in extending enterprise; and after conferring with other members of the Cabinet and the President of the United States, he appointed the Industrial Board referred to.

Co-operation Sought

"The Secretary of Commerce a few days ago addressed a letter to the president of the American Iron & Steel Institute, in which the Secretary stated his plans and requested co-operation by our industry and also opportunity on the part of George N. Peek, chairman of the board, to explain in detail what was proposed. The president of the Institute thereupon called together some of the leading manufacturers who were readily accessible, before whom Mr. Peek appeared and discussed at considerable length his plans and reasons for their adoption, after which the present meeting was called.

Has Been Better

"It is my opinion, and I believe the opinion of most of the large number of men who are assembled here to-day, that since the armistice was signed the iron and steel trade, generally speaking, has been better than it was represented to be in some of the publications, that it has been better than we feared it would be; that, all things considered, we have no reason to complain; and the number of unemployed has been much less than one would suppose from some of the statements which have been freely circulated. We know that, as a matter of fact, on account of the ordinary turn-over in labor and other reasons which result in idleness, temporary or otherwise, there are always large numbers of unemployed, and therefore it frequently happens that when people are expecting, in consequence of unusual conditions, an increase in unemployment exaggerations are made.

Return to Normal

"Personally, I have believed if business men and others who are interested in business conditions and results would retain their composure and courage we would gradually, if moderately, return to a condition normal and satisfactory. However, the Secretary of Commerce, a very wise and thoughtful man, believes, from his information and advice, that it was desirable to anticipate possible future adverse conditions, and therefore took the action mentioned, and, of course, this having been published, the natural result has been or will be to temporarily affect business progress until there can be a successful co-operative movement which is calculated to inspire confidence and activity.

The Barometer

"The steel industry is still more or less the barometer of trade. It involves large production, large amounts of working capital, large numbers of employees and has a decided influence upon the commercial and financial interests of the country. We occupy positions of great responsibility. What we do at this meeting may have an important bearing upon the whole business situation. We must not, we will not, intentionally make a mistake. During the war we have been called upon to do great things, and we have cheerfully and faithfully responded. I think we are bound to say we have in the main been treated fairly. We have served the Government to the best of our ability, and governmental representatives have, in positive language, commended our efforts.

Co-operation

"Now we are called upon again by a Government official to co-operate with the Government in the endeavor to stabilize business conditions, to protect so

far as practicable and reasonable, capital and labor, for they must always go hand in hand if success for either is achieved, and to bring about results which no reasonable man will deny are desirable. The methods were not suggested by us. They originated with a disinterested, high-minded and capable public official, whose obligation and whose desire are to best serve his country. We must on this occasion rise to a high plane of unselfish observation and there determine our course.

"Those who have been personally consulted, including all the members of the board of directors of the Institute who could be reached, have decided to recommend at this meeting that we promptly accept the invitation of the Governments to co-operate, so far as proper and consistent, in the cause which has been presented, and has been assigned to the Industrial Board made up of Mr. Peek as chairman, and other equally worthy men who may be depended upon to act fairly and intelligently.

Choose Committees

"If you should to-day submit your interests to a comparative small committee, that committee would come into conference with the Industrial Board and make an effort to agree upon prices intended to be just toward all who might be interested in the results, including seller, purchaser and the general public. It is intended, as usual, to give opportunity for full discussion, and I ask you to withold final judgment as to your action until the last speaker has been heard and the last reason expressed.

"There is ahead of us large business prosperity. We may hasten or retard its progress, depending upon our attitude. If we avail ourselves of the opportunities offered, we will succeed. We must be resolute, fairminded and confident. We must apply the spirit of co-operation whenever practicable. We must have faith in ourselves, in each other and in our country. Peace has not yet been established throughout the world and this fact more or less adversely affects industry. Still we have reason to expect an early settlement of most, if not all, of the important differences between nations.

League of Nations

"A League of Nations will soon be agreed upon, for the sentiment in its favor is well-nigh universal among the civilized peoples of all countries. The criticisms which are found in the speeches recently made in the Congress of the United States, with possibly slight exceptions, were not intended to be understood as opposing a practicable and workable agreement between leading countries which will result in preventing future prolonged international conflicts. The objections made relate to some of the conditions and terms contained in the covenant, or constitution, which has been reported for consideration by the General Council and in most cases, to proposed forms of procedure. Surely the great men who participate in the Peace Council will find a basis and a method for carrying into effect what they, and the hundreds of millions whom they represent, most earnestly desire.

"And then, after peace is declared and made secure, and with a cordial and reasonable co-operation between the Government and business interests, we should realize the greatest prosperity in our experience."

At the close of the meeting yesterday the producers gathered together at the Waldorf and unanimously voted to co-operate with Secretary Redfield's committee in taking steps to stabilize this industry. With this in mind a committee was appointed with Judge Gary as chairman, and power was voted to it to take necessary steps to bring about the best possible results.

PRICE READJUSTMENT WILL REQUIRE CONSIDERABLE TIME

The American Metal Market, Pittsburgh, Pa., states: There are strong probabilities that the selection of iron and steel prices under the Redfield plan adopted yesterday will require considerable time, possibly even the remainder of this month, so that the contemplated reductions will become effective April 1st, approximately or exactly. It is probable also that the reductions favored will be of such extent that they will naturally involve a reduction in wages, and to secure Government approval to any wage reduction will naturally require time. Meanwhile, buyers will hold off except as to the filling of pressing wants and demand will accumulate so that the announcements of the reduced prices may be attended by considerable buying. We predict that the buying will be heavier by the general public than by any Government activities, including the Railroad Administration. A rough guess would be that the reductions on finished steel products will range from $10 to $15 per net ton, in which case the producers would insist upon these reductions being considered final. Pig iron would be reduced much less, about $5. The extensive committee machinery of the Institute which functioned during the war will presumably be established again so as to insure the various prices being in proper proportions. The American Metal Market ventures a guess that the eventual schedule will be approximately $25 for pig iron, $35 for billets and two cents for merchant bars, with other products in proportion.

W. S. FALLIS ADDRESSED KIWANIS CLUB

An address was delivered at the weekly dinner of the Kiwanis Club, Montreal, by W. S. Fallis, managing director of the Sherwin-Williams Company of Canada, Limited.

Mr. Fallis traced the growth of Sherwin-Williams Company from its early stages to its present position. This sketch was made from the inception of the company at Cleveland in 1866. Several visitors were in attendance from Toronto.

LETTERS TO THE EDITOR

These columns are open to contributions upon any topic of interest to the trade, it being understood that the views expressed are those of the contributors, and do not necessarily imply editorial indorsement. Names of contributors will be withheld, if desired, but name of writer must accompany correspondence as an evidence of good faith.

HARDWARE AND METAL,
Toronto.

Gentlemen,—I note with great interest the portion of Col. Hatch's speech given at Hamilton recently. As a Westerner one could certainly go after the Colonel's remarks, say, for instance, Alberta is much smaller in population than Ontario, but we have more V.C. heroes from the recent conflict in Europe than our sister Province of Ontario, and the boys had no pull or army contracts behind them.

Nevertheless the tariff, or I think in the mind of us Westerners, price, is the large question. The manufacturers of Eastern Canada are not in business for their health, as Eastern bank statements can verify.

To bring my letter to the point I had in view when starting out I am in the retail business, handling a full line of hardware, harness and Massey-Harris implements, etc. Our biggest and keenest competitors are the G. G. G. Co. Perhaps Col. Hatch can explain why the G. G. G. Co. can lay barb wire down and retail it at the same price it costs the retailer.

Second. Binder twine can be sold by them cheaper than we can lay it down.

Now, as to implements, they can sell sleighs for $6 per set cheaper than we can. And wagons $10 to $15, plows $5 to $20. And remember they are all American goods brought in from the U.S.A., paying duty in most instances. Again, this company made one million dollars clear last year (this from a bunch of Western farmers). (Remember, the Massey-Harris agent does not set the retail price.)

There is no question, Col. Hatch, you and your fellow manufacturers in Eastern Canada have to get down to better or closer figuring and sell to the retailer at smaller profits or I am afraid the time is not far distant when the Westerner, retailer, jobber, and consumer, will look with longing though regretful eyes to the U.S.A. border. In place of strengthening the East and West the breach is becoming wider and wider.

This is written not because of any feeling toward Col. Hatch, but because he was representing the Eastern manufacturers in his speech at Hamilton.

WESTERN RETAILER.
L. C. P.

RETURNS FROM SCOTLAND

James Brodie, manufacturers' representative, of Montreal, has returned from a trip to Scotland. Mr. Brodie went there to size up business conditions and reports that there is a gradual transition from a war to a peace basis, but that, in the very nature of things, and because of the speed with which the war was being prosecuted, this readjustment will take time. Mr. Brodie is of the opinion that there will not be much domestic manufacture in a big way for some months to come. It is a big undertaking to make necessary readjustments.

EDITORIAL COMMENT

STUDY your trade paper. Learn from the records and achievements of others and study the methods of winners.

* * *

ENTHUSIASM and perseverance are the forces that convert opportunities into results and give them definite form and value.

* * *

IT USED to be a sign of weakness to advertise for business. Modern methods and competition have now made advertising the big factor in building business.

WATCH FOR THESE

REPORTS from various European centres agree that in many of the manufacturing centres of Germany there are now stored considerable quantities of goods which were manufactured for export. According to the reports many of these are staple lines and the owners are extremely anxious to get them moving and turned into money. That every subterfuge the cunning Hun can devise to get his goods unloaded will be practised, goes without saying. Investigations since the war have revealed that German firms were never any too scrupulous when business was at stake. Now that their needs for trade are more pressing than ever, it is not to be expected that they will stop at anything that promises results. It is unfortunately one of the conditions that has to be met that there are spurious commission agents and bogus manufacturers in various parts of the world who may be willing to lend themselves to all manner of schemes to profit by Germany's urgent needs. These men are no better than the Huns, but that does not alter the fact that the only way to protect British and Canadian industries will be to maintain the keenest vigilance. Goods labelled "Made in Sweden," "Made in Denmark," may be mere camouflage. The place to commence protective measures is not in Canada, but if possible before the goods reach Canada. There is no question that Canadian people do not want "Made in Germany" goods, but unless extreme care is exercised they may buy them in the belief that they were made in some friendly country. Co-operative measures by the Allied Governments to establish beyond question the source of origin of any doubtful commodities is being suggested by many manufacturers. An investigation department with agents at all European shipping points they believe, each reporting regularly, to all countries interested, they point out, may save a lot of trouble later. While no really definite action has as yet been taken, there seems the utmost determination that German competition must never again be allowed to become a menace.

DO YOUR SHARE

THE value of a good local newspaper is much greater than many people seem to think. One way the home merchants can help not only to keep it good, but to make it better, is to patronize it and furnish it with ads. A little investigation will convince anyone that the great majority of people are just as much interested in reading attractively written ads. as they are in following the general news. Many merchants do not always appreciate the business of the country and in maintaining its mighty power the press is in helping to carry on the power.

THE NIGHTMARE OF COMPETITION

THE merchant who listens to the contention of a customer that she can buy certain goods cheaper elsewhere, and thereupon starts out on a campaign to see if he cannot reach bottom quicker than the other fellow, is certainly wanting in a sense of proportion. It is possible that the merchant's price may be too high, but if it is figured on a real understanding of business, this is unlikely. It is possible, too, that the customer is using the same old bait that has been so often used to obtain favored prices. In any event, it is an item of comparatively small moment. The retailer who will spend as much time and energy devising constructive ways of selling his own goods as he does to "meeting competition" will have little competition to meet.

Many small dealers have made a nightmare of the cut price store and the mail-order house, and have confirmed themselves in their fears by cutting their prices to meet this competition. Of course, they lost out. Their very action was an admission of their own weakness.

It is time that retailers should, without exception, realize that price is only one of the elements that produce sales. A few years ago many merchants would have taken their oath that people would not buy sugar at 8 cents a pound. They

have learned now that people will find a way to buy sugar 11 and 12 cents a pound about as readily as they did at 5 and 6 cents. And those same merchants should have learned that there are other ways of getting business besides selling sugar at a loss.

As a matter of fact, service is a far larger factor in sales than the mere question of price. We do not necessarily mean elaborate delivery and extensive credits. But service as it is represented in attractive store surroundings, in well kept stock, in a desire to assist the customer, and in a courteous treatment at all times and under all conditions. Service is a saner basis on which to build business than cut prices.

MAIL ORDER HOUSE TAX

THE meeting which was planned for Thursday of this week by the committee which is looking after the matter of asking the Ontario Legislature to impose a tax on mail order houses in the municipalities in which they sell, did not take place. Inquiry elicited the information that it was not known when the meeting would be held, but that those in charge of the matter were waiting advice from the Legislature as to when would be the best time to present their case.

A LEADING EXPORT

WHILE higher prices have been a factor in the large growth of Canada's exports of both paper and pulp in the last few years, the growth is impressive. In the fiscal year ending March 31, 1913, total exports of paper and pulp were valued at $11,834,354. Returns recently issued show a total of $70,661,192 for 1918. In 1917 the total was $42,797,092 and in 1916 $38,443,239. Close to 6 per cent. of the country's total exports in 1918, swollen as they were by munitions and other supplies, fell under the head of paper and pulp.

NOT GOOD FOR TRADE

JUST how seriously internal disturbances such as have been prevalent in Russian for many months affect the trade of a country is shown by the fact that in seven months the exports from the United States to Russia have declined $111,000,000. In the same period exports to Belgium increased $74,000,000. The total increase in American trade with Canada was $5,000,000. The South American figures show some peculiarities. While sales to the Argentine increased by $16,000,000, exports to Brazil fell off $6,000,000 and to Central America, Mexico and Cuba, about $8,000,000. Many American firms are looking for further decreases in their export figures, especially to the South, now that British firms are again in the field and shipping conditions between British and South American ports are becoming normal.

VIEWS OF OTHERS

IT would seem to be the duty of the Government to urge the people by means of a publicity campaign to buy now the goods they need and not to wait for a drop in prices. The fact is becoming apparent in commercial and manufacturing circles that the feeling of timidity or cupidity which anticipates a long drop in the price of manufactured goods of all kinds is more permanent than was thought and that it is beginning to constitute a formidable obstacle to the effort to get our industries back to a peace basis.

A publicity campaign along the lines proposed would deal with the subject of unemployment in three directions: urging co-operation of the buyer, of the manufacturer and seller and of the worker. The seller or manufacturer must do his part by adjusting prices to a reasonable level so that there will be no justification for a charge that he is attempting to maintain the wartime level. Moreover, when conditions warrant, the manufacturer should guarantee the buyer that prices will be the same for a given number of months. This would remove suspicion that a drop might occur as soon as the retailer got stocked up with goods.—Ottawa *Citizen.*

WHEN the manufacturer issues full-page statements to the contrary advising that no one tamper with the tariff and points to the fact that upon the tariff we must depend for the revenue to meet the obligations of the country, does he realize that he is advising the Canadian people to buy foreign made goods? The manufacturer makes it plain that more than half of our revenue comes from the duties paid on imported goods. He points to the fact that the present year will find expenses enormously increased, even though the army will be practically disorganized, and that more than ever Canada must place her dependence on tariffs. Does he realize that only by the importation of more foreign goods can Canada increase her tariff revenue? When he preaches tariff for revenue he tears down all his theories of a protective tariff which is designed to keep out foreign goods. Canadian manufacturers throwing their gauntlet into the arena of world trade, challenging the industrial hosts, might meet the massed attack at the prospect of which they now tremble.—London *Advertiser.*

EVERY man desires to make his home the safest place on earth. Nevertheless it is a tragic fact that thousands of fatal accidents occur in households every year, simply because the homes themselves, or the appliances used in them, are unsafe. Defective electric wiring is one of the commonest causes of these fatalities. As a result of careless, inefficient, or cheap installation of electric fixtures, many homes are in constant danger of destruction by fire. Worse still, the inmates of these homes are exposed to danger of serious, if not fatal, electric shocks. Electric wiring should only be done by competent and conscientious electricians. If workmen possessing these qualifications are not obtainable, it is better to stick to kerosene lamps, dirty and dangerous though they be.—Brockville *Recorder and Times.*

IN Canada we must make sure that no section of the community is allowed to hold up the whole nation. We must make sure that Prussianism in the industrial world is beaten to the ground, as Prussianism was in Germany. There must be realization more than ever on the part of all employers and employed alike, that a nation or an industry cannot stand when divided against itself. When the war has broken down so many of the barriers which formerly separated class, there is all the more need for getting together and acting together in the common interest. And it would be well at this time for labor men to realize fully that their obligation to society is vitally important, and that their progress will be in exact ratio to the attitude they assume toward it.—*Border Cities Star*, Windsor, Ont.

EVENTS IN THE TRADE

Business Changes

Toronto.—C. W. Watson, succeeds L. Waintroob, hardware, 1160 Dundas st.

Toronto.—A. Staples has purchased the hardware business of William Howarth.

Arden, Manitoba.—W. W. Matthews, garage and hardware, is succeeded by Linn & Oliver.

Granby, Quebec.—Casavant and Tanguay have purchased the hardware business of Beauchemin & Son.

Rosenfield, Manitoba.—C. C. Fehr, of Halbstadt, has purchased the hardware business of C. K. Stewart.

Obituary

D. A. Gordon, of Wallaceburg, ex-M.P., for Kent, died at Braithwaite, La., on Tuesday. He was 63 years old, and was actively identified with the Dominion Glass Company, Wallaceburg Brass Works and the Wallaceburg Cut Glass Works.

Fire Losses

H. Gilbert & Son, hardware, sustained a loss of $1,000 in a fire at St. John, N.B.

In a fire at Montreal, Samuel Shulman, plumber and hardware, sustained a loss of $1,000.

The mica shop of D. Nault at Hull, Quebec, was damaged by fire. The loss will be about $1,000.

The main wing of the Pacific Sheet Metal Works at Vancouver, B.C., was destroyed by fire. The loss is $25,000.

Fire which was caused by the bursting of a retort used for melting glass caused a loss of $100,000 in the bottle factory of the Dominion Glass Company, at Montreal.

In a fire at Alberton, P.E.I., which caused a loss of $100,000, the following business places were destroyed: Edgar A. McRae, implements; John T. Profit, harness; James Birch, general store. The following were damaged: George Gards. sash and door factory; M. A. McNeil, implements.

Fire in the plant of the Niagara Falls Metal Stamping Works at Niagara Falls, N. Y., on March 7, caused a loss of $60,000. The management stated to HARDWARE AND METAL that the loss is mostly upon stock ready to ship for the spring trade. The plating department was not damaged but a great deal of the belting in the plant was ruined by water and the presses somewhat injured. The loss is fully covered by insurance. Work on repairs is being rushed and business, it is expected, will be resumed about March 15.

Personals

W. J. Chambers, of W. J. Chambers & Co., Toronto, has left for a business trip to Eastern Canada points.

W. H. Barker of the All Way Oiler Manufacturing Co., Toronto, who has been ill for two weeks, is progressing favorably.

C. C. Falconer, of Falconer's Hardware and Furniture Store, Winnipeg, was a visitor at the Toronto office of HARDWARE AND METAL on Thursday of this week.

John Farquharson, of Mackenzie, Milne & Co., Limited, Sarnia, Ont., was in London, Ont., on business for a couple of days this week.

J. M. Mackin, located in Columbus, Ohio, has recently become connected with the Black & Decker Manufacturing Company of Baltimore, and will represent the firm throughout the entire state of Ohio.

On the occasion of his departure for North Bay, where he has secured a position with the McDonald Hardware Co., the employees of the Cochrane Hardware Store at Copper Cliff presented W. E. Cassidy with a watch fob and a gold K. of C. emblem.

Trade Notes

The Acme Hardware Company has been registered in Toronto.

The Ontario Roofing and Tinsmithing Co., has been registered at Toronto.

The Model Tire and Vulcanizing Co., has been registered at Toronto.

The Montreal General Tool Co., Ltd., of Montreal, has obtained a charter.

The Albert Double Tire Co., has been registered at Montreal by Samuel S. Simon.

The Magnet Toy and Novelty Co., Ltd., of Bobcaygeon, Ont., has assigned to W. C. Moore of Bobcaygeon.

The Imperial Sheet Metal Works, Sarnia, Ont., has added a line of enamelware and tinware to its business.

The International Malleable Iron Co., of Guelph, Ont., plans to erect a three storey factory in which to manufacture pipe fittings.

According to newspaper reports the Canadian Cartridge Company of Hamilton, Ont., will go extensively into the manufacture of steel oil barrels.

W. B. Cochrane, of Vienna, Ont., has purchased the Tillsonburg Foundry and Machine Shop at Tillsonburg, Ont.

Howard and Lyn Hay have secured premises at Yellow Grass, Sask., and will shortly open a hardware store.

J. H. Millard, hardware dealer of Melfort, Sask., is in Winnipeg, where Mrs. Millard and family are ill with influenza.

F. W. Sturgeon, of Sturgeons, Limited, Toronto, left to-day on a six weeks' trip through Eastern Canada and the Eastern States.

Scythes & Co., manufacturers of cotton and wool waste, wipers, etc., have opened a branch at 143 Smith street, Winnipeg.

James Simmonds, Ltd., wholesale and retail hardware, Halifax, N.S., plans to remodel its store at Dartmouth, N.S., shortly.

At the annual meeting of the Pittsburgh Plate Glass Company, W. L. Clause was elected as chairman of the Board of Directors.

The partnership in the St. Lawrence Broom and Brush Co., Montreal, has been dissolved and another registered by J. A. Bray and Ernest Gohier.

The Partridge Rubber Footwear Company, of Guelph, Ont., plans to erect a $50,000 addition to its plant if a by-law to be submitted to the ratepayers shortly is carried.

L. A. Leavens, who has been travelling salesman for the Winnipeg Paint and Glass Company, of Winnipeg, has purchased the hardware stock and store of Stewart & Miller, at McAuley, Manitoba.

At the first euchre and dance of the Employees' Association of the Du Pont Fabrikoid Company of New Toronto, the presentation of a diamond stick pin was made to Sales Manager, W. A. Cotton by W. Marsh.

J. G. Smith, general manager of The Great West Electric Co., Ltd., Winnipeg, is on a business trip east. Mr. Smith will visit the large manufacturing centres both in the United States and in Canada, calling on leading manufacturers of electrical supplies and automobile accessories. He is expected back about the end of March.

The Black & Decker Mfg. Co., Baltimore, Md., announce that Chas. W. Unbehaun, formerly New York City and general Eastern salesman for the Bailey-Drake Company, Chicago, Ill., has joined the Black & Decker organization in the capacity of branch manager. Mr. Unbehaun will cover Eastern New York and the State of Connecticut.

Montreal News

Bigras Bros. have opened a hardware store at 73 Lorne Ave. west.

C. D. McDowell, with H. D. Smith & Co., Plantsville, Conn., is expected in Montreal this week.

The Main Hardware and Paint Store has opened at 1966 St. Lawrence Boulevard under the management of S. Migicovsky.

W. T. Evans, manufacturers' representative, and agent in Canada for the Sphinx Spark Plug, has returned from an extended trip to England.

George Henderson, president Brandram-Henderson, Ltd., Montreal, is in Halifax this week attending the annual meeting of his company.

Walter B. Ramsay is on his way to London, England, where he will represent the Canadian Paint, Oil and Varnish Association in connection with overseas trade.

J. A. Deschamps, formerly of the retail hardware firm of Deschamps and Kingsley, has opened a store of his own at 1918 St. Lawrence Boulevard.

Hon. C. C. Ballantyne, vice-president of the Sherwin-Williams Co. of Canada, has recovered sufficiently from his recent illness to permit of his leaving for Atlantic City. Mr. Ballantyne will remain there, it is expected, for a few weeks.

Winnipeg News

Mr. Witzke, of Witzke Bros., Expanse, Sask., is in the city on business.

J. Sahm, of the Eagle Pencil Co., spent a few days in the city recently.

J. F. Campbell, Miami, Man., spent a few days in the city on business.

Mr. Clark, representing the Samuel Cupples Co., St. Louis, is calling on the jobbing trade this week.

Archie MacFarlane, of the A. MacFarlane Co., Montreal, spent the week in the city on business.

Mr. Bruce, of the Kinzinger Bruce Co., Niagara Falls, Ont., spent a few days in the city this week.

Mr. Stephenson, president of the Delta Electric Co., Marietta, Ohio, called on the jobbing trade during the week.

F. Newton of Hunter & Newton, Mosher, Man., is a visitor in the city this week.

Incorporations

National Paper Goods Limited, head office, Hamilton, Ont., capital $300,000, plans to manufacture and deal in tape, twine, shipping cases, mailing tubes, etc.

Stewart Phonograph Corporation, Limited, capital $40,000, head office, Toronto, plans to manufacture and deal in phonographs of all kinds.

International Engineering Corporations, Limited, head office, Toronto, capital $750,000, plans to manufacture pumps and agricultural machinery.

Davis Slate and Manufacturing Company of Canada, Limited, head office, Toronto, capital $5,000, plans to manufacture building supplies and also electrical equipment.

East Kent Oil Producing Company, Limited, capital $300,000, head office, Toronto, plans to develop oil fields and deal in products obtainable therefrom.

H. L. Frost is Victim of Spanish Influenza

After a brief illness with pneumonia, which followed influenza, the death occurred in New York of Harry L. Frost, president of the Frost Steel and Wire Company of Hamilton. He was 45 years old and a native of Danville, Ohio.

At the recent convention of the Ontario Retail Hardware Association in Hamilton, Mr. Frost was among those who gave the visitors a hearty welcome to the city. At the banquet held on the first evening he not only made an address but assisted in the program of entertainment by a number of clever card tricks.

LATE H. L. FROST

President of the Frost Steel and Wire Company, Limited, Hamilton, Ont., who died of pneumonia in New York.

In addition to occupying a prominent place in the manufacturing life of Hamilton, Mr. Frost was widely known as a leader in all patriotic and philanthropic movements.

He was vice-president of the Hamilton Hotel Company, an ex-president of the Hamilton Board of Trade, chairman of the Trustee Board of the Methodist Deaconess Home, a member of the Advisory Board of the Children's Aid Society, an ex-member of the Board of Education, and a member of the Rotary Club. He was also prominent in Y.M.C.A. and Y.W.C.A. work. His wife and one son, Russell, who is overseas, and two daughters, Ruth and Margaret, survive.

HYSLOP BROS.' CATALOGUE

The 1919 catalogue of automotive equipment of Hyslop Brothers, Limited, Shuter and Victoria Streets, Toronto, is now being distributed.

It is carefully compiled and profusely illustrated and contains 208 pages, of which 65 are devoted to equipment for Ford cars.

This book covers a most complete assortment of automobile accessories, tires and garage supplies, in fact the firm claims it is the largest and most comprehensive catalogue of its kind ever compiled in Canada.

Many new devices that improve the efficiency and comfort of motoring are listed, also the standard equipment, the articles of which have proved themselves of merit and become vital parts of the automobile.

Copies of the catalogue will be sent to readers of HARDWARE AND METAL upon request.

VALLEY FORGE CUTLERY CO.

The Valley Forge Cutlery Co., 22 South Sixth St., Newark, N.J., has issued a most attractively printed catalogue listing the lines of pocket cutlery it manufactures. The catalogue contains 116 large pages and is profusely illustrated. The illustrations all show the actual size of the cutlery described. This plan is followed to give the catalogue additional value to those ordering by mail. Copies of the catalogue will be sent to readers of HARDWARE AND METAL upon request.

SILVER & CO., Inc.

Catalogue No. 18, issued by Silver & Co., Inc., 304-314 Hewes St., Brooklyn, N.Y., lists the "Homeware" line of house furnishings manufactured by the firm. It contains 128 pages attractively illustrated. The firm has also listed its lines of serving trays in Catalogue 19, its oil and gas stoves in Catalogue 20, and bathroom fittings in Catalogue 21. More than 800 different pieces of goods are dealt with in these lists. Copies will be sent to readers of HARDWARE AND METAL upon request.

LANDERS, FRARY & CLARK

Catalogue No. 61, issued by Landers, Frary & Clark of New Britain, lists the full lines of cutlery, hardware, electrical appliances, and vacuum specialties manufactured by the firm. In the foreword the company mentions that one of the great lessons learned from the war was that it was possible to do a very large volume of business on a reduced assortment of goods and that with this object

in view the company is listing items upon which the retailer can get prompt service from his jobbing source of supply. The catalogue contains 55 large pages and is profusely illustrated. Copies may be obtained upon request by readers of HARDWARE AND METAL who are interested.

Rumor of $300 Ford Car Has Aroused Much Interest in the Trade

CONSIDERABLE interest has been taken by the trade in alleged statements that Henry Ford plans to manufacture a car that will be put on the market at $300. Discussing the reports with HARDWARE AND METAL, Manager Fox, who is in charge of the Toronto branch of the Ford Motor Co., said he believed they were absolutely without foundation. He had had no intimation of any kind, he said, that any such car was contemplated, and declared that in his opinion the story was baseless and would be forgotten in a few days.

The following from New York shows the interest that is being taken in the automobile situation generally in that city by manufacturers and others:

"The automobile and tractor manufacturing industries are the most active purchasers of new equipment, and a good deal of their buying is being done in Detroit and Cleveland. So many new tractor manufacturing concerns have sprung up that the machinery trade is watching some of the smaller makers with care. Nearly all of the principal makers of automobiles are planning to build more cars this year than ever in their history. The market for small, low-priced cars is believed to be the best, and in this connection the announcement by Henry Ford that he will turn out a car to sell at $250 or $300 has been noted with interest by the machinery trade, particularly as at least two well known companies, the Willys-Overland Company and the Chevrolet Motor Co. (a branch of the General Motors Corporation) will this year bring out low-priced automobiles which will compete with the Ford car.

A Great Car Output

The Ford Automobile Company and the General Motors Corporation, as has been noted in previous reports, have bought more new equipment during recent weeks than any other interests. Both of these concerns are buying for the manufacture of tractors as well as for automobiles. The tractor plant of Henry Ford & Son, Dearborn, Mich., though separate from the Ford motor plant, is controlled by Henry Ford and his son Edsell, while the General Motors Corporation has taken over a plant at Janesville, Wis., for which equipment has been bought for making farm tractors. The Hudson Motor Car Co., Detroit, will utilize the plant built during the war for making shells to turn out the new Essex automobile, of which about 20,000 will be manufactured this year. The Board of Directors of the Hudson Company has authorized the expenditure of $1,000,000 for new machinery for this plant and the Hudson factory. The Nash Motors Company, Racine, Wis., has acquired an acreage adjoining its present factory for expansions, and will need new equipment.

ARTHUR C. LARIVIERE
Vice-President of the hardware firm of Lariviere Incorporated, Montreal, who died of pneumonia.

BUYS HARDWARE BUSINESS

D. D. McDonald and J. S. Oliphant have taken over the business of the McDonald, Voigt Co., Ltd., at Dauphin, Manitoba. The new firm will trade under the name of McDonald and Oliphant, selling hardware and groceries. John F. Voigt, who was vice-president of the McDonald, Voigt Co., Ltd., has left for Victoria, B.C., where he will reside. He has been a resident in Dauphin for the past twenty years.

CREDITS SUSTAIN OUR FOREIGN TRADE

The public hardly realizes the extent to which Canada's export trade is dependent on the providing of credits for other governments. Since the middle of 1918 credits amounting to $240,000,000 have been advanced to the British Government as follows:—

Imperial Munitions Board, $132,000,000; for the purchase of Canadian grain, $55,000,000; for exports of dairy products, $35,000,000; for the sale of the B. C. salmon pack, $8,000,000; for other exports of food, $10,000,000.

This money came from the Canadian public in the form of loans. Out of their savings over 1,000,000 people in this country brought Dominion bonds, and thus provided the funds out of which these advances were made. This practice must be continued if Canada is to get her share of the export trade. Those who buy War Savings and Thrift Stamps supply money for these credits.

Petroleum Products Company, Limited, capital $100,000, head office, St. Catharines, Ontario, plans to deal in oils of all kinds and also in electrical goods for light, heat and power.

Canadian Drill and Electric Box Company, Limited, capital $100,000, head office, Toronto, plans to deal in machinery and electrical supplies.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

532. **Broom stocks.**—A Bristol brush manufacturer would like to hear from a Canadian exporter of broom stocks, round or half-round, with hole bored or not, 12-inch to 14-inch in length and 2½-inch to 4½-inch in diameter.

533. **Wood washboards.**—Washboards, all wood, dovetailed, and 17 inches in height, are wanted by a Bristol firm.

535. **Scythe sheaths.**—A firm in Bristol is in a position to purchase scythe sheaths fitted with three sloths with iron-ring handles or rings so that they can be moved. Of standard size.

536. **Wheelbarrows.**—A Bristol firm desires to import wheelbarrows for navvy and general purposes.

537. **Washers and churns.** — Canadian manufacturers of washers and churns are requested to communicate with a firm in Bristol.

538. **Horse buckets.**—A concern in Bristol is prepared to purchase horse buckets.

539. **Lawnmowers.**—A Bristol firm would be glad to get in touch with a Canadian exporter of lawnmowers.

540. **Tree and hand pruners.** — A Bristol firm will buy tree and hand pruners.

541. **Garden tools.** — A firm in Bristol wishes to import rakes, forks, hoes and general garden tools.

542. **Hammers and hatchets** are wanted by a Bristol concern.

543. **Fly traps.**—A Bristol concern would be pleased to hear from a Canadian exporter of a good trap for catching flies.

544. **Mouse and rat traps.**—A Bristol firm desires to import mouse and rat traps.

545. **Mincers.**—A Bristol house wants to purchase mincing machines.

546. **Can openers.** — A Bristol concern wants to import can openers.

547. **Scales.**—Canadian manufacturers of a reliable household or kitchen scale or balance are asked to write a Bristol firm.

549. **Lanterns** wanted by a Bristol firm.

550. **Bread and cake knives.** — Canadian exporters should write to a Bristol firm.

551. **Egg beaters.** — A Bristol concern wishes to purchase egg beaters.

552. **Clothes pegs.** — Turned or spring clothes pegs are wanted by a firm in Bristol.

553. **Corn brooms.** — Canadian manufacturers of these brooms are requested to write to a firm in Bristol.

554. **Lemon squeezers.**—A firm in Bristol wishes to buy lemon squeezers.

559. **Bolts and nuts.**—A Bristol firm would be glad to get in touch with a Canadian manufacturer of bolts and nuts.

"Code of Truth" Adopted to Stop Exaggeration in Advertising

BECAUSE of the constant temptation that confronts employees of retail stores to think of the immediate sale, regardless of the influence which exaggerations in advertising may have upon future relationships with the customer, many retailers have adopted standards for the guidance of all employees, says a bulletin issued by the Associated Advertising Clubs of the World.

It goes without saying, declares the bulletin, that truthful advertising is the only kind that pays in the long run, and it is upon this thought that stores have taken every precaution against untruth in their advertising. For example, the Boston Store of Milwaukee has adopted what it calls its "Code of Truth," the provisions of which are interesting.

Must Have the Goods

"All Sizes" may be used only when a complete stock of all sizes is actually on hand.

The word "Bargain" may be used when goods are actually priced below regular, and its proper use is encouraged.

"Best" is prohibited, the store holding that through misuse it has lost its meaning in a store advertisement.

"Entire Stock" is permitted only when the sale described literally includes everything of the kind in the store, and nothing may be hidden or held out in such sales.

The store permits comparative price advertising but cautions great care.

Competitors may be referred to, but always in a complimentary manner.

"At Cost" and "Below Cost" must not be used even when true because the public looks upon such statements with suspicion.

All illustrations must be exactly descriptive of the goods advertised unless it is plain that the cut does not pretend to illustrate any particular item.

"Damaged" must always be used in connection with the cause of the damage.

Former Price

"Former Price" must refer to the price of an article before a permanent reduction was made and in most instances, the store's bulletin on the subject suggests, this means merchandise not quite up-to-date.

The store urges its people never to hesitate to say that an article was carried over from the previous season, when it is true. Great care must be used in employing such expressions as "Fortunate Purchase," "Sample Lot," "Manufacturers' overstock" and other similar phrases.

They cannot be used unless literally true.

A 59-cent article marked 33 cents, the bulletin sugests, is not half-price and the heading "Half-Price" may not appear above it. Great care must be used in employing such expressions as "Half-Price," "OneThird Off" and similar phrases.

The bulletin urges that the customers be warned that the quantity is limited or that a certain price is available "while the quantity lasts" in every case where there seems to be a chance that one day's sale will exhaust the supply.

Not in 56 Years Has Business Been Better

"Not in the 56 years that I have been in business have we had a better season than this," said Mr. Thomas Pink, of the Thomas Pink Co., Ltd., Pembroke, Ont. "Orders for lumbering tools have been coming in splendidly, not only from our own district but from New Brunswick, and, in fact, all parts of Canada."

This indicates beyond question in the opinion of Mr. Pink that the lumber men are having a very brisk season and this is due to a great extent to the demands for building purposes.

OPEN FACTORY AT TORONTO

Durkee-Atwood Co., Minneapolis, manufacturers of Rie-Nie products, such as auto patches, radiator cement, valve grinding compounds, enamels and dressings, who have factories at both Minneapolis and Cleveland, have now located a factory in Canada at 3 McCaul street, Toronto. They have done this to serve the trade of Canada from coast to coast, and give them better service in the shape of quicker deliveries. Their factory in Toronto will be in charge of Mr. A. E. Hosmer.

The photograph shows the members of the Toronto Warm Air Furnace Dealers Association assembled at their first annual banquet. They had as their guests for the evening the manufacturers of warm air furnaces. An account of the meeting appeared in a previous issue of HARDWARE AND METAL. *The members of the association are working towards having a practical heating bylaw put into effect.*

THE CLERKS DEPARTMENT

"If You Wish to Succeed, Never Try to Sell Goods You Don't Believe In"

This Applies to Everything From Rubbers to Religion, Says Stanley Moore—Salesman Who Has Honest Goods Need Never Be Ashamed

"YOU have a dollar. I have a dollar. We swap. Now you have my dollar and I have yours. We are no better off. You have an idea. I have an idea. We swap. Now you have two ideas and I have two ideas. That's the difference. But there is another difference: a dollar does only so much work. It buys so many potatoes, and no more. But an idea that fits your business may keep you in potatoes all your life. It may, incidentally, build you a palace to eat them in. Are you plowing, fertilizing, planting and cultivating your field with Moore service? Don't set an ox pace when rapid transit is available."

Had No Ideas

The man who got out this original bit of advertising is Stanley B. Moore, of Cleveland, Ohio, says Albert S. Greggin, in the "American Magazine." Only a few years ago he was just a likable young chap with a good many friends and a kind of half-baked ambition, but no particular ideas about what he was going to be or how he was going to be it—whatever it was. He began as "feeder" in a printing office. Then he learned to set type and to handle a press. After a while he got into the office, and learned to figure on jobs. Next he became a collector, and finally he was sent out to get orders.

When he reached this point he thought that he had got hold of the right thing at last, for he had a secret conviction that he was "a born salesman," and he confidently expected to make his mark in that line. He did succeed—for a while. But the orders he picked up were largely among his personal friends. Every time a friend died, or moved away, he lost a customer; and when he tried to find new ones among strangers, he, who had fondly imagined himself a born salesman, found that he was no salesman at all.

Thought It Over

The shock of this discovery made him sit down and give himself a thorough overhauling. He laid in a stock of books on salesmanship and studied them carefully. One of them, he says, he has read ten times. Another he knows so well that he can repeat pages of it word for word. Two years ago he decided to go into business for himself, and inside of eighteen months he was getting orders from no less than five hundred firms. Twenty-one months from the day he started in business he was keeping six other printing offices, besides his own, busy on his orders.

Moore thinks that his success is due to the principle of salesmanship which he has adopted as a sort of business creed. He isn't the only man to put this principle into practice, by any means; but perhaps he is particularly keen about it because he "doped it out" for himself.

Must Be Convinced

"I believe," he says, "that no one can make a big, permanent success of selling anything unless he is convinced of the value of the thing he is offering. Never try to sell what you don't believe in. Don't try to sell something to a man unless you think he will get a good return for his money.

"Here is the point: The thing itself may be all right. But if you don't think it is, if it seems 'punk' to you, if you are secretly calling your customer a poor boob for buying it, you are either going to be an indifferent or an insincere salesman. And no man ever built a good and lasting business on indifference or insincerity.

"If you take a man's money for what really is 'punk' it reacts on you in two ways: It can't help making you uncomfortable in your own mind. To succeed in flim-flamming a man may be a passing triumph, but it isn't one that will taste very sweet to you. You will not be able to go back to him with the same freedom and confidence. You will always be thinking of the time he lost out on a deal with you. And it is going to hurt your selling ability, just as sure as fate.

Will React On You

"Not only that, but it will react on you because the man himself will inevitably connect you with his failure to get satisfaction, even though you sold him something he thought he wanted. This may seem absurd, to talk of not selling a customer what he thinks he wants. But the truth is that selling a bad bargain is a proceeding that cuts both ways. It hurts the customer and it hurts the salesman. The best salesmen in the world are those who try to put themselves in the customer's place, to get his point of view, to figure out what will bring him the best return for his money.

"Suppose a man gives me an order to print some circulars he is going to send out to get business. That is apparently a simple proposition. I can take the order, charge him for labor and materials, and let it go at that. But suppose I look over his copy and, out of my knowledge and experience, decide that it is poor stuff and won't bring him an adequate return. I might say that this is no concern of mine; that it is his own lookout.

Future Business

"But is it? I want that man's business in the future. If I do this job for him and he doesn't get the worth of his money out of it, he is always going to have an idea that something was wrong with my part of it. That's only human nature. I will get the price of that one order, but I won't have a satisfied customer.

"It seems to me that we can't get away from this responsibility of the salesman to the buyer. It is a plain business proposition which pays in the long run. Of course a man may make mistakes. He may be so enthusiastic over a thing that he will sell it where it won't do any good. But honest enthusiasm is different from insincere and conscious flim-flamming. Enthusiasm, when guarded by responsibility to the buyer, won't go far wrong. But a salesman without enthusiasm—honest belief in what he is selling—won't go far at all.

Another Problem

"Trying to follow out this idea brought me face to face with another problem which I think is common to all salesmen. And, since everybody is a salesman of something, that means that it is a pretty universal problem. Here it is: you have something to sell—merchandise, or mechanical skill, or mental ability, or personality. You believe in it. You think it ought to be 'a good buy' for your customer. But the point is that he is going to use it, no matter what it is, to sell something to somebody else. Isn't that so? If you are going to carry out your idea of responsibility, you must look ahead and, if possible, help him to sell in his turn. That is the final test of good salesmanship.

How He Works

"Take my own case, because, of course, what we know best is what we learn out of our own experience. A man gives me advertising copy which I believe won't bring him any business. As I have already explained, I think it will be a poor deal for us both if I take the order. Well, then, it is up to me to offer him something which, in my judgment, will be a good buy for him. That is what I try to do. I want him to be able to sell what I have sold to him. If I believe his idea is a poor one, I must give him a better one. If the layout of his copy is unattractive, or commonplace, I must devise one that is original and striking. I have had customers who refused these suggestions. They thought their own scheme was better. If I was absolutely sure in my own mind that they were wrong, I refused the order. It took courage when I was just starting; but I believed a dissatisfied customer would be worse than no customer. I was banking on my knowledge of printing advertising copy that this customer would be dissatisfied, so I stuck to my guns.

"I believe in making yourself an expert in something that interests you, so that you will know when it is right. Then sell it when and where it will benefit the man who buys. If it is right, it will help him to sell in his turn.

Important In Selling

"Technical knowledge is important in selling, but it isn't all that is necessary. Ideas play a big part in salesmanship. I did not realize how much they counted until I started out to sell my own article—printing—and to help other men sell things. Most of the work I handle is advertising copy. Advertising is merely trying to interest people in something, and then showing them how they will benefit by buying it.

"You interest people, first, by the thing you talk about; and, second, by the way you do the talking. So I began to study what people were interested in. Well, I soon figured out that the things which interested me were those that came closest to me, that affected my health or happiness or success. So I hunted for good selling ideas right in my daily life. For example, on the Fourth of July last year, the stork

brought a baby boy to my house. Naturally, my own interest in the event was pretty keen; but I also figured that the birth of a son touches a secret chord in the hearts of all men. So I got out a humorous printed anouncement about the arrival of a "little Moore, yelling to beat the Kaiser," and mailed it to my customers. I jokingly referred to the increase in my overhead expenses due to the newcomer. That card brought enough business to put the boy through college, when the time comes. I simply cashed in on human interest; and human interest is the greatest selling idea in the world.

The Greatest Agents

"And ideas are the greatest selling agents. I don't employ a single solicitor for business. I depend almost entirely on ideas to get business for me. Much of the advertising matter I send out is just to keep people thinking of me. I am sending things now to fully four hundred firms who are not among my customers. I don't ask them for business, because I'm not ready to handle it yet. But I will want it sometime, and meanwhile they are learning to think about me.

"There are countless chances to 'cash in on human nature' if we keep our eyes and our minds open. I was a good deal annoyed a while ago by automobiles blocking the curb in front of my place of business, so I printed a large sign reading, 'Please Do Not Park Here.' It was leaning against the wall in my office one day when a long-winded individual came in and proceeded to take up a lot of time which I couldn't afford to waste. Suddenly his eyes lighted on the sign and he read it aloud. Instantly the idea came to me of printing that injunction on cards to be hung up in offices. I got out a supply, and they made a great hit. I had cashed in on the common human experience of a tiresome visitor 'parking his machine' alongside a busy man's desk.

Originality Counts

"Human interest ideas and a touch of originality in presenting them are a help in all selling. I have studied all the books I could get hold of on salesmanship. I believe that salesmanship is something every human being has to make use of. If you are not selling merchandise, you must not think you are not selling something. It may be your ability to keep books, or your skill in driving a locomotive, or your knowledge of law, or of medicine. Even your wife is selling something. She is marketing her ability to run a house and to bring up a family. The thing she gets in return is domestic happiness—your love and the devotion of her children. She ought to study salesmanship.

"What is more, a good salesman is usually a good buyer. I sent a man up to my house the other day to sell my wife a vacuum cleaner. We have one, but I thought we needed a new one. After a while the man came back.

"'Great Scott!' he said. 'I couldn't sell that woman. She made me think I was a fool to want her to buy.'

Teaching the Boys

"I am teaching my two older boys salesmanship already, even though Bobby is only seven and Lewis is just four. Every night I give each of them two cents to go and get an evening paper apiece. Bobby must go to a stand a block distant for his. Lewis, because he can't run so fast, goes to one only a half-block away.

"They must hurry back and sell a paper to me or to their mother. They have got to get up some selling argument, too. Of course they are little shavers and they haven't any startling ideas yet, but it is making them think. One claims I should buy because he got there first. The other claims his paper is easier to read. One says his paper has bigger news, because the headlines are more startling. The other says his paper has better pictures. They try to make my wife and me bid against each other. I pay a double price for the papers in the end, but I think it is a good investment.

Had Poor String

"When the boys were spinning tops last season, I noticed that they were using very poor string. So that night I walked eight blocks out of my way to get a ball of good fishing line. I gave it to the boys, told them to cut it up, get their own buttons, and make some first-rate strings for spinning tops. Bobby was going to school then and I told him to try to sell, or trade, these strings, to the other boys.

"The next evening I was appalled to find that in return for six of these strings he had acquired five tops and two cents in money! The tops probably cost about five cents apiece. The strings were worth only about half a cent apiece. You may say he merely drove a good bargain and that his playmates hadn't been obliged to give a five-cent top for a half-cent string if they didn't want to. But I can see that it's up to me to teach him the principle that, to be permanently successful, you must be sure that your customer will get the worth of his money. If my boy got the reputation of sharp dealing, of 'putting one over,' he would be a rotten salesman.

Teach Everybody

"I am so rabid on the subject of salesmanship that I'd like to teach it to everybody, from the cradle to the grave. My father is sixty-eight years old. For years he has been a wholesale grocery salesman down in Kentucky. He will go into a store of one of his customers and, if the proprietor is busy, my father will poke around behind the counters, examine the stock, make out an order for what he thinks the man needs, and send it in. That's pretty good work. But he has competitors, and he doesn't get all the business by any manner of means. He came up to visit me not long ago and I started in to talk up salesmanship to him. I got eight books for him to read and he waded in. When he left for Kentucky, those books went along.

"'Why, son,' he said, 'I didn't know the first letter of the first syllable of salesmanship! I'm going to begin right now to study my job.'

"That was from a man of sixty-eight. He's as enthusiastic as a boy over the new vision he has of the great game of selling things. It is a wonderful game. It keeps you on your toes. It makes you study yourself and other people. It sets you to digging up ideas. It gives you interest in life. Incidentally it puts money into your pocket. And, if it is the right kind of salesmanship, it will put money into the other fellow's pocket, too."

Racey in Border Cities "Star"

ATTENTION! OTTAWA

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

586. **Cabinet and builders' hardware; cotton piece-goods.**—A firm in Brisbane, Australia, wishes to secure the agencies for Queensland of cabinet and builders' hardware, also cotton piece-goods, for the sale of all of which they claim a good connection.

587. **Manufacturers' selling agency.** — A newly-established British firm, the members of which have had successful and varied experience with leading British exporting houses, is ready to undertake Canadian agencies. Arrangements for branch agencies have been made in Canada, the Argentine Republic, South Africa, Australia, New Zealand, China, Japan, Dutch East Indies, India, Burma, Straits Settlements, Egypt, Soudan, France, Italy, Spain, Portugal, Russia, Siberia and Scandinavian countries.

592. **Rubber goods.**—An Englishman now in London, who was formerly manager of a large Petrograd rubber factory, is anxious to get into touch with Canadian manufacturers of overshoes and other rubber goods seeking a market in Finland and Scandinavia, and eventually in Russia.

598. **Wire.**—A Glasgow firm wishes to hear from exporters of all kinds of wire with a view to business as soon as conditions permit.

599. **Box shooks**—A Glasgow firm wishes to be placed in touch with exporters of the above wit ha view to business as soon as conditions permit.

600. **Leather bends.** — A Belfast firm wishes to get in touch with exporters of the above with a view to business as soon as possible.

604. **Baling wire.**—A Glasgow firm wishes to receive offers of steel baling wire, No. 14 W.G. by 9 feet long, looped one end, oiled and bagged both ends, in 10-ton lots, with a view to business as soon as conditions permit.

605. **Trunk mounting.**—A Glasgow firm would like to receive offers of the above with a view to business as soon as conditions permit. Specifications may be obtained from the Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa.

606. **Agricultural implements.**—A Glasgow firm asks to be placed in touch with exporters of the above with a view to export business with Mediterranean countries.

608. **Binder twine.** — An Aberdeen firm would like to hear from exporters of the above in a position to quote on 10-ton lots.

609. **Agency.** — A Canadian commission house recently established in Barbados will cover all the West India colonies for Canadian manufacturers who commission them to represent them.

610. **Agency.**—A commission merchant of Kingston, Jamaica, well acquainted throughout the island, wishes to arrange for exclusive representation of Canadian manufacturers. References furnished to the Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa.

615. **Belting.**—A Buenos Aires firm of importers of belting, asbestos packing and machinery supplies, desires to be placed in communication with manufacturers of belting in general.

616. **Belting.** — A Buenos Aires firm of general industrial and agricultural machinery importers desires to be placed in communication with manufacturers of belting in general.

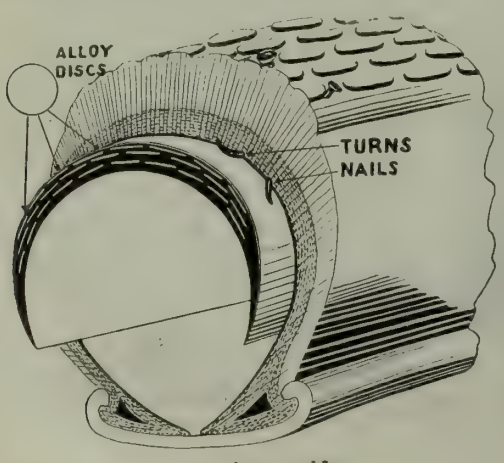
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

WIRE CONNECTORS

The "Walger" wire connector manufactured by the Walger Connector Co., 22 College St., Toronto, do away it is claimed with blow torch, alchol, solder, acid, rub-

ber tape, and paste for fixture outlets and motor leads. The manufacturers claim they save eighty per cent. in time and that all that is required to make the connection is a screwdriver. In soldering a joint the old way they claim the heat is conducted along the copper wire decreasing the insulating qualities of the rubber



near the joint. The "Walger" connector it is claimed does away with all this as the insulation it is stated is permanent and cannot dry out and drop off as tape will. The electrician it is stated can leave his workshop with enough connectors in his pocket to wire up the fixtures for a whole building and it is also claimed

can use the connector without the slightest difficulty in places where he may be cramped for room. It is also claimed that when the "Walger" is used the inspector can readily and quickly examine every joint.

ARMOROIDS

"Armoroida," made by the Armoroid Company, 4 Morley avenue, Toronto, are, it is claimed, absolutely puncture proof. It is stated they are constructed of three layers of a special alloy disc, one-half inch in diameter, arranged to overlap and specially treated in the firm's laboratory, which treatment, it is stated, enables the vulcanizing to them of rubber. The discs are by this process, it is stated, permanently held in position, preventing heating and friction. These alloy discs in combination, it is stated, with pure gum rubber and the best Sea Island fabric, make a perfectly flexible inner casing which, it is claimed, effectually protects the inner tube from punctures. Armoroids, it is stated,, support and strengthen the outer cover.

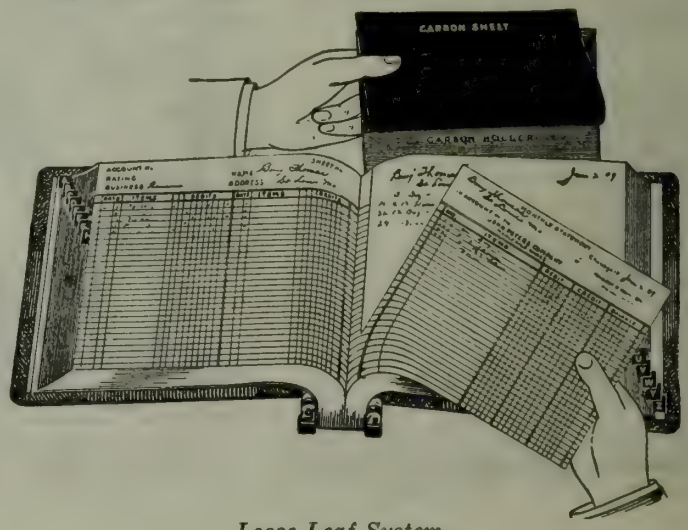
Armoroids

RADIATOR CEMENT

A new RieNie product has recently been put on the market by Durkee-Atwood Co., of Toronto and Minne-

Radiator Cement

apolis. This is known as RieNie Liquid Radiator Cement, used in automobile, truck, and tractor cooling systems. The claims made by the manufacturers are that it only takes a small quantity of this cement to stop a leak in a radiator, and that it will not only stop the leak, but will hold it, and that driving over rough roads will not cause the cement to shake out, in other words that it makes a permanent repair.



The directions given are that the motor shall be started, the radiator cap removed and one should make sure that the water in the cooling system is circulating properly. The can of cement is then shaken well, and about half the contents used for an ordinary leak, and all contents for large leaks. The motor should be kept running until the leak is stopped, which usually requires from one to five minutes.

This cement is also useful to plumbers and steam fitters, as it will repair hot water plants and steam boilers.

LOOSE LEAF SYSTEM

The duplicate statement ledger system manufactured by the Lowe Martin Company, Limited, Ottawa, it is stated, is an ideal method of handling charge accounts in hardware and other retail stores. It is claimed it will prove economical and efficient in every way. The duplicate statement ledger system requires the following equipment, current binder, transfer binder, current indexes, transfer indexes, statement leaves, and ledger leaves.

At the end of the month, or at any time when a statement is required, the total month's debits with the old balance added, it is stated, gives the exact balance to date. At the end of each month all the original and duplicate statements are removed from the current binder, the originals being torn off where perforated and mailed to the customers as statements of account, and the duplicates being filed in the transfer binder.

Loose Leaf System

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

LOWER prices have been named this week on wire bale ties and cut hay wire, the declines amounting to approximately 50c per 100 pounds. This is a reflection of the changes made in the base price of smooth steel wire recently. Tinners' wire extras have also been revised, the present scale of extras being a reduction of an even dollar from figures formerly in effect.

Range boilers have come in for a substantial reduction, the decline approximating a good 12½ per cent. Lower priced steel sheets have largely been the contributing factor in this change. There seems to be a desire on the part of some manufacturers to get down to absolute rock bottom in the matter of prices, so that building can be encouraged.

This attitude is showing in relation to steel sheets and kindred lines, and the results of the meetings being held in the United States are looked forward to as perhaps bringing about a basis of prices at which buyers will come into the market actively. Galvanized sheets are down locally another 25c per 100 pounds, with black sheets and plate holding at declines of a week or so ago.

Turpentine has recorded a decline of 2c per gallon in some quarters, with most factors now on same basis. The restrictions on the import of turpentine into Great Britain are to be lifted the end of March and on resin the last of April. If bottoms are available for shipping this should stimulate the movement appreciably. Reports from the South indicate that wet weather there is retarding new crop production. These factors serve to steady the market.

Linseed oil is on the upward move again, prices being up from 3c to 5c per gallon, with indications pointing to even higher levels before present movement is halted. The non-arrival of Argentine seed at United States points has intensified the present situation, and Canada's markets are a reflection of strength across the line. There is some export business developing on oil, and the demand locally is reported as much improved.

Among the lines which have advanced this week are corn planters, post-hole augers and solder, this latter being a reflection of stronger tin and lead markets. Pipe stocks and dies, safety tackle blocks, and some lines of pliers, punches and dividers are also on the upward trend. Pig iron is down along with tin plate, copper sheets and bars, and set and cap screws. Fuel oil and lubricating oils have declined, and lower prices are ruling also on tin and galvanized wash boilers, copper and iron rivets.

MONTREAL, March 13.—Many distinct declines and a few advances are the outstanding features of the week. The declines made are summed up as follows: Range boilers for both standard and extra heavy grades are reduced about 12½%. Set and cap screws are down about ten per cent., and the same approximate reduction applies for a few lines of light builders' hardware. One line of pipe wrenches is readjusted in price, and tire tape also was slightly revised. Fuel oil and lubricating oils are down, the latter declining two cents per gallon. Black and galvanized sheets and old material are all under revision downward. Pig iron is quoted down at $45 per ton. Copper and tin sheets and Canada plates are less, as are also copper bars.

The advances made are one for collar pads of 5%, one cent per pound on block tin, and two cents for bar solder. Snow shovel handles, referred to last week, should be made to read $6 per dozen—the former price being $7.50.

MONTREAL MARKETS

Range Boilers Down; Copper Bars, Too

Montreal.

RANGE BOILERS.—The prices on range boilers have been reduced about 12½ per cent. The following prices are now in effect: Under 12 gals., each, $9.50; under 30 gals., $10.50; 30 gal., $12.25; 35 gal., $15; 40 gal., $18; 52 gal., $24; 66 gal., $33; 82 gal., $40; 100 gal., $50, and 120 gal., $65. These prices are for the regular standard grade. Thirty gallon extra heavy are quoted at $14.50 and 40 gallon at $20. In lots of twelve or more an additional 5 per cent. is allowed. Copper bars are reduced to $28 per cwt.

Collar Pads Up; Set Screws Down

Montreal.

COLLAR PADS, SET SCREWS.—An advance of about 5 per cent. has been made in collar pads. Some prices follow: R9. $8.80 per dozen; R10, $9; R13, $9.50; S9, $9.60, and RE10, $9.40. Set and cap screws are reduced in price about 10 per cent.

Builders' Hardware Down; Wrenches, Tape

Montreal.

VARIOUS LINES.—Some varieties of builders' hardware are reduced in price and this will apply to sash lifts, cupboard catches and similar lines; the approximate decreases are 10 per cent. Stillson line of wrenches are also changed in price, the change being more in the

way of a revision. Tire tape is also revised in three sizes, the present prices being 65c per dozen for one ounce and 63c for 2 oz., while ½ lb. size is selling at 62c. All prices are per pound.

Steady Basis on Wares and Stoves

Montreal.

STOVES AND WARES.—While there is little new to say regarding these lines, stoves are steady and firm, and the basis in a general way is held. For ware, including enamelled tin and galvanized, there is a fair demand and ample stock to meet this.

Nail Sales Fair Without Change

Montreal.

NAILS, WIRE.—Steady selling of nails in rather reduced lots is reported but few are buying more than are needed for the present. The basis is steadily held on standard wire nails at $5 per keg, and that for cut nails $5.35. Smooth steel wire, base, is quoted at $5.75 per 100 pounds.

Rope Materials Somewhat Scarce

Montreal.

ROPE.—There is not a great deal of movement as yet, although sales are developing. Manufacturers state that supplies are not any too free. It appears that the use of ships for transporting troops is so general and the boats are so urgently needed that raw materials cannot be got promptly. Prices are: Pure manila, base, 37c per pound; British manila 33c, and sisal 27½c.

Fuel Oil Lower; Lubricating, Too

Montreal.

OILS AND GASOLINE.—Lower prices are out on a number of lines of lubricating oil, the reduction amounting to about 2c per gallon and affecting, in particular, red oils. About 65 per cent. of the various grades of machine oils are affected. Fuel oil is also down, the present price per gallon being 8 3-10c per gallon. There is not a heavy demand at present. Coal oil is steady at 20c to 23c per gallon, and the price of motor gasoline is held at 34c per gallon still.

Steel Bars and Iron Unchanged

Montreal.

IRON AND STEEL.—There is nothing new in either steel or iron, the movement being still limited to small lots. Whether there will be any readjustment of values is not clear, but some look for reductions in the not too distant future.

Common bar iron, per 100 lbs.	$4 30
Refined iron, per 100 lbs.	5 30
Mild steel	4 30
Iron finish machinery steel	4 35
Norway iron	12 00
Single reeled machinery steel	6 00
Spring steel	6 00
Sleigh shoe steel	4 30
Tire steel	4 50
Toe calk steel, per 100 lbs.	5 20
Band steel	4 30
Harrow tooth steel	4 35
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Sheets Down 25c; Tin; Plates Less

Montreal.

SHEETS AND PLATES.—Jobbers are inclined to take less for sheets and there has been a readjustment of prices in this market, making the range narrower all around by 25c per 100 pounds for both black and galvanized. There is but a small and limited business still, and few extensive orders are received. Corrugated sheets are, of course, available on a more favorable price basis, and the average advance for corrugating in some quarters is 35c per 100 pounds. Revisions downward have been made for copper sheets, Canada plates and tinplate. These are given in the current market section.

BLACK SHEETS—	Per 100 lbs	
10 gauge	$6 00	$6 75
12 gauge	6 10	6 90
14 gauge	5 85	6 75
16 gauge	5 95	6 80
18-20 gauge	6 10	7 00
22-24 gauge	6 15	7 10
26 gauge	7 20	7 15
28 gauge	6 35	7 25
GALVANIZED SHEETS—		
10¾ oz.		$9 50
28 gauge		9 00
26 gauge		8 75
22 and 24 gauge		8 60
20 gauge		8 60
18 gauge		8 60
16 gauge		8 25

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Two Cents Added To All Solder

Montreal.

LEAD PRODUCTS.—There is a straight advance this week of 2c per pound for solder. This applies to the line of bar solder right through and is a direct result of the firming tin market. Sales of various lead products are still limited.

Lead pipe, lb.		$0 12
Lead pipe (cut lengths)		0 13
Lead waste pipe, lb.	0 13	
Lead traps and bends	Net list.

Extensive Declines In Old Material

Montreal.

OLD MATERIAL.—Very drastic declines all down the line on old materials are made, and there is really no interest in this market. Dealers in the country are not selling, and dealers here are not interested in buying even at the reduced prices. It is fully expected that there will be no activity for the immediate present or near future as the big users are not needing supplies very badly.

Dealers' Buying Prices

Pipe scrap	8 00
Stove plate, per ton	15 00

Briefs From the Weekly Markets

Bale ties declined 50c per 100 pounds and a drop has been registered in cut hay wire also.

* * * * *

Galvanized sheets after holding steady for some time are down 25c per 100 pounds in some quarters.

* * * * *

Machine oils show a decline averaging 2c per gallon in some markets, tending lower in others.

* * * * *

Collar pads have gone higher, the advance amounting to about 5 per cent.

* * * * *

Solder shows a reaction from many declines in a two-cent advance this week.

* * * * *

Corn planters have undergone a revision to higher levels.

* * * * *

Bernard pliers, Lodi pliers, Lodi punches and Lodi dividers are among the list to advance this week, new prices showing an advance of about 10 per cent.

* * * * *

Kiddie Kars have been revised to higher levels.

* * * * *

Range boilers recorded a decline this week averaging about 12½ per cent.

* * * * *

Post hole augers, though it is said they are meant to go down, have gone up—in price—this week.

* * * * *

Snow shovel handles, referred to last week, should be made to read $6.00 dozen, the former price being $7.50.

* * * * *

Sheet zinc is down 5c per pound, being quoted at 25c in Winnipeg markets.

* * * * *

Star safety tackle blocks have advanced from 5 to 20 per cent. according to size.

* * * * *

Soldering coppers show a further drop of 6c per pound.

Tin Again Firms; Pig Iron, $45.00

Montreal.

INGOT METALS.—There is certainly little new movement in these lines, and the principal feature of the week is a firming tin market. Most of the items are dull and uninteresting. Pig iron is down $5.

COPPER.—With the basis nearly cut in two from the high levels obtaining last fall, prior to the armistice signing, the declines for copper are expected to be much smaller. There is no change this week and prices are quoted here at 20c per pound.

TIN.—London markets lowered for a while, and there was a considerable drop amounting to nearly £40. This has been practically recovered again and local quotations are made at 60c per pound.

SPELTER.—This is unchanged at 9c per pound and there is but little selling reported.

LEAD.—The basis is held without change and locally the trade is supplied at the unchanged price of 7½c to 8c per pound.

ANTIMONY.—On the held basis of 8c per pound there is little doing.

ALUMINUM.—Prices have not been altered in any way, and with a small demand there is no feature. Price, 40c per pound.

PIG IRON.—There is readjustment on this item and $45 per ton is quoted, this being $5 less than previous price.

TORONTO MARKETS

TORONTO, March 13.—Lower prices have been named on galvanized sheets this week, the decline amounting to 25c per 100 pounds. Cut hay wire is also down 50c per 100 pounds, and the list of extras on tinned wire show a revision downward of $1 to previous figures. Range boilers have declined, and a lower basis of quotations on machine oils seems to be on the way. Ingot metals show a somewhat firmer tendency, tin, copper and lead seemingly having reached the bottom for the present at least.

Business shows improvement, orders going forward in much better volume and outlook generally is considered very satisfactory.

Range Boilers Register Decline

Toronto.

RANGE BOILERS.—Lower prices have been named on range boilers this week following the substantial reductions made in sheets and indications are that the basis arrived at will prove much more satisfactory from a consuming standpoint. New prices on the standard boilers are given as follows: 12 gallon and under $9.50; 20 gallon and under $10.50; under 30 gallon, $11.50; 30 gallon, $12.25; 35 gallon, $15.00; 40 gallon. $18.00; 52 gallon, $24.00; 66 gallon, $33 00; 82 gallon, $40.00; 100 gallon, $50.00; 120 gallon, $65.00; extra heavy boilers are quoted for the 30 gallon, $14.50; 35 gallon, $17.00; 40 gallon, $20.00; 52 gallon, $28.00; 66 gallon, $38.00; 82 gallon, $47.00; 100 gallon, $58 00; 120 gallon, $75.00; 144 gallon, $90 00; 168 gallon, $100; 192 gallon, $110.

Heating Coils Changed, Too

Toronto.

HEATING COILS. — Revised prices have been issued on heating coils also, the charge on these being extra to those named on the range boilers. The following quotations are now effective: 30 gallon and under, $12.00; 35 gallon, $14.00; 40 gallon, $16.00; 52 gallon, $20.00; 66 gallon, $25.00; 82 gallon, $28.00; 100 gallon, $31.00; 120 gallon, $35 00; 144 gallon, $40.00; 168 gallon, $45.00; 192 gallon, $50.00.

Kiddie Kars Make Advance

Toronto.

KIDDIE KARS.—Higher prices have been named on Kiddie Kars this week, new quotations now being named to the trade at the following figures: No. 2, $2.00 each list; No. 3, $2.50 each, list; No. 4, $3.00 each, list; all being subject to a trade discount of 33 1-3 per cent.

Bale Ties Lower; Cut Hay Wire, Too

Toronto.

BALE TIES. CUT HAY WIRE.—A reduction of 50c per 100 pounds has been made in the price of wire bale ties this week and the new scale of quotations is given as follows: No. 12, $6.25 per 100 pounds; No. 13, $6.35; No. 13½. $6.40; No. 14, $6.50; No. 15, $6.70; No. 16, $6.95.

Cut hay wire has also been reduced and the present range of prices being made to the trade is as follows: No. 9, $6.15 per 100 pounds; No. 10, $6.20; No. 11, $6.25; No. 12, $6.40; No. 13, $6.50; No. 13½, $6.50; No. 14, $6.65; No. 15, $6.90; No. 16, $7.10.

Tinned wire extras have been revised to lower levels also, the list to-day being for Nos. 17 to 25, $2.00 per 100 pounds net; Nos. 26 to 31, $4.00; Nos. 32 to 34, $6.00; which is a $1.00 drop in each instance back to previous figures.

Nails Steady; Fair Movement

Toronto.

NAILS, WIRE.—New developments are lacking in the situation on nails this week. Prices are holding at unchanged figures and whereas the movement to the trade is not heavy, there are some orders going forward. Quotations being named are for wire nails $4.95 per 100 pounds base, and cut nails $5.35 per 100 pounds base.

Cotton Waste Down; Oakum Holds

Toronto.

WASTE, OAKUM.—In quoting price changes on cotton waste a week or two ago, the new quotations on some lines of colored waste were omitted. These are reproduced herewith, the present figures being lower than those formerly in effect. Quotations are: Fancy 15½c per pound; Lion, 14c; Standard 12½c; Popular 11c; Keen, 9½c.

There has been no change in the situation on oakum though prices on marine oakum rule with a very firm undertone. Business is fair and outlook generally considered satisfactory.

Steady Situation Shown in Rope

Toronto.

CORDAGE.—The market seems to have steadied down and appears to be on a very fair basis. Manufacturers and jobbers report a very good movement of rope to the retail trade and altogether the situation is quite satisfactory. The range of prices shows no change, the following figures being those now in effect: Pure manila, 37½c per pound base; British manila, 33c; New Zealand hemp, 33c; sisal, 27½c; sisal lath yarn, 27½c per pound base

Machine Oils Tending Lower

Toronto.

OILS, GASOLINE.—Indications seem to point to a general reduction in the price of machine oils, amounting to possibly 2c per gallon. The list has not yet been figured out so new prices are not available for the trade.

There have been no new developments shown in the situation on coal oil this week, business being done showing a large volume at unchanged prices, ranging from 19½c to 22½c per gallon, according to grade. Gasoline is moving out pretty freely and market is steady at 33c per gallon.

Stoves Holding; Wares Active

Toronto.

STOVES, WARES.—The market on stoves and ranges remains without change and whereas business offering just as present is not large manufacturers generally are satisfied with the outlook. Activity is noted in gas, electric and coal oil stoves and a very nice volume of orders is being shipped out.

Manufacturers of enamelware, tinware and kindred lines report business as quite brisk and the markets rule with a firm undertone. Some minor revisions upward are reported and situation generally is considered one of strength.

Iron and Steel Bars Moving Better

Toronto.

IRON AND STEEL.—There is a little better movement of iron and steel bars reported but trade is not large by any means. Dealers seem to be buying from hand to mouth but the fact that repeat orders are coming in would indicate there is a fair consuming demand which may develop into bigger business at a little later date. Quotations are unchanged at following figures:

Common bar iron	$4 75	$5 00
Common bar steel	5 00	5 25
Refined iron	5 15	5 40
Angle base	5 25	5 50
Horseshoe iron	5 00	5 25
Tire steel	5 15	5 40
Mild steel	5 00	5 25
Norway iron	11 00	13 00
Toe caulk steel	5 90	6 15
Sleigh shoe steel	5 00	5 25
Band steel, No. 10	5 25	5 50
Do., No. 12	5 50	5 75
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Better Feeling In Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—Generally the feeling is better in regard to corrugated sheets and other lines of manufactured sheet metals. This is not shown in a great increase in actual business but there is more inquiry and indications point to real orders developing at a little later date. It is still too early to expect a big movement of this class of goods.

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Galvanized Sheets Decline 25 Cents

Toronto.

SHEETS, PLATES.—A decline of 25c per 100 pounds has been made in some quarters on galvanized sheets bringing the base on 10¾ oz. to $8.25. There seems to be a desire on the part of the mills to get as close as possible to the point where buyers will confidently come into the market, knowing that they are safe in making extensive purchases. The only danger is that the reduction may not be made in such a manner as to preclude the danger of price-cutting campaign. Were this to start it might be difficult to put a peg in and stop the movement, and prices might easily be flattened to below costs. The general belief is that a new schedule will become operative about the first of April, and the trade generally will be glad to witness a return to a basis where they can get out after business without the possibility of having their feet cut out from under them. Quotations being named to the trade follow:

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 50	$6 00
12 gauge	5 55	6 05
14 gauge	5 60	6 10
16 gauge	5 70	6 20
18-20 gauge	....	6 30
22-24 gauge	....	6 35
26 gauge	....	6 40
28 gauge	....	6 50
3-16 inch plate	....	5 75
¼-inch boiler plate	....	5 50

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$8 25	$8 50
U.S. 28	7 95	8 20
U.S. 26	7 65	7 90
22 and 24	7 50	7 75
18 and 20	7 35	7 60
16	7 20	7 45

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Wrought Pipe Holds; Tubes Unchanged

Toronto.

WROUGHT PIPE, BOILER TUBES.—There is little change in the situation as it affects wrought pipe. What may develop as a result of the present conference of steel men in the United States seems just a little uncertain but best informed men in the trade look for reductions in steel and iron prices by April 1 and that pipe may fall in line seems quite probable. Prices for the week hold at figures shown in current market quotations.

Boiler tubes are unchanged at recent declines and in these as other lines, the waiting attitude is more or less apparent. There is some business being done and outlook considered satisfactory.

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1 inch	$28 00	$.....
1¼ inch	32 00	.....
1½ inch	35 00	28 00
1¾ inch	35 00	28 00
2 inch	40 00	28 00
2¼ inch	43 00	30 00
2½ inch	45 00	35 00
3 inch	52 00	40 00
3¼ inch	.....	47 00
3½ inch	62 00	48 00
4 inch	70 00	60 00

Firmer Feeling in Lead Products, Solder

Toronto.

LEAD AND ZINC PRODUCTS.—The market on manufactured lead products is showing some strength, the metal being on a slightly higher basis and the downward trend seems to have been halted for a while at least. Solder is steady and with tin tending towards higher levels and lead firmer, the market is ruling with a strong undertone. The range of quotations being named to the trade is as follows:

Lead pipe, lb.	....	$0 12
Lead waste pipe, lb.	....	0 13
Lead traps and bends	....	Net list
Lead wool, lb.	..	0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	$0 35	$0 37
Solder, strictly, lb.	0 33	0 37
Solder, commercial, lb.	0 30	0 36
Solder, wiping, lb.	0 29½	0 32½
Solder, wire, lb.	0 40	0 45½
Zinc sheets, per lb.	....	0 20

Lower Levels on Old Materials

Toronto.

OLD MATERIALS. — Lower levels have again been reached on old materials this week and dealers report business absolutely stagnant. Commenting on the situation as it exists to-day, one of the largest factors in the business said: "It is hard to believe that prices can go on down to a lower level than they are at present. A great deal rests, as far as red and yellow metals are concerned, on what the United States and Dominion Governments intend to do with the scrap metal they have in their hands at present. There are millions of tons of this material, and the manner in which it is going to be disposed of will make a great deal of difference as to the future of the scrap metal markets. If the policy adopted is simply to throw this material on the market, why it means that the situation will be glutted, and prices may stop hardly short of nothing at all. If, on the other hand, they decide to control the release of this scrap, and allow it to come out in quantities that can be readily absorbed in the trade, then matters may be much better and a gradual recovery would be looked for by the trade. Much the same condition prevails in the other lines of machine shop scrap, and the Government can do much one way or the other to stabilize the market for this material. Until these points are decided it is hard to see how there can be anything approaching a betterment in the conditions of trade."

Dealers brought down the prices on all grades of coppers again this week, crucible, heavy and wire now being placed where dealers offer only 12¾c per pound for them. Brass cuttings and turnings, both red and yellow, are also down considerably. Perhaps the most noteworthy drop is in heavy melting steel, which sank to-day to the low quotation for Toronto yards of $9 per ton, while boiler plate comes down to $8. There is certainly nothing in any of these quotations to tempt holders disposing of their material, and dealers claim they do not want to take on anything for fear of still lower levels.

Dealers' Buying Prices—

Ingot Metals Show Little Change

Toronto.

INGOT METALS.—There is a better feeling in the metal markets generally. Copper seems to have reached bottom and tin is enjoying quite a good deal of activity. Lead is on a firmer basis, with spelter unchanged. Business seems to be on an improved basis.

COPPER.—Local trade is not large but the feeling prevails that the bottom of the market has been reached and reports indicate a much greater feeling of optimism on the part of the producers. Quotations here remain around 20c per pound with quiet conditions prevailing.

TIN.—There is a very fair demand and the market has firmed up although quotations are unchanged for the week at around 60c per pound. Supplies seem to be very fair and outlook considered much better.

SPELTER.—The market is quiet and there is little of great interest to the trade. Buying is within rather a narrow compass and supplies ample. Quotations locally are being made at 8½c per pound.

LEAD.—The market is holding steady and with a firm undertone. The tone of the market is quiet and there is still evident the improvement in feeling by leading interests. Prices hold around 7½c per pound.

ALUMINUM.—Conditions are quiet, the open market conditions exercising no great influence on the situation in this metal. Price ranges around 50c per pound with lower figures probable for actual orders.

ANTIMONY.—The market continues one of a routine nature with quotations holding around 8½c per pound and little business offering.

LONDON MARKETS

LONDON, March 13.—Higher prices have been named this week on corn planters, post-hole augers and one line of boxwood rules, while new quotations now available on snow shovels show a decline of about 20%. A revision downward in tin and galvanized wash boilers has been made.

With the approach of spring business in the hardware stores is increasing in volume. The prospects in this district are good for big spring and summer trade.

Post Hole Augers Make Advance

London, Ont.

POST HOLE AUGERS.—Revisions in the prices of the Digwell post hole augers have been made, and the new quotations being named to the trade show an advance over former figures. The 8-inch is now quoted at $23.00 per dozen, and the 9-inch at $23.50 per dozen.

Wash Boilers Revised Downward

London, Ont.

WASH BOILERS.—Quotations on tin and galvanized wash boilers have been lowered this week, the present prices being given as follows:

Tin wash boilers, with flat or pit copper bottom, No. 8IC, $1.82 each; No. 8IX, $2.08; No. 9IC, $2.01; No. 9IX, $2.34.

Tin wash boilers, with flat tin bottom, No. 800LC, $1.00 each; No. 900IC, $1.15 each.

Galvanized wash boilers: No. 8, $1.17 each; No. 9, $1.35 each.

Boxwood Rules Show Advance

London, Ont.

BOXWOOD RULES.—An advance in at least one number of Stanley boxwood rules has been made this week, the No. 61 being revised upward to sell at $3.00 per dozen.

Dairy Supplies of More Interest

London, Ont.

DAIRY SUPPLIES.—More buying interest is being shown in some lines of dairy supplies, a fair movement of churns and butter workers being in evidence. Prices are holding steadily without change, some of the more familiar lines being quoted as follows:

Daisy or Favorite Barrel Churns—No. 0, $7.20 each; No. 1, $7.20; No. 2, $8.00; No. 3, $8.80; No. 4, $10.40; No. 5, $12.80.

Dazey Glass Churns—No. 30, $20.75 doz.; No. 40, $27.00 doz.

Dazey Metal Churns—No. 200, $3.65 each; No. 400, $5.75; No. 600, $6.85; No. 1000, $11.50.

Ash Dash Churns—5 gal., $23.00 doz.; 7 gal., $24.25; 10 gal., $27.50.

Butter Workers—No. 0 x 15-lb. capacity, $3.85 each; No. 1 x 25-lb., $4.60; No. 2 x 40-lb., $5.50; No. 3, 3 x 60-lb., $7.90.

Lower Prices on Snow Shovels

London, Ont.

SNOW SHOVELS.—New prices issued on snow shovels provide for a decline of about 20 per cent. from figures formerly ruling. The quotations given herewith are figured at a discount of 12½ per cent. off list:

Prince or No. 20, $7.88 doz.; Queen or No. 30, $8.75 doz.; King or No. 40, $10.50 doz.; Moose or No. 50, $13.13 doz.

Furnace scoops, long or D handle, $8.75 doz.

Good Sales of Washing Machines

London, Ont.

WASHING MACHINES.—A splendid sale of washing machines continues to manifest itself, and dealers are well satisfied with business being handled. Quotations are firm and unchanged, net prices on a few lines being shown herewith: Dowswell, $6.30 each; Hamilton, $7.56; Patriot, $11.97; Canada First, $11.97; Beaver, $13.86; New Era, $11.34; New Century Junior, $11.34; Ideal Water Power, $17.64; Perfection Electric, $71.51.

Corn Planters Up; Wheel Barrows Hold

London, Ont.

CORN PLANTERS, WHEEL BARROWS.—Higher prices have been named this week on corn planters, King of the Field being quoted at $11.75 per dozen, and King of the Field with pumpkin seed attachment, $15.50 per dozen.

Wheelbarrows are enjoying a very fair sale, and no change in prices is shown in figures reproduced herewith: Garden City, $3.90 each; No. 1 Loose Side Garden, $4.95 each; No. 2 Farm Barrow, solid sides, $4.65 each.

Horse Clippers, Wire Stretchers Selling

London, Ont.

HORSE CLIPPERS, WIRE STRETCHERS.—Activity is pronounced in sales of horse clippers now and the power machines are going forward in good numbers. Quotations hold steadily, the Stewart power clipper No. 1 being invoiced at $9.75 each, and sheep shearer attachment for same going out at $9.00 each.

Wire stretchers are also moving out to the trade now with prices unchanged, the Townsend being quoted at $13.50 doz.; London or Detroit at $1.55 per pair; and McClaskey Grips at 75c each.

Rope Firm; Nails Unchanged

London, Ont.

ROPE, NAILS.—The market is firm and unchanged on rope with some fair-sized orders being shipped out. Quotations to the trade to-day are: Pure manila, 37½c per lb., base; British manila, 33c; New Zealand hemp, 33c; sisal, 27½c.

No further change is shown in nails and business is still confined to small lots. Wire nails are quoted at $4.95 per 100 pounds base and cut nails at $5.35.

Alabastine Moving; Putty Unchanged

London, Ont.

ALABASTINE, PUTTY.—Sales of alabastine are improving with the ap-

proach of Spring along with other Spring cleaning lines. Prices hold without change: White and colors, in 5 lb. pkgs., selling at 14c per lb., less 40 per cent., and in 2½ lb. pkgs. add 50c net per 100 lbs. to the former figure.

Putty is held without change this week, with sales along rather narrow lines; figures quoted to the trade are: Standard, 100 lb. drums, $6.75 per 100 pounds; in 25 lb. drums, $7.00; pure, in 100 lb. drums, $8.75; in 25 lb. drums, $9.00.

Linseed Oil Higher; Turpentine Down

London, Ont.

LINSEED OIL, TURPENTINE.—The flaxseed market seems to have steadied down somewhat and the change in quotations for the week shows only a small advance. Prices on linseed oil have advanced 2c above basis of one week ago, as shown below.

Turpentine is quoted at slightly lower levels, though markets in the South seem quite firm and a fairly active business being done. Quotations locally are made at figures herewith:

Linseed Oil—	Raw	Boiled
1 to 2 bbls., per gal.	$1 67	$1 70
3 to 5 bbls., per gal.	1 66	1 69
6 to 9 bbls., per gal.	1 64	1 67
Less bbls., add 10 cents gallon.		

Turpentine—	Imp. gal.
1 bbl. lots	$1 03
2 to 4 bbls.	1 02
5 gal.	1 13

WINNIPEG MARKETS

WINNIPEG, March 13.—Price changes during the week are again fairly numerous. Declines predominate and include such lines as pig lead, sheet zinc, bull rings, copper and coppered iron rivets, section rivets, carriage rivets, wagon box rivets, tinners' rivets and soldering coppers. The lines advancing include pliers, punches, dividers, pipe stocks and dies, safety tackle blocks, and wood alcohol.

Business in general is reported as favorable, although a little lighter than last year, no doubt due to the holding back of orders in anticipation of price declines. Fall bookings are reported as very good, and dealers expect a good year.

Pliers, Punches Go Up 10 Per Cent.

Winnipeg.

PLIERS, PUNCHES.—Recent prices received from manufacturers of Lodi pliers and punches and Bernard pliers again show an increase of approximately 10 per cent. over former quotations, due, it is indicated, to increased costs of production. New prices now effective are given herewith:

Lodi Pliers—No. 300 x 4-in., $1.10; 5-in., $1.65; 6-in., $2.20 doz. No. 301 x 4-in., $1.10; 5-in., $1.65; 6-in., $2.20 doz. No. 302 x 5-in., $2.20; 6-in., $3.30; 7-in., $4.40 doz.

Bernard Pliers—No. 102 x 4½-in., $18.40; 5½-in., $23.20; 6½-in., $28.00 doz.

Lodi Punches—No. 250, $4.15; No. 260, $5.25 doz.

Lodi Dividers—No. 60 x 6-in., $4.15; 8-in., $5.65; 10-in., $7.50 doz.

Pig Lead Registers Decline

Winnipeg.

PIG LEAD.—Prices on pig lead again show a further reduction on the local market during the week, falling away from 2 to 2½c with only a very limited demand, prices ruling to-day being $8.00 per 100 lbs.

Sheet Zinc Down 5c Pound

Winnipeg.

SHEET ZINC.—Sheet zinc prices which have held firm at 30c lb. for the duration of the war, have dropped to lower levels during the week, showing a reduction of 5c lb. with the probability of still lower prices. To-day's market is 25c per lb.

Bull Rings Down Substantially

Winnipeg.

BULL RINGS.—Due to the drop in the market price of the raw material, new prices have been named on bull rings, which show a substantial reduction. These are now selling on the following basis: Copper, No. 21 x 2½ inch, $3.10; No. 22 x 3 inch, $3.40; copper, self-piercing No. 31, $3.60 dozen; aluminum, No. 61, $2.75 dozen.

Pipe Stocks and Dies Move Higher

Winnipeg.

PIPE STOCKS AND DIES.—Based on prices just received from manufacturers of solid pipe stocks and dies, a slight revision has been found necessary, new prices being from 2½ to 5 per cent. above former quotations. To-day's resale prices are as follows: Solid pipe stocks and dies: No. 0, $6.25; No. 1, $8.20; No. 1½. $7.50; No. 1¾, $7.50; No. 2, $11.40 each.

Safety Tackle Blocks Up 5 to 20 Per Cent.

Winnipeg.

SAFETY TACKLE BLOCKS.—Star safety tackle blocks have been revised to higher levels, based on new shipments received from manufacturers showing advances of from 5 to 20 per cent. on the different sizes. This is due, it is said, to higher costs of production. These are now selling to the trade at the following figures: No. 1, $2.25; No. 2, $3.60; No. 3, $6.50; No. 4, $9.55 set.

Copper, Iron Rivets Revised Downward

Winnipeg.

COPPER, IRON RIVETS.—As predicted in last week's issue of HARDWARE AND METAL, a reduction is recorded during the week on copper and iron rivets of all kinds, following a reduction by the manufacturers of approximately 20 per cent. The lines changed include carriage, wagon box, hame, section, and tinners' rivets. To-day's market prices are given below:

	No. 8	No. 10	No. 12
Copper rivets and burrs, ass't'd, lb.	67c	72c	76c
Copper rivets only, lb.	60c	65c	69c
Copper burrs only, lb.	60c	65c	69c

Coppered iron rivets and burrs 30% off list.

	⅜ inch	½ & ⅝ inch	¾ & ⅞ inch	1 in. & over
Carriage rivets				
No. 6, lb.	17c	16c	15c	15c
No. 3, lb.	...	15c	14½c	14c
No. 0, lb.	...	15c	14½c	14c
Section rivets—				
No. 6, lb.	18c	16c	15½c	15c
Wagon box rivets—				
No. 6, lb.	...	...	...	15c
No. 3, lb.	...	...	...	14c
No. 1, lb.	...	...	...	14c

Tinners' Rivets.—Black, 8 oz., 15½c; 10 oz., 17c; 12 oz., 18c; 14 oz., 20c; 1 lb., 20½c; 1¼ lb., 22½c; 1½ lb., 26c; 1¾ lb., 29c; 2 lb., 31c; 2½ lb., 39c; 3 lb., 43c; 3½ lb., 50c; 4 lb., 55c; 5 lb., 70c; 6 lb., 78c; 7 lb., 92c; 8 lb., $1.05 per M.

Tinned—8 oz., 22c; 10 oz., 25c; 12 oz., 27c; 14 oz., 30c; 1 lb., 33c; 1¼ lb., 38c; 1½ lb., 45c; 1¾ lb., 50c; 2 lb., 55c; 2½ lb., 70c; 3 lb., 80c; 3½ lb., 94c; 4 lb., $1.05; 5 lb., $1.31; 6 lb., $1.50; 7 lb., $1.80; 8 lb., $2.03 per M.

Soldering Coppers Decline 6c Pound

Winnipeg.

SOLDERING COPPERS.—The recent decline in the copper market is responsible for a further drop in the price of soldering coppers which have shown a steady decline for the past few weeks, the reduction this week being 6c per pound, making to-day's ruling prices as follows: ¾ lb. per pair, 55c; 1 lb., 54c; 1½ lb., 51c; 2 lb., 50c; 2½ lb., 49c; 3 lb., and over, 48c per pound.

Wood Alcohol Records Advance

Winnipeg.

WOOD ALCOHOL.—Prices on wood alcohol, which have remained firm for some time past, show a slight advance during the week, being quoted to-day at $2.25 per gallon in 1 and 5 gallon cans, plus the usual charge for containers.

Turpentine Holds; Linseed Oil Firm

Winnipeg.

TURPENTINE, LINSEED OIL.—Turpentine prices show no change during the week, holding firm at former levels, with the usual spring demand. Stocks are reported as moderate. To-day's prices are as follows: Barrel lots, $1.25 gal.; ½ barrels, $1.28 gal.; 5 gal. lots, $1.30 gal.; 1 gal. lots, $1.30 gal.; plus the usual extras for containers.

Linseed oil prices are reported firm during the week, no change being recorded over previous quotations, which are confirmed as follows: Raw linseed oil, $1.80 gal.; boiled linseed oil, $1.83 gal., in single barrel lots.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Mar. 13.—One of the most important events in the year's iron and steel market history occurred last Thursday, in New York, when at a meeting of 130 representatives of the industry it was unanimously decided to co-operate with the Government in its efforts to bring about lower prices for all commodities, particularly building material, in order to bring about industrial activity and facilitate the transition from war time to peace time conditions.

High Operating Rate

The steel industry did not need to reduce its prices at once for the sake of inducing a higher operating rate, for as a matter of fact its operations have been at a high rate. This is a fact that has not been generally apprehended. Apparently the majority of those who have commented upon iron and steel trade conditions have depended upon theory and not upon observation of the pertinent facts. They have observed an extremely dull, even a stagnant, market for steel products and hence have concluded that necessarily the steel mills have been operating at a very low rate, but that is not true. Undoubtedly the real fact is very difficult, if not impossible, of explanation, but that is no good reason for ignoring it. During February there were many trade reports published suggesting that the steel industry was operating at about 60 per cent. of capacity, or even less. Trade reports that sought actual facts, even if the facts did not seem to accord with observed market conditions, contended that the mills were operating at not less than 75 per cent. of capacity. Those who wrote such facts knew that in a short time the official figures, absolutely incontrovertible, would prove that they were correct. This proof has now come. The American Iron and Steel Institute's monthly report of steel ingot production is now out, covering the month of February. It shows that 29 companies, which in 1917 made 85.1 per cent. of the country's total steel ingot production, produced 2,688,011 gross tons of ingots in the month. Allowing for the number of working days in the month and year, and for the output of companies not reporting, this shows a rate of production during February of 40,930,000 tons a year. Capacity is known to be about 49,000,000 tons, so that in February the mills operated at nearly 84 per cent. of capacity. The January report showed a rate of 85 per cent. The highest rate ever attained was 95 per cent. , last September. The largest production in a calendar year was 43,619,200 tons, in 1917. The highest production before the war was 30,284,682 tons, in 1912, while the highest rate of production attained, for only a short time, was about 35,000,000 tons, in the spring of 1913.

These figures, of course, are absolutely trustworthy. They show that in February steel production in the United States was more than 15 per cent. in excess of the highest rate attained before the war. With business throughout the country so very dull, with only a few exceptions, it is impossible to explain this showing, but the fact is there just the same. Possibly the ordinary every-day needs of the country have so grown that they absorb much more steel than formerly, without making a showing of there being much demand. Then there is a good bit of Government work still in progress, while furthermore a little steel, but not a great deal, is going into stocks of producers. The last named item, however, can account for only a few per cent. of the current output, certainly not 10 per cent.

Thus the steel industry has not been in bad shape by any means, but undoubtedly it would get in bad shape in the near future, within a period of a few weeks perhaps, if something did not occur to stimulate demand.

Lower Prices Coming

While various pig iron and steel producers have made some show of not being favorable to Secretary Redfield's proposal that lower prices be arranged there is no doubt whatever that they have been greatly in favor of the project, if it could be carried through in an equitable manner. The producers knew that lower prices would be desirable, in the long run, but they have no means of regulating a decline and if they failed to adhere to regular quotations, slightly reduced as they were last December from the Government limits, there might be a wide open market with prices below cost of production and an absolute destruction of confidence on the part of buyers. Hence moderate reduction under official sanction, to prices openly stated and capable therefore of being adhered to, would prove a great benefit.

At last Thursday's meeting a committee was appointed, its personnel representing all branches of the trade, Lake Superior iron ore, pig iron, unfinished steel and finished steel products. This committee will confer with Secretary Redfield's board, which is called the Industrial Board of the Department of Commerce. George N. Peek is chairman of this board, and the producers find that he is a business man with broad judgment. Mr. Peek gives assurance that the steel industry will not, to employ popular parlance, be made "a goat" but that reductions will be sought on all building materials. The steel producers recognize that their customers buy other things than steel, and if the other things do not come down buying and construction work in general will not be materially stimulated, even if steel prices do come down, hence they want all prices to come down.

The matter of wages will probably be involved.

Iron and steel producers will probably propose such reductions that obviously wages ought to come down a trifle in keeping. The American Federation of Labor was offered representation on Mr. Peek's committee, but refused.

The negotiations will probably occupy considerable time, and it may be close to April 1 before the reduced prices are announced and put into effect. A rough guess would be that prices will not be higher than as follows: Pig iron, $25; billets, $35; merchant steel bars, 2.00c; black sheets, 4.20c; nails, $3.00.

While in the main the steel producers are disposed to adhere strictly to recognized market prices until there is an orderly readjustment, some of the merchant furnaces have been weakening, in recognition of the fact that buyers will not take hold at present prices, and some markets are now quotably lower. The southern furnaces, which had a $34, Birmingham, Government price, were rather slow to make the $3 reduction recommended in December, and which the northern furnaces adopted January 1, but they did come down to $31 eventually. In the past week the deadlock was broken by a sale of 500 tons for March delivery to the Standard Sanitary Company at Louisville, Ky., at $28.25, Birmingham, but this price is not low enough to be competitive with northern iron in general. Before the war Birmingham prices were $3 to $4 a ton below prices at northern furnaces. At least two Eastern Pennsylvania furnaces have started quoting on the basis of f.o.b. furnace, instead of f.o.b. Pittsburgh, as the Government regulations effective October 1, 1918, permitted them to do. This makes a reduction of perhaps two dollars per ton. Finally, two or three of the valley furnaces have broken loose on foundry iron and have quoted $28 or less at furnace, against the recognized quotation of $31.

SAYS VETERANS MAKING GOOD

Four hundred veterans who were placed in the plant of the Goodyear Tire Company, are making good at the work, according to statements made by the firm to officials of the Service Branch of the Department of Soldiers' Civil Re-establishment.

At the annual meeting of the National Portland Cement Co., of Durham, Ont., R. H. McWilliams of Owen Sound, was appointed manager.

Advertising With What You Have

Greatest Problem of Many Dealers is Not to Overlook the Simple Methods Right at Hand That Will Produce Business, if Applied—Maybe the Idea You Are Seeking is so Close You Don't See It

ARE you using what you have, to get what you want in more paint business?

As one paint dealer has put it—"My biggest job is not trying to devise some new-fangled, complex, Philadelphia lawyer scheme for getting business. It is trying not to overlook some simple little method any kid might think of, and then doing it after I have found it out."

Another paint man, after trying out many advertising methods, sums up his experience by saying:—"Trouble is, with too many of us, we keep getting in over our heads with schemes that bring us in a dollar and cost us two to operate. We overlook the schemes that cost us little or nothing, and bring us in the two dollars, because they lack the novelty, complexity or glamor we think they ought to have. The less complex and the more obvious a method is, the more likely we are to discard it."

By Simple Means

Charles Schwab, the American Steel Magnate, has pointed out, that with few exceptions, the greatest results in business or other forms of economical service to humanity are usually attained by simple means and the exercise of the most ordinary qualities.

By utilizing the simple things of everyday business, and that are a necessary routine of a store's operations, paint advertising and paint sales may be promoted with the most inexpensive means, and at practically no cost for distribution.

A prominent business man who started life as a clerk attributes his success to the habit of turning to advantage the most obvious and simple opportunities that came before him day by day. He denuded his mind of any such hallucinations as luck, good fortune or any idea that success could be obtained only by deep, mysterious or round-about methods; his methods were simple, and straightforward, and were based on the little, obvious circumstances that others entirely overlooked.

His Proposition

A young paint traveller was presenting the newspaper advertising campaign, prepared by his firm, to a retail paint man who had been many times through the mill. A very elaborate set of electrotypes was presented in a neat brochure, showing what this particular firm intended doing in general magazine and newspaper advertising.

Said the dealer—"Would your firm be willing to print these over my name, each on a separate dodger? It doesn't have to be expensive paper. Just make them up the same as handbills."

"What is the idea?" asked the salesman.

"On a Saturday morning, I'll send one of the boys over to the market with a bunch of those bills, and have him drop one in every market basket and farmer's rig on the market. If you're here on the Saturday I distribute them, you'll be surprised how many of those bills will wander back in here before the day is over."

Simple! Yes. Obvious! Yes. An inexpensive paint advertising method, in which distribution was certain and cheap, with quick and direct returns.

Catches the People

Such distribution catches the townspeople when they are in a spending mood. It catches the farmers likewise, and when they are gathering money into their pockets to spend.

That paint salesman learned a valuable advertising lesson for his customers situated in market towns.

Another example of an obvious opportunity:—How many parcels of all kinds are carried out of your store daily? Would it be any extra burden on your customer if you enclosed a handbill or paint color card? Not that they would notice! How many parcels are delivered on your truck daily? Wouldn't it do more good than harm to make some enclosures of paint advertising. It would not cost a cent for distribution by this means.

It may not seem logical at first, but we'll ask some further questions in this connection. How many paint color cards, or how much literature regarding paint are there resting unused and forgotten in some hole or corner of your store? Are these doing any good, with their lights hidden under a bushel in this manner?

Send it Out

Now parcels must go out of your store, and paint literature is of no use packed away in limbo. Why not dig up the latter, and let the former carry them forth into the homes of your trade to start thoughts of painting? A very complex scheme! Very!—Yet, there are millions of parcels being carried forth daily, utilizing energy which would feel no extra strain if an enclosure were made. And it is a safe bet that there are tons of paint literature resting in the dark holes of oblivion that might be dis-

The Best Wall Finish!

There are so many strong factors which make sales for "Muresco" that dealers have come to recognize it as the **"Best Wall Finish"** to sell.

One factor that goes far toward making sales is "its ease of application." Once you convince your customer that **"Muresco"** is easy to apply and easy to renew, a sale invariably results.

Next come beauty and sanitation. The "Muresco" tint card with samples of the sixteen delicate tints is evidence of beauty and the customer immediately appreciates the advantage of clean tinted, sanitary, plaster walls.

Also the "Directions for Use" on the "Muresco" carton which show how easy it is to mix and apply are factors worth laying stress upon.

You can sell your customers no better Wall Finish than **"Muresco."** Write to-day for our attractive agency proposition.

BENJAMIN MOORE & CO., LIMITED

WEST TORONTO :-: ONTARIO

tributed helpfully by utilizing this energy.

For centuries the waters of Niagara tumbled down the great chasm unharnessed and unused, with boundless energy going to waste, till someone diverted only a small portion of this inexhaustible power, contributing to the wealth and comfort of the people of Ontario.

Use Your Wagon

Take the energy of your delivery wagon or truck. There are two sides to a delivery truck; one side or the other is constantly facing passersby on one side or the other of the street; and a delivery truck goes into pretty nearly every hole and corner of the town. Many dealers are experiencing the pride of having their firm name nicely embellished on a brass plate on the sides of their trucks—but Jake Saunders got business by harnessing up the truck's potential advertising value. Jake had two metal frames made, each of which would hold a large white card. These were left open at the top so that the cards could be inserted or taken out at will. He fastened these frames, one on each side of his truck. If he had a specialty in his store to announce, it was done on these cards. Special sales were brought to the attention of the town in the same manner. Without any trouble he could change these cards at will, daily, weekly, or as circumstances required. Commencing in March he used them for paint advertising; he made use of such slogans as were connected with his brand of paint or he devised simple sentences that led passersby to thinking of paint.

Often Neglected

Some of these suggestions may seem so simple as to appear ridiculous. The real absurdity rests in the fact that they are so often neglected when they might so easily be adopted.

Clever complex advertising stunts too frequently shoot wide of the mark, or over the heads of the trade. What advertising ought to do is interest and educate buyers and possible buyers in one-syllable words and ideas. When it awes or mystifies or gets beyond the depth of average understanding, trade tends to fight shy of the goods advertised.

The continual driving home of a single, simple idea or advertising sentence, oftentimes produces results far more effectively than elaborate detail or description. Drop a cannon cracker beside the average run of men, and they give one jump and it's over. But there is nothing that gets a man's goat worse than a continual rattle on the back axle of his flivver.

Got Them Going

Jim Hill, of the Hill Hardware Company, roused the buying nerves of his trade by the continued repetition of these two sentences "Paint for Protection" and "Paint Your Barn." He began machine-gunning his trade with these two paint selling bullets early in March and kept it up all season. These two sentences received constant repetition in all of his local newspaper advertising; every parcel that went out of the store was ticketed with small tags bearing their counsel. Rubber stamps were made up with this double-barrelled advice, and their imprint was placed on envelopes, statements and the advertising of other goods. Price tags with one of these sentences on the front, and the other on the back, were used to mark goods in the store. One couldn't turn around in the Hill store without facing these two simple paint commands. Wherever a piece of Mill Merchandise went it bore these paint reminders. They became a by-word in the community, just as the old patent medicine slogan "Take a Hutch" of a few years ago became a slang phrase of everyday usage. The continual rat-a-tat-tat dinned into the ears and eyes of Hill's customers produced more paint business than he had ever experienced before.

Brought Results

It was about all Hill had to say in his advertising that year about his paint, but it brought results. Like the proverbial drop of water on the eternal stone, constant repeating wore the necessary impression on his trade.

Rightly applied, and applied often enough, simplicity in advertising is vastly more effective than a ponderous single explosion of complexity. This simplicity may be found in some obvious circumstance that has been overlooked for years. It may be found by

The Brush Department

Brush Department Offers Opportunity For Satisfactory Profits

Get a Good Stock, Let People Know You Have it, and Then Cash in—Painters' Brushes Best Displayed on Panels

"CLEANLINESS is next to Godliness" is a well-known adage, and the hardware man can be of distinct service to his community, to this desirable end, by making his brush department one of lively interest, for the mission of the brush is none other than clean up and brighten up. In addition to serving his community in an effective manner, the dealer himself incidentally profits to no mean extent, for few lines handled by the hardware trade offer the opportunities for such satisfactory profit and ready sales as brushes.

To sell brushes extensively, the first requirement is to have them to sell, not necessarily a large stock, but a comprehensive selection, as there are now brushes made for so many labor saving and useful purposes that a virgin field full of sales possibilities is opened When your stock is assorted and complete, the plan dealers who get big results from their brush department follow is to have them on display.

Painters' brushes are best shown on neat panels made of beaver board, finished in a suitable color, or by covering boards about 4 ft. x 2 ft. 6 in. with green baize which makes a very effective background. The best way to fasten them is by inserting a small brass screw eye into the end of the handle, and suspending this on a screw hook on the board. By this method the customer can then have the brush taken off and handle it. Do not sell the sample, but take the brush from stock.

Dealers who follow this plan do the most business and surprising results have been obtained. But in addition to the increased sales, which this plan absolutely assures, the system of having one kind of each paint, varnish and kalsomine brush displayed on distinct separate panels, enables the dealer to show the customer his full line in a minimum of time and labor necessary to take the boxes off the shelves, open them up and vice versa. To sell the better grades should always be the dealer's aim, and for his sale and his profit is then not only greater, but absolute satisfaction is guaranteed his customer. Under the old system of selling from the boxes, in busy periods, the salesman is apt to show but one or two kinds, probably the cheaper ones, and hence the sale is less, the profit is less, and quite possibly the customer has left with a brush that would not answer his purpose so well as a better brush would have done, and as every dealer knows satisfaction is what brings their customer back, and hence the importance of this point.

Says Paint Sales Show a Steady Improvement

Charles Hickman of the Ottawa Paint Works, Ottawa and Toronto, Ont., interviewed by HARDWARE AND METAL states that business is very satisfactory. "Our record on sales for November, December and January was a pronounced improvement over the same months last year," stated Mr. Hickman. "There is now some backwardness on the part of retailers in buying, though they are not cutting it off altogether; but they are buying only to take care of their spring business. There is a little feeling of timidity, particularly on the part of those carrying big stocks. Before the armistice was announced, there was a tendency to buy in some cases double of their actual requirements, owing to the apparent upward trend of the markets; but such conditions were not normal. The feeling was apt to spread. For example, if I went to the manufacturer from whom I get my cans and asked for them ahead, he may have been affected by that to buy ahead in turn. There has been some reckless buying, but the majority of dealers have been pretty careful. We have had to protect ourselves mostly on raw material coming from the Orient and Europe.

We have been obliged to use certain raw materials from necessity which we would not use from choice; such as American ochre, for example. We always have to compensate for this so as to maintain the quality of our paint.

We shall be glad to have access to our old supplies of raw materials again. There is no whiting in the world to take the place of the English whiting, for example—it comes from the chalk cliffs of Old England. We had to import American whiting during the war, but it is very inferior; and I am glad to say the English product is again coming forward in fair quantities.

As to export business, the paint manufacturers are acting wisely, I think, in sending a man across to look the field over and study conditions. If it is worth while, we will send special representatives over."

(Continued from previous page)

harnessing up forces for advertising use that have been running loose and unutilized day after day. It may simply lay in repetition. Their effectiveness depends on how the merchant grabs them up and puts them into service.

We might go on to no end picking out the little things that could be used to advertising advantage. There are hundreds of these happening daily in the hardware and paint stores of the country, which the writer could not hope to cite in this article. It's up to the individual merchant to pick them out for himself and use them to his own advantage as circumstances prescribe.

Some day when you are wrinkling up the worry bumps under your hat—stop short—and see if the idea you are looking for isn't under your feet—amongst the little things that you have been overlooking.

TELLS OF VARNISH MANUFACTURE

At the Canadian Railway Club's monthly meeting in Montreal this week, held at the Windsor Hotel, Norman Holland, president of the Holland Varnish Company, Ltd., gave a comprehensive address on varnishes and varnish making from its earliest history down to the present. The address was interestingly illustrated by over 150 slides and a large number listened with interest to the speaker, Mr. Holland having been in the manufacturing end of varnish making for many years. Particular reference was made to some of the difficulties of procuring materials, and of the high cost of basic raw supplies, some of which had increased enormously, and few, if any, of which have yet been reduced.

Chinese Dominating Market For Bristles

China at the present time is supplying a very large percentage of the bristles used by the world's brush manufacturers. Pigs are raised everywhere in the celestial kingdom and because the Chinese do not like young pork the hogs have a chance to grow and develop bristles that are much in demand. The bristle exports now total 4,000 tons a year valued at about $6,000,000.

Bristles that are long, thick, stiff, bright, wiry and clean command the best prices. The white are preferred. Each hog yields about 1 1-3 pounds of bristles. The yield of each hog is tied in a bundle placed in water for a few days, then scraped off, combed to remove impurities, sun dried, steamed, and then sorted into bundles about 1½ inches in diameter, with bristles of uniform length. Most of the work of cleaning and tying the bristles is done by women, who receive about 5 or 6 cents a day. Buyers are very particular about the bristles being well cleaned, of uniform length and color, and the bundles solid. This is apparent when it is considered that prices vary from 20 taels to 300 taels per picul (133 1-3 pounds) depending on the assortments. The collecting season is from November to April, as bristles are soft and useless for the trade during the hot months. This accounts for the fact that the main producing and shipping centres are north of the Yangtze. For export the bristles are packed in boxes containing 1 picul to a box. The ports from which they are shipped are, in the order of their importance, Tientsin, Chungking and Hankow. Manchuria and Shantung are increasing in importance in this trade. Most of the bristles are shipped to the United States, Great Britain and France.

BENJ. MOORE & CO. WIN AN INTERESTING CASE

Former Director-General of Railroads McAdoo had no power to issue an order against the institution of lawsuits against railway companies contrary to the code provision regulating such matters in New York State, is the ruling of Judge Benedict, in the Supreme Court in Brooklyn.

The case was that of Benjamin Moore & Co., incorporated in New Jersey and doing business in New York, against the Atchison, Topeka & Santa Fe Railway, a Kansas corporation, asking restitution for loss of oil in transit over the lines of the defendent from San Francisco to Carteret, N.J., in 1917.

The railroad company asked to have the suit dismissed, alleging that a New York court had no power to settle an action involving corporation of foreign states, and, furthermore, contending that General Order No. 18 of the Director-General of Railroads specified that such actions must be brought in the county where the cause of action arose or where the parties were resident.

"Congress did not, in my opinion," said Justice Benedict, "intend by this legislation either to extinguish or impair vested rights of action or to authorize th President or his agent or agents to do so. The President and his agent, therefore, had no power to make any order whereby a right of action already existing would be extinguished or cut off. If such be the effect of General Order No. 18, then I must hold that it was to that extent beyond the power of the Director-General of Railroads, as the agent of the President to make."

Trade Inquiries

240. **Catalogues and price lists.**—A Durban wholesale firm ask for catalogues and price lists in all lines of hardware, tools, agricultural implements, brushware and kindred lines.

241. **Agencies.**—A Durban commission agent with a well-established Natal connection is prepared to take up Canadian representation in such lines as hardware, iron and steel, wire, paper bags, wrapping paper, grease-proof paper, foodstuffs, canned goods and proprietary lines.

242. **Mining supplies.**—A Johannesburg firm of engineering agents who make a specialty of mining supplies, request correspondence from Canadian manufacturers of mining machinery, light rails, ball bearings, engineering specialties, leather and balata belting, shovels and other lines of mining material.

243. **Catalogues and price lists.**—A Durban firm asks for correspondence, including catalogues and price lists, of household utensils, hardware, tools, iron and steel, carriage and wagon material all kinds, brushware, and other lines for hardware trade.

244. **Agencies.**—A Johannesburg agent with twenty years' experience on the Rand is prepared to take up at once agencies in hardware, shovels, tools, disinfectants, proprietary lines and foodstuffs.

617. **Belting.**—A Buenos Aires firm engaged in industrial machinery importation and stocking general hardware and tools, desires to be placed in communication with a manufacturer of cotton belting.

618. **Powdered white lead.**—An Argentine firm of paint manufacturers would like to receive quotations c.i.f. Buenos Aires for powdered white lead in casks of 250 kilogrammes net weight.

Varnish Value

TRUE varnish value consists in quality—plus. That is to say, a varnish to be 100% efficient must be the right varnish, for the right use, for the right price. Anything less than this is a handicap to the user and an unnecessary addition to the cost of any finishing operation.

During 61 years' experience we have developed Finishes for every known purpose, and our practical knowledge of the varied needs of consumers enables us to supply varnishes and their allied products exactly adapted for the uses intended.

Berry Brothers' label can always be depended upon as a safe guide to satisfactory varnish values.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, March 13.—Another advance in linseed oil is made this week, the same ranging from three and a half to seven and a half cents. The difficulty of securing seed from the Argentine is one of the big factors, while strikers have served to hold back supplies. Turpentine is unchanged, but some of the paint men are expecting a decline to develop ere long. Mixed paints are moving quite well and the season is looked forward to with much interest. The varnish market is very firm and advances on various lines are anticipated here. Dry red lead is being quoted down in one quarter at $13.50 per cwt. for genuine.

3½c-7½c *Advance For Linseed Oil*

Montreal.

LINSEED OIL.—Still the seed market soars and oil prices are up again from 3½c to 7½c per gallon. The shipping and strike situations have served to affect deliveries of flaxseed, and as a consequence there has been a much firmer undertone to the market for some days past. The movement is just fair.

Raw, Imp. Gallon—		
1 to 4 bbls.	$1 58½	$1 62½
5 to 9 bbls.	1 57½	1 62½
10 to 25 bbls.	1 56½	1 62½
Boiled, Imp. Gallon—		
1 to 4 bbls.	1 60	1 65
5 to 9 bbls.	1 59	1 65
10 to 25 bbls.	1 58	1 65

One Dollar Still Marks Turpentine

Montreal.

TURPENTINE.—The market is ruling without change. It was expected in some quarters that there would be a reduction ere this, but the same has not materialized. Much will depend upon deliveries and labor conditions, these having given some concern to the manufacturers. There is a moderate movement in small lots.

Turpentine—		Imp. gal.
1 to 4 barrels	$1 00	$1 05
Small lots	1 07	1 17

(Packages extra).

Putty Undertone Steadily Firm

Montreal.

PUTTY.—The prices of raw materials are not lowering any, say the putty makers, and in fact there is not that change in the matter of securing supplies of whiting that was expected possible. This is partly the result of shipping being so hard to obtain for cargoes, all available boats being used for the transport of troops.

The higher cost of linseed oil is another firming factor. Prices rule as follows:

	Per 100 lbs.		
Standard Putty	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Steady Market on White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—The basis for white lead has held without change, and the movement is limited. With a somewhat firmer pig lead market there is no change in contemplation on lead in oil. Quotations are as follows: Five ton lots standard lead in oil, per 100 lbs., $15.50; ton lots, $16, and less quantities, $16.35.

Varnish May Advance; Paints on Move

Montreal.

PAINTS, VARNISHES.—There is a manifest improvement in the number of enquiries regarding early shipment of paints to the retail trade. Anticipating an early trade, the hardware men are anxious to have their stock on hand to meet the demand, and orders are coming in nicely.

The varnish market is a firm one and advances are contemplated on some lines. Materials are scarce yet and are very high in price.

Red Lead Quoted On Lower Basis

Montreal.

RED LEAD.—The market is quoted down in one quarter half a cent per pound, making the base price for 550 pound kegs $13.50 per cwt. as the low range. There is not a great deal of selling at this time.

TORONTO

TORONTO, March 13. — Higher prices are again the order of the day for linseed oil, and the strength of the seed market is a factor to indicate that the peak of this movement may not have been reached even yet. Turpentine has recorded a decline of 2c per gallon in some quarters, with all factors quoting on the same basis to-day. There seems to be a quiet, yet noticeable improvement in business being handled, and outlook generally is one of optimism.

Linseed Oil Gaining Strength

Toronto.

LINSEED OIL.—The market seems to be gaining strength and the trade generally seem to feel that quotations, which have undergone a revision upward to-day, are due for a further advance before present movement is stopped. Primarily, the situation is intensified, owing to the non-arrival of Argentine seed at United States points, with stocks there working down to a comparatively narrow compass. There is a good export demand for oil reported and the situation as regards business in Canada is much improved. The range of quotations to-day is as follows:

Linseed Oil—	Raw	Boiled
1 to 2 barrels, gal.	$1 67	$1 70
3 to 5 barrels, gal.	1 66	1 69
10 bbls. and over	1 64	1 67
	Boiled	Imp. gal.
1 to 2 barrels, gal.	$1 70	$1 73
3 to 5 barrels, gal.	1 69	1 72
10 barrels and over	1 67	1 70

Prices shown are those ruling on Thursday of current week and subject to daily fluctuations of the market.

Turpentine Down Two Cents Gallon

Toronto.

TURPENTINE.—The restrictions on the import of turpentine into Great Britain are to be lifted the end of March, and on rosin the last of April. If bottoms are available for shipping this should stimulate the movement appreciably. The wet weather in the South is retarding new crop production greatly. Locally, stocks are ample, with buyers filling present demands only. Inquiries are more numerous, and there is a quiet, yet noticeable improvement in the amount of orders being handled. The market holds quite steady and the next few weeks should see a marked increase

PROFITS -- HOW TO MAKE THEM BIGGER

Every merchant is in business for profit. His every business thought and act is directed toward bigger profits.

One merchant who has made a big success of his retail hardware business attributes this success to the fact that he plays up the "feature line."

"What do you mean by **feature line?**" he was asked.

"By feature lines, I mean those products in which I know the public have complete faith. There is, you know, one such product in every line. There is for instance, an outstanding gas range—I made it my business to get the agency for that range.

"There is a line of brushes that all Canada accepts as having highest quality —I play up that line in my windows and in my advertising.

"But above all, I have made it my business to be known as the man in my town who sells Quality Paint, for a hardware man is judged largely by the paint he handles.

"I have therefore linked up my store to the B-H line of Paints and Varnishes —and I play up the part that I'm the B-H Agent in my locality in every possible way."

Full particulars of our attractive agency proposition sent without any obligation on your part.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

in the volume of business. Quotations to-day show a decline of 2c per gallon in some quarters, making all prices on same level of $1.03.

Turpentine—	Per Imp. gal.
1 barrel (barrel included)	$1 03
2 to 4 barrels (barrel included)	1 02
5 gallon lots	1 13

Mixed Paints Move; Wall Finishes

Toronto.

MIXED PAINTS.—Business on mixed paints continues along fairly good lines, and there seems to be a better movement in progress. Prices hold without change, and manufacturers do not look for any immediate change in present basis of quoting.

The situation in wall finishes, such as Muresco, Alabastine and kindred lines, on which the trade seem to feel prices will remain steady for some time, is one marked with considerable activity. Manufacturers report sales for the first three months of the year as very heavy, and look for a record year's business.

White Lead in Oil Has Firmer Undertone

Toronto.

WHITE LEAD IN OIL.—A firmer undertone to the market on white lead in oil is noticeable, due to the advances recorded in linseed oil along with the stronger feeling in the lead situation. This has not resulted in any quotable change, and there seems no reason to expect higher figures at the present time. Prices are ruling without change, pure white lead in oil being quoted at $16.30 per hundred pounds in ton lots; at $16.65 per hundred pounds in less than ton lots. The various brands are shown in current market quotations.

Steady Market on Glass; Putty, Too

Toronto.

GLASS, PUTTY.—The market on window glass is steady without any change of particular interest being noticeable. Business is quiet at the present time; discounts are shown in current market quotations.

Putty is without any outstanding feature. The market holds without change at following quotations:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

Made-in-Canada To Nth Degree

From the *Maritime Merchant*

Toronto, we suspect, has had the credit of being the headquarters of the "Made-in-Canada" movement. At any rate most of the propaganda in connection with the "Made-in-Canada" campaign of education has come from there. But the other day, we discovered the original cradle of the idea. It was brought to our attention by the head of a great manufactory in the city of Quebec. This gentleman submitted evidence to show that the French-Canadian farmer of the Lower St. Lawrence is the real father of the "Made-in-Canada" movement. "The French-Canadian farmer," he said, "buys very little, practically nothing, abroad, that he can get at home. His food and his clothes are mainly of home production. He lives well; that is to say, he gets a good supply of wholesome food, but the most of it comes from his own farm; and as for his clothing, he is still using cloth made from the wool of his own sheep; in fact, he goes so far as to raise his own leaf tobacco, a habit that meets with no approval from the tobacco manufacturers of his own province. As a matter of fact, he is about the most self-contained, independent man that we have on this continent. Like the village blacksmith, about whom Longfellow wrote: He

> ". . looks the whole world in the face
> For he owes not any man."

We heard all this on the morning of a bright January day and during the afternoon of the same day as we sat in the train looking out over the snow-clad fields of the Valley of the lower St. Lawrence on our way home we felt ourselves impelled to think about it—of the advantages and disadvantages of the French-Canadian farmer's plan of life in so far as his industry is concerned. And on the one side we had to recognize the virtue of keeping his money at home, which is the exact policy advocated in the "Made-in-Canada" propaganda as prescribed from Toronto. We had to admit too his confidence in the products of his own country. But on the other hand we saw that his self centred conditions would not permit him to share in the progress of the outside world or benefit by the inventions constantly being made for men's comfort. Further it was evident that the fact of his being so self-centred, made him unsusceptible to the appeal for comforts which are enjoyed by other people and that he found him content to do things as his grandfather or his great grandfather had done them. And if it were true that he did not keep up with the progress of the times in that way it seemed to us that by reason of this fact he was not likely to keep up with it in many other ways. Our point is that an exchange of commodities between individuals, communities, provinces, and nations, produces the opportunity for men to enlarge their vision of things and to benefit by the examples they see of an intense concentration of effort on the part of others. Surely it must be that the farmer whose resolve it is to wear nothing but clothes made from the wool of his own sheep must miss the inspiration that is to be found in the fine product of the looms of foreign countries, which has reached a perfection only achieved by competitive struggle and centuries of concentration on that one thing.

Of course, an argument can be made that the ideal of the French-Canadian farmer is different from ours. It may be said that he is not much concerned about the psychological effect of imported goods in so far as he or his family or community are concerned; it may be said that he is satisfied to get three wholesome meals each day, a comfortable bed in which to sleep, and to be known in his own community as an honest man. That would seem an honorable though modest ambition; but if the whole world were that way it would not make very rapid progress industrially or commercially. To-day, if a nation as a whole wishes to hold its own in competition with other nations, its people cannot be content with the self-centred conditions described above; if they do, they will find other nations with more enterprise step in and undermine their power.

Now, perhaps some of our friends in the Canadian Manufacturers' Association may think that we are trying to show why people should buy imported goods rather than those made at home. We would say that, quite consistent with all we have said, imported goods need only be purchased when the values offered are superior, taking one purchase with another, to those obtained at home. But this fact of the quality of the home products should be so unmistakable that there would not be any necessity for a patriotic appeal to buy them. Canada as a whole has gone a long distance in the manufacturing field. She has some of the best minds in the world and some of the most skilled artisans engaged in the manufacturing industry; she has assembled her information from every country; she has not been content to go on doing the thing in the same old way that grandfather did—in all of which, of course, there is a marked difference compared with the illustration from the farming districts of Quebec. But she still needs the competition of the imported article as a pace maker, for there is nothing like fighting against others to develop efficiency; there is nothing more necessary for Canadian manufacturers or for any of us than to be constantly reminded of the fact that we must keep on improving; otherwise we shall not put our very last ounce into the scale.

Last summer we read an article in a Canadian magazine in which the writer almost called down fire from heaven to strike anybody who would buy goods that were not made in Canada. This article appeared just at a time when everybody was really trying to keep the country's money at home because of the urgency of home needs. But we could not help thinking as we read this article that, from the standpoint of the manufacturer who wrote it the things he said were a mistake. To the average reader it was a call to do, not the thing he wanted to do, but the thing he had to do, in the country's interests; it was calculated to make a man feel, when he bought a Canadian manufacturer's product, which should stand to his credit as a sacrifice. Now, we happened to know that the manufacturer who wrote this article was a producer of a high class product; we knew from personal experience, for we had tested his product in comparison with others in the same classification made in foreign countries. His value, as we say, was good, but when he threatened to seek the assistance of the avenging angel to exterminate those treasonable Canadians who were not disposed to buy his product, "Made-in-Canada," he was really increasing the distrust which people may have had for the domestic product as compared with the imported article. It seems to us that what is needed in Canada in order that our manufacturing industry may flourish is at all times a fair amount of competition from the foreign field; enough to keep us up to the scratch. And further we would say that we want an educational appeal to Canadians to TRY rather than to BUY "Made-in-Canada" products; either this, or forget the "Made-in-Canada" slogan entirely and seek business solely on the merit of the article sold.

In case the point we are endeavoring to establish may need further elucidation we would briefly say that a country to be in the van of world progress must not shut itself behind an impassable barrier, either of indisposition to be interested, as in the case of the Lower St. Lawrence farmer, or by invoking the aid of the tariff, or patriotic appeal.

Lowe Brothers Paints

It is easy for you to sell Lowe Brothers Paints to the man who believes in fire insurance.

The Paint Dealer can use the same arguments as the fire insurance agent.

IF a man has the foresight to insure his home against destruction by fire, he will be willing to insure it against destruction by decay.

The only insurance against decay is PAINT.

Fire and decay mean the very same thing. In chemistry the same word describes them both—Oxidation.

Paint not only insures against decay, it prevents decay.

It costs a man much less to protect his house from decay than to insure it against fire—and insurance does not prevent fire.

If a farmer objects to painting his barn, ask him if he has it insured against fire. If he has you should have no difficulty in selling him barn paint.

The deterioration of an unpainted barn or house in one year will amount to ten times the cost of painting. Besides painting adds substantially to the value of the building.

Jamieson Sales Mean Larger Profits

ASK

the dealer who has been selling our line.

"HE IS A SUCCESS"

The veteran painter, tried and proved, the man who does paint well.

"HE KNOWS"

The chemist, who can analyze—he smiles and says

"ALL RIGHT"

Because

It goes farthest.

Covers more space at less cost.

Encourages the inexperienced to paint and brighten up.

It would be a wise thing to stock them now.

On C·C·M· BICYCLES

"MASSEY," "CLEVELAND," "RED BIRD," "COLUMBIA," "PERFECT"

Owing to the high cost of both materials and labor, it is doubtful if there will be any appreciable decline in bicycle prices even by summer.

The loss of even one sale through lack of stock would offset any probable reduction in the cost of a good many bicycles.

And with transportation so slow, it is well to order as far in advance as possible.

FLOGLAZE

brings

Larger and Quicker Turnover

With the Least Expenditure of Capital

Floglaze will meet all domestic requirements adequately. With Floglaze on your shelves you do not have to stock up with a hundred and one specialties that tie up capital and shelf space unnecessarily.

This means better turnover, larger profits on money invested; and enables you to meet every household and farm requirement.

Floglaze is a Finish that Endures

This ensures satisfaction to your customer, and assists in building up permanency of trade in your paint department.

Our Floglaze proposition is unique in many ways; it may be imitated but never equalled in the way that it has met both the needs of the dealer, and the satisfaction of the customer.

Write us for complete details.

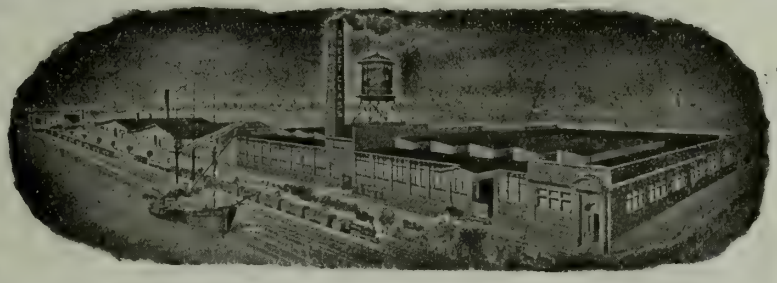
"The One-Minute" Electric Washer

Every housewife dreads the laborious tasks of wash day. A device that eliminates many of these tasks meets with her instant approval.



The "One-Minute" Electric makes wash day a pleasure instead of a drudgery. Place one on your floor and the interest created will mean many sales. It's a strong, reliable, dependable washer with a multitude of improved features that give absolute satisfaction. Washes all grades of clothes, better, cheaper and with less wear and tear than any wash-woman could do it.

We have an unusual proposition of interest to the dealer who will handle this wonderful washer. There are many you can sell in your district and the profits are good. Write us to-day for further information.

We make Hand, Electric, Gasoline and Water Power "One-Minute" Washers.

A Paint that Satisfies!

Stephens'

REGISTERED TRADE MARK

When you hand a can of paint over your counter, what are you selling your customer?

Is it just paint—a fluid which colors a surface? If that is all you can honestly give him for his money, it's high time you were linking up with a *Stephens' Agency.*

Every *Stephens' Agency* sells with every *Stephens' can of Paint or Varnish* a product that he is proud to recommend to his customer.

He knows — that the Stephens' organization is back of every sale. An organization that has a reputation for good paint.

He knows — that the high standard set for Stephens' Paints and Varnishes is there in every can.

He knows — that his customer will be thoroughly satisfied.

STOP THAT

GUESSWORK

There is only one way whereby you can be sure—take a Stephens' Agency.

"THE EDEN"

THE MOST POPULAR

Electrically-operated Washing and Wringing Machine

The Eden is the one best machine; the tub is made entirely of rust-proof iron, reinforced with angle iron, all mechanism geared direct, no belts or chains; automatic stop causes cylinder to stop with opening always at the top; flat top is entirely clear of mechanism. All moving parts are covered. Wringer is guaranteed and has safety release to prevent accidents. Special motor is equipped with safety cutout that prevents overloading.

All metal rust-proof construction, giving strength, durability and long life.

Built to Last a Lifetime

Great West Electric Company, Limited

WINNIPEG

Distributors of Laco Tungsten and Nitro Lamps

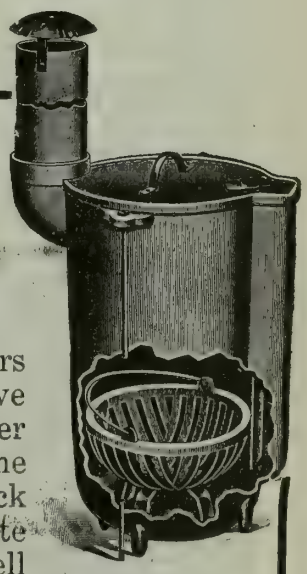
TRADE MARK "MORRISCA"

When you see the above Trade Mark on anything pertaining to Fishing Tackle you need have no hesitation in recommending it to your customers.

There is no possibility (except in a few articles) of prices for Fishing Tackle being reduced before next season, so that during the period of transition you would be well advised to place orders well ahead of your every-day requirements.

Orders for future delivery are now being booked, but owing to the great pressure we have had with Government work it will be some time yet before we are able to attain our pre-war output.

Our new General Catalogue is now in preparation, and we are placing on a Register the names of Fishing Tackle Dealers who will obtain a copy on publication. Have you sent in your name? If not, do so now.



In the meantime we invite and welcome your enquiries and will be pleased to quote you for anything we can supply. We are Wholesale only, and all enquiries from consumers direct are referred to the nearest retailer. We don't cut into his business.

The "Open Sesame" to color sales is

Lucas

There is sales magic in the name ***LUCAS*** when applied to Imperial French Greens in Oil and Dry Colors. Practically every painter who comes into your store regards ***LUCAS*** as a positive guarantee of color perfection.

To say ***"LUCAS"*** to a painter is to make a sale. He never questions ***LUCAS*** quality. He knows it as the world's standard.

LUCAS Imperial French Greens in Oil and ***LUCAS*** Dry Colors are made in Canada. ***LUCAS*** Imperial French Greens are distributed by Hardware and Paint Wholesale Houses.

Order from your nearest Distributor or direct.

It's Like a Rolling Snowball!

REMEMBER the big snowballs you used to make when you were a boy — how they grew bigger and bigger at every turn?

Well, that's just the way with "61" Floor Varnish in Colors. It "turns over" quickly and P&L dealers are increasing their sales at every turn!

It's that 70-year-old Pratt & Lambert reputation for quality backed up by powerful nation-wide advertising that keeps that ball rolling and kicking up cash in its wake.

Are you in on this? Have you stocked "61" in Colors?

If you're not one of these dealers, let us show you how to get your share of this steady business! Write for particulars of Introductory Assortment.

DIAMOND A BRAND ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

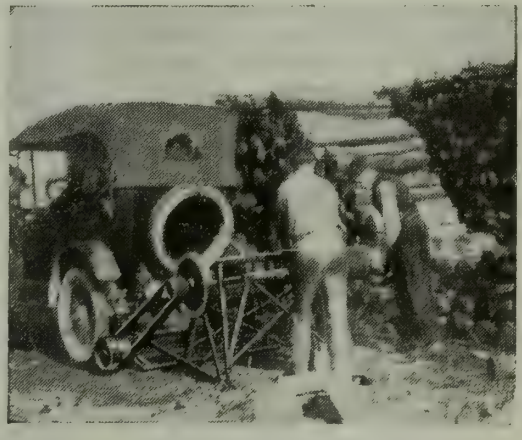
LAY PORTA-POWER

Fits your Car, regardless of make. No adjustment or alteration of Automobile is necessary. It utilizes the power of Automobile Engines for belt power upon farms and ranches.

It doubles the value of the Farmer's Car

It takes the Arm Work out of Farm Work

Lay Porta-Power is a durable and practical implement, well constructed, that takes its power from the rear wheels of any automobile and will develop from 5 to 20 H.P., depending on the size of the car. It acts as a portable gasoline engine, at just one-third the cost of a stationary plant. It takes the engine to the job, not the job to the engine. Wood sawing, feed grinding and cutting, pumping, ensilage cutting, silo filling and farm lighting are only a few of the farm jobs that this implement can be readily used for. It will not heat the engine nor injure the tires, and is a money, time and labor-saving device that ought to be on every farm. It is simply constructed and can be adjusted to fit practically any make of car or small truck.



Easily and Simply Applied

To Dealers

The demand for Lay Porta-Power being so great already is an indication of the tremendous sales possibilities that it opens to dealers. It fits into any line you may be handling. If you are in "open territory" we will gladly talk business.

Write for prices and discounts.

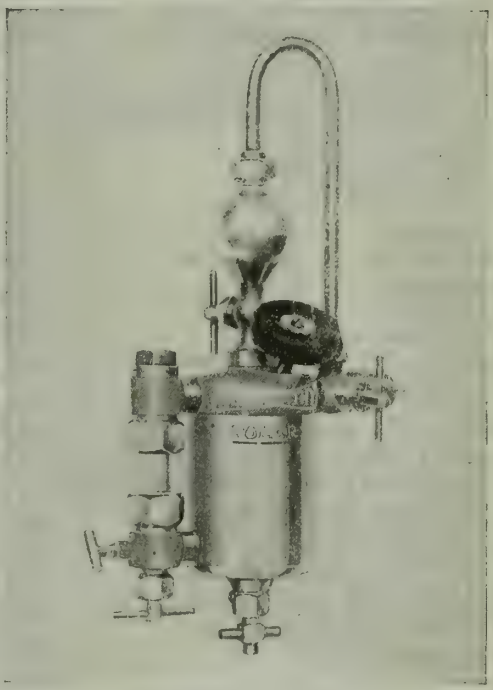
PENBERTHY

POLAR

STEAM LUBRICATOR

THE NEW COLD WEATHER CUP

Equipped with Special Heating Chamber. Oil Always in Liquid Condition.



Double Connection

POLAR

Lubricators are designed along the same high-grade lines as the most expensive cups, and are equipped with a long-sight feed glass which shows the engineer at a glance the exact amount of oil being fed to the engine.

On account of the special heating chamber located in the oil reservoir, they make an ideal outdoor lubricator in cold weather.

Single Connection

A GOOD LUBRICATOR TO BUY

When Your Customer Wants

A First-class, Reliable Sight-Feed Lubricator at a Reasonable Price, Sell him a

PENBERTHY POLAR

It is simple in construction, easy to operate and will give the service.

Addition to Electro Service

INQUIRIES from hardware retailers in various parts of Canada, requesting HARDWARE AND METAL to enlarge the electro service to embrace motor accessories have resulted in the following new additions. These cuts, to be used by retailers in their advertising, are supplied mounted on wood blocks and postage paid, at a cost of 20c each, cash with order. Booklets showing entire assortment of hardware cuts will be supplied free upon request. Address all inquiries to HARDWARE AND METAL, Electro Dept., 143 University Ave., Toronto, Canada.

Talk No. One Hundred and Eighty-Nine

Whatever may be said about other lines, Galvanized Sheets are away down now compared to "War Prices." "Made-in-Canada-Premier" means no possibility of a hold-up by foreign makers. The consumer benefits. Order from your jobber now.

TINKER TOM.

Look for Talk No. 190 next week.

DOMINION SHEET METAL CORPORATION, Limited
HAMILTON, CANADA

Dependability

WHEN you buy sheet steel products that have a reputation for rendering a certain kind of service, you are not going to tolerate a compromise. You want a material that will measure up to all claims made for it.

When we tell you that *Keystone Copper Steel Sheets and Terne Plates* will resist rust and withstand wear more effectively than any other steel or iron, we base our claims upon the indisputable tests of actual time and service.

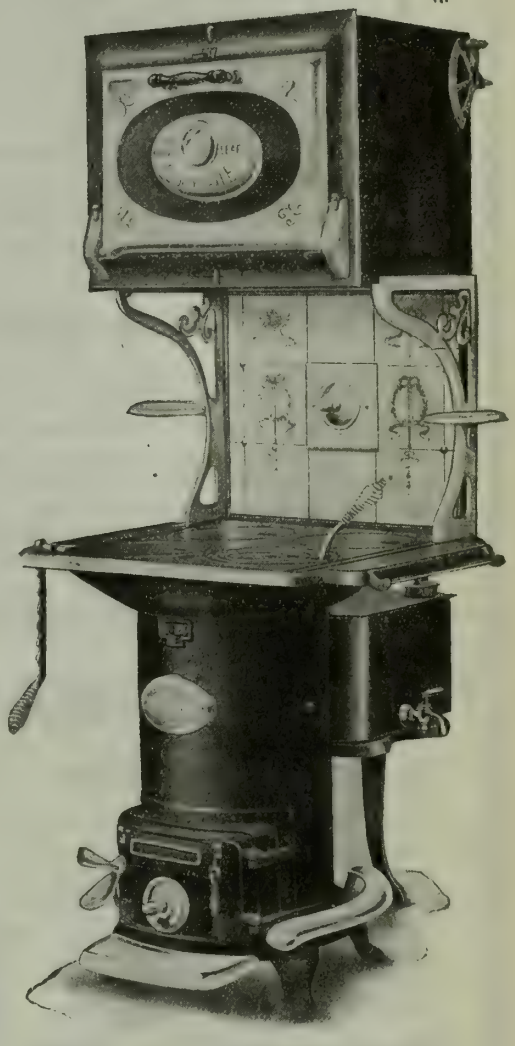
The Complete MAPLE LEAF Line
Ranges, Heaters and Furnaces



An AGENCY
includes exclusive
right to sell the
"Hit of the Season,"

The Maple Leaf Composite

Watch for illustrations
Maple Leaf
Ranges and Heaters,
in the Spring Number
(March 22nd).

Send for Catalogue.
Let us prove quality.
Secure the agency.
Be in line for success.

The Invader Square

(Made also with reservoir)

A great favorite for town and city use.
Satisfactory for smaller country homes.

For Heavier Demands Sell the "Composite," "Grand," "Monarch" or "Ottawan"

TESTIMONIALS

Varna, Ont., Feb. 26/19

I am enclosing cheque in payment for the Composite Stove.

I could not get any person to try it so I had it taken into my own home. It has given the very best satisfaction. I would not sell it for twice the amount if I could not get another as my wife uses it altogether. She has discarded our big range.

(Signed) L. BEATTY (Dealer)

Walkerton, Ont., Feb. 8/19

I was so disgusted with my old range that I decided to try one of your Maple Leaf Composites. I must say I have had wonderful results.

I cannot say enough for the Composite, for I like it better every day, especially for baking, and as a coal-saver it has no equal.

(Signed) Mrs. G. F. Bruder

The Maple Leaf Composite

The Composite with reservoir and tile panel.

(Made also without reservoir.)

Excellent for Summer use with wood grate. This device is the "Hit of the Season." Eclipses all others for economy and satisfaction. Read the testimonials. Booklet of such testimonials from enthusiastic purchasers will convince the doubtful. Some one will sell them in your territory. Secure the Agency.

THE BEACH FOUNDRY COMPANY, LIMITED
OTTAWA, ONT.

Do High Prices of Machine Tools Hinder Sales?

THE question asked of a considerable dealer in Toronto by THE FINANCIAL POST is answered by him in THE POST of March 8th, in part, as follows:

> "New lists that are coming out do not show concessions in prices. As long as firms can sell at the present prices there is not much chance for a lower level of values."

The rest of that article in THE POST is interesting, and here are some other extracts worth noting from POST items of this week:

Implement Manufacturers May Unite for Export Trade

"Representatives of the implement manufacturers have been at Ottawa in consultation with the Canadian Trade Commission to arrange for the pushing of their export business. What is likely to be proposed to them is that they should work in concert, and their orders abroad should be placed through a central selling body, the expenses of conducting which should be maintained by a pro rata tax on each member of the association. They will provide their own credits from a common fund, which can be created by contributions gauged according to the respective interests involved."

Steel Market Is Still Unsettled

Big American Interests Co-operating in Secretary Redfield's Plan

The talk of lower prices for steel continues in the market. It is a fact that the "set prices" of the war period have, in many ways, spoiled the trade for what has followed. When prices were fixed, buyers and sellers knew their ground for the coming three months. Not only so, but they were quite certain that when changes would be made they would not be radical, and would be in keeping with the cost of material and labor entering into the output.

Last week a number of prominent steel producers were meeting in New York, and according to the authorized version they "discovered" that George N. Peek, recently named by Secretary Redfield as chairman of "The Industrial Board of the Department of Commerce" was in town, and accordingly they invited him in to explain Secretary Redfield's plan for the deflation of war-time prices. Indications are that the steel producers are going to make a show of resisting the movement, but will gracefully yield at the last moment.—"The Financial Post," March 8, 1919.

Above is part of a front-page news item in THE POST of March 8th.

Latest Activities of Steel and Iron Using Interests

Stove Manufacturers Out For Export Trade

"The Canadian stove and enamelled ware manufacturers are making an aggressive effort to develop export business and to secure orders from Europe, Australia, New Zealand and South Africa. A. M. Smith, sales manager of the McClary Manufacturing Company, will, on behalf of the manufacturers, make a personal investigation of European prospects."

New Ship Repair Plant For Vancouver

"Seattle men propose to build at Vancouver, B.C., a steel dock of 25,000 tons, capable of handling the largest ships which make the Port of Vancouver. Embraced in the enterprise will be a shipbuilding and repair plant, the whole to cost in the neighborhood of $4,000,000."

New Iron Industries For Border Cities

"Plans are being made for the location of a large malleable iron corporation with extensive connections in the United States, on the Windsor industrial site. Negotiations to this end have been pending for considerable time. Altogether, 12 large manufacturing firms with headquarters across the border are negotiating for sites in the Border Cities."

Business Building News Items Appear Each Week in *The Financial Post*

The above are only a few of the many subjects of real profit-making interest to Canadian men of affairs which have been dealt with by expert writers and editors in THE POST of March 8th. THE POST will keep you informed on Canadian business matters in a way unrivalled by any other publication. Send for a subscription to-day. The price is $3.00 per year, and you have only to fill in this form:

The MacLean Publishing Co.,
143-153 University Ave., Toronto.

Send me THE FINANCIAL POST every week till further ordered. I will pay subscription price, $3.00 per year, on receipt of bill, or you may draw on me for this.

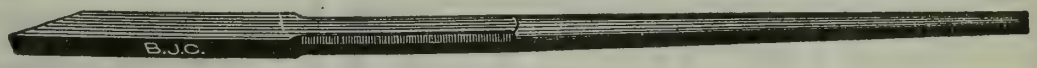
Why It Pays!

ADVERTISING in HARDWARE AND METAL is economical because it reaches, and the advertiser only pays for, a circulation of tremendous buying power, which is always on the lookout for new lines and information regarding goods which are already in stock.

Manufacturers and wholesalers cannot afford to side-step the dealers. In nine cases out of ten, the customer accepts the retailer's recommendation.

REFRIGERATORS
SCREEN DOORS and WINDOWS

Please remember, before too late that SERVICE and best attention come to those that order early.



Your order in on time will help us to produce the right lines.

Our aim is to build Refrigerators and Screen Doors that will satisfy every one of your respected patrons

No time like the present. Order now. Why wait?

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for Machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

REPRESENTATIVES WANTED EVERYWHERE

We have been manufacturing awnings for over FORTY years and honestly lay claim to being experts in our line. We guarantee QUALITY, FIT and WORKMANSHIP EQUAL to ANY and SUPERIOR to MOST awnings made by other manufacturers. Business in this line can be developed locally by agents in touch with new buildings and alterations. If we are not represented in your locality we are open to appoint an agent—preferably in the hardware trade. Good commissions. Samples and quotations on application.

J. J. TURNER & SONS, LIMITED - PETERBOROUGH, ONT.

WHY have our sales increased 200% over last year?

BECAUSE our prices, quality equal, are 10% lower than others

KINDLY MENTION THIS PAPER WHEN WRITING TO ADVERTISERS

Good Men

DO you need the services of a good retail salesman, traveller, or manager. The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

The Next Issue Will Be

The Big Annual Spring Buying and Directory Number of HARDWARE AND METAL

It will be the 31st Annual Spring Number, and without doubt, the best and biggest number ever produced in Canada. Advertising forms have closed and the trade will find in the advertising section of this number, a wealth of information in the advertisements of the leading manufacturers and retailers who desire the business of Canadian hardware firms. In the editorial department will be found an abundance of valuable and interesting information. The number is one that will be used as a Buyers' Guide and Directory for many months to come.

21 Walker St., New York, N.Y.

The Greatest Hour of the Dairy Farmer

"There are no substitutes for dairy foods"

Now that the war is over, the farmer's responsibility and opportunity are greater than ever—for the American farmer and dairyman must literally feed the world. It means greater production and getting the *most* out of that production. Waste is as unpatriotic now as it was during the war.

But there is many a farmer who would not think of planting a hundred rows of corn and only harvesting 95 rows who is now using a fixed feed separator and wasting a good part of his butterfat through turning under speed. Even though the proper separating speed is marked on the handle, tests show that 95 per cent. of *all* separators are turned below speed. But when a Sharples Suction-Feed Separator is turned below speed, it skims clean just the same—due to the patented suction feed. No other separator has this principle.

Sharples is the pioneer American Separator—invented, perfected and preferred in America. It is the product of the greatest factory of its kind in the United States—and all American owned.

Above is part of a full page Sharples advertisement appearing in national dairy papers. It points the way to the Greatest Year for the Sharples Dealer—and a great opportunity for any dealer. Write for details on the Sharples contract—the fairest, squarest, liveliest proposition for dealers. Address nearest office.

The MacLean Business & Class Publications in Canada

TO SELL or buy from Canada such lines as machinery, hardware, food products, dry goods, books and stationery, paper, printing machinery and supplies and general merchandise of almost every description, raw or manufactured, use or consult the MacLean Business and Class Publications, as per list below. For special information, write the publishers. Concerning the quality of the MacLean publications, let this copy of HARDWARE AND METAL which you hold in your hands speak for all. The MacLean list of 14 publications is as follows:

The Canadian Grocer (Est. 1886)
Serving the Grocery, Provision and Foodstuffs Trades. Published weekly.

Hardware and Metal (Est. 1889)
Serving the Hardware, Stove and Metal-working Trades. Published weekly.

Dry Goods Review (Est. 1889)
Serving the Dry Goods Trade generally; Wholesale, Retail, Manufacturing and Department Stores. Published monthly.

Men's Wear Review (Est. 1898)
Serving the Manufacturers of Clothing, Underwear, Shirts, Collars, Neckwear, Footwear, Hats and Caps and Allied Sundries, and their Retail Distributors. Published monthly.

Canadian Machinery (Est. 1905)
Serving the Machinery, Metal-working, Iron and Steel, Foundry and Allied Trades. Published weekly.

The Power House (Est. 1907)
Serving the Operating and Consulting Engineers and Power Superintendents, Devoted to the Generation, Transmission and Application of Steam, Gas, Electric, Air and Water Power; and to the operation of Refrigerating Machinery. Published monthly.

Bookseller and Stationer (Est. 1884)
Serving the Book, Stationery, Fancy Goods and Associated Trades. Published monthly.

The Sanitary Engineer (Est. 1907)
Serving the Manufacturers of Sanitary, Heating and Ventilating Machinery, Systems and Equipments, and those installing them. Published semi-monthly.

Marine Engineering of Canada (Est. 1910)
Serving the Marine Engineering, Merchant and Shipbuilding Trades. Published monthly.

Canadian Foundryman (Est. 1909)
Serving Foundries and the Pattern-making, Plating and Polishing Trades. Published monthly.

Printer and Publisher (Est. 1892)
Serving the Publishing, Printing, Paper-making and Allied Trades. Published monthly.

The Financial Post (Est. 1907)
Serving the Business, Investment and Financial Interests of Canada. Published weekly.

MacLean's Magazine (Est. 1896)
A popular family and literary magazine; the most important in its field in Canada. Published monthly.

The Farmers' Magazine (Est. 1910)
Serving the agricultural and rural communities of Canada. The only farm and country life publication in Canada having extensive national circulation. Published semi-monthly.

This fact may interest you: namely, the MacLean organization is the largest concern of its kind in the British Empire. The output of its mechanical department every working day is the equivalent of a 125-page publication of the size and type of this copy of *Hardware and Metal.*

Our London Office 88 Fleet Street, E. C.

Also at New York Boston Chicago Montreal Winnipeg

For over 20 years the MacLean Publishing Company has maintained a fully-staffed London office, and has rendered British and Continental manufacturers, shippers, and traders an invaluable service in many directions.

Specimen copies of the MacLean publications will be cheerfully forwarded to all asking for them. Address us at London or Toronto.

If you have a business to dispose of, or are in need of efficient help, try a Want Ad. in Hardware and Metal, and let it assist you in filling your needs.

Wanted

POSITIONS WANTED

RETAIL HARDWAREMAN WITH OVER FIFteen years' experience and not afraid of hard work, wants position as manager of branch store, Alberta preferred. Good references. Box 209, Hardware and Metal.

AT ONCE, POSITION AS HARDWARE salesman, preferably in North-west, by discharged soldier. Eight years' selling experience. Four in retail hardware as salesman and window dresser. References from former employers. Box 231, Hardware and Metal.

HELP WANTED

FOREMAN WANTED FOR TINSMITH AND plumbing shop in Maritime Provinces. Apply Box 208, Hardware and Metal.

ONE-MINUTE WASHER REPRESENTATIVES wanted for Maritime Provinces, Saskatchewan, Alberta, British Columbia. Apply 74 Logan Ave., Toronto.

WANTED—AN EXPERIENCED HARDWARE man, able to estimate on contracts, with a thorough knowledge of bookkeeping, salesmanship and advertising. Applicants must state ability in each of these lines. State salary required per month, and apply before the 25th of March to Nicholson-Herity Hardware Co., Ltd., Kerrobert, Sask.

WANTED—TINSMITH TO TAKE CHARGE OF shop, to figure on furnace and plumbing work. State age and wages. Box 230, Hardware and Metal.

MISCELLANEOUS

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

STOVE REPAIRS FOR ADMIRALS, CLIMAX, Pen Esthers, Acmes, Crown Hurons, Garlands, Colonials, Marvels, Silver Kings, Souvenirs, Imperial Oxfords, Jewels, Peninsulars, Sterlings, Oak Laurels, Sunlights, Pandoras. Write for full list of stoves and prices. Grundy Bros., Strathroy, Ont.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada. (tf)

ADDING TYPEWRITER, WRITE, ADD OR subtract in one operation. Elliott Fisher. Limited, Room 314 Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensome hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis Fensome Elevator Co., Toronto.

Brass Tubes

HOSKINS & SEWELL LTD., BIRMINGHAM, England, invite applications from established firms with Selling Organizations in Canada to act as their Agents for the sale of Brass Tubes for the Bedstead, Coach Fittings, Chandelier and Electrical Trades.

FOR SALE

1—NO. 8, 37" x 2" SLIP ROLL FORMER, Brown-Boggs make. Used about six months. W. J. Heaman, Exeter, Ont.

FOR SALE—A BATTERY OF SIX BOWSER pumps and tanks, together or separately. Also set Cameron & Campbell's drawers, nail bins and tool cabinet. Box 201, Hardware and Metal.

HARDWARE BUSINESS FOR SALE, IN thriving Ontario city; $14,000 stock and fixtures at a bargain. Good reasons for selling. Apply Box 219, Hardware and Metal.

TINSMITH AND PLUMBING BUSINESS IN small but growing town in Eastern Ontario. Population 1,400. Waterworks. No opposition. Good proposition for live man with small capital. Town is located on Lake Ontario. Box 224, Hardware and Metal.

GENERAL HARDWARE STOCK FOR SALE IN Sudbury. Old-established business of Purvis Bros., Ltd. Good general stock of shelf and heavy hardware; about $20,000.00, with twenty-nine years' good-will and fair dealing. Premises can be leased or bought. Retiring on account of failing health. Purvis Bros., Ltd., Sudbury, Ont.

OWING TO THE SERIOUS ILLNESS OF THE proprietor, which has necessitated his removal to a Southern climate, I am offering for sale that well-known and established business in the town of Oshawa now being carried on by Glenn A. Henry & Co. This is a straight hardware business—no tinshop,—and has been conducted on practically a cash basis. It has always been a good paying business and would not be on the market were it not for Mr. Henry's failing health. Stock will run from $10,000 to $12,000. Here is a first-class proposition for someone. Wire or write, W. E. N. Sinclair, Barrister, Solicitor, etc., Oshawa, Ont.

TRANSLATIONS

ENGLISH INTO FRENCH. COMMERCIAL, Financial and Technical Literature. Advertising booklets, catalogues, circulars, posters. Private correspondence. Manufacturers and Manufacturers' Agents desiring English to French translations will secure expert service at a moderate rate by addressing Leon A. Archambault, P.O. Box 135, Station B, Montreal.

Getting Results

A large firm in a Western Canada city recently advertised in Hardware and Metal Want Ad. Page for a man to fill a responsible position—result 21 replies. This indicates that the want ad. page is followed closely. The man YOU want to reach is reading this page.

Use this page—the page that is never overlooked—from time to time to put efficiency in your service, and watch it for opportunities.

Everything is classified under appropriate headings, so that you can, at a glance, find what you are looking for. Quite often the want ad page is consulted as a guide to conditions.

Anything used or of interest to the Hardware and Metal trade can be located by an advertisment on this page.

HARDWARE AND METAL reaches thousands of the best hardware men in the Dominion—the kind you want to speak to.

The cost of this service to you is very small—2 cents per word first insertion, and 1 cent per word for each subsequent insertion of the same advertisement. If you do not wish your name to appear in the ad we have a Box system whereby everything is strictly confidential, for which we charge 5 cents per insertion extra.

Kindly enclose remittance with ad so as to save unnecessary bookkeeping, etc.

Hardware and Metal Subscribers

Buy for business as well as for p r i v a t e consumption. That is why one inquiry frequently pays for an entire year's advertising. Advertisers in HARDWARE AND METAL r e a c h only the cream of the trade—the best and biggest buyers in Canada.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

A Sure Sign
that he is going to do
a big business in Paint

For Particulars Regarding the B-H Agency Proposition, write to Brandram-Henderson Limited, Montreal

Now for SPRING, House-cleaning and O-Cedar Polish

ALWAYS saleable articles, always in steady demand, O-Cedar Polish and the O-Cedar Polish Mop attain the zenith of their sales in March, April and May.

So important are these products as an aid to Spring house-cleaning, that the up-to-date housewife would be as likely to attempt her annual clean-up without soap as she would be to start house-cleaning without a supply of O-Cedar Polish or without an O-Cedar Polish Mop.

Now's the time to put in a window display of these products. Now's the time to ask your customers if their old mops are worn out.

Get the benefit of this big demand that comes in the Spring—display O-Cedar products, together with O-Cedar signs and cards. Remind the women you have O-Cedar products—and this line—so splendidly advertised at this season and so fully appreciated by your customers—will practically sell itself.

HOW TO SELL MORE

It's a question you can't get away from and your growth—your prosperity—your very business depends on it.

The answer you are looking for is

CLEVELAND GRINDSTONES

WHY?

Because—With them you can supply every need with unmounted or mounted stones, in frames of wood or metal.

Because—You can offer your trade stones in any size required, since we own and operate 22 quarries in Ohio and Michigan.

Because—You can get stones of the proper grit for every purpose wanted, as we have experts who have passed their lives in the study of grindstone grits.

Because—You get stones from an organization controlling the largest sandstone quarries in the world and who are also the producers of the only **genuine** Berea and Lake Huron grindstones.

The Reconstruction times are here—For shop, factory and farm more and better grindstones are needed to-day than ever before.

Let us solve your problem with Quality Goods.

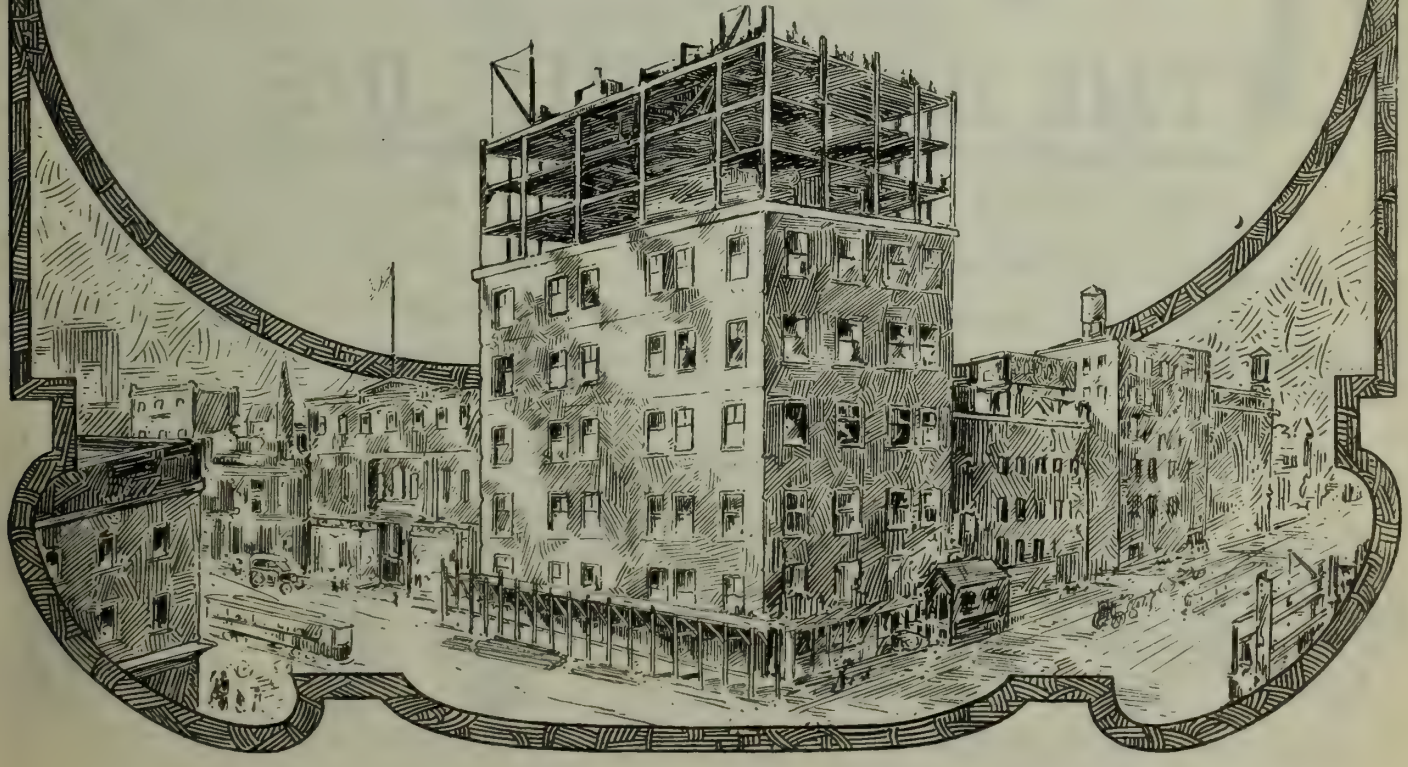
View inside Garage

View outside Garage



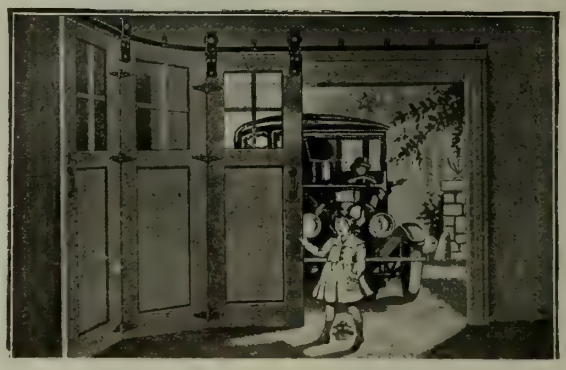
☞ ***Build your sales on a solid foundation with this quality line.***

Every item composing our **No. 801 Garage Door Set** is the best of their respective kind, both in attractive appearance and wearing qualities. Here is a door set that you can sell with a great deal of profit this year. Consists of the following, with screws, all ready for assembling:

3 pair 8-in. Reversible "T" Hinges, 1 No. 820 Chain Bolt, 1 No. 830 Foot Bolt, 1 No. 5 Door Pull, 1 No. 27 All-steel Latch—all packed in a neat, strong carton in the **"Unusual National Way."**

Write us to-day for prices and particulars. Our complete catalogue of Builders' Hardware should be on your files. Ask for it.

NATIONAL MANUFACTURING CO., STERLING, ILL.



ALL GARAGE DOORS SHOULD BE HUNG ON ROLLERS

No equipment ever produced offers the many attractive features or gives such universal satisfaction to the user as does the

HATCH GARAGE DOOR OUTFIT

Outfit includes:

- **3 Special Swivel Door Rollers**
- **22 Feet of Track**
- **3 Pairs Special Garage Door Hinges**
- **3 Stay Rollers**
- **2 Extra Heavy Door Handles**
- **1 Safety Hasp**
- **1 Hook and Eye**

Makes doors weather-tight, sag-proof; prevents slamming, and does not get out of order.

The hinged door allows entrance without opening the other two.

Complete directions packed with every set.

The roller bearing swivel hangers hold the doors in place, take the bind off the hinges and roll the doors around the corner, on the inside of building to the side wall.

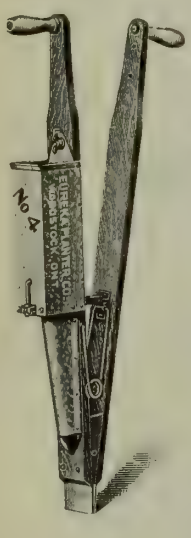
EUREKA TOOLS and IMPLEMENTS

The Farmer and Gardener are always live prospects for the right kind of labor and money-saving devices. Canada will always be a great producing country.

Eureka Sprayers and Planters are a vital necessity to the producer who aims to get the utmost out of his acres. It's for you to make the proper display in your store in order to create consumer enthusiasm.



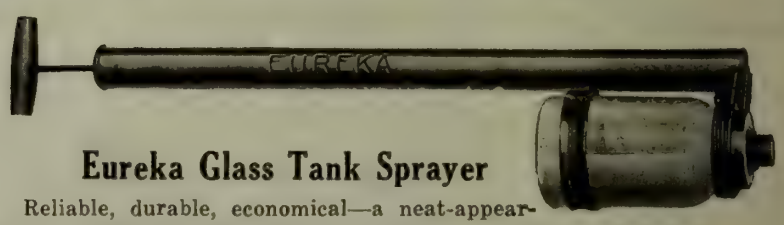
Eureka Sprayers and Planters are easily demonstrated, and are sold to you at a price that allows a splendid margin of profit.

There should be a steady revenue of sales for you all through the year with **Eureka Products.**

May we help you to go after this business. Write to us for prices and any information you desire on the **Eureka** fast-selling lines.

Fountain Compressed Air Sprayer

Eureka Corn Planter



In one and two-hand styles, well finished, light and durable, positive and accurate in action. A seed guard determines the number of kernels to be dropped in each hill. Only one lot of seed can pass into the jaws at one time. A flat steel spring is used in place of the cheap brushes used in ordinary planters, which constantly wear out.

No complex or intricate parts, positive and automatic in action, easily operated, easily controlled —a time-saver, labor-saver and solution-saver.

Eureka Special Sprayer

A tin sprayer, throughout both tube and tank. The spraying tube thoroughly breaks up and atomizes all oils and solutions into a fine mist-like spray; adapted for all kinds of general spraying and used extensively for spraying disinfectants.

Eureka Glass Tank Sprayer

Reliable, durable, economical—a neat-appearing, efficient sprayer for potatoes, small shrubs, live stock or for disinfecting poultry houses.

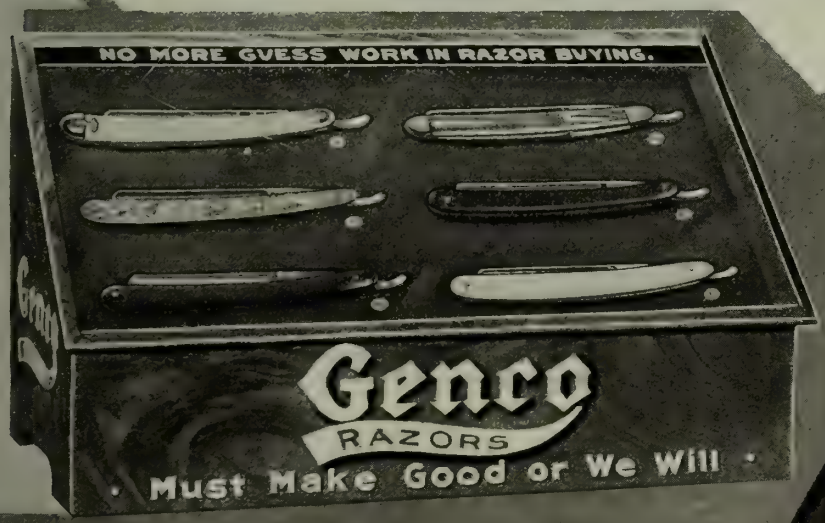
Genco RAZORS

A Square Foot of Selling Space

That Can Be Made Very Profitable In Your Store

THE space occupied by this Genco Razor Display Case is about one square foot, Besides containing and protecting the razors, it catches and holds the eye and gives the goods a pleasing display. As a salesman it is on the job every minute.



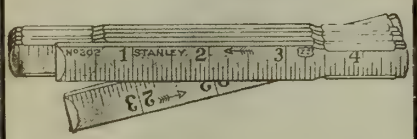
The case is made of pressed steel, with handsome Circassian walnut finish. It holds six Genco Razors of different design on constant display against a background of Royal Purple plush and there is ample room beneath for carrying stock.

All current Genco Razor advertising features this case prominently. It goes to work for you the minute it appears on your counter. Let it be a reminder to your customers of the 500 master cutlers who, in the largest high grade razor factory in the world, grind the quality in and the guess work out of Genco Razors.

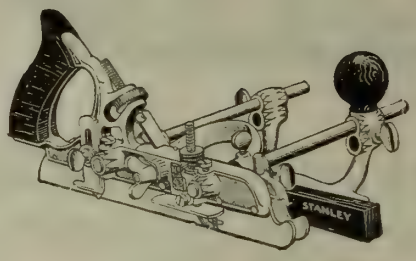
We are making a special proposition which includes one of those display cases free with your first order. Write for the details of this offer now, while the matter is fresh in your mind. It's quite a good thing. Mention the name of your jobber when writing us.

GENEVA CUTLERY COMPANY

159 Gates Avenue, Geneva, New York



TOOLS THAT MAKE DEALERS FAMOUS



Why Bother with Substitutes?

Stanley Tools

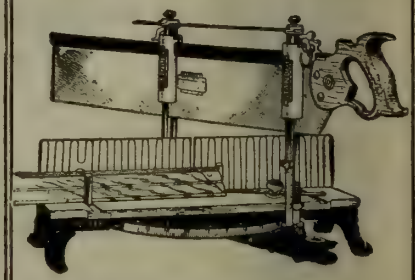
"Zig-Zag" Rules

They might very properly be called "Folding Tapes". They, however, have the advantage that, as the joints are held open by springs, they can be used to measure across openings by supporting the end away from the user, where, with a tape, it would be necessary to have one person hold each end, or else hang the outboard end on a nail, necessitating additional climbing. In many cases, they are useful for measuring concave, convex and various uneven surfaces. When folded, they are compact and easily go in the pocket. A handy and convenient rule for mechanics and householders.

Stanley "Forty-five"

Seven Tools in One

(1) Beading and Center-Beading Plane; (2) Rabbet and Filletster Plane; (3) Dado Plane; (4) Plow Plane; (5) Matching Plane; (6) Sash Plane; (7) A Superior Slitting Plane.



Extra cutters may be used to advantage by substituting specially formed detachable bottom. Carpenters will find this tool almost invaluable

Stanley Plumbs and Levels

are made of thoroughly seasoned and selected stock, and have many valuable features which will appeal to every lover of good tools. Made in all styles for **Carpenters, Masons, Plumbers, Machinists, Millwrights, etc.**

Stanley Tools

Mitre Boxes

These Boxes are compact, strong, and durable; are quickly put together or taken apart for convenience in carrying; have the greatest strength with the least weight, and will do the widest range of work of any Mitre Box made.

Several new and important features have recently been added to these Boxes which will interest Carpenters, Cabinet Makers, and other workers in wood.

Made in seven sizes. With each Box a specially made Back Saw is furnished.

STANLEY SPOKESHAVE

Have a Stanley catalog on file for reference. It shows a wonderful line of Carpenters' Tools. We will be glad to send you a copy.

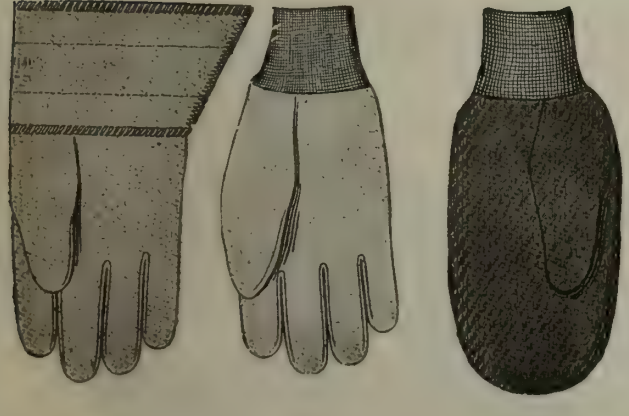
The AMERICAN PAD and TEXTILE COMPANY
CHATHAM, ONTARIO

Horse Collar Pads



The tremendous need for food production still exists. It is therefore our patriotic duty to increase food production.

The horse is a vital factor in such accomplishment. His efficiency is measured by the degree of fitness for constant use.

TAPATCO Brand Pads are the horse's owner's best insurance against bruised, galled and chafed shoulders.

Thirty-seven years' experience in making Pads for horses is back of the TAPATCO Brand. They have our exclusive patented hook attachment, which makes possible the use of the Pad long after the fabric has been weakened by constant wear. Order through your jobber.

TAPATCO REGISTERED TRADE MARK BRAND GLOVES AND MITTS

Our varied and complete line of Gloves and Mitts are especially made to meet the Hardware Dealer's Trade. We manufacture a selection of styles to choose from, that cover all customers' requirements.

Gauntlet, Knit Wrist and Band Top Styles in heavy, medium and light weights. Leather Tip, Leather and Leatherette Faced Gloves, Jersey Gloves and Mitts in Tan, Slate and Oxford.

The excellent wearing qualities of **"TAPATCO" Gloves and Mitts** create an abundance of customers' satisfaction. An early display will attract much "good business" to your store. Order your stock now. An easy line to sell and good profits in it too.

"TAPATCO" PRODUCTS Are Made in Canada and Sold by RELIABLE CANADIAN JOBBERS

EDDY

ESTABLISHED A.D. 1851.

Indurated Ware

Pre-war conditions will not be realized in Canada for some time to come, on certain manufactured products. Raw materials for metal-wares will continue at a premium.

You have no annoying problem of this nature to contend with if you are selling **Eddy's Indurated Ware.**

We can supply you in any quantity and at a price to allow you a splendid margin of profit. Besides there are very good reasons why you should be selling **Indurated Ware.** It's much better than either metal or wood for—it's strong and durable yet light in weight—will last a life time—seamless, therefore more sanitary and never shrinks or falls apart. Made in Tubs, Washboards, Pails, Butter Pails, and Cuspidors, etc.

There's **good money** in handling **Indurated Ware,** but be sure it's Eddy's.

Order through jobber or direct.

The

Eureka Bread Moistener will do it—*sells on sight*

NO OPERATING COST—NO MUSS—NO TROUBLE

Here is a line that can be put in every home in Canada, in every confectionery, every cigar store, in fact anywhere where a slightly moistened air is desirable.

The Eureka is a small, neat, sanitary article scientifically constructed and made of a material which when held under a tap will absorb 2½ ounces of water which will moisten the air of the bread or cake box, confectionery or cigar showcase for a full week.

The Eureka will pay for itself in saving in a few days. It prevents moulding, prevents wastage from drying out.

There's a good margin of profit for the dealer in selling the Eureka at 75c—there's an unlimited sale. Now is the time to act.

Retails at 75c.

Place your initial order to-day and try out the Eureka.

Introduce this new line in your town.

Richards-Wilcox Trolley Barn Door Hangers

By "Trolley Hanger" is meant a hanger that runs INSIDE the track.

For sliding doors nothing better has ever been devised than **perfect** trolley track, because the hanger is **inside** the track where it cannot jump off, the load is suspended **from the center,** and the weight is distributed **at four points** on the track.

But if the trolley track and hangers are not properly made, they are likely to give as much trouble as any other style. It is, therefore, important to get **perfect** track and **perfect** hangers.

Here are the points to be watched:

1. There should be no contact between the hanger and the side of the track—if the wheel rubs on the side of the track the hanger will run hard, scrape and bind.

2. Wheels should be accurately machined, round and smooth and should run on heavy roller or ball bearings. If not properly machined, the wheels will sooner or later cut through the track.

3. The hanger pendant must not rub on the flanges of the track, but should always be centered between the flanges, as shown in cut.

4. The track must be uniform as to size and shape, absolutely straight and true throughout its entire length. Specially selected steel is required, of great strength and durability.

The only properly designed and perfectly made trolley hangers are those bearing the name, "Richards-Wilcox." If anyone doubts it, an actual comparison will quickly remove the doubt.

Builders who want perfect operation and dealers who desire to supply their trade with the best goods should look for the name "Richards-Wilcox" on every length of trolley track. Any slight difference in price between R-W hangers and others is more than offset by their superior operation and greater durability.

No. 321 "CHAMPION." The hanger that leads the Canadian market.

LOOK FOR THE NAME "RICHARDS-WILCOX" ON EVERY LENGTH OF TRACK

If you have not received your copy of Catalog C-2 (160 pages) showing the finest line of quick-selling Hangers and Hardware Specialties on the market, kindly let us know.

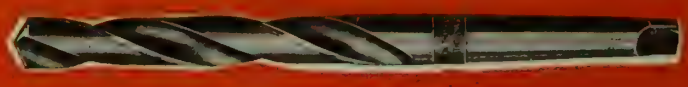
BUTTERFIELD

Carbon and High-Speed
TWIST DRILLS

It takes a mechanic to appreciate the excellency of **Butterfield Twist Drills.**



We have been making cutting tools long enough to know the mechanic's desires. In fact the name **Butterfield** is to cutting tools what **sterling** is to silver.

Once a **Butterfield** user always one. That's the kind of business for your store. Handling a line that brings back customers for more.

Write us for our new catalogue A listing our complete line of **Twist Drills and Milling Cutters,** also catalogue No. 17 listing Taps, Dies, and Reamers. Ask for prices, too. We want you to share in the success and profits that other **Butterfield Dealers** are experiencing.

BUTTERFIELD & CO., INC.
ROCK ISLAND, QUE.

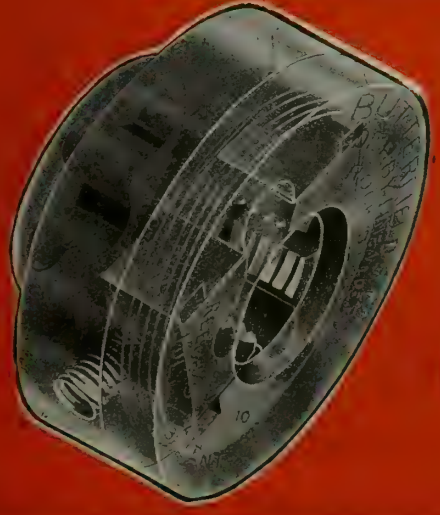
REECE'S

SCREW PLATES

SAVE

Labor—
because they make thread cutting a one-man job. The mechanic can do more work in a day with less effort than formerly.

Time—
because they are adjustable to cut any size of thread. No time wasted in changing dies.



Money—
because threads cannot be spoiled for the guide is cast solid with the collet and cannot work loose.

Reece's Screw Plates have all the advantages of solid dies, with none of their disadvantages. Mechanics everywhere pronounce them the ideal cutting tool. Dealers are making many sales and splendid profits selling them. How about you? Are you out for more business this year? Then send us a postal to-day for particulars that will acquaint you with the **Butterfield Line.**

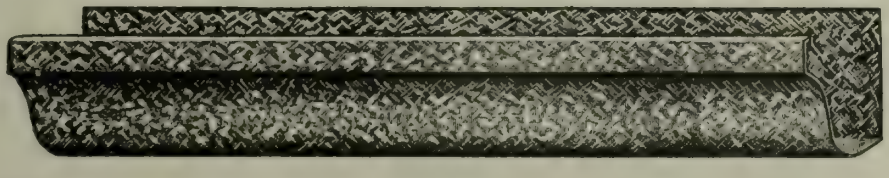
ROTARY VENTILATOR

You will find our eavestrough and conductor pipe easy to put together on the job, thus saving time and money. They have been the standard for many years.

We were the first manufacturers in Canada to produce corrugated conductor pipe and have been the leaders ever since.



Our corrugated iron roofing and siding is pressed one corrugation at a time instead of being rolled and will line up uniformly straight, with good, deep corrugations.

We also make ridgerolls, valleys, skylights, ventilators, conductor heads, elbows, conductor hooks, finials, solder, speaking tube and whistler, curved eavestrough and mouldings, etc., and carry a large and well assorted stock of galvanized sheets from 12 gauge to 10¾ oz.

We ship while others are thinking about it.

WHEELER & BAIN

STORMTIGHT

No Leaky Roofs For Ten Years

Coat your roofs, old or new, with STORMTIGHT and they are covered by our ten-year guarantee.

Come rain or snow, heat or cold, the water-proof oils and gums and the asbestos fibre of STORMTIGHT will remain steadfastly water-tight.

Easy To Put On

Apply it in any weather on any roof surface——tin, wood, tile, stone, brick, slate, concrete, canvas, composition, etc.

For your convenience STORMTIGHT is furnished in plastic form, to be applied with a trowel, or liquid to be brushed on.

Plastic STORMTIGHT is especially recommended for repairs to leaky joints, breaks, flashings and over shingles where extra body is required.

STORMTIGHT saves labor and material expense. Investigate.

Our customers know——write for their testimonials and full information to Department 41.

Demon Grip Pump Rod Couplings

The fact that **Demon Grip** pump rod couplings are made of steel is ample proof of their superiority.

Steel-to-steel prevents thread stripping, and the length-wise split takes care of over-sizes.

The **Demon Grip** coupling is the strongest place in a line of pump rods, instead of the weakest. Your customers will appreciate that. Tests have shown that the **Demon** will stand a pull of five and a half tons, while Malleable Couplings were destroyed by one and a half tons. A pump rod with **Demon Grips** is straight and true. Sold by reliable jobbers. Put up in convenient boxes of twenty-five each.

Send your Jobber a trial order to-day. There are good profits in them.

NUMBER ONE

The WRIGHT BROTHERS

IN 1896, Wilbur Wright and Orville Wright of Dayton, Ohio, decided to abandon several small business enterprises in which they were interested and concentrate their entire force and inventive genius on the perfection of a flying machine. Up to the time they entered the field no one had ever studied the subject with such scientific skill or such undaunted courage.

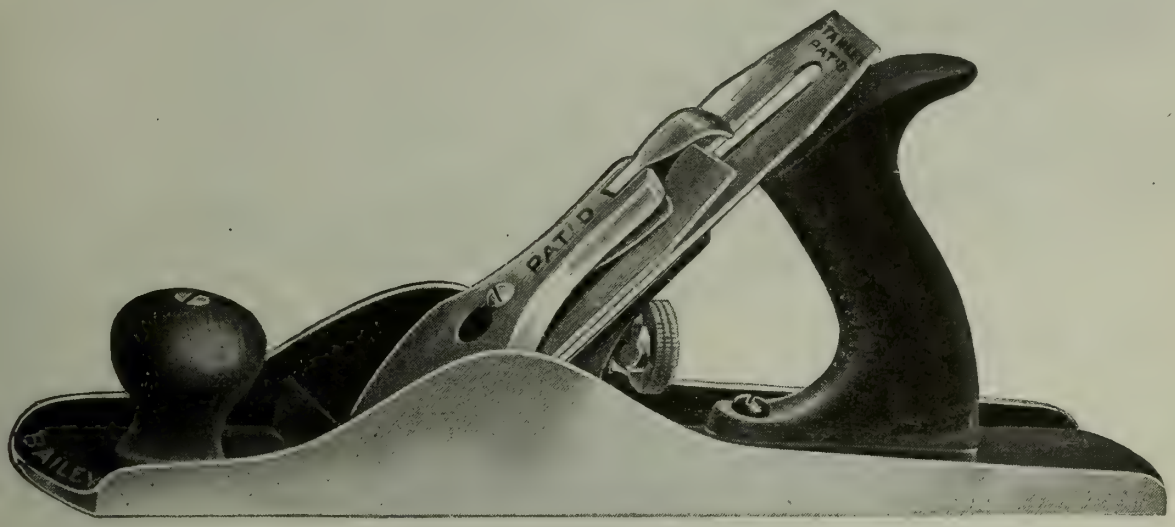
The Wright Brothers were masters in all their work. After years of concentration they gave to humanity a gift which ranks in importance with the noblest achievements the world has ever known.

The secret of Wright Brothers' success was

CONCENTRATION

The same principle of concentration, which enabled the Wright Brothers to perfect their Airplane, has enabled us to create the Victor Hack Saw Blade—which is recognized everywhere as the last word in Hack Saw Economy.

For twelve years we have focused all our force on the perfection of this one tool—the Victor Hack Saw. We have centered our powers on making exhaustive experiments and on the development of new processes.



Logic told us that by concentrating all our energies on one tool, we were more likely to produce a Hack Saw Blade which would excel all others, than if we tried to perfect a dozen or a hundred different tools.

As a result of this concentration, we have created the most enduring and efficient Hack Saw Blade known to science. There is nothing vague about the economy of the Victor Hack Saw Blade. It has been proven.

BAILEY IRON PLANES

The Standard For More Than Fifty Years

No matter what other makes of Planes a Hardware Dealer ordinarily carries, his stock should include a full line of **BAILEY PLANES.**

Their great reputation among all users of wood-working tools and the exceptional quality of the material and labor that enters into their manufacture, has created a demand that insures quick sales and customer-satisfaction.

Made in the Canadian Works of the

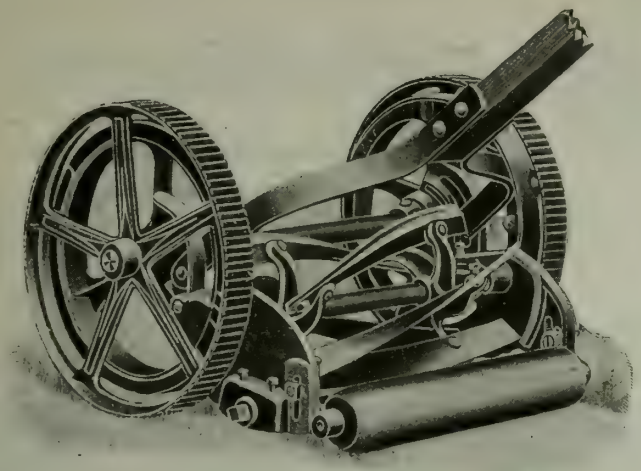
STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN. U.S.A.

Canadian Representatives---A. MacFarlane & Co., Ltd., Montreal, Canada.

The Nationally Advertised Hack Saw

Star Hack Saws are being advertised nationally in a larger way than any other tool. The schedule of full page ads in the Saturday Evening Post is now being increased to double pages at a cost of $10,000 a piece—a yearly advertising appropriation on Star Blades of more than $100,000.

There are big possibilities in the sale of Star Blades to factories and smaller shops, to plumbers, steam-fitters, iron workers, electricians, garage men and every mechanic who cuts metal.



If you get behind the green box with the black label, Star Blades will move now as hack saws never moved before. Our advertising is making Star Hack Saws, for so many years the leading blades, more than ever the dominating hack saws.

Be sure you get your share of Star Blade profits.

Our popular handbook "How to Sell Tools" will be sent free for the asking.

Williams' "Agrippa" Tool Holders

FOR nearly half a century we have been designing and making drop-forgings and drop-forged tools. Our trade-marks, "Vulcan" and ◇W◇ and "Agrippa" are known throughout the world wherever machinery and tools are used; they represent our constant endeavor to maintain and improve quality—to put *Superior* into our product—to make it individual and worthy of the high standard long established for Williams' goods.

Williams' "Agrippa" Tool Holders are a case in point. They embody all the improvements in design, material and practice suggested by experiment with former models. No pains or expense that will add to their efficiency is spared in their manufacture. Many of their features are unique and make for economy and convenience. A full line in a wide range of sizes is carried for various classes of work, including

Turning	**Boring**	**Threading**
Planing	**Cutting-off**	**Knurling**
	Side Work	

These tools, as well as Lathe Dogs, Clamps, Caliper Gauges, etc., are all described in our Machinists' Tools Booklet—free on request.

Selling Your Customers on Goodyear Cord Hose

YOU have seen the advertising that put Goodyear Cord Tires across. That put millions of Neolin Soles in use. Now we're covering Canada from Halifax to Vancouver with a dominant campaign to sell Goodyear Cord Hose.

Goodyear Cord Hose is constructed like the famous Goodyear Cord Tire—layers of strong, pliable cords embedded in good rubber. Welded without seams into one unit—with a smooth cover. It will not kink or tangle. It costs the buyer **less** because of the extra wear it gives.

We are prepared to co-operate fully with the retailer. We will supply window-displays, sales suggestions, advertisements for the dealer to run in his local paper. Advertising circulars that can be mailed for 1c or distributed from door to door.

Take full advantage of this opportunity. Feature Goodyear Cord Hose when the advertisements are pulling — when the public is learning its merits.

Order Goodyear Cord Hose from your wholesaler. Plan now to get your share of this master advertising.

BEWARE CHECK CROOKS

IF you were to refuse to be interested in the Dimunette Check Protector you would save yourself no more than ten dollars.

On the other hand, you might at the same time lose every cent you own.

For what safeguard, what evidence have you to show of your own care, if the bank cashes any check issued by you without "effectual protection."

A pen and ink—a bottle of acid—and someone of the many people who may handle your check before it gets to the bank—

—And poverty, absolute stark ruin, may stare you in the face!

Last year check crooks cleaned up over $20,000,000 by raising and altering checks lacking proper protection.

Business men all over the continent are becoming wide awake to the situation. The jobbers in the hardware trade are uniting to help ward off the check crooks.

Illustration is one-half actual size of machine

Finished in brushed bronze effect with black and nickel trimming

A shipment of "Dimunette" Check Protectors has been secured. This simple, sturdy approved device is made by the oldest concern of its kind in the world. Through the "Dimunette" it is now possible for every merchant to get standard protection at the lowest possible cost.

A ten dollar bill buys the "Dimunette." One operation and your check—personal or business — is protected. It defies the wiles and skill of any check crook. It is true this Check Protector may never save you a cent—it may save you every dollar you are worth.

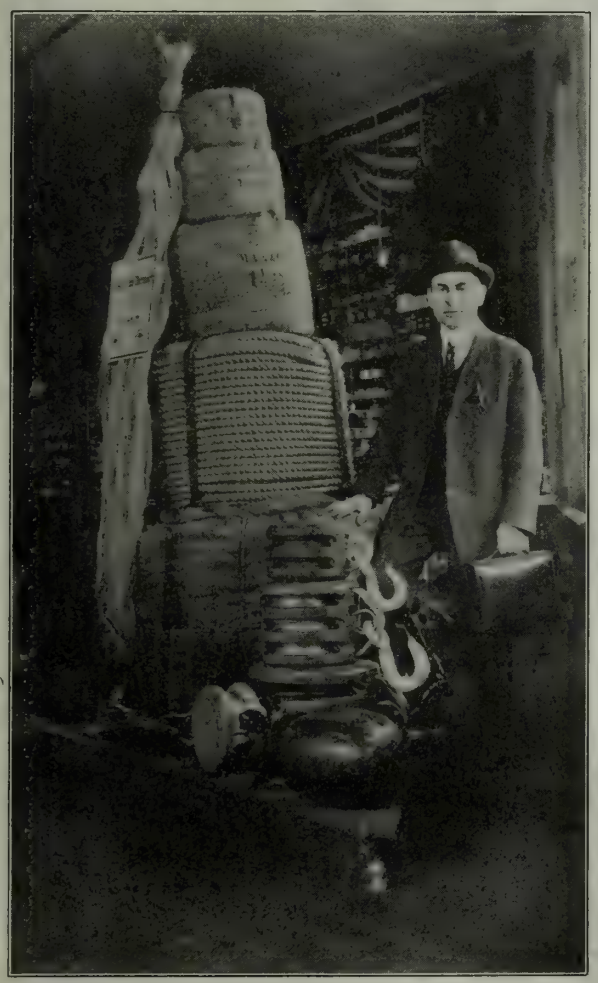
DIMUNETTE

CHECK PROTECTOR

For Personal and Business Use

For the sake of ten dollars you simply can't afford to leave your bank account without the positive surety of this *legal* safeguard. Ask the next jobber's representative who calls. He can supply you with a Dimunette in a few hours.

By "Standard Check Protection" is meant that process which shreds the paper and impregnates the fibre with acid-proof ink. *Standard Protection has never failed.*



If your jobber can't supply you, write us at once.

LIGHT—Weighs only 28 lbs. One person can carry it from position to position.

COMPACT—Height from floor to top is 33½ inches; width is 20 inches; depth is 14 inches.

ATTRACTIVE—Proportions are pleasing. Color is pearl grey. Finish is enamel — double-coated. An inconspicuous article of furniture, yet has style. Door is defined by heavy embossing. Name, "FROST KING" is in gold on embossed medallion.

STRONG—Made of sheet metal heavily galvanized (rustless). All parts bolted together so they can be taken apart or repaired simply. Construction is first-class. Hinges are solid and stout.

SANITARY—No wood or other absorbent materials used. Dampness, odors and germ-breeding surfaces and corners entirely absent.

LARGE ICE HOLDER—Ice holder is galvanized sheet steel, with a capacity of 25 lbs. of ice. Measures 18 x 11 x 8 inches. Is instantly removable. Ice put in from top. Top lifts in its entirety.

COMMODIOUS FOOD CHAMBER — Measures 18 x 13 x 19 inches. Has grill self removable, made of galvanized sheet metal.

DROP DOOR—Door is hinged horizontally and when open forms a braced shelf.

INSULATION—Ice holder is suspended in ice chamber and is separated from outer walls and top by air chambers after the manner of a thermos bottle, thus economizing in ice and maintaining an even icy-cold temperature.

WATER ESCAPE—Water drains to waste pipe, which empties into pan placed under the refrigerator or through a pipe passing through the floor.

FEET—Refrigerator has cast-iron feet, bolted on. Bottom of refrigerator stands 5 inches above floor. Thus ample space for pan for water from melting ice is provided.

The "Frost King" is suitable for any home, summer residence, apartments and especially adaptable to camp use.

Procured from all leading jobbers or direct from us.

The Royal Fireless Cooker

The FIRELESS COOKER is recognized as one of the most useful and economical devices ever introduced into the kitchen.

SAVES—FUEL, TIME, ANNOYANCE

COOKS FOOD BETTER (no waste of real qualities contained in the food), adds to health, both from better food and the lessening of labor in preparing it. *NO ODORS OF COOKING* in the house.

TIME SAVED for other occupations—sewing, reading, or pleasure. Will pay its own cost quickly in *FUEL SAVED.*

FOR THE DEALER it is extremely profitable, a splendid parallel to stove lines. Every user becomes a missionary spreading the wonders of the *FIRELESS COOKER. It's a winner all round.* Literature on application. Plenty of references from satisfied users.

Cookers also made containing an *ELECTRIC ELEMENT* that can be attached to an ordinary *lamp socket.* No special power installation required. No loss of electricity. No loss of heat by radiation, etc.

We also make a *STEAM COOKER* that cooks a whole meal, in separate compartments. Can be used on one burner or hole of stove or will be supplied with an *ELECTRIC ELEMENT* for attaching to the lamp socket.

Write for catalogue, price lists and information regarding the wonderful working of these FIRELESS COOKERS to—

SUCCESSOR TO
CUTTS HARDWARE CO.
HARDWARE MERCHANTS
TORONTO

Cameron & Campbell,
578 Queen St. E.,
Toronto.

Dear Sirs:-

On various occasions we have been asked who supplied the wall fixture for our store in West Toronto. We of course are always pleased to refer enquires to you and do not fail to mention the excellent service we have received from your firm.

We expect when our present plans on which you are now working, are completed, to have an exceptionally well equipped store which will greatly facilitate the service we always aim at giving our patrons. We consider Cameron & Campbell fixtures a valuable asset to any hardware store.

We are,

Yours truly,

CUTTS' HARDWARE COMPANY,

Manager.

Perhaps you have a wall case in mind —one that will just fit your needs and enable you to give that service you pride yourself in.

It was just such a mental vision which Mr. C. D. Cutts, of West Toronto, had when he called us in to ask our opinion. The result was a

Cameron & Campbell

WALL CASE

MADE-TO-ORDER

and a satisfied customer, as the accompanying letter would indicate.

We pride ourselves in our service—in our ability to give our patrons what they want and as near when they want it as possible.

Draw out a rough plan of what you require and submit it to us for an estimate.

NOTE---Cameron & Campbell Wall Fixtures are made with metal shelf boxes and also felt-lined display case. Note the case shown above.

Made of Galvanized Iron with Black Iron Drawers, Self-Closing Doors, Removable Screens

This makes ash-sifting a pleasure instead of a horror ; you can wear your best clothes and yet not get any dust on them.

It is dustless; you don't have to rock it or shake it; it is self-operating, a child can work it.

We guarantee that this ash-sifter will give satisfaction or your money refunded. There are good profits in it for the dealer.

MAPLE LEAF FURNACES

A Complete Line of Hot Air Furnaces

Thousands Giving Satisfaction

Divided radiator gives double heat travel.

Many furnaces are so constructed that the coal gas travels first to the flues at front causing escape of gas when the fire door is open. It is not so with the Maple Leaf construction. The gases are drawn away from the fire door and confined to flues until they reach the smoke pipe.

Easily cleaned flues. Heavy two-piece Firepot. Four Heavy triangular Grates.

The Beach Foundry Co., Limited

Ottawa, Ontario, Canada

THE BANNER FURNACE

Sectional View of Banner Furnace.
For HARD Coal, SOFT Coal, COKE or WOOD

The **Furnace** is the most expensive part of the

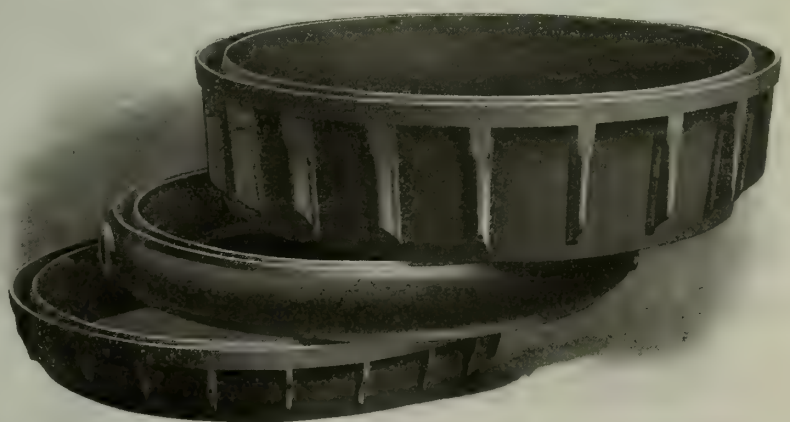
Heating Plant

The buyer should examine it carefully to see whether the maker has used brains in designing it—care in choosing his materials, and skill in building it.

The Banner Furnace has proven its worth for many seasons, and under all conditions.

The Banner Furnace is mechanically correct and built to last. Every part of furnace that comes in contact with the fire is made of Cast Iron. For instance, a solid Cast Iron **Combustion Chamber.**

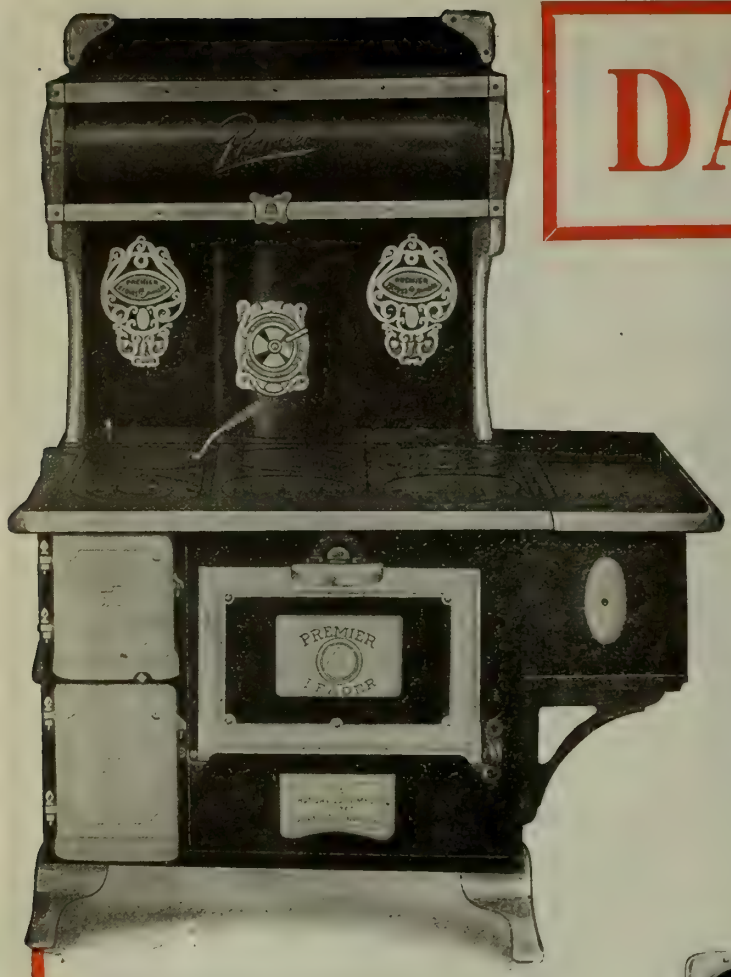
Combustion Chamber



The **Fire Pot** is made in two sections, with a cup joint.

The **Grate Bars** are triangular in form, four in number, two of which are shaker bars.

The **Water Pan** is large and placed in the best place to give satisfaction.



The **Gas Ring** is exceptionally convenient, and is supplied when required. No trouble when changing from Gas to Coal; no parts to remove.

Many good towns open, where good Agents are wanted.

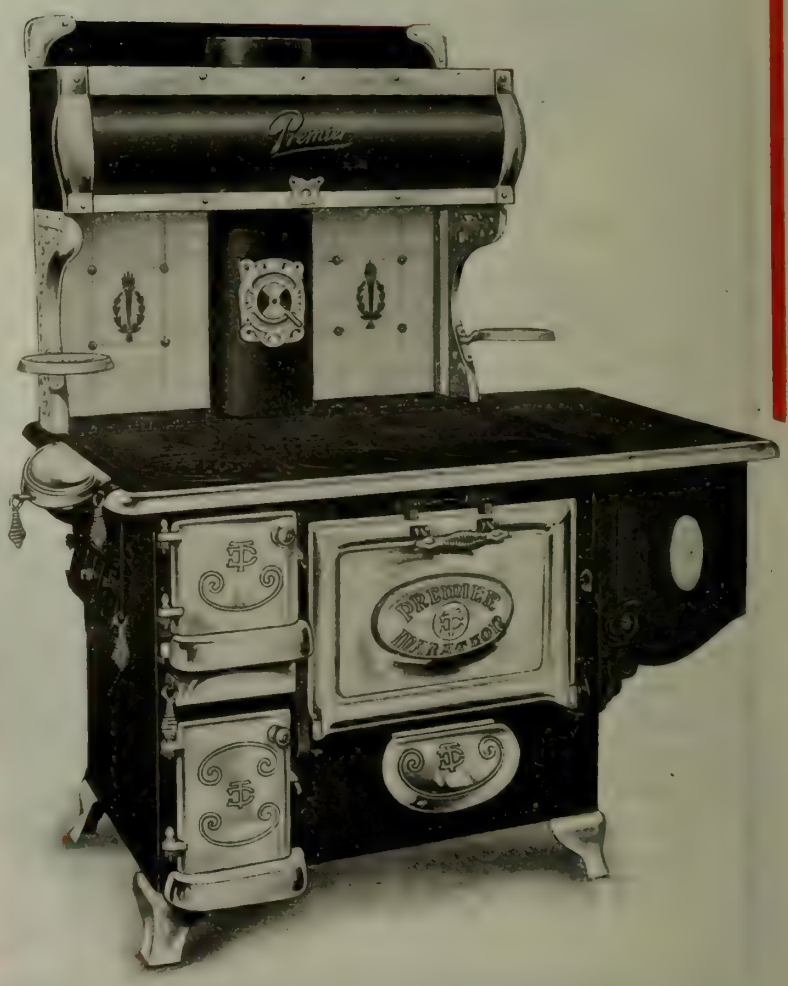
GALT, ONT.

DAVIDSON'S

Premier Marathon
Premier Cordova
Premier Leader
Premier Royal
Premier Chieftain

PREMIER RANGES is the line that gets the business---and it's good business, too. Shows big returns to the customer in *never-failing* "absolute satisfaction" and to the Dealer in ample profits.

There's a "Premier" For Every Purse



The Premier Leader

The most economical steel range you can recommend to your customers. Strong, durable, well made and at a price that makes it a "good buy." Its exceptional finish and splendid appearance make an instant appeal to the prospective purchaser. Housewives appreciate its fine cooking and baking qualities on a minimum of fuel consumption.

The Premier Marathon

This is without a doubt the best value we can offer you in a high grade steel range. Fitted with our Persian closets, comprising tiled back and pipe. Firebox best ever designed. Grates and linings very substantial. Oven proved best by experience—can't buckle. Body of heavy polished steel practically indestructible.

Write us for information about any of these ranges. There are good profits in them and they are rapid sellers.

The Thos. Davidson Mfg. Co., Limited

Toronto MONTREAL Winnipeg

DAVIDSON'S

Water Coolers
Refrigerators
Freezers
Filters
Ice Chests

What of the summer time—with its hot, scorching days? We do not venture to predict what this summer will be like, but we do predict a very disappointing time for the dealer who fails to consider his **"hot weather"** needs early. The lines here illustrated possess all the most modern and up-to-date features that go to make them rapid sellers. Made with that same exacting care that has put all **Davidson products** in the front ranks of **"High Quality."**

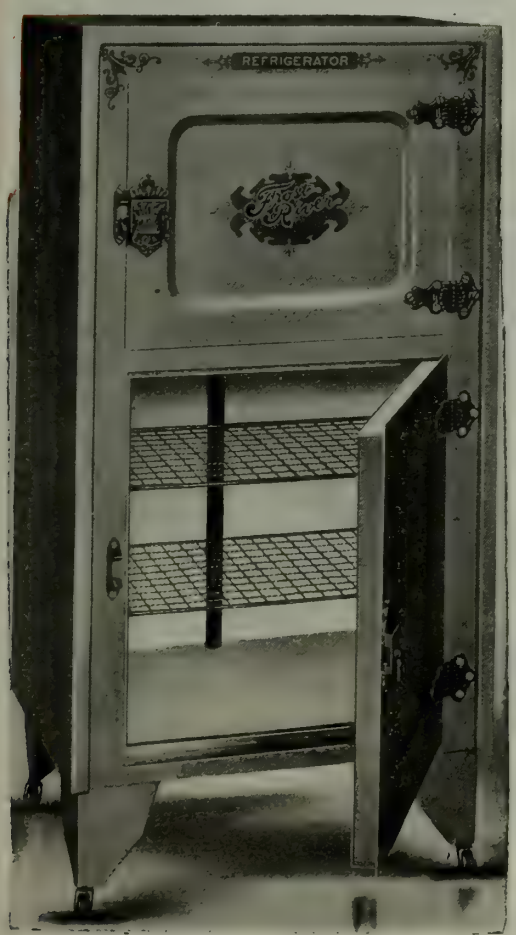


Fig. 452

Davidson's Water Coolers

Capacity 3 to 10 Quarts

Japanned in French grey and handsomely decorated, plated faucets. Properly constructed — they are used universally and recognized as the standard for hard usage. Extra carbons supplied separately.

Davidson's Frost River Refrigerator

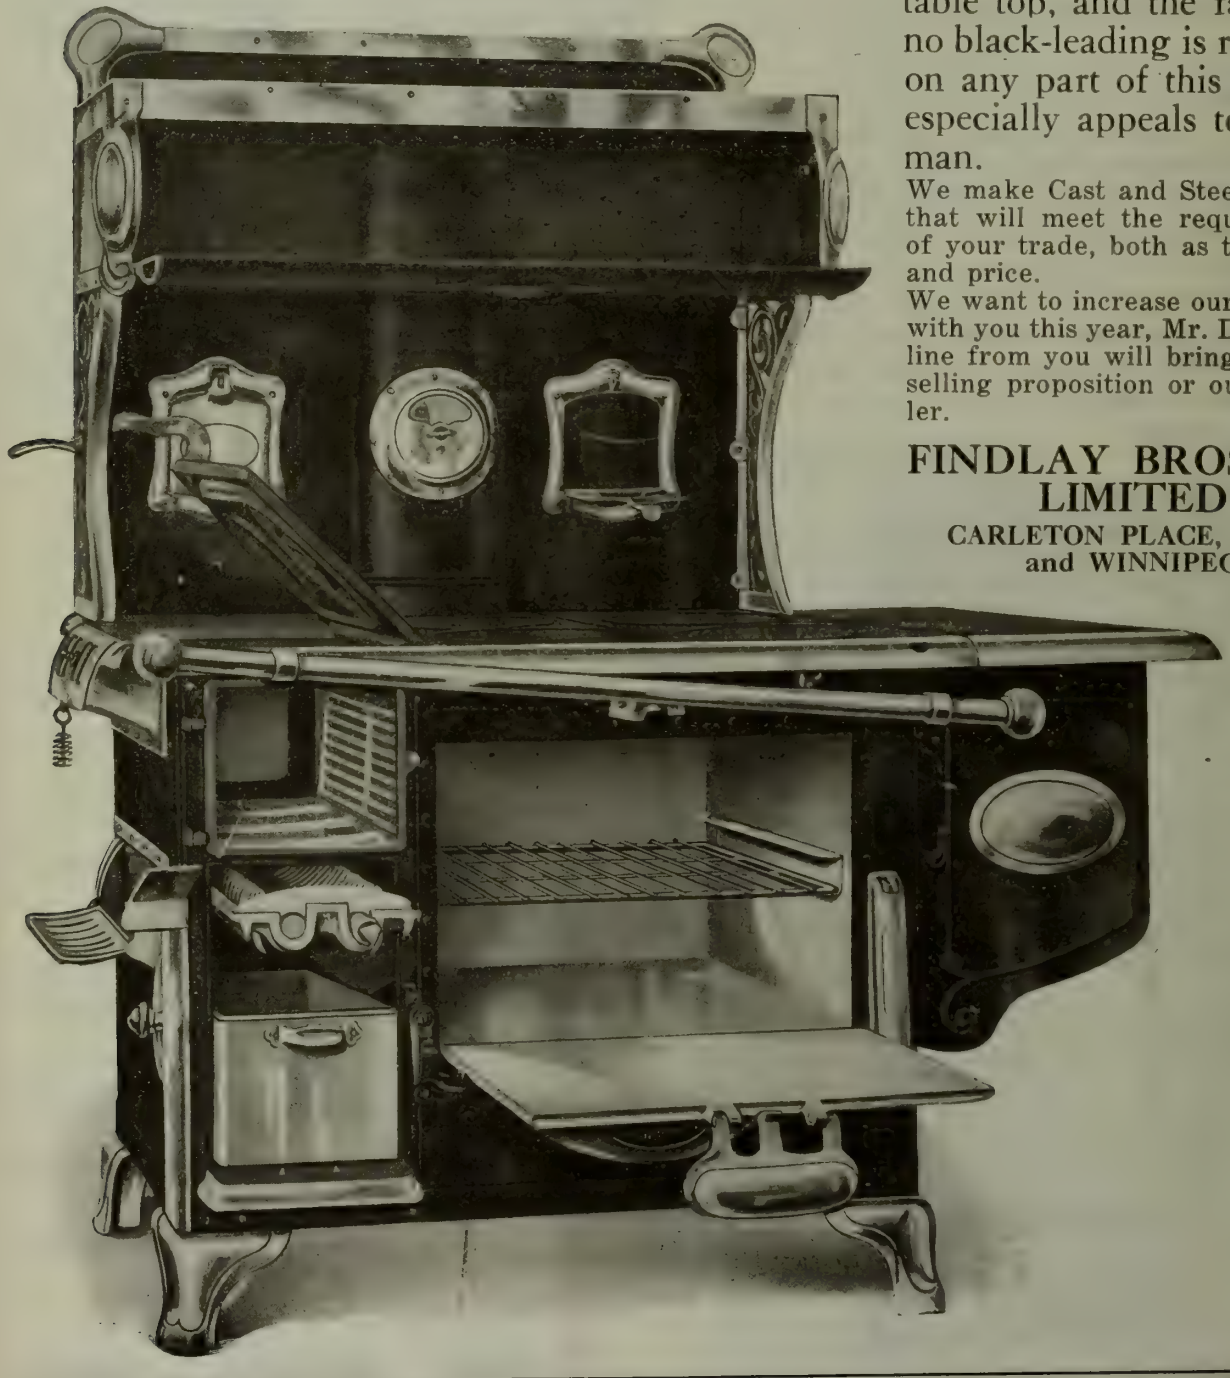
Made of galvanized sheet steel finished outside with beautiful French grey enamel, and inside in snow-white enamel. Fitted with tinned wire shelves which will not rust. Inside parts are removable for cleaning. Locks, hinges and handles are of polished solid brass. Made in three sizes.

The "Frost River" uses much less ice than a wooden refrigerator—a good feature in these days of high prices.

Write for prices on these good summer lines.

The Thos. Davidson Mfg. Co., Limited

Toronto MONTREAL Winnipeg



The Kitchen Masterpiece

Findlay's Universal

The UNIVERSAL has the appearance which counts for a lot, but above all, it is a dependable Range. It represents quality, service and satisfaction.

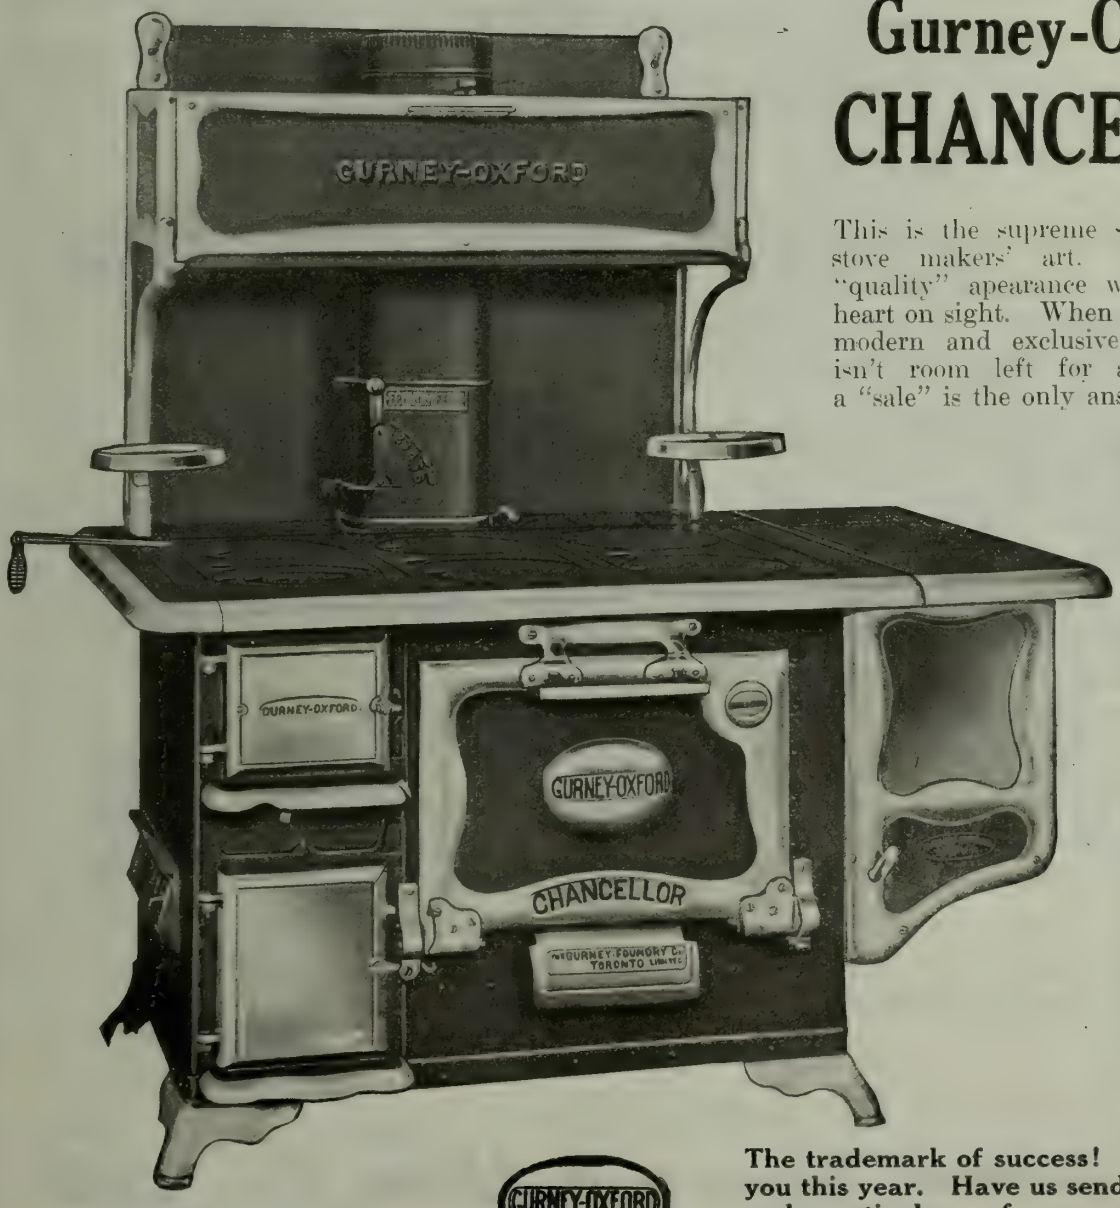
The sale of a FINDLAY UNIVERSAL means a satisfied customer, more business for your store, and the selling of a number of other of these Ranges in the same district.

There are lots of good homes in your district, who will pay the price for a good Range of this class. One of its strong features is the roomy, level, burnished table top, and the fact that no black-leading is required on any part of this Range, especially appeals to a woman.

We make Cast and Steel Ranges that will meet the requirements of your trade, both as to quality and price.

We want to increase our business with you this year, Mr. Dealer. A line from you will bring you our selling proposition or our traveller.

FINDLAY BROS. CO. LIMITED



CARLETON PLACE, ONT., and WINNIPEG

REVILLON WHOLESALE LIMITED, EDMONTON

Wholesale Jobbers for Alberta

A Matchless Seller

This superb Gurney-Oxford Steel Range, the well-known 'Chancellor," is a "matchless seller" in every sense. Easily sold because of the admitted prestige and reputation of the House of Gurney—foremost since 1845. But—best of all—it gives wonderful service and satisfaction when sold. Every "Chancellor" home is a life long friend and customer for the dealer who sold it.

Gurney-Oxford CHANCELLOR

This is the supreme standard of the stove makers' art. Its handsome "quality" apearance wins a woman's heart on sight. When you mention its modern and exclusive features there isn't room left for an argument—a "sale" is the only answer.

SOME OF ITS GOOD POINTS

- Heavy, best quality blue steel construction.
- Polished Top.
- Special Grate.
- Divided Flues.
- Special heavy nickel trim.
- Large, extra efficient oven.
- Copper reservoir, 12 Imperial Gallons.
- Drop oven door.
- Big drop door warming closet.
- Arranged for hard or soft coal or wood.
- Splendid finish all through.

THE GURNEY FOUNDRY CO., LIMITED

Toronto Montreal Winnipeg Vancouver

"Triplex Jewel"

COMBINATION RANGE

The Range that caused so much favorable comment at the Hardware Men's Convention held at Hamilton last month.

The newest and most up-to-date Combination Range yet made, every modern feature being embodied in its construction.

In one second, by a slight forward movement of the lever at right side of oven the range is changed from a coal and wood to a gas burner, all dampers and ventilators being automatically set in proper position.

A reverse movement of this lever again changes the range to a coal and wood burner, placing the oven burners in an out-of-the-way-position and resetting all dampers.

Note Particularly that with the *Triplex Jewel* there are no loose oven burners to be placed and removed, no cumbersome baffle plates and the possibility of forgetting to properly set dampers and vents is eliminated as all are automatically operated.

Don't fail to examine the construction of the oven of the *Triplex Jewel,* you will be convinced that the system of ventilation is perfect and unequalled.

—The Range that will be in demand—

Stoves, Ranges and Furnaces

THE RECORD EXCELLO

Warm Air Furnace

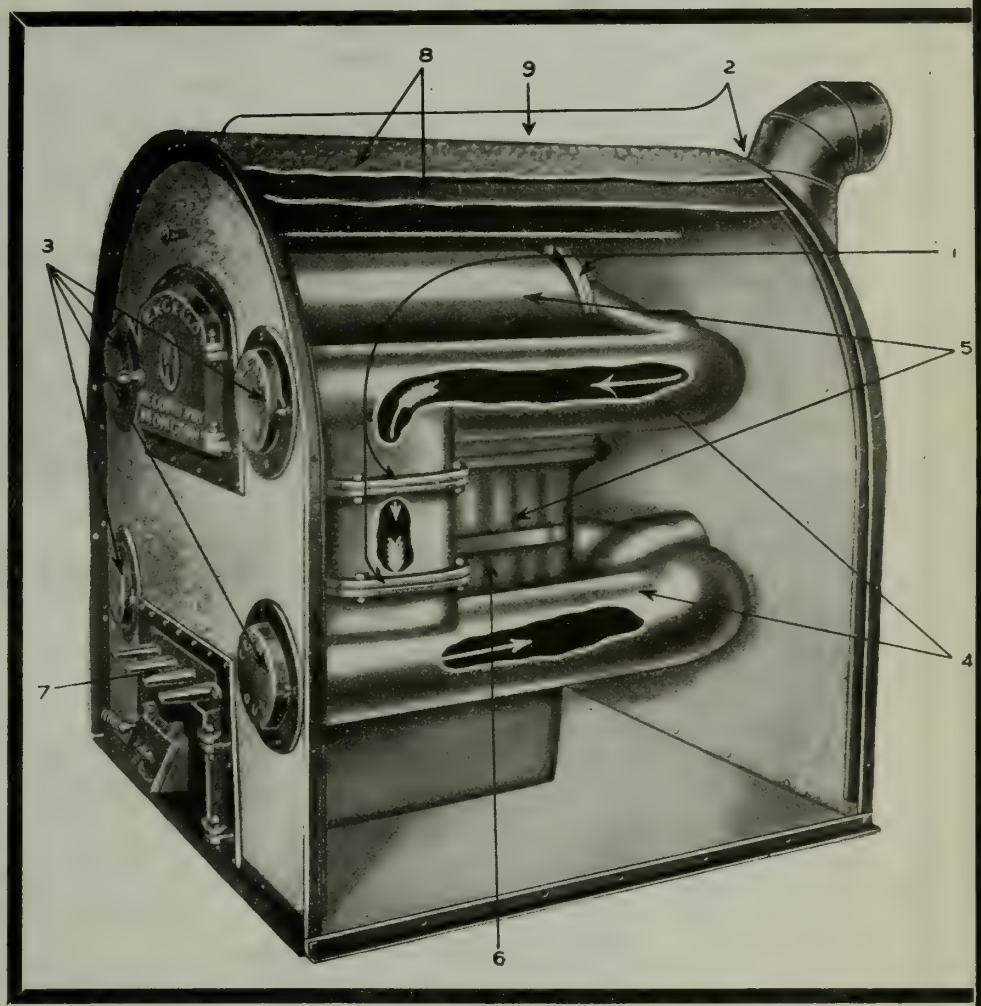

FIG. 1—Showing the SHEET ASBESTOS GASKETS bolted between iron flanges, making absolute GAS and DUST-PROOF joints, which is a most important improvement over the old-style joints.

FIG. 2—Showing the simplicity of construction of the EXCELLO over all other furnaces, as it is not necessary to disturb the hot air pipes or casing in making repairs, as the casing can be simply raised up from the bottom and the whole inside of the FURNACE may be examined or repaired.

FIG. 3—Showing the cleanout FLUE CAPS which only have to be lifted off to get access to the interior of the FLUES.

FIG. 4—Showing the perfect indirect downward draft flue construction, the effect of which is to retain the products of combustion in the flues much longer than any other furnace made.

FIG. 5—Showing the long fire travel, giving positive assurance that the EXCELLO has the largest amount of direct radiating surface in proportion to the grate surface of any heater made.

FIG. 6—Showing the most perfect fire pot ever constructed with perpendicular sides which overhang the sides of the ash pit one-quarter of an inch, making it impossible for dead ashes to accumulate.

FIG. 7—Showing the triangular roller grates with no frame or gears to warp or break.

FIG. 8—Showing the double casing one inch apart, the outside one being made of galvanized iron, and the inside one of pure tin.

FIG. 9—Showing the low down construction at the EXCELLO, which is only 40 inches from the bottom to the top, which is about 30 inches lower than the ordinary make of furnaces.

The EXCELLO wil burn all kinds of fuel equally well. Hard coal, soft coal, coke or wood, and will radiate 18 per cent. more heat from the same amount of fuel than any other furnace made.

We do not pretend to compete with makers of cheap-made, low-priced furnaces, but if you wish a really first-class heater, we have it in the EXCELLO.

Write for our furnace hand book explaining this furnace.

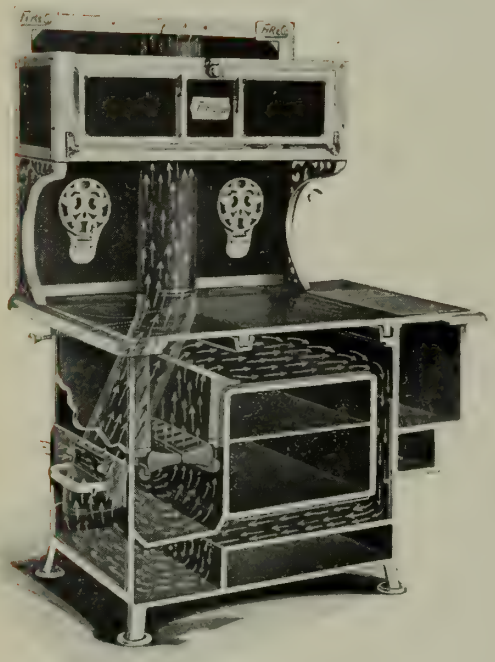
Announcement

¶ The Canada Stove and Foundry Company, Limited, desire to advise you that their representatives are now on their several routes. To those who have not been called upon we would ask that they defer ordering until they see what we have to offer. This year should be a notable one for both maker and dealer in "Canada" lines. Our variety is all that could be desired—quality of real excellence and values that we believe are unequalled. It is with unbounded enthusiasm and utmost confidence that we look forward to a banner year—increased sales—satisfaction—success for you and all of us.



The Canada Stove and Foundry Co.

LIMITED HEAD OFFICE VILLE ST. LAURENT MONTREAL

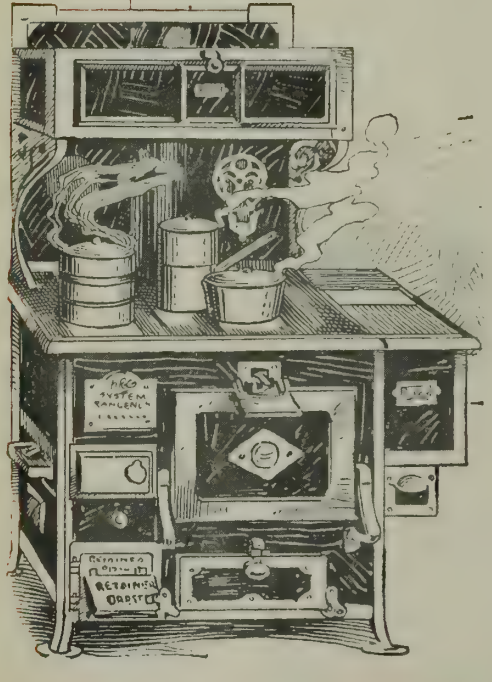
MAKERS OF ORIGINAL STOVES, RANGES, HEATERS, AND ALL KINDS OF APPLIANCES USING COAL, WOOD AND GAS

FiRēCo

REGISTERED

The science of Heating has made remarkable advances during the past few years. The apparatus invented, and the methods figured upon, have all had the one end in view—**the saving of fuel.**

There is yet to be invented, and yet to be improved, an apparatus or principle that approaches the



FiReCo SYSTEM

It's right up-to-date to the minute and many years ahead of all other known methods.

The FiReCo Ranges and Heaters are the only stoves on the market to-day made on the FiReCo Principle.

Dealers who are selling them are experiencing a most satisfactory volume of profitable sales and "good business."

TRADE FiReCo MARK SAVES FUEL

The FiReCo Range solves the Fuel Problem. Soft coal may be burned with equal facility as Hand Coal and minus the usual muss and dirt.

It conserves the heat
It economizes the fuel bill
It makes combustion complete
It prevents the flues being filled with soot
It gives absolute control of the fire
No gas can escape from this range
And saves 50 per cent. of Fuel Costs.

Requires 50 per cent. less labor to operate, with 50 per cent. less ashes to carry out, and gives 100 per cent. more cooking and heating satisfaction.

A combination of Efficiency, Economy, Sanitation and Simplicity.

It will pay you to investigate the "FiReCo" line.

We demonstrate this Range in your store—then you can talk it intelligently. Get it **now.**

THE HALL-ZRYD FOUNDRY CO., Ltd. Hespeler, ONT.

CALGARY EDMONTON WINNIPEG VANCOUVER

Before

After

"BEFORE"—To the stove dealer, this reproduction illustrates a familiar sight—the old stove that you allowed your customer a few dollars for in the deal for a new one.

Now, the question arises in your mind, "Shall I dump it in the junk heap, or put it in shape to sell again at an attractive profit?"

You have the extra fittings to put the inside in good order, and we have the equipment and expert workmen to put all nickel trimmings in the same condition as when new, and at a small cost.

What are the net results?

1. **You are in a position to allow your new stove customer more money for his old stove—he is thoroughly satisfied.**

2. **When you and we convert this old stove into practically a new one, as shown above as "AFTER," you will have a "most as good as new" stove to sell to a customer at a medium price—he will be absolutely satisfied.**

3. **Now you have made two sales instead of one—have two satisfied customers instead of one—have made two profits instead of one, and you are satisfied.**

4. **Now, remove all the nickeled trimmings from the old stoves you have on hand, wrap in old newspapers and pack securely in a box and send them along to us—we will make them look like new at a trifling cost, and we will be satisfied.**

5. **Up to now everybody is satisfied, and you can feel that you have conserved instead of wasted.**

We have been rendering this service for years and have scores of satisfied customers.
We have recently doubled our capacity and can give you quick delivery.
On receipt of your shipment of fittings we will quote prices for your approval.

Profitable Lines to Carry

THERE are many reasons why McClary's lines are profitable to carry. First, any line that bears McClary's Trade Mark is guaranteed the highest quality. Second, they carry the latest improvements. They are the result of seventy years' experience. Third, McClary lines are quick sellers affording a ready turnover—they are well advertised.

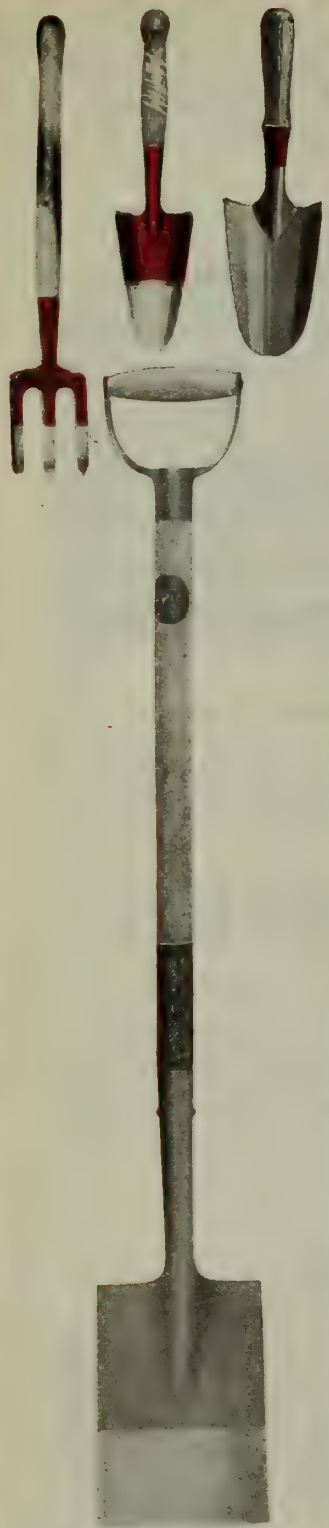
THE Florence Automatic Cook Stove, with mantel and McClary's Success Oven, is a most serviceable kitchen equipment, and is in great demand. It is thoroughly efficient and safe in operation. There are no wicks, no valves, and NO ODORS. The jacket attachment on the burner concentrates the heat on the cooking.

No. 419. "Florence Automatic" Oil Cook Stove, fitted with Mantel and No. 70 Success Portable Oven.

DAIRY SUPPLIES

These also are a most profitable and satisfactory line to sell. Besides being perfectly sanitary, these cans are strong and durable, made to withstand the rough usage of transportation from farm to dairy. They are extra heavily tinned. All seams and wearing parts are heavily reinforced.

STRAINER AND DAIRY PAILS



Our strainer and dairy pails are sanitary, all seams are flushed full of solder. Our catalogue of Summer Specialties, No. 97, is on its way to you.

Here are the Facts

HARDWARE AND METAL has been published every Saturday for the past 31 years. It is read by practically every worth-while hardware buyer in Canada, both wholesale and retail.

It is read by many hundreds of retail hardware and travelling salesmen each week. The market reports are not only used by the Canadian hardware trade in all its branches, but they are also used by the Dominion Government in preparing Annual Reports on Wholesale Prices in Canada.

HARDWARE AND METAL'S circulation is audited by the A.B.C., the highest authority on circulation in the world. Our circulation stands investigation at any time.

HARDWARE AND METAL is a unique trade newspaper, serving thoroughly the best class of merchants in Canada. Through the advertising department of HARDWARE AND METAL you can place your messages before the Canadian hardware trade in the most thorough manner and at the least possible cost. A request for further details will not obligate you in any way.

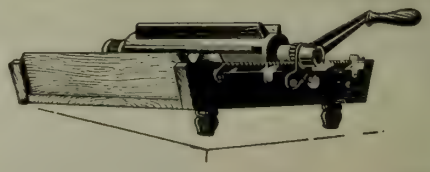
Maxwell

MAXWELL'S "HOME" WASHER

A high-speed, ball-bearing Washer that is light, noiseless and easy-running, enclosed gears making it safe in operation.

The construction of the dasher makes this type the best for the thorough washing of everything. It can be operated by hand power or water motor.

It is made in Canada of best quality cypress, and is superior in design, construction and finish to any imported washers.



"FAVORITE" CHURN

More Favorites are sold annually in Canada than all other makes combined. Barrel of best imported oak with aluminum-finished hoops, exceptionally large roller-bearings, easy running and durable. Note the bow lever handle, adjusted to turn left or right, as desired.

Maxwell's Philadelphia Butter Worker

Philadelphia Butter Worker results in better butter and bigger profits. Adopted by the best dairies everywhere.. Makes the butter firm, even and consistent. In three sizes—14 inches, 17 inches and 20 inches wide.

Write to us to-day for catalog and prices.

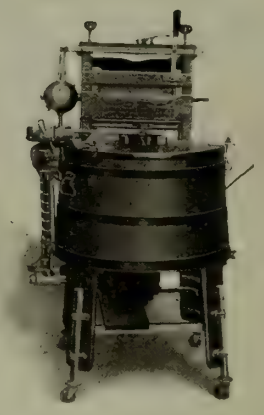
CONNOR

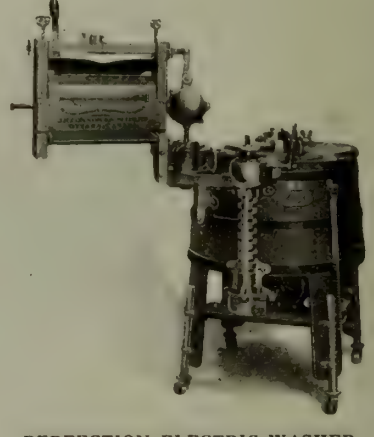


¶ The present line of Connor Washing Machines has been developed to give the utmost of service to the user and the greatest amount of satisfaction and profit to the dealer making the sale. This, of course, requires that the machines "Deliver the goods." Connor Washing Machines have been a household word for over 40 years; during that period we have endeavored to build into our product every idea which would in any way improve the working qualities of the machines.

¶ The splendid types of Washing Machines and Clothes Wringers, which we illustrate on this and the three following pages, show machines developed to the highest degree of perfection, and leaders in their respective styles.

¶ In selling Connor Washing Machines and CLOTHES Wringers you are offering to your customers goods of approved merit and of high quality, which have established an unassailable reputation for satisfactory service for nearly half a century, and which we pledge ourselves to maintain.

¶ Connor Washing Machines and Clothes Wringers are sold from Halifax to Vancouver. British Columbia dealers, write Brown, Fraser & Co., 1150 Harbor St., Vancouver. Alberta and East, address us at Ottawa. To dealers in Alberta, Saskatchewan and Manitoba we quote and ship F.O.B. Winnipeg. Ontario and East we supply from large stocks held in Ottawa and London, Ont.



¶ We have letters of appreciation from our dealers who have taken advantage of the service our advertising department is prepared to offer. This service is open to all Connor Dealers, and is eminently worth while. Look over the line which we illustrate and let us hear from you if interested. Our catalogue "E" is yours for the asking.

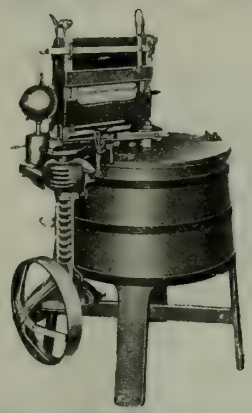
PERFECTION ELECTRIC WASHER

Electricity is playing so large a part in the labor saving in the home nowadays—the weekly washing—the hardest of all labor, can now be done by electricity.

We show above our Perfection Electric Washing Machine which is a machine of exceptional merit and of the utmost economy of labor and time in doing the hardest of all household work. Wash-Day now becomes Wash Hour without the usual confusion incidental in doing the Washing in the Old-Fashioned Way. Equipped with 4 winged Dolly.

PERFECTION ELECTRIC WASHER

This view shows the Swinging Wringer extended to use in connection with baskets or tubs placed on the floor or stands, or to use in connection with stationary tubs.



The Wringer can be swung to any desired position and can be operated in either direction, being fitted with a Reversible Water Board.

This Wringer is equipped with full 11 in. best quality 5-year guaranteed rolls, enclosed cogs.

Note the extension legs which allow this machine to be adjusted to any desired height.

J. H. Connor & Son, Limited, Ottawa, Ont.

CONNOR

PERFECTION GASOLINE POWER WASHER

This machine is in all particulars the same as the Perfection Electric Washer.

Angle Cleats are supplied with this machine so that the Washer can be attached securely to the floor.

This belt-driven machine is giving the very best of satisfaction, equipped with a 12-inch Pulley which runs from 250 to 300 R.P.M. Also equipped with a 4-winged dolly.

LOW PRESSURE WATER POWER WASHING MACHINE

This is a very satisfactory and popular Water Power machine. This Motor has met with more success than any other Motor we have knowledge of. It is giving the same splendid results to-day as years ago when we first put this machine on the market.

There is a big sale for this machine.

Equipped with 4 winged dolly.

PERFECTION ELECTRIC AND GASOLINE POWER —STEEL FRAME

In the accompanying cut we show the Perfection Gasoline Power Washer equipped as a 3-tub machine. It shows the Wringer extended, wringing from rinse tub to basket. This is also supplied in the Electric machine.

Perfection Electric, 2 tub, Steel frame.
Perfection Electric, 3 tub, Steel frame.
Perfection Gasoline, 2 tub, Steel frame.
Perfection Gasoline, 3 tub, Steel frame.

BEAVER HAND WASHING MACHINE

Equipped with machine cut gears, smooth and quiet running. The bulk of the machinery is on the side of the tub. Can be operated either standing or sitting, without stooping or bending.

We recommend this machine very highly where a high grade washing machine is desired. Equipped with open 4 winged dolly.

BEAVER POWER WASHING MACHINE

This machine is not equipped with Wringer—any hand power wringer, however, will fit this machine.

This is the Beaver Hand Power with Flange Pulley added for Belt Drive and makes a very efficient and medium priced machine. Equipped with 4 winged dolly.

CANADA FIRST WASHING MACHINE

A very popular machine cut gear washer with momentum fly-wheel. Very smooth and easy in operation. The lever handle very conveniently placed. Supplied with the open 4 winged dolly which provides the maximum circulation of the suds in the machine.

J. H. Connor & Son Limited, Ottawa, Ont.

CONNOR

CONNOR BALL BEARING, WOOD FRAME, WASHING MACHINE

The tub swings on large steel ball bearings. These ball bearings carry all the weight, and are arranged in a steel cup so constructed that they cannot get out of place.

By grasping the handle and swinging it to one side, the coil tempered steel springs stop it and start it back the other way with a quick reverse motion, as the tub travels the other way another spring swings it back again.

At each swing of the tub the boiling water by centrifugal force and suction is forced through every thread and fibre of the clothes, cleaning them with three times the rapidity, and more thoroughly than any other way, and doing it with very little labor.

CONNOR BALL BEARING WASHING MACHINE—STEEL FRAME

Works on same principle as the Wood Frame machine—the only difference being in the style of stand.

The Wringer remains on the machine during the washing and is thrown forward by relieving the small screw on the right hand side to open and close the cover.

The Slusher is attached to the cover, which, when open, allows the water to drain back into the tub. There is no post or obstruction inside this tub on which the clothes may wind and tear.

A very popular machine—neat and attractive of appearance.

GEM WASHING MACHINE

This is a High Speed machine—the handle can be operated from two different positions which allow the machine to be worked either standing or sitting.

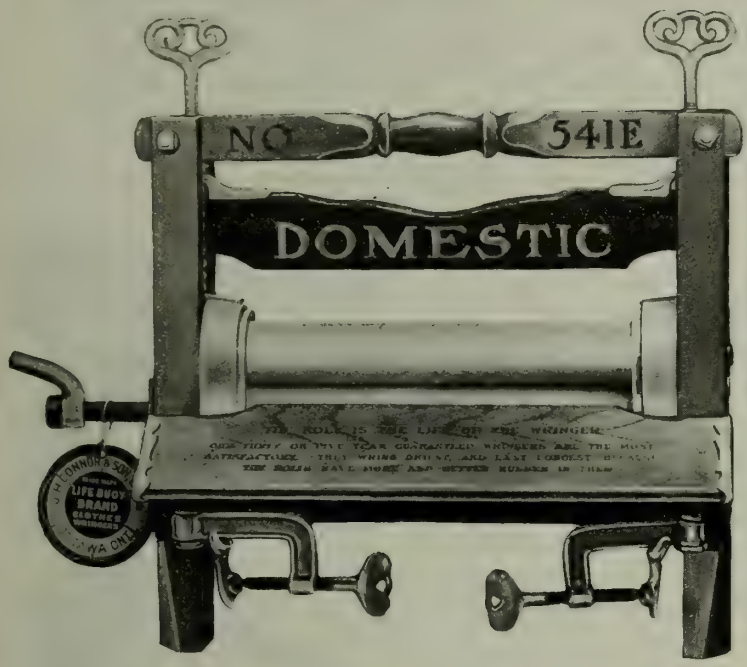
The momentum fly-wheel makes 7 complete revolutions to every complete rotation of the slusher, which makes this machine very easy to operate and does efficient work under the most favorable conditions.

WINNER WASHING MACHINE

A very popular Rotary type machine. Easy running, no cams or springs to get out of order.

OTTAWA WASHING MACHINE

A very popular type lever washer. The same quality of material and workmanship as our very highest priced machines.



CONNOR IMPROVED WASHING MACHINE

The original open rocker Washer. A success in the beginning and still very popular. Considered to be the best open Washer made.

J. H. Connor & Son Limited

OTTAWA, ONT.

CONNOR

Connor Clothes Wringers are made in three grades, carrying FIVE, THREE and ONE year guarantees. In exposed and enclosed cog types, with or without ball bearings, with spiral or elliptic springs in 11", 12" and 14" length of roll.

In this limited space we are unable to illustrate our full line of Clothes Wringers, they, however, are fully set forth in our catalogue which we will gladly mail you upon request.

DOMESTIC 541E

Ball Bearings.
Enclosed Cogs.
Spiral Springs.
Best quality 5 year guaranteed 11x1¾ in. Rolls.

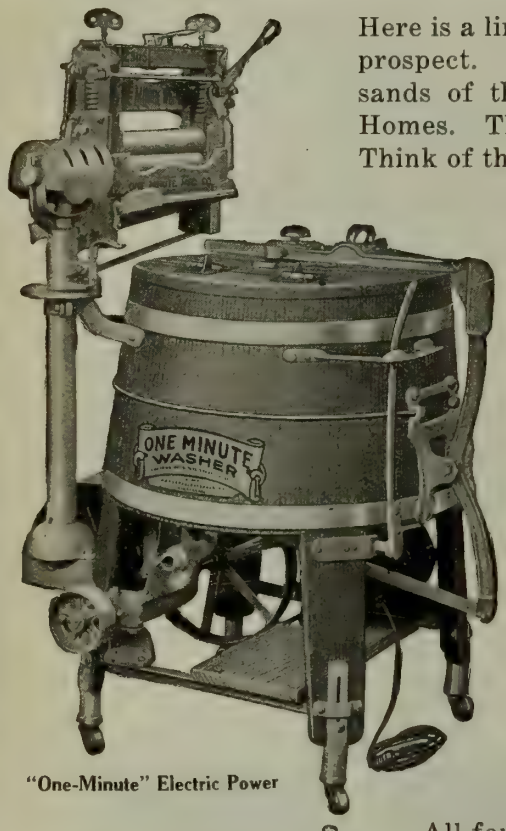
OTTAWA 341E

Same characteristics as above, with 3 year guaranteed Rolls.

GEM 141E

Same characteristics as above, with 1 year guaranteed Rolls.

This wringer stand keeps the wringers off the floor. Gives them a preferred position in your store. Write us for conditions.

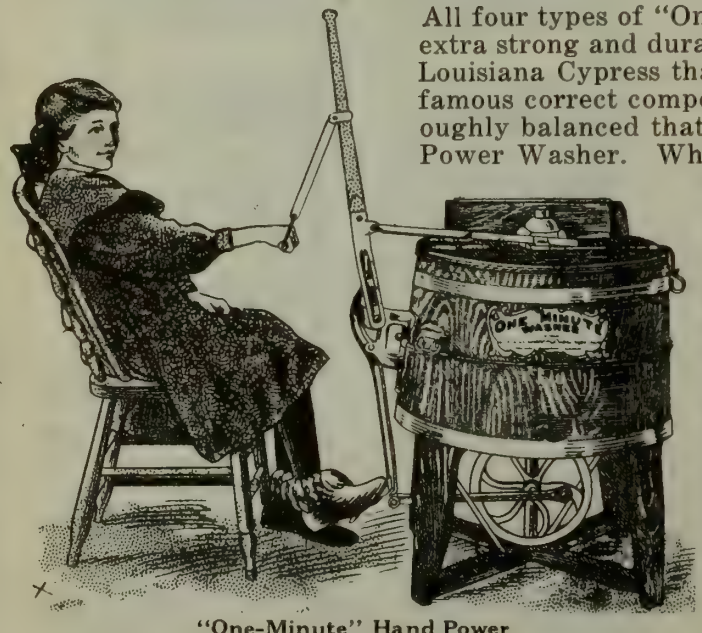


J. H. Connor & Son Limited, Ottawa, Ont.

ONE-MINUTE WASHERS

Hand - Electric - Gasoline and Water Power

Here is a line of Washers that will enable you to make a sale with every prospect. There is a **"One-Minute" Washer** for every purse. Thousands of these washers are giving absolute satisfaction in Canadian Homes. There is yet to be returned to us an unsatisfactory machine. Think of the prestige these high quality products will add to your store.



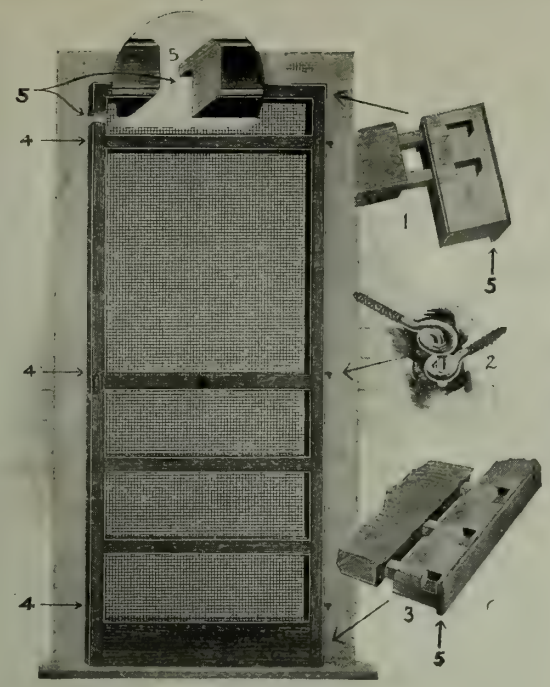
"One-Minute" Electric Power

The Housewife sees in the "One-Minute" Electric the complete realization of her dreams. It solves the servant problem, saves time, labor and wear and tear on clothes. A child can operate both wringer and washer. Where Electricity is not available, recommend the "One-Minute" Water Power Washer. Its simple construction and unusual washing qualities will attract many satisfied customers to your store.

"One-Minute" Water Power

All four types of "One-Minute" Washers here illustrated are made extra strong and durable, with tubs of kiln-dried and well seasoned Louisiana Cypress that will not rot. The washing principle is the famous correct compound Lever Type. The mechanism is so thoroughly balanced that a child can operate the "One-Minute" Hand Power Washer. Where Gasoline or other Engine Power is available, the attachments here shown will enable your customers to have all the labor-saving advantages of a mechanical washer.

"One-Minute" Hand Power



Why not investigate the "business-getting" possibilities of this quality line? It meets a popular demand, and the profits are good. Write us to-day for our attractive agency proposition.

It's a good one.

"One-Minute" Gasoline Power

ONE MINUTE MANUFACTURING CO., Toronto, Can.

Every "Kasement" door has 26 mortise and tenon joints, and is positively

GUARANTEED NOT TO SAG.

QUALITY COUNTS

Five minutes of your time or your clerk's will convince a customer that the "KASEMENT" DOOR is the most satisfactory screen door made, and by far the cheapest in the end.

With the aid of our Demonstrating Model you can show how easy it is to hang "Kasement" doors—with a sample joint-section you can show the way our mortise and tenon joints are made also the quarter sawn or Edge-Grain stile lumber, etc.

Every "Kasement" door you sell means a satisfied customer, a profit for you, and an advertisement for your store.

Get your Kasement Model on the counter now and start booking orders at once. Write us for electros, circulars and selling helps.

KASEMENT SKRENE DORE CO.

183 Church St. -- Toronto

Factory: Burlington, Ont.

This is the famous Kaitting "Pastime" Rub Board machine.

Thousands of these machines are in use in Canada to day. Thousands of housewives are sounding their praises. Make an appeal to your customer by showing a "Kaitting" machine in operation in your store. It always creates a desire with housewives to own one.

There are splendid prospects for you in "Kaitting" sales. Write for prices and complete information.

HARDWARE AND METAL

Published Every Saturday Since 1888

Vol. 31 TORONTO, MARCH 22, 1919 No. 12

Canada is on the Eve of Great Developments

Hardware Department in the Hudson's Bay Company store at Vancouver, B.C. A model of neatness.

AN investigation of business conditions carried on during the past few weeks indicates that the business outlook for spring is much better and brighter than it appears on the surface. There is a tendency on the part of a few business men to exaggerate the present dullness. The short-sighted policy of some gloom-spreaders to excite alarm over the alleged probable demoralization of Canadian business, should a change in the tariff occur, has done more mischief than will be caused by any slight re-arrangement of tariff or war tax. Despite the fact that retailers have not been buying freely, business has been good with them, and it is safe to say that Canadian retail hardware stocks, taken as a whole, are lighter than they have been at any time in many years past. The feeling is becoming more general that we are not going to have big price declines, at least for some months to come. There are bound to be price readjustments here and there, and there are bound to be some declines in price (many have already taken place), but to look for wholesale slashing of prices is out of the question so far as spring business is concerned. The past winter has been a most unusual one, and many lines of winter goods have been carried over. Stocks of spring goods, however, are exceptionally light, and there undoubtedly will be a brisk demand for goods within the next few weeks. Building operations are starting on an unexpected scale. Labor is becoming more plentiful, and hundreds who have put off building during the war period are now going ahead with long delayed and much needed work. Reference to an article elsewhere in this issue giving figures on building permits will indicate how active the building trades have become within the past month. The people of Canada are prosperous and have the money. It is true that the greatest need now is co-operation between various parts of Canada, and between employers and employees. With wise guidance on the part of our industrial leaders these difficulties should soon be solved, with resultant good to the whole of Canada.

POSSIBILITIES UNDER TRADE AGREEMENT

One of the most important announcements in many months, in its immediate future effect on Canadian finance and industry, is that of the wiping out of the handicap which Canadian products met in the British market, and the granting of what is equivalent to a preference for Canada, temporarily, at least. Many of us have been fighting for this for a generation.

The preference should result in a great impetus to our immediate trade with the mother country. If permanent, as it is almost certain to be, if we keep men of the proper calibre on the job, it means tremendous immigration and the settling of millions of acres of farm lands. It means the extensive development of present and the establishment of numerous new industries in Canada, to take advantage of the preference (HARDWARE AND METAL now has confidential information regarding five large United States firms that are already arranging for plants in Canada); bringing in hundreds of thousands of mechanics and mine and forest workers. For example, the Canadian subsidiary of the U.S. Steel Corporation, which has been marking time, will, in all probability, now go ahead energetically with their twenty or thirty million-dollar plant development here. In fact, it is quite probable that within a week plans will be completed and action taken for the immediate erection of about 1,500 workmen's houses at Ojibway, Ont. Reports in cables to U.S. papers state that scores of American manufacturers and other business developers who have been in Great Britain are returning home feeling that there is now little hope of overcoming the handicap of prohibition of imports and preferences unless they establish branch plants in Canada or the United Kingdom. Canadians have learned that there is no sentiment in British business, and the British manufacturer that he must not expect an Imperial Government to support him in any selfish, narrow pettiness to the detriment of the whole Empire. It ought to mean bigger and better business for the British manufacturer and his employees. It is the triumph of British Imperialism over Provincialism. We have the same narrowness in Canada but public opinion will overcome it.

OPPOSITION TO CANADA

When our commissioners arrived in London in November last they found exactly the same conditions as did our unofficial delegates seeking munition orders in 1914. It will be recalled that at a conference in London the Canadians expressed the hope that the manufacturers of the mother country would, with their long experience and great influence, aid Canadian manufacturers in securing business.

According to the *Financial Post*, Sir Trevor Dawson, head of the big Vickers Co., promptly and very brutally told them that not only would they not help Canadian manufacturers, but they would do all in their power to prevent us getting into or learning anything about the munition business. This rebuff was a good thing for Canada. It did not discourage but inspired the Canadians to the splendid results that are so well known. Sir Trevor's own company subscribed for Canadian technical newspapers to learn of the successful methods adopted by Canadians. Last November, large food and reconstruction orders were spoken of. Our commissioners expected that a goodly share would be passed by the British authorities through them to the Canadian producers. They were quickly disillusioned. The British manufacturers proposed to keep these and the home business to themselves. They got it with Government aid. Vexatious regulations shut out all competition, though because of greater influence some neutral countries were given preferences over Canada.

There can be no doubt that but for the steady, persistent work of the Jones-Lloyd Harris commission the selfish policy of the British manufacturers of shutting out Canada particularly would never have been overcome. Canadians who have gone over seeking business have learned that sentiment was of no avail. They had to fight for orders, overcoming not alone prices, but powerful combinations bent upon keeping them out by drastic regulations or red tape interferences. Beyond the disillusionment on the sentimental theories on which the Associated Press had fed them, the Canadians have no complaint to make. They admit the British manufacturer was justified in considering his own particular interests, though they think his methods are sometimes high-handed, crude and unfair to other parts of the Empire. Canadian exporters found this thirty years ago with the development of the store cattle trade. This interfered with the vested interests of a few men then, and since, powerful in the British Government, and particularly in the Department of Agriculture. They could not get an import tax so they got prohibition by making the outrageous charge that pleuro-pneumonia prevailed among Canadian cattle, but in response to a request from our High Commissioner, Sir Charles Tupper, they were never able to show him one case of the disease. But the embargo stayed on—and it was a good thing for Canada. We had to fatten our cattle here and thus made greatly increased revenue.

BRITISH BUSINESS SHREWDNESS

The British business man is a mighty shrewd, far-seeing individual. We have no fault to find with him. We admire him—want to help him. As a trader he leads the world, but as a manufacturer he has sometimes depended too much upon his Government to help him by treaties, agreements, etc. The Americans, Germans and Canadians have undersold him in many lines because he has not been getting the production from his plant or employees. His selling methods are weak. There are exceptions, of course, and many of the best English houses have for years past been doing a tremendous amount of business in Canada. The British manufacturer's far-sightedness is exemplified by recent gossip common among Americans and some Canadians. They say the British manufacturer was "tipped off" on the German collapse long before we were on this side. At once he got his Government to relieve him of all possible war orders and load them on Canada and the States; while he quickly turned over his plant to the most necessary, and then more profitable peace supplies. The result was that when we on this side were busy with war orders the British manufacturers were closing large contracts in neutral and other export markets. The big steel order quoted in December was one of these. For a long time it puzzled the steel people on this side with their modern plants to know how a run-down, inefficient

Window Display Suggestion No. 1—See accompanying article for comments and description.

Unique Advance Suggestions

A Most Unusual and Practical Series of Window Display Ideas and Suggestions For Spring and Early Summer Features—How the Trade Can Make Use of Them

ON this and the following pages, HARDWARE AND METAL is presenting to its readers a feature that should be worth thousands of dollars to the Canadian hardware trade during the spring and early summer months. We are showing here, prior to the opening of the season, a series of seven of the finest hardware window displays procurable in the world. These are appearing for the first time in HARDWARE AND METAL. The displays were planned and arranged by ———— of Walbridge & Company, Buffalo, and HARDWARE AND METAL is glad to be able to present to the readers of the paper a series of displays that will furnish ideas to hardware window trimmers in all parts of the country. Each display is numbered and a description is given in the following series of short articles:

* * * *

Window Suggestion No. 1

Window Display Suggestion No. 1 furnishes some excellent ideas for an early summer display. Two hammocks suspended from the ceiling form an excellent cover and background. A couch hammock occupies the centre of the display. A wide range of summer and outing supplies help to make up a display that would attract attention because there are very few people who are not interested in displays of this kind. Among the many lines of goods featured in the display are awnings, golf supplies, camping outfits, croquet sets, children's autos, kiddie-cars, baby carriages, lawn tennis supplies, outdoor toys for children, vacation requirements, etc. The window trimmer in following carefully the details of the arrangement of this display will note that through careful arrangement of the goods, a large and varied range of goods may be shown without giving the window a too crowded or clustered appearance. By following the plan of the display the window trimmer will be enabled to produce a trim that will attract attention and produce business.

Window Suggestion No. 2

A splendid early spring window display suggestion is shown in Window Display Suggestion No. 2. In this display is shown a range of hardware supplies found in almost every retail hardware store. Despite the fact that a wide range of goods is featured in the display, each line stands out prominently and in a manner that will command attention. The gardener, both amateur and expert, the florist, the home lover, the chicken fancier, and many others would be interested in a display of this kind. Note how effectively poultry netting has been featured in this display. Vegetable and flower seeds on the floor of the window are given prominence, which is emphasized by the use of show and price cards. Wire flower bed border is also exhibited, while lawn tools, rollers, etc., are also given prominence. Hedge and grass shears, turf edgers, tree pruners, garden forks and trowels are featured in a neat and attractive manner. Garden tools are also featured and include spading forks, spades, rakes, hoes, weeders,

etc. Sprayers and spraying materials are also given a place in the display. It would be hard to produce a better spring goods window than the one shown here, and window trimmers in all parts of Canada will unquestionably be interested in this unique and most excellent display. In adopting ideas from this display, window trimmers cannot go far astray, and they will find that a display of this kind will pay handsome dividends. Common-place hardware lines such as poultry netting, fencing, garden tools, etc., have been arranged in an exceptionally clever manner and with splendid effect. This display is a winner and one that will furnish many ideas for window trimmers this spring.

* * * *

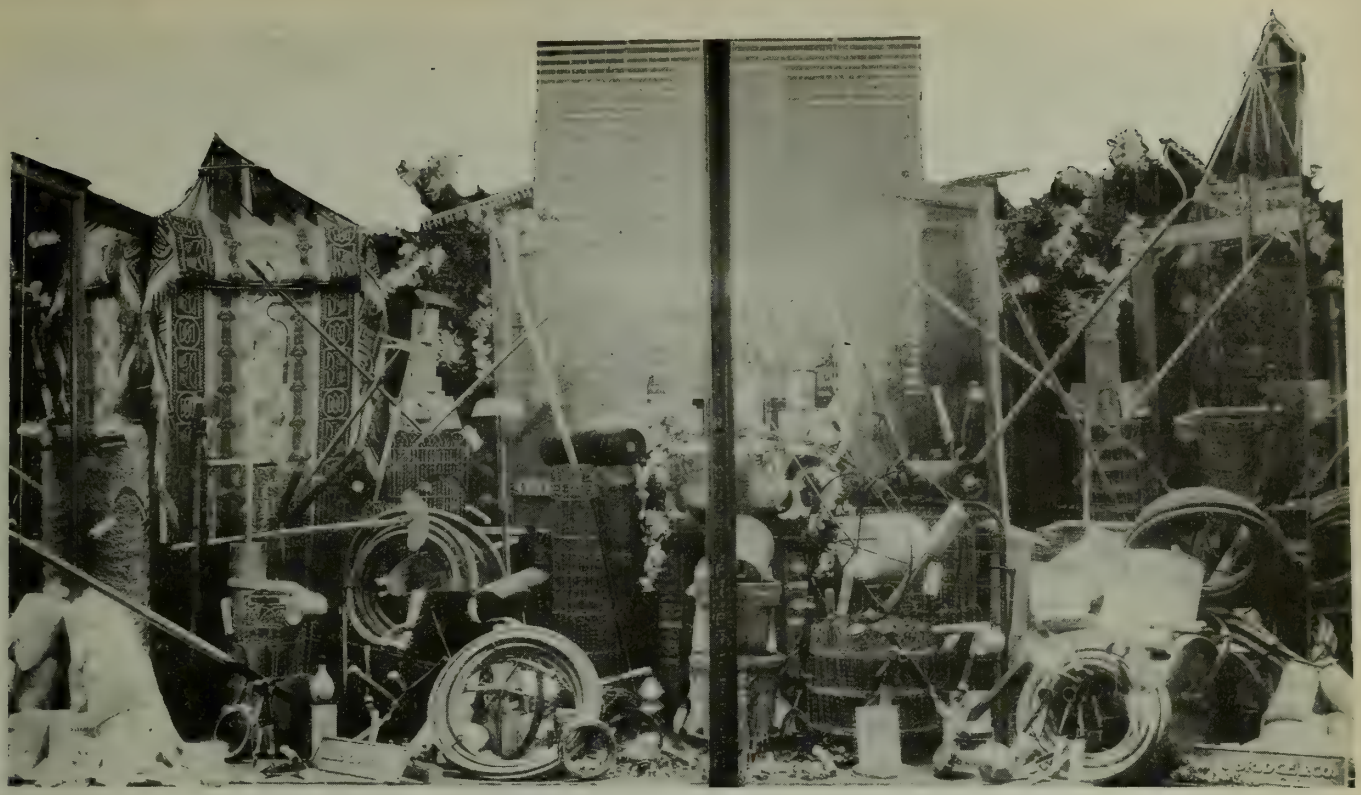
Window Suggestion No. 3

In Window Display Suggestion No. 3 we have a display that could be used after display No. 2 has been featured. This window, while featuring many lines of gardening and lawn tools, etc., includes also such lines as screen doors, hammocks, rubber hose, sprinklers, lawn rakes, screen wire cloth, screen windows, etc. This display, like the others, features an unusually wide range of goods for one display and still there appears to be plenty of room for each article, and the display stands out prominently with individual articles easily distinguishable. This is a splendid example of intensive window trimming without the appearance of overcrowding. This window furnishes many excellent ideas for the window trimmer.

* * * *

Window Suggestion No. 4

During the spring there is always a demand for housecleaning supplies and hardware merchants are called upon to supply many lines required during the spring housecleaning season. The amount of business which the merchant receives, as a general rule, is in about the same proportion as the enthusiasm shown by the merchant and his sales staff in pushing the sale of housecleaning supplies. The display window is one of the best mediums to use in placing these goods before the public. Window Display Suggestion No. 4 furnishes a suggestion for a display that will include almost every imaginable requisite for the housecleaning season. You will note that liberal use has been made of price cards, a particularly desirable feature in a window display of this kind. The floor of the window is used to feature a miscellaneous assortment of goods, while the background is attractively built up with various lines of goods. Among many articles featured in this display are scrub brushes, corn brooms, wall brushes, floor brushes, dusters, dustless mops, polish, pails, tubs, clothes wringers, washing machines, carpet whips, cleaning compounds, vacuum cleaners, wash boards, mop wringers, carpet sweepers, chamois, pails, waste baskets, garbage cans, clothes hampers, and dozens of other lines. This is a most effective display and obviously one that was carefully planned out by the window trimmer. The many splendid ideas furnished in this display will be taken advantage of by hundreds of window display men in all parts of Canada.



* * *

Window Suggestion No. 5

In Window Display Suggestion No. 5 we have a somewhat different display from the others. Sporting goods, including fishing tackle and supplies, lawn tennis goods, golf supplies, etc., are featured in one-half of the window. The other side is de-

Window Display Suggestion No. 2.—

Window Display Suggestion No. 3—

voted to a display of travelling bags, cases, suit cases, etc. The display is a most effective one and shows how these lines may be featured to advantage.

* * * *

Window Suggestion No. 6

In Window Display Suggestion No. 6 is a display dominated by a few lines. The outstanding lines featured in this window are poultry netting, lawn fencing and border, and rubber hose. These lines stand out most prominently, but an examination of the display discloses the fact that there are other articles tastefully arranged in appropriate places in the window. These other lines include garden tools, lawn sprinkling equipment, hose reels, etc. Note the imitation of water flowing from hose nozzle near centre of display. This effect is secured by a careful arrangement of twine from the nozzle outlet to the base of the window. This display shows a great volume of a few lines of goods and is a

Window Display Suggestion No. 4—

Window Display Suggestion No. 5—

display that would be remembered by all who see it. Excellent suggestions may be secured from a careful study of this display.

* * * *

Window Suggestion No. 7

In Window Display Suggestion No. 7 we find a well-selected range of warm weather goods. Refrigerators, water coolers, fireless cookers, picnic hampers, wire dish covers, ice choppers and picks, lemonade shakers, thermos bottles and kits, and many other articles are arranged in a neat and tempting manner. This display would make a strong appeal to the buying public, and it also furnishes suggestions for a warm weather goods display.

In the foregoing, only a brief outline of each display has been given, in order to point out a few of the outstanding features of each display. The window trimmer will be able, upon a close examination of each reproduction, to find many unique and practical suggestions which will enable him to make his window trims more effective during the spring and summer months, and thus "sell more goods."

Electrical goods are also a splendid line to feature in window displays. We believe from investigation which we have made that the hardware trade is rapidly securing control of the electrical business in all its branches and that in a few years, especially in the smaller centres, the electrical goods trade will be controlled almost entirely by the hardware trade. As an indication of how rapidly this department of the Canadian hardware trade is devedoping, one of the largest wholesale hardware jobbing houses in Canada is now planning to open a big electrical goods department in which they will carry a complete line of all electrical appliances which can be sold through dealers. This firm has made a tremendous success of selling all hardware lines, and opened one of the largest and stock motor accessory departments in Canada. Their advent into electrical goods field at a future date will be simply another indication of the rapid strides which the hardware trade of Canada is making in taking control of the sale of one of the most

Distance No Barrier to This Dealer

Particular Attention Paid Heating and Tinsmithing by Watson Smith, of Shubenacadie —Says There Are No Dull Seasons—Reaches Customers by Using Motor Express—70-Mile Trips Made—2,400 Milk Cans Sold

WATSON SMITH of Shubenacadie, N.S., says that the longer he is in business the more he likes it. To HARDWARE AND METAL, Mr. Smith's remark was: "I would sooner put up a furnace than go on a day's fishing."

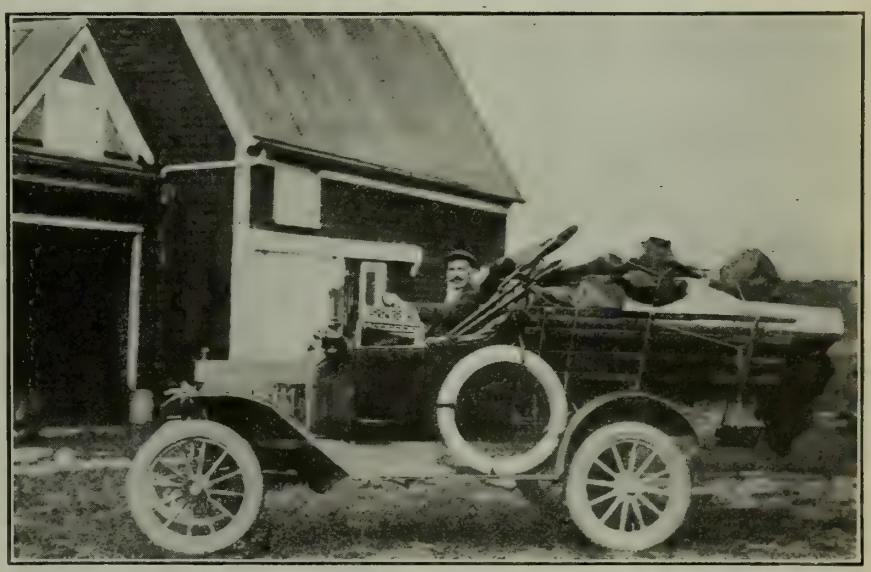
As will be already understood, Mr. Smith is keen on the tinsmithing end of the business, although he carries a stock of hardware, sporting goods and automobile accessories, and these lines are meeting with increasing favor and sale. The last-mentioned line was only added last year, but it bids fair to be a winner in point of sales and also as a profit maker.

Distance No Barrier

Mr. Smith is one of those who firmly believes that if the retailer is to get business he must go after it, and that if he does not do so he will miss a great deal. To this end he has been able to reach out in all directions from his town (which he proudly stated was the best in the Dominion to him) and to serve no fewer than five counties. This applies principally to the furnace work which he has done and which he personally supervises. In this way he knows absolutely when a job is correctly done and to his care over many years, he can doubtless trace the success that marks this phase of his business.

"A round trip is from 20 to 70 miles," said Mr. Smith. "I take my fitting from here in my Ford runabout, made into an express, 35 miles being the longest trip made this way. Other work is done at a greater distance, but when this is the case we ship the furnaces and fittings and go by train to do the work."

It is interesting to note how compactly it is possible to pack a furnace on the auto. together with fittings, although, as a rule, the fittings alone, being bulky, make a full load.



2,400 Milk Cans—Always Busy

"Our milk-can trade extends over the province," said Mr. Smith. "This year would have been a record one had we the tinplate. As it was we made and sold about 2,400 ten-quart cans, the size sold here, and this part of our stock turned about twelve times in 1918. This is not an unusual thing but about the average number of times the stock is turned. As this is a dairy farming district the cans are always in demand and we have no dull seasons, making up stock in the winter months."

One of the cardinal qualities of a good furnace man in Mr. Smith's opinion is that of good old-fashioned hard work. For instance, he sometimes has to put in a brick-encased furnace. There are probably few heating men that would follow his plan, leaving the masonry job to the bricklayer.

Does It Himself

"If it is a wood furnace I do the brickwork myself," said Mr. Smith. "I also cut all openings needed and put up stack and other pipes. It takes a day to put a furnace up, and we never go back unless short on some stack and then we wait until someone else in that district wants work done. But I am almost always sure of my load on a long trip. The largest day's work I ever did was before I got my car. I drove twenty-four miles and put in two coal furnaces with galvanized jackets and back the twenty-four miles at night." Is it any wonder that Mr. Smith deserves success in this work?

Watson Smith of Shubenacadie, Nova Scotia, has found that with his delivery car as shown above he can draw business for a radius of many miles and give his customers the prompt service that he aims to give always.

Profits—Short Terms

Mr. Smith believes in two important things to which the dealer is entitled—a fair profit for his work or his goods, and his money without considerable delay. He said: "Profits are about one-third on furnace work, and I get cash for most of my outside work. Sometimes I take a note at 30 days, or even at three months where good, and with bank interest. But for the most part this work is cash, and in a general sense our business is about one-third, with the balance in thirty days. I believe in collecting; it is not business for the customer to have both the goods and the money."

It is evident that Mr. Smith has made it clear to his many customers what his terms are. There is wisdom in this. It but bears out on observation made recently by a manager in a large Montreal store who voiced his impression that there was much to be gained by the average merchant who would boldly launch his "strictly cash" scheme and religiously adhere to it. A bold, straightforward policy, he was sure, no matter how hard-and-fast it were made, would be supported by the worth-while trade a merchant could reach.

Controlling Expense

In the matter of advertising, Mr. Smith stated that he did some, and that it produced results. "But," he said, "a satisfied customer is the best advertisement." And his business doubtless has received the reflex influence of work well done, for that has been the determination here, to execute all work in a manner to win and maintain confidence.

As one of the helps toward controlling overhead expense, Mr. Smith has had his son associated with him in the business. It is a wise and a fortunate provision to make, for with a promising vista open to the young man in this attractive business he has something to stimulate him to the best effort.

"We don't carry a large stock of any one line. I believe in buying in small lots and often," was Mr. Smith's answer to a query on this point.

This is a matter to which more attention is being paid by various hardware men the country over. There is a manifest desire to carry a big variety. There is, on the other hand, a growing determination with many to buy in smaller quantities. It means more frequent turning of the stock with more "free" capital.

Mail Order Houses Building Up Instalment Sales

Sears, Roebuck and Other Firms Breaking Away From Strictly Cash System.

By G. A. Nichols in "Printers' Ink."

EDITOR'S NOTE.—Just at the time when hundreds of Canadian firms are adopting the cash system of doing business, following as it were the lead of Canada's biggest department store and mail order house, it comes as a shock to find some of the largest department stores and mail order houses reverting to a form of credit system. One of Toronto's large department stores, which for years was on a cash basis, has opened a credit department for certain lines of goods.

The accompanying article on the subject by G. A. Nichols in *Printers' Ink* will prove of great interest to all branches of the trade in Canada. HARDWARE AND METAL would be glad to hear from readers giving their views on the subject.

RETAIL mail-order houses are uncovering a vast amount of business through application of the instalment credit system. In the beginning, retail mail-order necessarily was a cash proposition. This worked well enough on the ordinary items, but it shut the mail-order houses out from a big and profitable trade in the larger and more expensive goods.

When a thing runs pretty well up into money the average person will hesitate before buying it for cash. He is going to shop around. Then by the time he is financially prepared to make the purchase he may decide he does not want it, or may buy it from some house other than the first one he had in mind. But he is likely to go without the thing altogether.

Take, for instance, the complete furnishing of a home. The average cost of fitting out an apartment or a cottage for newlyweds these days is around $600. This is more money than the average ordinary American citizen has when he gets married. He either must buy his furniture on the instalment plan or get it bit by bit. In the latter instance he is likely to scatter his purchases among various retailers or mail-order houses. If this $600 order could be secured at one time it would be worth-while business. The instalment furniture houses in the large cities offer a way out for people living in those cities. But the family out in Lyndon, Kansas, likes good furniture as well as the one in Chicago. The mail-order houses finally recognized this fact and now anybody in the country of good reputation and fair credit standing can buy his furniture on the instalment plan.

The same principle applies in the purchase of pianos, talking machines and similar luxuries. People living in or near cities of any size have long had the privilege of buying these on the instalment basis. Dealers in these cities have reached out to some extent for the country trade within a radius of one or two hundred miles. But not until the mail-order houses took up the instalment business in this line were pianos and talking machines at the disposal of the multitude. The resulting volume of business may be regarded as amazing when viewed from one angle. But it is only natural, after all. Previously, only the surface of the potential market had been scratched. Now, thanks to mail-order, the country-wide demand is being met.

To-day a woman on the farm need not wait until her chicken money or egg money reaches a sum which will enable her to buy a cream separator. She can get it from a mail-order house on credit and pay for it by the month. If the farmer wants a gasoline engine or farm machinery of any kind he can buy it on the same basis. The mail-order house will sell him a heating plant or a lighting system and collect from him in easy payments.

Manufacturers Help in Beneficent Change

This mail-order business in the larger items is due for a still greater extension. Manufacturers will gladly co-operate in the development because of the increased volume in their business that is sure to result and that is resulting right now. The mail-order houses have done wonders in supplying manufacturers with an outlet.

In the establishment of credit relations with their customers at a distance the mail-order firms have surprisingly few complications. The farmer, whether he owns his farm or rents, is looked upon as the best credit risk. The queer thing about it is that the man in Iowa or Nevada who orders some of these larger goods by mail on the instalment plan has much less difficulty in establishing his credit with the mail-order house than does the man in the city who deals with the department store.

You can go into McClurg's book store in Chicago and buy a large dictionary. Unless you can pass a pretty thorough examination at the hands of the credit man you have to pay cash for it. On the other hand, you can sign your name to a coupon clipped out of a magazine advertisement, send it to the publisher and get the dictionary without quibble or question, and have the privilege of paying for it at a modest sum per month.

Is there a psychological something about signing an order of this kind that induces a man to be more careful about paying than he would be if he bought the book in a store in the ordinary way? Perhaps. Anyway, the fact remains that he generally does pay.

Sears, Roebuck's Way of Instalment Selling

There is very little red tape to be gone through with on the part of the purchaser when he wants to buy on credit from a mail-order house.

"If a farmer down in Oklahoma orders a heating plant from you on credit, how do you satisfy yourself as to his responsibility?" the writer asked Credit Manager O'Connor, of Sears, Roebuck & Company.

"Well," replied Mr. O'Connor, "there are one or two questions on the order

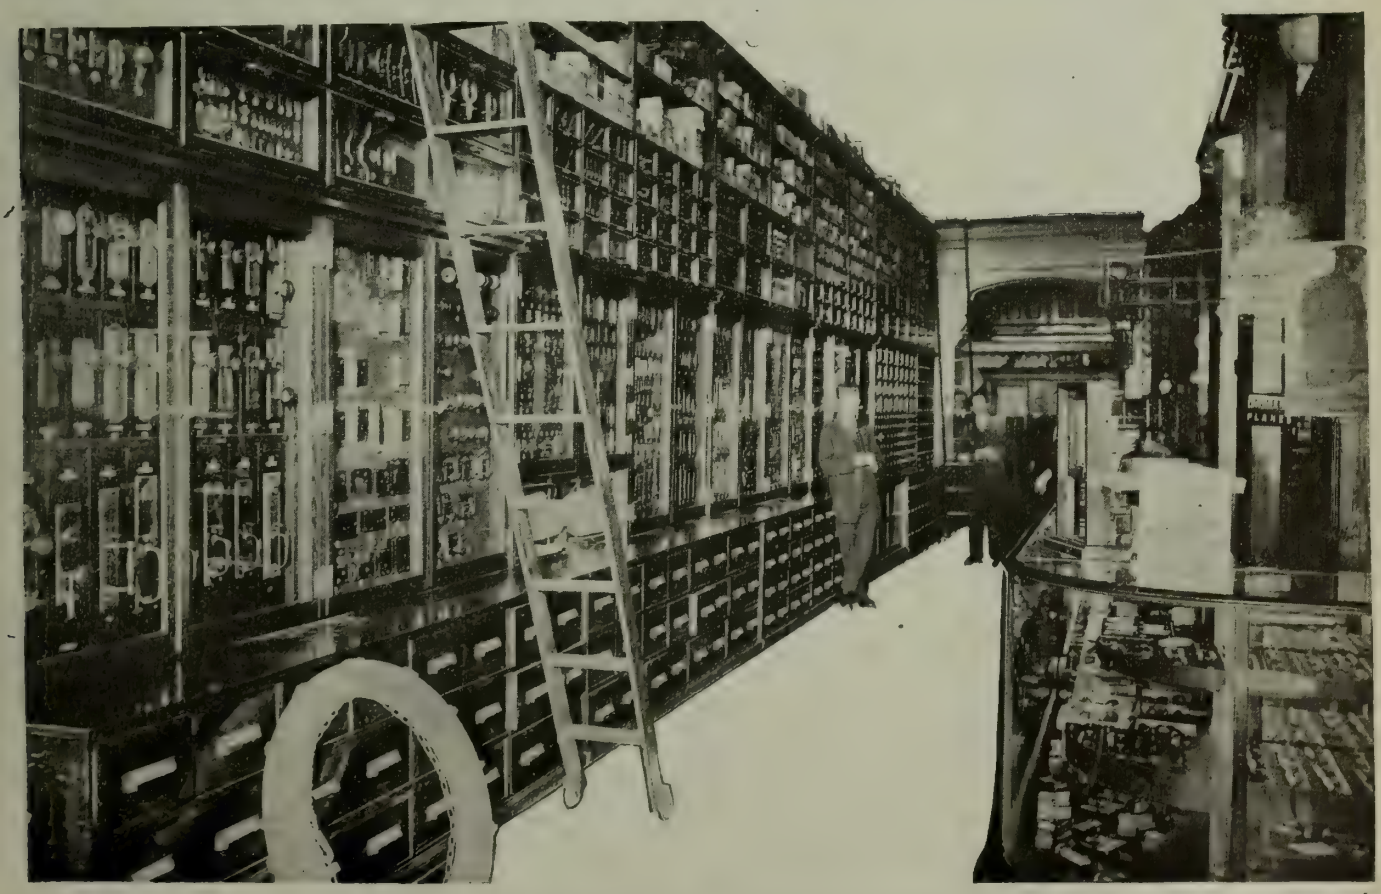
blank for the man to answer. These give us all the information we need. Anyway, nine times out of ten this farmer already is a customer of ours. He may have been buying goods from us for years—lots of goods. With order after order the cash has come each time. What better evidence could we have of his reliability and solidity than this? In other words, he has built up with us a credit standing because of the many orders he has sent us accompanied by the cash. A farmer is absolutely the country's choicest credit risk so far as instalment mail-order business is concerned.

"We do not carry open accounts with our customers. We confine their credit purchases to those larger items that run into money to an extent that makes an instalment plan desirable. An order for the general run of goods in our catalogue must necessarily be paid for in advance.

"But even in this exceptions are made. Suppose a banker or some other well-known business man wants to order some goods from us to be shipped to his summer home. We will accept the order on open account if his credit comes up to the usual commercial standing. This kind of deal, however, is entirely apart from the instalment proposition. Selling on instalments is one thing and selling on a straight commercial credit basis is another."

This concession to persons of approved credit mentioned by Mr. O'Connor is given as inducement for them to concentrate their purchases. This is the very reason so many retailers cling tenaciously to the credit basis of selling, despite the occasional loss they incur and the undoubted advantages of the cash system. Every retailer knows that a person with an account at his store buys more goods than he would if he paid cash, and does not scrutinize prices so closely. This is the principle behind all the great growth of the instalment business both in retail stores and mail-order houses.

The credit policy of the larger mail-order concerns is very broad and liberal. Some manufacturers have satisfactory instalment dealings with farmers and others also, but are somewhat more exacting in looking up the credit risks.



The Albaugh-Dover Company, of Chicago, sells many cream separators to farmers on the credit basis. The advertising is done largely through farm journals. The farmer is asked to return a trial-order coupon that is a part of the advertisement. This order when properly signed is practically a note. It contains the terms on which the separator will be sold him, and stipulates that the purchaser may pay the balance any time he wants to and receive a cash discount of 5 per cent.

A separator is sold on thirty days' free trial, and the purchaser has a year in which to pay.

The complete furnishing of houses, apartments and rooms as worked out by the retail mail-order firm of Hartman Company, Chicago, is one of the most interesting and profitable examples of selling goods by mail and collecting the money in instalments.

Hartman has developed this type of mail-order selling to a point where anybody in the United States can have the advantages of furnishing his home complete and paying for it monthly. A few years ago, when Hartman was conducting only retail stores, the advertising slogan, "Let Hartman Feather Your Nest," showed many a perplexed young fellow in Chicago and other large cities a way in which he could get married and furnish his flat without having to save money for a long time. All he had to have was a girl who was willing to marry him, a job and a good reputation. Hartman would supply the furniture, and it could be paid for while it was being used.

The thing worked out so well that the company decided it ought to be extended to the country at large. The credit proposition loomed high. But, proceeding on the principle that the average person is at least reasonably honest, Hartman advertised in farm papers and fraternal organs inviting people to order certain assortments of furniture. The people were trusted to a point where the company offered to send them the goods on thirty days' free trial without advance payment. Then, if they were satisfied with the goods, they could begin paying for them month by month with a certain

The value of good display methods is quite apparent in this reproduction, showing portion of a Montreal hardware store.

stipulated sum. The orders were sent in on coupons clipped from the advertisement. Then people were invited to send for the catalogue. This contained order forms which called for sufficient credit information to make the trans action safe for the company.

The thing worked out so well that today Hartman has a standing offer of a prize to any one who will show a town in the United States where it does not have a customer.

The plan specialized on complete housekeeping outfits, complete dining-room equipment or bedroom suites. But any kind of furniture or household furnishings would be sold on the same basis.

The result of all this was that the company solved the problem which is the bane of every retail furniture man's existence. The furniture business as conducted in the average retail store pays a satisfactory net profit, but as far as volume is concerned it is either a feast or a famine. During the housecleaning months of the spring and fall the furniture man is rushed half to death. In midwinter and during the summer he has little to do.

What every progressive retail furniture man in the country wants to do—and in this he is being aided materially by far-visioned manufacturers who are after increased outlets for their goods—is to make his business an all the year proposition. He cannot change the inexorable law laid down by womankind to the end that housecleaning should be done in April, May, September and October. He is not going to get very far in any effort to spread out over the year the rush of business he experiences in those months. But he can keep his store busy all the year by featuring related lines. He sells dining tables. Why should he not sell the dishes and even the linen to go on that table? He sells china? He sells beds and mattresses. Why not sell blankets, sheets and comforters?

Manufacturers in these and allied household lines have been working on the retail furniture dealer considerably during the last few years. They are making a different merchant out of him. They are utilizing a perfectly logical outlet for their goods and thus are increasing their own profits as well as the retailers'.

The bulk of Hartman's business comes in the housecleaning months. But it advertises all through the year special offerings in this or that, and thus maintains a healthy and steady volume of orders.

Hartman was wise enough to realize at the outset that it had to get and keep the confidence of customers. This was of hugely greater concern to the company than satisfying itself of the reliability of the customers. It realized it was a greater relative risk for a farmer at a distance to send his money than for the company to send him its furniture. The customer had as much right to be satisfied as to Hartman's absolute reliability as the latter had in his case.

In all the advertising catalogues or farm papers, it emphasized the quality of the merchandise without exaggeration. This was on the cold-blooded basis that experience had shown that merchandise which gave complete satisfaction was its own best collection argument. An inspection bureau is maintained where a sample of each piece offered in the catalogue is taken apart and analyzed. If anything is wrong, it is fixed.

The house stands unqualifiedly back of each thing it sells. If anything is not satisfactory it may be sent back. When a purchase is returned as not coming up to the catalogue description a letter is sent to the customer apologizing for the trouble to which he has been put. The letter explains that in such a large business, merchandise not up to standard occasionally slips in despite all precautions.

The working out of the instalment mail-order business on such a dignified and satisfactory basis by the catalogue houses represents one more of the many good things mail-order has done for the business of this country in general.

It is all well enough to say nice things about the retailer and to wish him well in his efforts to keep business at home. But one may just as well tell the honest two-fisted truth. And this is that there were a lot of things about the retail method of conducting business that were very badly in need of fixing.

The way some retail instalment furniture houses prey upon people in the smaller towns is a scandal little short of a crime. Taking advantage of people's ignorance of values and their need of the goods these concerns sell house furnishings for several times their value. The prices they ask are far in excess of what might properly be charged even taking into consideration the deferred payments and the credit risk. These stores naturally have as their customers the poorer class who are the more easily impressed by the apparent ease of buying under this plan. They could not pay $15 cash for a much coveted chair, and so they will pay twenty-five or fifty cents a week stretching out over a long, weary period until the chair costs them perhaps two or three times that sum.

Naturally, people of standing are not going to buy on any such basis. Yet the instalment method appeals to them as much as to the other class. The mail-order houses were quick to sense the outlet that thus had been neglected. They are bringing about a new deal in instalment selling that is benefiting the entire business of the country. It sells more goods to more people.

The retail stores themselves are having a part in the benefit. The wise retailer these days is finding that he can gain more profit by learning and applying the lessons taught him by his catalogue competitor than by abusing and fearing him.

Income Tax Days

Hardware merchant "Hell—p"

Going the Limit With Customers

The Main Policy of A. H. Bedard, 392 Victoria Ave., Westmount, is to Please the Customer—Nothing a Bigger Business-Builder—Dealer Should Be Able to Sell Line He Desires—Some Plans That Are Working Successfully

OVER and over again did A. H. Bedard, hardware merchant of 392 Victoria avenue, Westmount, emphasize to HARDWARE AND METAL the prime necessity of going the very limit with the customer, if this seemed necessary, in order that there be a continued good-will on the customer's part toward the store. For, as pointed out by him, there is no surer way to build a business than to please every single customer entering one's store. Mr. Bedard mentioned concrete instances to illustrate his point.

"There was one instance where a man had some work done and he was not satisfied with the bill which was sent. He flatly refused to pay the account as rendered. He suggested that I send one of my men up—and this was done, the work being looked over. The matter was gone into thoroughly and we believed that we had made the correct charge. The man's wife had told the workman to go ahead with some difficult wiring, and, as this was beneath a floor, it took time. But the customer was sure that it could not have taken so long and continued his emphatic attitude against paying this account. Finally I said, "I will just receipt this bill, Mr. ——." "Why, what for?" was his question. "Well, I want you to be perfectly satisfied, and if you feel at any time that you want to pay us, you may do so on the basis of what you believe is just and right. On your own decision, I shall be willing to give you a receipt in full."

"The man went away and later paid the bill. We did not get the full amount, but I was satisfied. That man could not speak anything but well of me, and it would be worth while losing even the whole account to retain his attitude to us favorably."

"Painstaking Service"

It will be noted in the opening advertisement of the Bedard store, which was run in one of the big Montreal afternoon dailies, that "an efficient and painstaking service" is offered as an inducement to "Westmount and Notre Dame de Grace" buyers. This is one of the points that Mr. Bedard advanced in this interview and his ideas along this line are well defined.

"A man came into my store recently and remarked that he had just 'dropped in.' I referred to some of my selling ideas, and, eventually, he spoke of a roasting pan. His wife wanted one, he remembered, but he did not know what she would like. I suggested that we would send one over, and that if it was not alright he might exchange it, or, if he preferred, we would refund the money. This seemed to please him greatly, and he mentioned that this appeared to him as unusually good treatment. He really felt that I had offered him a privilege that was not generally extended."

To make this short, Mr. Bedard sold the roasting pan, the man was fully satisfied and has been a purchaser on several occasions since. The idea which Mr. Bedard emphasizes is that no service is considered too great if through the exercise of it the customer is satisfied.

Does It Pay to Charge Goods?

"Do you conduct a strictly cash business or otherwise?" was asked of Mr. Bedard.

"This matter was considered, and while I had thought of starting a cash business, I realized that I had many friends who would prefer to run an account on short dating. I will therefore do as much cash business as possible, and charge accounts will be opened with those I choose to give them to. This will be conducted as closely as possible to a 30-day basis."

Continuing on this subject of credits, Mr. Bedard cited two instances wherein he had collected accounts that had been considered hopeless; in fact, either would never have been collectable through suit.

"In one case my friends told me the people were worthless, and in the other case I knew that I could not get the amount, even if a judgment were secured," he said.

Got the Money

The one customer owed a great many accounts to the knowledge of Mr. Bedard, and he had reason to feel that his claim was the largest of any. And so he went straight to the man and asked him for the money. The reply was that he could not settle, and instead of becoming argumentative, Mr. Bedard stated that he needed the money, and asked for a portion of it to help meet some bills. He continued this solicitation from time to time, and, eventually, the account was fully paid. Patience coupled with good judgment, under the circumstances, had won out.

"I do not believe that the other creditors got anything," said Mr. Bedard.

Got This One, Too

The other case was that of a lawyer, who, with his wife, had made considerable purchases. This was even a worse account, and one friend called it "absolutely worthless."

"I went down and saw the woman myself," said Mr. Bedard. "She received me kindly and eventually opened up the subject of her indebtedness. She said she could not pay the account, as she had nothing. She had promised to send a cheque when the goods were delivered. I suggested that she begin to make small payments weekly. She agreed, and although I had to go down again once in a while, she finally settled the whole account, with the exception of about $3. Patience had again won."

Two Important Things

There were two points of considerable importance outlined in this interview.

The first of these was regarding the opening of a proper set of books. Mr. Bedard has been in business at this location but a short time, but has arranged to have a set of books properly opened by a competent accountant. Said he, "I want to know how my business stands every day, and it is my idea to have the best system and the most simple one to suit my needs. By getting the ideas of this accountant and adding some of my own, I think we can get it."

Must Know Business

A very important thing this. One must know the vitals of his business—his actual purchases, his amounts owing and those owing him. Strict attention to these details and a careful and frequent reference to them will prevent many a business man getting into deeper water than he can successfully ford.

Following this, Mr. Bedard referred to buying. He is an advocate of carrying a comprehensive stock, but not an excessive one. "I think overstocking is one of the greatest difficulties that many a retailer has. I will not overbuy to get a favorable price. I would rather turn a small stock frequently than buy largely with the bait of a ten per cent. better price being offered. I think the wholesaler should carry the stock and the retailer buy just what he can sell. And I also believe it is better for the traveller and the jobber to have the dealer buy often. It does not pay them to load the retailer with goods."

"In the matter of receiving salesmen, I always try to be considerate. They can help a merchant very often, and I never think it good policy to treat them differently than I would myself like to be treated."

These two considerations are big and they are likewise vital to the successful conduct of modern retail merchandising. Careful consideration of these points should go far in attaining success.

Display Your

Let People See the Stock and They Will Keep Store Clean, Bright and Displays and Advertising

J. M. ADAM SAYS

Good advertising copy backed by good window displays will bring direct results every time.

My experience in regard to demonstrations, both of stoves and paint, is that better results are obtained when they last only one day.

Big signs placed at vantage points on every road leading into town, boosting our paints, have resulted in many good sales being made.

It is a good plan to change window displays weekly and one of the important things to bear in mind is to always keep the goods shown seasonable.

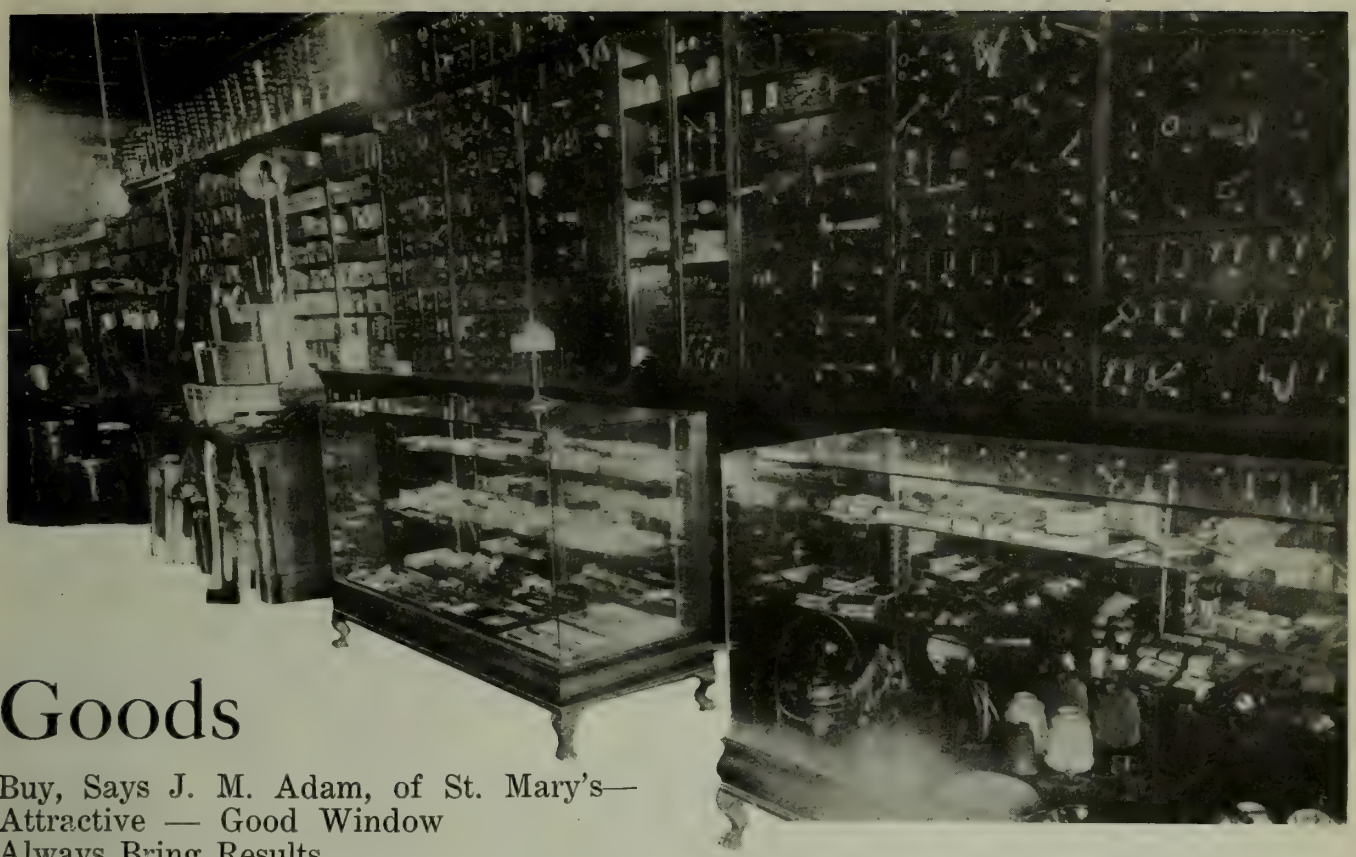
Keep your stock changed around in the store with seasonable lines always up at the front where everyone coming in will see them.

DISPLAY, display, and still more display. This is the first thing that impresses a visitor to the hardware store of J. M. Adam at St. Marys, Ont. One has hardly entered the store before he is aware that Mr. Adam believes in letting people know that he has a good stock of hardware for them to choose from. Everywhere you look, on the floor, to the right or left, straight ahead, or upward, you will find hardware of one kind or another that invites inspection. It should not be gathered from this that Mr. Adam has simply gathered in a big stock of goods and spilled them all around the store any old way. On the contrary there are not many stores where everything is kept in such perfect order or so spotlessly clean. Cleanliness is another thing that Mr. Adam is a crank on besides display.

Follows Definite Lines

His display methods are the result of the most careful planning. He always takes particular care to have seasonable lines well up to the front of his store and in his two display windows. They are arranged neatly and attractively, and are always kept clean. This involves considerable work, but Mr. Adam says that it pays, and pays well.

"The way to get business," he said to HARDWARE AND METAL, "is to get a good stock and then let people know that you have it. There are two ways of doing this, by placing it in your store where they can see it, by putting up nice window displays, and by advertising in the newspapers. I have proven beyond any doubt that both will produce excellent results. People like to come into a store and see a lot of goods well arranged. It creates a kind of confidence in their minds that they are going to get good service, and that is what they like."



Uses Display Tables

Right in the centre of Mr. Adam's store are a number of display tables. On these are arranged all kinds of small articles, especially goods that will appeal to women shoppers. These tables are changed often. As a matter of fact they have to be because Mr. Adam has found that the great percentage of the articles he puts out on them are not there in a short time.

"Those little display tables have proven wonderful sellers," he said. "It is really surprising the number of sales directly traceable to them. They have another advantage also. They are great time-savers. Customers come in and very often see what they want while we are busy waiting on someone else. They will select their goods and bring them over and get them wrapped up, and the sale is complete. We do not have to lose the time it would take to show them a lot of sizes of styles, or the time usually consumed in sales talk. There is another point I have often found, and that is that people seeing on the tables something they had planned to buy but would have forgotten had they not had it drawn to their attention by seeing the goods, make the purchase right there."

Sales of Stoves

Selling stoves is a feature of Mr. Adam's business. Notwithstanding the unusually mild winter, he disposed of

Goods

Buy, Says J. M. Adam, of St. Mary's— Attractive — Good Window Always Bring Results

almost a car and a half of stoves, ranges and heaters. Here again his display methods are responsible for results. During the season, as may be seen from the photo, shown above, one side of the store was devoted to a display of stoves. Every one of them was kept looking its very best, the nickel work shining and the other parts clean and well kept. If a prospective customer wanted to look inside, the lifter was there to remove the lids, not hidden away under a counter. If any information was wanted about the working of the stove, someone competent to answer any and all questions was there to give it.

"We sell a lot of stoves for a town this size," said Mr. Adam. "One of the best methods of getting people interested is to have a demonstration. My experience is that it is better to have a one-day demonstration than to spread it over three or four days. One can arouse a lot of interest and enthusiasm in a one-day affair and round up a lot of good business and prospects, where if it is spread over two or three days things may begin to lag."

Gets Them Out

In putting on a stove demonstration Mr. Adam takes good care to use attractive ads and to let people know in plenty of time when and where the demonstration is to be held. He backs his advertising by a window display, and in the window display he has large cards around the stoves he is showing inviting people to come inside and see the stoves. In the store he has one or more stoves in action, that is, with a fire actually burning in them and a tea kettle steaming. The people crowd into the store and are made comfortable, and the stove is demonstrated and any number of questions are asked and answered.

A part of Mr. Adam's policy which has perhaps been a big factor in building up his business is that he aims not only to sell stoves or paints, or whatever line it may be, but to give satisfaction. He stands absolutely behind his goods. If a stove does not work to the satisfaction of a customer Mr. Adam finds out where the trouble is and remedies it. He aims to give the best possible value to his customers all the time.

Not Afraid of Them

As a result of his policy he has nothing to fear from the mail-order firms. He can beat them at their own game every day in the week because he has the goods and can give the service that the mail-order firm cannot possibly give. If it is selling a stove, a customer can come in and see the stove, find out all about it before he buys, have it sent home and set up and in operation in an hour or two. Later, if there is any little fixing or changing to do, the trouble can be remedied in a few minutes. If it is selling electric fxtures, a customer can come into the store and see the goods. see them hanging from the ceiling just as they will look in his own home. Mr. Adam has his own men to put them up and see that the work is done right. The customer realizes that this is a service he cannot get from the big city department store which ships goods selected from a catalogue and leaves the customer to take them home and set them up as best he can.

J. M. ADAM SAYS

Get a good stock and then let the people know you have it. Small articles on display tables not only sell themselves, but they save the staff a lot of time which they can devote to customers.

I think the day is coming when automobiles will be shown on the floor of the hardware store just like stoves or any other lines.

The merchant in the small town has nothing to fear from the mail order house. He can beat them every time in service, price and quality. Keeping the stock clean and well arranged is a big help in selling.

It seems to me that the mail order houses have demonstrated that the buying public thinks more of the merchant who does a cash business than the man who gives them credit.

Well dressed windows have resulted in pulling a great deal of business to his store, says J. M. Adam. He changes his displays each week and pays particular attention to keeping the lines shown seasonable. The window on the right was used to stimulate spring paint sales.

Paint Demonstrations

By applying his sales methods to paint Mr. Adam has built up a big business in this department also. He goes after this business aggressively. Every season demonstrations are held which are advertised and backed by window displays. As in the case of stoves, Mr. Adam says that a one-day demonstration produces the best results. In addition to his newspaper ads and his window displays and demonstration Mr. Adam uses another means to stimulate sales. On every road leading into St. Marys and for miles throughout the countryside he has placed large signs telling about the good qualities of a certain line of paints and emphasizing that the place to buy it is at the hardware store of J. M. Adam, St. Marys. These signs have produced good results in stimulating sales among the farmers Mr. Adam says.

Son is Overseas

Enlistment for war purposes left Mr. Adam rather short of help. His son, Sergeant R. S. Adam, signed up with the 110th Perth Battalion in 1915, and went to England in 1916 with the Mechanical Transport. He was in England only a short time before being sent to France, where he is still. He spent six months in the Ypres salient, was in the advance for Roulers on July 31, 1917, at St. Quentin when the Germans broke through on March 21, 1918, and was through all the heavy fighting during the retreat. He was also in at the finish, being at Mons on November 10 of last year, the day before the armistice was signed. Sergt. Adam was one of the lucky ones, as he went through the whole campaign without a scratch. Besides having to get along in the store without his son, Mr. Adam also had to do without two of his clerks. As a result of this he has had to temporarily discontinue the handling of automobiles. His son was in charge of this end of the business, and it was developing steadily when he answered the Empire's call.

May Go In Again

"I cannot say yet what we will do," said Mr. Adam, "but it is likely when my son returns that we will again handle automobiles and accessories. There is a lot of good business in that field. I think the day is coming when most hardware stores will have an auto department and show cars on their floor just as we show stoves or other lines."

Mr. Adam is giving a good deal of consideration at the present time to putting his business on a cash basis. He has not yet definitely decided on this policy but states that he is very favorably inclined the more he looks into the matter.

"The public thinks more of the man who does a cash business," he says. "The experience of the big departmental stores demonstrates that. The man who gets the money for the goods he sells can put it right back into the business and keep his stock in good shape, and certainly gets away from a lot of bookkeeping and the worry of chasing up delinquents. In a smaller town, and with a country trade there are things which

The photo shows the manner in which forks and shovels are not only kept together neatly and attractively but are displayed in a convenient part of the store. The illustration also shows how a lot of goods can be displayed in a general way and the store kept orderly. There is a place for everything in Mr. Adams store and it is kept there.

have to be considered. It would be easier if every merchant would adopt the cash basis plan. I have taken the matter up with one or two, but whether they adopt it or not, if I make up my mind that it is the best thing to do I will go ahead."

Store Arrangement

There are some points in connection with Mr. Adam's store arrangement that may be of interest. At the right as one enters are large, all-glass display counters filled with an attractive selection of cutlery. In the centre of the store are the display tables previously mentioned. At one end is the display of forks shown in the illustration. The stove display starts from near the front of the store and runs almost the full length of the store on the left and the walls behind it are filled with shelves laden with paints. All around the store on the shelving at the top are displayed dairy pails, enamelware and similar lines. Because they are up high and out of reach these goods are not permitted to become dust collectors. They are kept in just as good shape as the rest of the stock and add to the general favorable impression that is created by the store.

Uses All Opportunities

As might be expected, Mr. Adam neglects no opportunity to get people into his store. In the fall a one-day fair is held in St. Marys which is a centre of attraction for farmers for many miles around. Mr. Adam usually has a demonstration of special interest arranged for this day. Instead, however, of having it at the fair he has it at his store. He advertises well in advance, and as a result his store on fair day is kept filled to capacity from early morning until closing time. Not only are many good sales made in whatever line the demonstration happens to be on but he gets in touch with hundreds of prospects which are kept track of and followed up closely, resulting in still more sales.

Uses Good Space

Mr. Adam has always been a firm believer in newspaper advertising. He is a consistent user of space and always has a message for the buying public. He has found that attractive illustrations in his advertising matter are invaluable in helping to produce results. St. Marys is one of the Ontario towns recently referred to in HARDWARE AND METAL in connection with the "Spend Your Dollar at Home" campaigns. Mr. Adam does not trust to a one-inch ad. sandwiched in among a lot of others and without any illustrations to sell hardware. When he advertises he always uses a fair-sized space, varying it according to the importance of the announcement he has to make.

FORTY YEARS IN THE CUTLERY TRADE

CANADIAN hardware firms are vitally interested in the Sheffield cutlery trades, in fact several Canadian buyers are at present in England looking up cutlery lines. An article which will prove interesting reading to Canadian hardwaremen appeared in the last issue of "The Ironmonger," published at London, Eng. Under the heading, "A Cutlery Maker's Retrospect," the article appeared as follows:

Before the Sheffield Cutlery Trades Technical Society recently, a paper entitled "Forty Years in the Cutlery Trade" was read by Mr. Walter Tyzack, who said that in 1877, when he first became associated with cutlery making, the boom in trade following the Franco-German War was declining and competition was becoming extremely keen. There was a steady tendency to undersell and to see how cheaply a pocket knife to be retailed at six-pence could be produced. To attain that end there was a constant screwing down of workmen's wages, and it was always the poor cutler who had to bear the brunt of the burden. In that year pocket-knife blades for the most part were hand-forged out of cast steel, and the work was well done. The cheaper filed blade did not make its appearance until some years later, when Bessemer steel came into the market. Grinding had varied little during forty years, although the grinder now enjoyed the advantage of the modern composite stones. All razors were ground by hand with flat sides. The hollow-ground razor was not established, but blades were often sent to Hamburg to be ground hollow. Table knives were almost, and carvers' and butchers' knives entirely, hand-forged.

With the advent of cheap Bessemer grade steels the goff hammer was introduced, and was the means of a vastly increased output of table and other blades. The table-knife branch was the only section of the cutlery trade which had expanded during the last forty years, and that would have been impossible but for the use of machinery for the first process of manufacturing the blades. The introduction of celluloid for hafting helped largely the sale of table cutlery. The use of that material necessitated the narrowing and lightening of the blades to secure the necessary balance.

The drop-forging of scissors was a much more recent process, and in that work he did not consider that we could yet equal the German stampings. Better dies and cutting-out tools were required. The British stampers, however, were improving, and he appealed to them to devote attention to the possibilities of the business.

At the outbreak of the war in 1914 the cutlery trade in Sheffield was decadent, and it was only a question of time when it would have been all but extinct. The way in which the conflict had ended, however, offered the trade opportunities such as had never before occurred in its history. Among the causes which had brought down the industry to its parlous pre-war condition were the unbusinesslike methods of the manufacturers, petty jealousy and suspicion, and lack of technical knowledge and modern commercial methods. He warned the trade against the fallacious idea that the result of the war would render Germany harmless as a competitor. German competition would revive before long, because the world was bare of cutlery and could not wait for its supplies until Sheffield reorganized its system. Moreover, Sheffield had now to fear the United States with her large, well-equipped cutlery factories, and in another way those of Japan. To pay the costs of the war and indemnities Germany must have an outlet for her manufactures.

The future held the hope that Sheffield would alter its outlook and organize for a vastly increased output. The makers must get away from small-scale production, reduce the number of patterns, and eliminate overlapping and duplication of plant so as to keep every machine working full time in order to keep down the cost of production. The industry should be put on a factory basis, and the system of the workman paying rent for his working room and being charged for power, light, and materials ought to be abolished. Schemes of amalgamation and pooling had met with little encouragement, and in spite of examples of other industries the Sheffield cutlery manufacturer preferred to go his own way.

SELL A GOOD DOOR FOR THE BACK

At the recent hardware convention one of the speakers, W. H. Cunningham, of the Kasement Skrene Dore Company, emphasized a point which is frequently overlooked by hardware merchants and their sales staff. Mr. Cunningham made the point that in the majority of cases the public will buy a nice door for the front of the house, and the very cheapest kind of a door for the back of the house. As a matter of fact, the back door is the one which is used mostly and the one which is called upon to keep out the greatest number of flies. In view of these facts, Mr. Cunningham claimed that an equally good or better door should be placed at the back of the house, as it is more constantly used and performs a greater and more important function in keeping out the deadly fly pest. Furthermore, there is very little or no profit in the cheap screen doors, and the hardware merchant is entitled to just as good a profit on the back door as on the front door.

EDITORIAL COMMENT

EDITORIAL BRIEFS

REPORTS from England state that machinery will probably be set up similar to that of the Federal Trade Commission of the United States and regulate trusts and monopolies of the United Kingdom. There are many hardware men who would like to see something of a similar nature started in Canada.

* * *

FOLLOWING the Printing Bureau revelations, states the *Financial Post,* there is now a unique opportunity, with a Union Government in power, and patronage officially abolished, to clean up the Civil Service. The country should demand an investigation of the whole question, the appointment of a body of efficiency experts—efficient in business, but not in politics—who would go through the whole Civil Service and clean it out. All that would be necessary would be to apply those tests which would be applied in any private business. There is no visible reason why the country should any longer carry this burden of expense and efficiency, which would not be borne by any wise private business man.

* * *

DURING the past few weeks Government War Supplies have been disposed of to various branches of the trade at ridiculously low prices, with the result that these goods have found their way into the market and in a few local quarters have greatly upset markets on some lines. If some of the sales were carried on in the manner as rumored by certain parties, the system for disposing of these lines must be very loose indeed and must cause considerable loss to the authorities disposing of the goods, and also to the established business interests. Further information along this line may be forthcoming at a later date.

* * *

AT the recent hardware convention at Hamilton, one of the speakers was the secretary of several associations which are allied with the hardware trade. According to the programme this secretary was to speak on Trade Associations. When his turn on the programme arrived the secretary asked to be excused, stating that he would probably speak on associations later on during the convention. Those in attendance at the convention were looking forward with pleasure and with great interest to this address, but the address was not forthcoming and the trade is now asking why?

31ST ANNUAL NUMBER

THIS issue is the 31st Annual Spring Buying Number of HARDWARE AND METAL. It is the biggest number of a hardware trade paper that has ever been issued in Canada. In this issue our many readers in all parts of Canada will find announcements from the leading manufacturers and wholesalers who do business through the Canadian hardware trade. Wholesale and retail buyers will find in the advertising pages a wealth of information which is of vital importance at the present time. From an editorial standpoint we have tried to make this issue one of real practical value to the hardware trade. Retailers and their sales staff will find many splendid illustrations in this issue showing window display suggestions, interior display suggestions and by examining these reproductions of store windows, etc., our readers may secure ideas and suggestions they can adopt with profit to themselves. We believe that the publication of this big number at the present time will have a splendid effect on all branches of the hardware trade in Canada, and will indicate to the trade the confidence which manufacturers and wholesalers have in the Canadian hardware trade, as in the future of Canada. This number announces the opening of spring trade, and we believe that our readers will find in this number information and ideas which will prove of great value during the coming spring and summer months. HARDWARE AND METAL is published in the interest of the retail hardware trade of Canada and our paper is published and edited with a view to making it more valuable and practical for the retail hardware trade. It is true that our paper is subscribed to and read closely by many manufacturers and wholesalers who find information of vital importance and interest to them, but our chief object is to look after the interest of the retail trade and in this way maintain the confidence and respect of the hardware trade of Canada. Every Saturday for the past 31 years HARDWARE AND METAL has gone out regularly to the Canadian hardware trade. This issue is the biggest issue that we have ever published and we sincerely hope that our readers will find it the most practical and valuable number that we have ever forwarded to them.

WILL WAGES REMAIN UP?

THERE appear to be a great many contradictory views regarding the future of wages and prices. Some weeks ago the feeling was quite general in most quarters that within the next few months there would be reductions in wages to such an extent it would be possible to reduce the prices on many manufactured products in which labor cost is one of the biggest factors.

During the past couple of weeks there is less disposition to encourage the view that there will be a reduction in wages in the immediate future. The *American Metal Market* in referring to this condition states that the remarkably small amount of unemployment occurring with the apparent dullness in nearly all industries is being recognized as an evidence that labor is not likely to be as plentiful as was expected. The demobilization proceeds slowly, from the standpoint of the men who are being taken into industry. This is not surprising in view of the experience after the civil war. The men were near home then, yet they were absorbed with practically no disturbance. Increased attention is being paid to the movement and prospective movement of the foreign born. It is well known that a great many of the foreign born intend to return to the land of their birth, and even if many who now intend to do so do not carry out the intention there will be a great migration nevertheless. It would be strange, indeed, if this did not occur. If it is not a great boon to the people for whom independent republics are being set up in Europe, why is it being done? If it is a great benefit to those peoples, why would not the new condition draw some men from this country?

In the circumstances it is easy to see that possibly there will be no trend at all for wage rates for common labor to decrease.

GETTING RIGHT WITH THE WORKERS

IN Hamilton recently, a small and informal gathering of local industrial leaders and representatives of organized labor was held which promises to spread a significant influence throughout Canada in establishing more intelligent relations between capital and labor and offsetting the Bolsheviki tendencies which are so menacingly at work in this period of unrest and readjustment. The manufacturers and the labor leaders took dinner together and then in a practical way started in to discuss the industrial situation as between employee and employer. It was after midnight when the gathering broke up. The executives put their cards on the table frankly and the representatives of the workers were told in a straightforward way of what was being done and had been done in their interests. The results were most gratifying.

Largely as the outcome of this meeting, an organization is now being worked out by the Canadian Manufacturers' Association to bring about better relations between workers and their employers throughout Canada. A committee is being appointed from each of the eight branches of the Association to meet with representatives of the labor element for a free and frank discussion of industrial problems. These committees will work with a central committee for all Canada, thus completing a national organization. Further than this, manufacturers are individually urged to take up in a direct way their problems with their own employees.

If this idea of intimate relations between the manufacturers and their employees can be carried out in a broad way much will be accomplished to solve the greatest problem which industry has to face to-day. Tariffs and readjusting prices are in themselves questions which are difficult of solution, but they are tangible in character as compared with that unknown quantity which may be termed "social unrest."

DISHONESTY IN BUSINESS

THE whole fabric of modern business and industry is based on confidence. Any one, be he retailer, wholesaler, or manufacturer, who breaks faith with another, takes a slash at business in general. There are those who break their contracts when prices decline, and feel safe in the knowledge that it would cost too much to litigate, and the judgment would not cover all the loss of money, and none of the loss of time. Sometimes, a real business man does get disgusted, and in spite of his loss, he gives the offender a lesson on the ethics of business for the benefit of the country in general. There are, however, large numbers of the small calibre business man who manage to stay in business, sit tight while markets rise, and welsh when prices decline—usually escaping the penalty, probably because the game is not worth the ammunition.

It has been known for a carload of canned fish from the Pacific Coast, packed and labelled to the order of an Atlantic house, to be cancelled by wire a few days before date of shipment because the market has declined, and the shipper, with a carload of canned fish on his hands, was told, "He could use his own judgment about shipping, but the stock would be refused on inspection." What powers of clairvoyance! It has been known that a carload of Eastern jams has been accepted en route only on greatly modified terms by the consignee in the West, which simply meant that goods were received under terms and at prices at which, had the shipper known, the goods would never have been shipped. It has been known that cars of fresh fruit from the fertile valley of the Fraser have been refused on arrival on the Prairie—except they were delivered to the "Buyer" on consignment only, and the wily shipper, instead

of "falling," took the night train, and reached the Prairie point to find the cars well iced and unopened.

There is a serious lack of the fundamental basic principles of honesty evident among some engaged in business, and it is the duty of every business man to stamp out the unprincipled, unethical member wherever his presence is discovered. Make it unprofitable to be morally as well as legally dishonest.

GOOD WORK OF ASSOCIATION

THE beneficial results of the retail hardware convention at Hamilton are still apparent in the hardware trade. Everywhere you go you will find hardware merchants discussing matters which were taken up at the convention. Manufacturers, travellers, retailers and even the retailer's salesmen are all vitally interested in many of the important subjects which were taken up, and whenever a group of hardware merchants get together the conversation invariably drifts around to something which took place at the hardware convention. Hundreds of the hardware merchants who are discussing these matters are merchants who did not attend, but who read the convention report in HARDWARE AND METAL. It has been the policy of HARDWARE AND METAL for many years past to give complete and authentic reports of the convention proceedings and HARDWARE AND METAL will continue to do so in the future, but we would urge every retail hardware merchant to do all within his power to attend the next convention and take an active part in the association. There are a great many benefits to be derived from an active association, and the membership of the Ontario Retail Hardware Association should number upwards of 1,000 members instead of somewhere around 300 members, as at the present time. The association has a number of splendid service features which are supplied free to members, and the Annual Convention alone is worth far more to the retailer than the cost of membership and the cost of attending the convention. In addition to the many splendid addresses by trade representatives the merchant who attends the convention has an opportunity of personally seeing other merchants engaged in the same line of business and also manufacturers and wholesalers who are vitally interested in the hardware trade. All these branches of the trade are interdependent and at a meeting such as the convention, various branches of the trade can get together and discuss trade problems and smooth away the many little difficulties which appear to crop up from time to time. The various branches of the trade will find that their differences are not very far apart, with the exception, perhaps, of two or three associations of manufacturers who are not playing the game in the proper manner. A membership and attendance of 1,000 members should be the slogan for the next convention and with an organization of this strength the merchants could accomplish a great many things which are impossible at the present time on account of the smaller membership.

ELECTRIC DEVELOPMENT

AT the hardware convention, one of the speakers stated that he did not think the hardware merchant could make a success of selling electrical goods unless he carried a complete line of stock. This was interpreted by some members present as meaning that a hardware merchant was better without electrical goods than simply to try to do business with a small stock. We believe the thought which the speaker wished to carry was that in some stores the hardware merchant does not carry sufficient large stock to secure the splendid returns which are warranted at the present time with the rapid development of the use of electricity in Ontario.

To say that a hardware merchant could not sell electrical appliances without carrying a big stock would be rather out of place, because there are hundreds of hardware firms selling electric irons, electric toasters, electric washing machines, electric vacuum cleaners in a big way and are not carrying any other lines of electrical goods in stock. You will also find scores of hardware firms where their chief sales of electrical appliances are confined chiefly to electric irons and toasters. On the other hand there are hardware firms who not only carry complete stocks of modern household electrical appliances, but also go into the sale and installation of electrical light appliances and carry a complete stock which are featured in splendid show rooms.

BRIGHTER BUSINESS PROSPECTS

A GREAT improvement in the business outlook has been noticeable during the past couple of weeks. There is a general feeling percolating throughout the trade that with the advent of spring we will see a great amount of activity in building circles. Reports from various parts of Canada indicate that the outlook for building during the coming spring is brighter than at any time during recent years. During the war period a great many people held back expecting a slump in the price of materials and in the cost of labor. Many of the firms and individuals are no longer able to delay building operations, and the result is that an unusually large amount of work is already under way and the prospects are that despite the gloomy outlook of a few weeks ago, there is going to be a sudden rush of building, and, as one man stated, when it breaks it will break big. It is quite true that business of all kinds has been conducted on a very conservative basis for the past few months, but right now there is every reason for feeling optimistic regarding business during the next few months. The retail hardware trade can do a great deal towards stimulating the building industry and they will unquestionably take a large part in the great development work which is bound to go through in Canada in the immediate future.

Starting the 1919 Bicycle Season Early

Campaign for Big Year's Sales Inaugurated on Dollar Day by T. V. Hill, Oshawa—Starting Early and Keeping at it to Get Results—The Housing Scheme.

THERE is nothing like getting away to an early start, is the opinion of J. V. Hill, hardware merchant, Oshawa, in bringing bicycles to the attention of his customers. It was early in March that Mr. Hill first started to display bicycles in his windows and on the floor of the store for the 1919 season, and the first shot in his newspaper advertising campaign was fired on the occasion of the Dollar Day sale, held last Saturday, March 15.

Mr. Hill has devoted a great deal of time to developing the bicycle end of his business, and its large proportions today speak well for the energy he has put into his selling campaigns. Even more extensive are his plans for the present year's activities, and Mr. Hill looks forward to a record-breaking season in point of sales for bicycles and bicycle accessories.

An Automobile Centre

Although Oshawa is an automobile manufacturing town, it does not follow that everyone can have an auto. However, bicycles form a splendid means of locomotion, not only from a business standpoint, but from the standpoint of pleasure as well. The lake is about three miles from the town, and whereas a street-car service is maintained, it is not always going the right way—another plea, then, for the bicycle—always at hand to take one where he may wish to go.

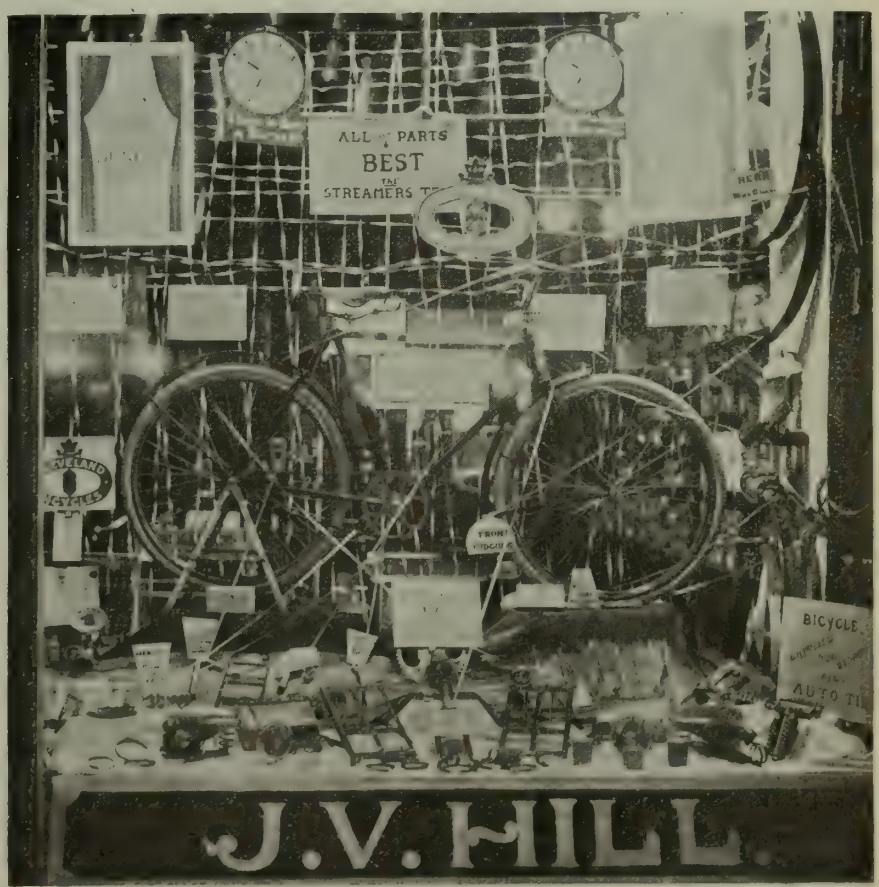
Farmers and Bicycles

It is also noticeable, Mr. Hill states, that farmers are using bicycles very extensively, too. Those living in the immediate vicinity of the town find the bicycle very convenient to run in for small repairs, which they may need on the farm. Or it may be the younger generation want to take in the movie show in the evening—the bicycle is handy, speedy, and requires no special attention on arrival in town. These are all factors which make for the appeal Mr. Hill has to place before his trade. The results are showing also, as Mr. Hill sells as many as 40 to 45 bicycles in a season, and he is campaigning to go beyond all previous records in 1919.

Why Business Has Grown

Asked as to the reasons for the success of his bicycle campaign, Mr. Hill stated that he stood back of every bicycle sold. Even beyond the manufacturer's guarantee, which was pretty broad, he stood ready to see that absolute satisfaction was secured by the purchaser.

A full range of bicycle accessories and repairs is carried, embracing tires, pumps, handle-bar grips, seats, mud guards, wrenches, pedals, etc., and the customer is assured of quick and efficient service in having his needs taken care of. Mr. Hill looks after the repair end, should anything go wrong, and it is his personal attention which is such a factor in the successful development of his bicycle business.



Constantly Displayed

One window of the store is used practically the entire season to carry displays of bicycles and accessories. The arrangement of the window is changed frequently to preserve a fresh appearance, and the ad. reproduced herewith, as noted above, is the first step in the 1919 newspaper campaign to increase the sale of bicycles.

Other Lines Pushed

But there is more to Mr. Hill's activities than the selling of bicycles. He carries a complete hardware stock, builders' hardware, mechanics' tools, automobile supplies, cutlery, housefurnishings, embracing enamelware, tinware, and stoves, paints, etc.

Of these, perhaps the largest is builders' hardware. Here is one reason which may be cited for this condition of affairs: Mr. Hill is interested in building himself, putting up two or three houses a year, and influencing a large share of the business on other properties through his association with the building game and knowledge of its requirements.

This window display was used by the J. V. Hill Co., of Oshawa, Ont., to open the bicycle selling season. Note the use made of show cards and price cards.

The Housing Scheme

The outlook for building this year seems very promising. The town council is planning on a housing scheme in conjunction with the Goverment's activities along this line, and it looks very much at present as though there will be a large amount of work undertaken this year at Oshawa. Needless to say, Mr. Hill will watch the development of this business closely and be ready to close up his fair share of trade offering.

And there may be just a point here for other merchants throughout the country: The Government's housing scheme seems likely to go through in some form, and if it develops satisfactorily, there should be benefit to many communities, and the hardware men in these towns should be ready to handle any and all the business which may be offering.

To Be Nation-Wide Building

Indications point to quite a substantial revival of building operations all over Canada this coming year. This will open up opportunities for practically every department of the retailer's business. Nails, building paper, cement, door sets, paint, are only a few of the lines which will be called for. The completion of the house and new tenants means another opportunity for business which cannot be overlooked if intensive selling is to be followed. These are all points brought to light in reviewing the 1919 outlook with Mr. Hill, and seem worthy of more than casual mention, but that is all that can be given them here.

Goods in Full View

The arrangement of the stock in Mr. Hill's store is such that goods are in full view of prospective customers. Enamelware and tinware, with kindred lines, are displayed on open shelving, easy of access. Stoves are given lots of room, and in these, Mr. Hill reports a very good business. Trade during the fall months in stoves and ranges was considered good, although the season was an unsatisfactory one, as far as climatic conditions were concerned. The mild winter weather affected adversely the sale of heaters and base burners, but that is considered all in the game.

Sells Auto Accessories, Too

Automobile accessories are carried in rather a nice range, and whereas, Mr. Hill states, a lot of this business is handled by the various garages in town, he indicates that he manages to sell a very satisfactory volume of the supplies called for by the motorist. These lines are always on display, either in the window or arranged on tables down the centre of the store.

Altogether, Mr. Hill views the 1919 outlook with nothing but optimism, and feels that he should be able to show a nice increase in the year's business, even over the figures obtained during war years. That is what he has in mind at any rate, and when one sets his mind on a certain objective, he doesn't usually stop until he has gone over the top. The war spirit of success applied to peace-time activities is the attitude for the year's business.

Get Rid of This Rottenness

The Scandal of the Printing Bureau at the Capital — Gross Inefficiency — Under Any Other System the Plant Would Have Been in the Hands of Sheriff Long Ago—Authority Undermined

OTTAWA.—The strong argument against public ownership — that Government administration means gross inefficiency—has been startlingly emphasized by the revelations regarding conditions in the Dominion Printing Bureau contained in the report of the committee appointed by the Government in November last to investigate the whole conduct of the department. Overmanning, inefficiency, extravagance, waste and lack of co-operation are terms which are applied in a general way to the conditions found—conditions described as "shocking" and such as would long ago have resulted in the closing of the doors of the plant by the sheriff "under any but Government ownership."

Of Government ownership it is pointed out in the report that the conditions uncovered are "the perfectly natural outcome of the system which created them." The Bureau has been a refuge of the incompetent. Sweeping recommendations are made for reorganization, which may be summed up in the sentence: "Get rid of the unnecessary employees and make those remaining render efficient service." The findings of the committee may be briefly summarized as follows:

Commercial inefficiency "shocking."

Labor employed at Bureau inefficient.

Proofreading staff overmanned, and could be reduced 60 per cent., with a saving in wages of $40,000 per year.

Conditions in typesetting department "pitiable."

In some departments three men employed where only two are necessary.

Some of printing costs 50 per cent. more than it should.

Conditions in bindery department "preposterous."

Political influence in selection of help cause of inefficiency and lack of discipline.

Charwomen and caretakers costing $31,000 a year.

Proofreading department a dumping ground for those "who could not otherwise be placed."

Editorial Board has done good work, but is fettered by present system.

Mechanical staff is paid a higher scale than obtains for the same work in Toronto and Montreal.

Placing the Blame

In placing the blame for the conditions found, the committee makes it clear that the insidious influence of politics so often found under the system of Government administration has undermined the authority of the King's Printer. The report says:

We unqualifiedly place the blame for the existing conditions in the Bureau upon the failure of those to whom the King's Printer has been responsible to uphold his authority under the law, thereby undermining the discipline absolutely essential to the successful management of the Bureau. This condition is practically as old as the Bureau.

Neither the King's Printer nor the Superintendent of Printing can be held responsible for the unfortunate situation.

Recommendations

Recommendations of a sweeping character are made, and the fact that they represent an annual saving of $350,000 to the Government and to the people of Canada is an indication of how deeply they cut. They include:

Put Bureau on an independent commercial basis.

Superannuate all employees over 60 years of age who have rendered a fair amount of service.

Reorganize the executive staff, particularly foremen and sub-foremen.

Reduce staff of proofreading department alone by at least 60 per cent.

Have Bureau administered "by the King's Printer and the Superintendent of Printing, with full power, through their foremen, to hire all help and dismiss when, in their opinion, such action is necessary."

Some Strong Language

The report, which is a voluminous document, deals exhaustively with the conditions investigated, and it speaks out candidly as to what has been discovered. Following are some quotations which will serve to indicate the trend of the whole document:

Viewed from the standpoint of commercial efficiency, the conditions found to exist are shocking.

Under any but Government ownership the sheriff would long ago have closed the door of the plant.

Given its housing accommodation rent free, without taxes or insurance, not expected to provide even depreciation on its plant let alone interest returns upon its cost, with heat, light, and power gratis, with wages of certain of its employees paid by vote of Parliament, the Bureau has not been able to pay its own way.

The labor employed by the Bureau renders inefficient service. To be candid, it does not earn the money it is paid. Furthermore, there is not much inducement for it to do so.

The system has placed each class of employees on the dead level, and made it uncomfortable for anyone to attempt to distinguish himself amongst his fellows.

It is pertinent to point out that the committee is strongly of the opinion that neither the King's Printer nor the Superintendent of Printing can be held responsible for this unfortunate situation.

To maintain a man in idleness for two months in order that he may work one, is obviously bad business practice.

During the last year, the situation, to put it mildly, has become pitiable.

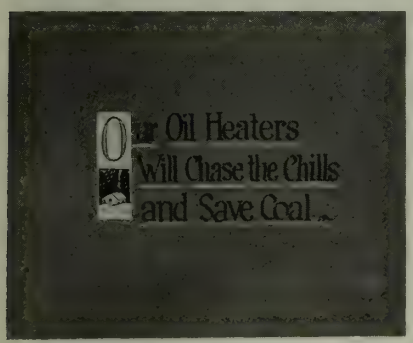
At certain times there is not enough work available to make even a pretence of an honest day's work for the number of men employed. As a result the art of doing nothing and making it appear like real labor has been highly developed.

An appointment to the Bureau staff has, by practice, apparently become a life engagement. The mere fact that there is no work for the employee to perform has no bearing on his retention. As a result, three men are engaged in doing the work that two might perform without any necessity of exerting themselves.

The "Official Gazette" is still set by hand, although machinery which could do the work at a fraction of the cost is standing idle. This publication is costing almost 50 per cent. more than it should.

The difficulty at the Bureau can be largely explained by the statement that the employees have been engaged through political influence.

The management has been powerless to correct the difficulty owing to the pressure brought to bear on behalf of some of the employees. It appears to have been used as a dumping ground for people who could not otherwise be placed.



Exclusive Store Uses Small Cards

Show Cards in the Windows a Little Larger and More Easily Read Than Those Used in the Store—Color Scheme of the Cards is Frequently Changed, Although White Cards Are Always Popular

One of a series by R. T. D. EDWARDS

ANYONE interested in showcard writing, whether a card-writer or not, when travelling throughout the American continent will take notice of the particular styles of showcards used in various districts. He will also notice the similarity of the work in one district of various card-writers.

This seems to have been the case especially throughout Canada where card-writing has not been practised as long as on the other side of the line. Here, one good card-writer settles in a district and from him many amateurs copy their style. This is gradually improved upon until the district has a lot of good card-writers, all with much the same style.

This condition, while not objectionable, could be improved upon by varying the ideas comprised in showcards used in other cities with the local style.

Various Methods

With the object of improving the showcards in various localities, we are running this series of showcards explaining the various methods used in large stores throughout Canada and the United States.

This month's article deals with two large stores in Chicago. Their methods of preparing showcards are well worth studying.

The first store which we will consider is one which handles very high class merchandise, a very exclusive store. Not the type that has to advertise bargains to sell its goods, but whose merchandise is so exclusive that very few cards are needed for the display.

The Difference

This is one of the predominating differences between the Canadian and American stores. The better class American stores use showcards sparingly and those they use are very small with small lettering.

The lettering is very neat, but no neater or better than many Canadian card-writers can do. The lettering is kept to the centre of the card, showing plenty of background, and when a price is necessary the figures appear no more conspicuously than the lettering. The work is usually of brush or pen stroke construction.

Now take the Canadian stores, even the most exclusive; you find them using cards of a type that the cheaper American store uses. Large cards with heavy type and often of gaudy colors are common. This class of card is absolutely barred in the type of American store previously mentioned. They are considered vulgar and absolutely out of keeping with their beautifully designed stores and with the beautiful merchandise they sell.

Their showcards are small, the lettering is small and price is small. The lines are straight across the card and all layouts are uniform. One type of lettering is used throughout the store and only one. These cards are used exceedingly sparingly and not placed in a too conspicuous place so as to detract from the merchandise display.

White is Popular

White cards are popular, but the color of the cards is changed from time to time. But no matter what color is used it must be uniform throughout the store. The card-writers work slowly and accurately to get uniformity in their work.

At the present time the most exclusive store of the two is using a very pleasing brown mottled card with small white lettering for both windows and interior use. The white lettering is put on with a small brush or music pen which will flow the heavy opaque card-writer's white successfully.

A quarter sheet card (11 in. by 14 in.) is used in the windows and with the most exclusive displays no cards are used at all.

The other Chicago store uses a white card for the interior and varies the styles for the windows.

On the main and second floors of the latter store it is the rule not to use any larger card than 5½ in. by 7 in. The lettering is made with the pen, using a black carbon ink. Both the lettering and price are put on small, but are quite readable.

The Window Cards

The window cards are a little more elaborate at opening times when coloring is used very sparingly. Cards similar to the grey card with black lettering illustrated on this page are used. The edges of this card are sometimes bevelled and gilded. The fancy capital is drawn on white paper and pasted on the card.

The other illustration shows the style used by the store first mentioned. It is a dark brown mottled card with white lettering. This store always has the edges of their good display cards bevelled and gilded.

GOING THE LIMIT WITH THE CUSTOMERS

(Continued from page 133)

Some Selling Points

"Do you think the retailer can sell the line he wishes to get behind, Mr. Bedard?"

The reply was in the affirmative, and Mr. Bedard made some important observations.

"If a customer asks for a certain thing, I try to place it before him. But I do not lose the chance to sell a line which I know to be reliable. And I am strong on selling a high grade of goods always."

Continuing, it was pointed out that customers would come in and ask, for instance, for a tin of varnish or paint. "I want a tin of cheap varnish," they would remark. In such case this would be produced. The point is that the customer has asked for a given article and it is the least reflection on their request to comply. But at this point the salesman should interest himself in the customer very closely. What is the varnish for? Is it to be used on a floor or on some other work? There are instances where a floor varnish, probably, would not be as suitable as a cheaper one.

Explains the Goods

Ascertaining the exact use to which the varnish was to be put, the salesman would explain the important advantages of the line which he would then recommend. This is very important, for it is probable that the average woman, in particular, has no knowledge at all of the varnish or paint that she expects to use. As Mr. Bedard said: "It is quite as important to the dealer as to the customer that the latter get the particular line best suited to the work. For if she is given the product that will not give satisfaction, even though it be the one asked for, the dealer will not soon be forgotten; he will get all the blame for a job that has not been satisfactory."

One instance will serve to illustrate the selling power of the dealer.

"A lady came in and wanted some varnish. She was sure she must have the line asked for. I gave it to her. But I said: "Will you please take this (giving her a small tin of another brand I knew was of high quality) and just use a little of it on the floor where the wear is hardest? There will be no charge for it."

The result was most desirable. "The woman returned for a pint tin later, then a quart, and finally she bought a half gallon can of the varnish I had wanted her to use."

Other Good Plans

Particular attention is paid to the development of a key-cutting trade, to saw sharpening, scissors sharpening, electrical repairs, etc. That this may be done with every satisfaction to the customer, Mr. Bedard has an expert in charge of the work, and this insures real satisfaction.

Kept Them All

"I called up the wholesale and asked that a quarter dozen of each style of trunk keys be sent me. There seemed to be some hesitation on their part, for there were a great variety of these and I knew this. Even when the delivery man brought them he seemed to expect that I would change my mind—that there were likely more than I had figured on. However, I kept them all. These many patterns enable me to fit any lock that may require a key. It is important to have the proper key when it is wanted, and even though this purchase meant an investment of $15, it is worth while. If one of these keys does not fit (the locksmith taking a sample of each kind with him, numbered) he can come back to the shop and quickly cut one. It means much to a customer to get a key right when it is wanted."

A splendid little idea is carried out in stocking these keys. A small rectangular board about 20 inches wide by two feet long is varnished and ordinary bright screw hooks, square, are used to hang the keys on. These are placed a few inches apart and room is found for stocking nearly 100 varieties and from three to six of each. A little slip of paper beneath each carries the number and the cost and selling price. It is thus convenient to keep tab on stock at a glance, and there is no overstocking. Provision is made to also carry night latch keys and blanks at the bottom of the board.

A Repair Shop

A small bench is provided at the back of the store and the little jobs of repairing electric irons, making keys, etc., can be carried out between times. A neat office has been arranged immediately over this little workshop, with shelving beneath, and permitting all room to be used to advantage.

In the basement an electric motor is placed and a neat and compact workshop set up for saw-sharpening, knife and scissors-grinding, and many other little jobs that are wanted from day to day. By having a handy man, expert in doing this work, the features outlined will doubtless prove to be trade-winners and real profit-makers for the Bedard business.

CANADA IS ON THE EVE OF GREAT DEVELOPMENTS

(Continued from page 124)

British concern had got in ahead of them.

New Minister of Trade Needed

The Prime Minister's next move is to find a new head for our Department of Trade and Commerce—a big, broad, tactful, able business leader. The people of Canada have been misled—by outside propaganda; by little journalists in big jobs, men unable to understand business problems; by newspaper proprietors afraid to tell the public unpopular truths; by self-seeking, irresponsible politicians who play to the prejudices of the masses; by some workers from the Old Country and effete monarchies who can't see the great differences between European and Canadian conditions and opportunities—until we have class misunderstandings and antagonisms, wrong ideals, class legislation, handicapping the enterprising investor and manager, who, more than anyone else, is responsible for our national prosperity and the future development of the country is regarded with suspicion. All this prevents co-operation and co-ordination among those whose interests are common.

A great trade leader is needed to bring order out of this chaotic condition, harmony among conflicting interests, encourage enterprise, control the few selfish combinations of capital that create trouble for the other vast percentage; a man who would get us all working together for Canada and the Empire just as Sir Arthur Currie united and put enthusiasm, thoroughness, a capacity and a desire to do things into the Canadian Corps in France.

Despite the handicap of lack of proper leadership, the indications are that Canada is entering on an era of great development and prosperity. With proper leadership and co-operation Canada will forge ahead at a more rapid rate that any other nation.

The hardware trade of Canada will feel results from the growth and development of our country more than any other class of merchants. The hardware trade of Canada can do more than those in any other line to assist in the development of our country, and they can depended upon to do their part.

GOOD ADS SUCCESS CORNERSTONE

Continued from page 151

to-date unpacking and packing room. Here all freight and other material is handled after it has been conveyed from the lower floor by means of an electric elevator. Should the contemplated changes be made, this floor will be used as a wholesale warehouse.

In all, fifteen men have enlisted from the various departments. The departments are in charge of the following, some of them having been with the firm since its inception twenty-one years ago: Frank Barrett, building and hardware, also assistant manager of store; Clarence Hatherly, mills' and farmers' supplies; H. J. Dunnett, house furnishings. Major Dunnett, as he was formerly known, left Canada with the 18th Battalion. He went to France as a private and won his promotion on the field. He was also honored with the D.S.O. for bravery shown in battle. Major Dunnett was reinstated in his former position as soon as he received his discharge. Other department heads are: C. Layle, paints and varnish; E. A. Davey, secretary of the company, silverware and cutlery; W. Cassidy, toys and electrical department; Alex. Lewis, foreman of workshop, and F. Smithson, basement.

Solving Your Own Housing Problem

Experience of One Canadian Industry May Contain Ideas For Your Own Community—The Hardware Dealer Can Cash in on Present Movement—Lend it Your Support and Experience

THE Housing Problem is not confined by any means to the larger cities, but is a vital question in practically every town in the country. The idea of this article is to show the steps taken by one industrial firm to solve their own employees' problems in this respect and perhaps suggest something which the hardware merchant can bring to the attention of his local town council or local firms as a suggestion for their activities during the present year. It is not too early to "start the ball rolling" and the hardware man stands to benefit by lending his support and influence to any housing scheme which may be instituted in his own community.—EDITOR'S NOTE.

THE housing of the workman is receiving a large amount of attention, and justly so, for the industrial developments of the last few years have to a large extent altered conditions formerly encountered. Many industries have sprung up in districts remote from large centres, and even the cities themselves have felt the pressure incidental to the increased numbers of workers in the munition plants, which have been operating in such large numbers. The Governments of many of the Allied countries have taken considerable interest in this phase of the labor problem, and many firms have themselves gone to considerable expense to create satisfactory conditions for their employees.

One of the most interesting of these private housing schemes has been worked out by the Norton Company, both in Canada and in the United States. In this article the industrial community created by the Norton Company shows the developments which have recently been completed at Chippewa, where the Canadian plant of this company is located. There may be some feature of particular interest which can be adapted to your own community, and the hardware merchant is one who is sure to benefit in proportion to the interest he shows in the present housing problems of his town.

The location of the Norton Co. at Chippewa, while ideal from the standpoint of power supply and industrial facilities, was somewhat at a disadvantage as regards housing conditions for employees. Houses were scarce and unsatisfactory, and rents were high, necessitating the employees living at Niagara Falls and coming to work by street car, the night shift having a car service at only one hour intervals.

To ameliorate these conditions the company started a comprehensive housing scheme in 1916, the major portion of which has recently been completed. Land, which was formerly a cow pasture and swamp, is now filled in, graded, with well built roads and lighting, and forms the nucleus of an exceedingly attractive community. How many towns have these "beauty" spots that are an eyesore to the residents and create a poor impression on the visitor?

Layout

The community is located somewhat to the south of the plant and centres around a new cross street, which intersects the main approach to it.

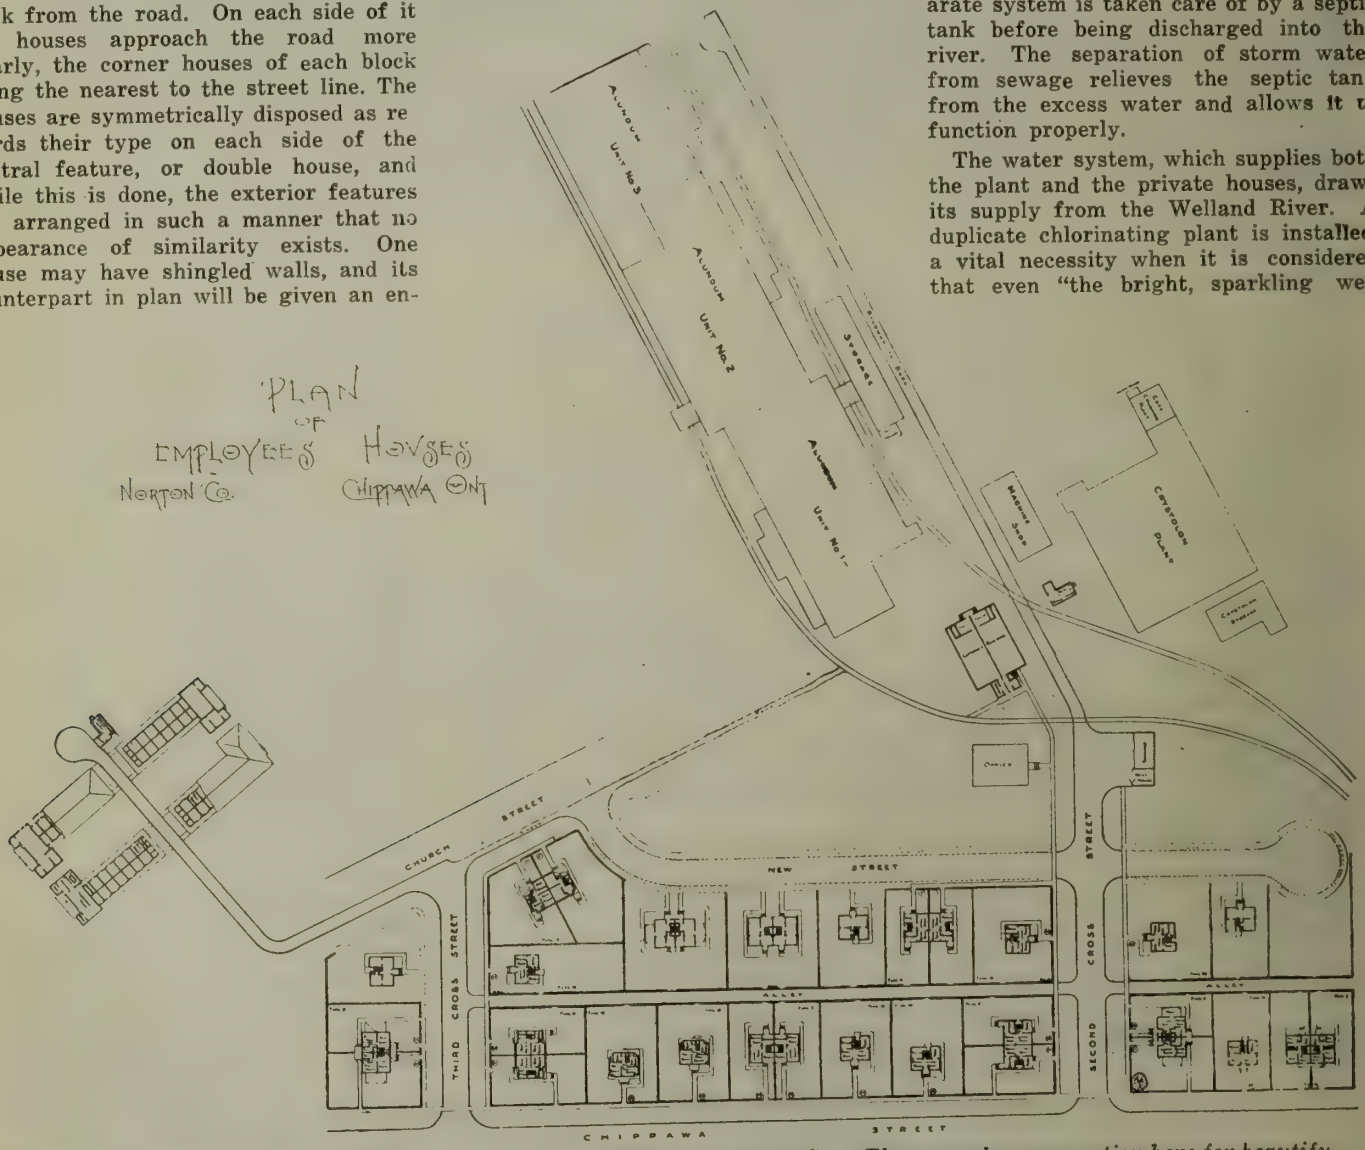
This street, together with that leading to the plant, has been graded, paved, sidewalks put down and made attractive by the planting of trees and the wise utilization of those already grown to full size. An additional pavement has also been put down for the space of several blocks to provide a satisfactory means of entrance from the village of Chippewa proper.

The types of houses developed by the architects, Wright and Kremers, of Niagara Falls, N.Y., are vastly different from those usually met with in industrial communities. All too frequently in new developments one sees block after block of houses the same in every respect, closely jammed together and with no attempt made to relieve the monotony by varying the architectural features of individual houses, if, indeed, they have any.

This illustration shows a typical single and a typical double house. The type is not an unfamiliar one in many communities.

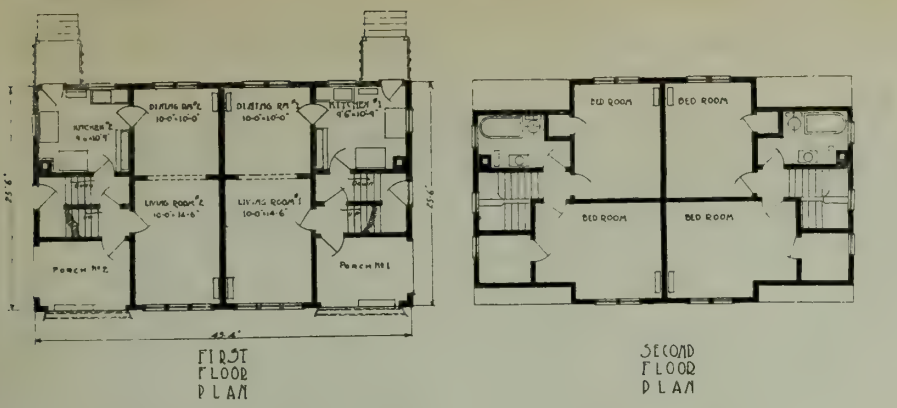
In the development here described, the value of plenty of yard space for each unit was well considered. Each house, or double house, is set well back from the road, with an ample back-yard, and a uniform street line has been carefully avoided. In a typical block the central feature will be found to be a double house of substantial appearance, set well back from the road. On each side of it the houses approach the road more nearly, the corner houses of each block being the nearest to the street line. The houses are symmetrically disposed as regards their type on each side of the central feature, or double house, and while this is done, the exterior features are arranged in such a manner that no appearance of similarity exists. One house may have shingled walls, and its counterpart in plan will be given an entirely different appearance by the use of clapboard siding, and a different verandah treatment.

The Vanished Backyard Fence

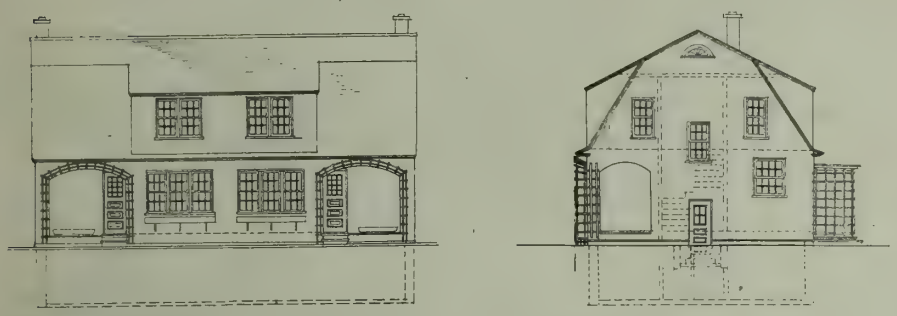


That eyesore of the city and town, the backyard fence, is only conspicuous by its absence, and the hedges, which have been planted in its stead, will, with each passing year, grow more attractive and will make the backyard a place of beauty, instead of a depository for ashes and tin cans.

Along with this improvement goes one which also helps towards the attractive appearance of the community. No one will admit that the twice a week appearance of ash and garbage cans on front lawns is an aid to civic beauty. This has been avoided in the present instance by the provision of a through lane, serving every house in a block. Through this lane all coal is delivered and all garbage collected. The garbage cans are chained to posts so that their removal is a matter of some difficulty.



Sanitary Provisions



Since the Village of Chippewa has no sewage or water systems, the company have considered it good policy to provide both for the community which they have established. Every house is connected to the sewage system, or rather to two systems, for the rain-water collected from the roofs is drained into a separate sewer, which also takes the waste water from the plant. The sewage in a separate system is taken care of by a septic tank before being discharged into the river. The separation of storm water from sewage relieves the septic tank from the excess water and allows it to function properly.

The water system, which supplies both the plant and the private houses, draws its supply from the Welland River. A duplicate chlorinating plant is installed, a vital necessity when it is considered that even "the bright, sparkling well

Plan for housing development at the Chippewa plant of the Norton Co. There may be a suggestion here for beautifying some unsightly part of your own comunity.

Plan and elevations of typical double house. Many builders favor this type and it has advantages.

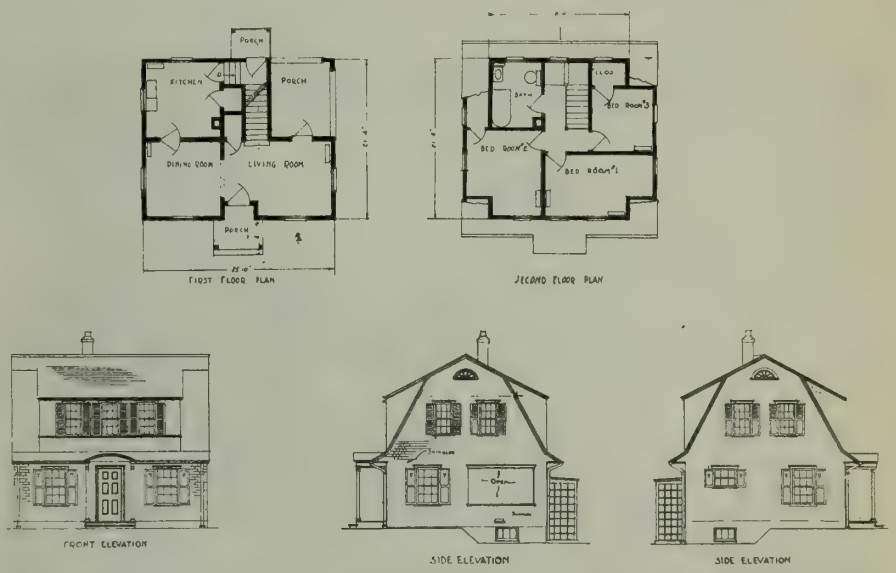
Too many towns to-day neglect to have a proper fire protection system. Hundreds and thousands of dollars could be saved were better fire fighting apparatus available. The saving in insurance rates covers the cost of proper equipment to fight this dreaded menace.

Plan Arrangement of Houses

As will be seen from the accompanying illustration, the single house has three rooms on the lower floor with a back porch. The dining room is 10 ft. 8 in. square and opens onto the living room of larger size. A swing door connects with the kitchen, which is provided with a sink and pantry closet. A rear entrance leads to the outside and also to the basement, the cellar stairs being located under the stairs leading to the second floor.

The second floor contains three good-sized bedrooms and bath, closet space being provided for each room.

The double houses are arranged on a slightly different plan, the stairs leading to the second floor from a small hall, instead of directly through the living room. A front porch is also provided, instead of one off the living room. The



(Continued on page 154)

water" of the village was highly contaminated with organic matter and at times a dangerous source of typhoid.

The chlorination of all water used in both the private houses and the plant removes the possibility of infection from this source.

Fire Protection

For the protection of plant and community from a fire, a fire department has been organized with hydrants located at proper distances apart. Two volunteer fire companies have been organized and are provided with a hose reel and a chemical wagon, housed in an attractive station. Fire alarm boxes of the break glass type are located on the ornamental lamp posts. These boxes serve to operate an indicator in the fire hall, and also operate an electric syren at the plant. This signal gives the operator at the pump house notice to boost the pressure.

Plan and elevations of typical single house. There may be an idea here for your own community builders.

View showing typical houses, Norton Development, Chippewa. This class of house is a credit in any town or city. Making this old world a better place to live in is not such a bad idea.

Putting the Window Display Across

Changing the Display Often and Use of Price Cards Factors in Success

Jordan and Virtue, Oshawa, Pay a great Deal of Attention to Development of Window Display Selling. The Interior of the Store Conveys the idea of "Making it Easy For the Customer to Buy Goods." Looking Forward to Big Year's Business in 1919. Mechanics' Tools One of Biggest Lines Handled.

"SO you are buying goods?" was the query put to Mr. Virtue, of Jordan and Virtue, Oshawa, as the representative of HARDWARE AND METAL waited while part of a new shipment of merchandise was being marked.

"Why, yes, of course. Why not?" Mr. Virtue replied. "We can't do business unless we have goods to sell, and if we starve our stock we must expect to starve our business. That most certainly we do not want to do. Our record here has been one of continual growth, and we do not aim to have 1919 show any different returns when the figures are totalled up at the end of the present year."

That is the spirit which is going to carry on and result in big business for those adopting it. Mr. Virtue sees no reason for the calamity howler to be loose, and is adopting a selling policy which should spell success for the present year.

Mechanics' Tools Featured

One of the big items in the Jordan and Virtue business is mechanics' tools. Being a large manufacturing centre, Oshawa trade calls for an enormous amount of the tools necessary to carry this on successfully, and it is to this trade that the members of this hardware firm cater particularly.

The Window Display

Reproduced herewith will be seen a window display run a couple of weeks ago by this firm. As a matter of fact, one window of the store—there are two display windows—is used altogether for mechanics' tools, and this is rearranged every week, usually on Friday, to be ready for Saturday trading.

The illustration shows a window display of Jordan & Virtue at Oshawa, Ont. Note the use of price tickets. Action was given to this display by a revolving stand operated by a small motor. This resulted in a number of lines being shown that could not have been displayed in the same space otherwise.

This is a reproduction of the advertisement used by Jordan & Virtue of Oshawa, Ont., in connection with the recent Dollar Day sale.

Getting "Action" Into Window

In the window display shown herewith, there was "action" put into the effect by building what might be called an octagonal cylinder. This was arranged in such a way that, with the power supplied from the motor of an electric fan, this cylinder revolved, and besides attracting attention to the "moving display" itself, secured the attention of the passer-by to the many other lines in the window.

There is really nothing complicated in the construction of this revolving display idea. A saw, hammer, a few nails, and the wood could be very easily and quickly

Continued on page 152

Not only the lower windows are used by Ingram and Davey for display but also the whole front of the second floor. Every article bears a price ticket and while a lot of goods are shown the windows are never overcrowded.

Good Ads Success Cornerstone

Hard Work, Giving Good Value to Customers, and Good Window Displays Also Big Factors in Building Business, Says George W. Davey—St. Thomas Firm is Planning Larger Premises

"PLENTY of hard work, plenty of live advertising, well-dressed windows all the time, and last, but not least, giving our customers value to the extent of one hundred cents on the dollar on every purchase made."

This is the formula which George W. Davey, of the hardware firm of Ingram and Davey gives for the success of the firm, which the proprietors in their advertising feature as "Western Ontario's Largest Retail Hardware Store."

"Twenty-one years ago," said Mr. Davey to HARDWARE AND METAL "we started in business in a little building in the extreme east end of the city. It measured eighteen feet by sixty. Ten years later, after having enjoyed a measure of success we moved, and now occupy one of the finest hardware stores outside of Toronto, in the province."

Will Enlarge Store

"Despite war conditions, business has been excellent, and our present buildings, one being forty by one hundred feet of red pressed brick, and the other forty by fifty feet, two storeys, are too small. We are planning extensive alterations and additions and have purchased adjoining property with the intention of building a new three-storey building to take care of horses and delivery trucks. The upper storey will be used as a warehouse, and in order to avoid the expense of additional real estate we will place another storey on top of our workshop in the rear."

Ingram and Davey are constantly seeking new fields of development. They believe in going out after business and in going after it aggressively. Service to the community is part of their programme. If there is a demand that is not being supplied the firm takes it on.

Built Up Business

In this way it has built up some of the departments of its store until there are not many larger or better equipped departments in the province. Starting in a small way with electric fixtures and equipment the firm now handles a large quantity of these goods. It is stated that it handles more electrical goods by quite a large percentage than the electrical shop of the Hydro Commissioners in St. Thomas. The electrical goods section on the second floor of Ingram and Davey's store is most attractively arranged and stocked. The lamps and electrical fixtures and devices of all kinds lend themselves readily to display purposes, and full advantage is taken of this. The firm not only has a large and complete stock but it takes pains to let the buying public know about it. This is accomplished by window displays and newspaper advertising and by display in the store. Back of all this, however, is the service idea. The firm is ready to stand behind the goods it sells. It aims to not only sell merchandise, but satisfaction. If by any chance any goods that go out do not prove satisfactory the firm wants to know about it and will make them good. This spirit has won for Ingram

and Davey a wide patronage, not only in St. Thomas, but for miles around. People who deal with a firm whose aim is satisfaction and service generally are not slow to tell others about it, and Ingram and Davey have profited by this kind of free advertising.

The Toy Department

The toy department is another branch of the store that has grown from small beginnings to a turnover that now runs into large figures and is steadily growing. Every youngster for miles around knows about Ingram and Davey's toy department, and the visits made there are events about which the kiddies dream for months. Toys have come to be an all-year-round line with this firm, and they have built up their big trade in this department by persistent advertising, window displays that carry an appeal to every youngster in town, and by arranging special demonstrations. For instance, at Christmas time, as described in a recent issue of HARDWARE AND METAL, Santa Claus came to town, and while there his headquarters were at Ingram and Davey's store. Good care was taken by use of newspaper space to advertise the coming of St. Nick a month in advance, and as a result there was a procession of youngsters and their parents on his arrival that looked like a peace celebration. There was just as much enthusiasm, too.

On Other Occasions Too

Christmas of course is the big toy season, and the big demonstration is held at that time, but during the year Ingram and Davey frequently plan a drive in seasonable lines of toys, and the youngsters and their parents are invited. What is more to the point, they come, and what is still more to the point, a very large percentage of them buy. Incidentally the firm gets an enormous lot of free publicity of the most valuable kind.

On the main floor to the left of the entrance is the builders' hardware department. The same ideas of display are carried out here. The prospective customer, as soon as he enters the store gets a favorable impression, because he finds himself looking over not only a large, but a very complete and very well kept stock. This applies to the stock throughout the store. It is well kept and the store is well kept, neat, clean, and orderly and well arranged.

Immediately behind the builders' hardware section is the mill, farmers, and plumbers' supply department. Here also is a complete stock, well displayed, and in the rear of the store is the house-furnishing department. This is an especial centre of attraction for the housewives of St. Thomas and district, with its big stock of aluminum goods, graniteware, tinware, fibre goods and brushes and other lines.

The Paint Department

At the rear of the house-furnishings section, and separated by sliding doors of fireproof construction, is the paint and varnish department, also oils. The paint business of the firm in the past three years has shown a splendid increase, and it is not unlikely that as a result of the importance it has assumed that during the pending building operations the paints and varnishes will be given a place nearer the front of the store. Putting things where people can see them has been one of the methods by which Ingram and Davey have steadily increased sales. The paint stock, while a large one, is easily accessible, as the higher shelves may be reached by the clerks from sliding ladders. For handling the oils, self-measuring tanks have been installed, and for the convenience of motorists there is a large tank of gasoline near the side door of the main building.

Make Big Sales

As might be expected in a city where the shops of several important railways are located, there is a big opportunity for selling tools. Ingram and Davey have a department stocked with mechanics' tools that is one of the features of their store. It is located on the opposite side of the store from the builders' supplies section and at the front of the building. Everything that is likely to be required by any of the mechanics in the city is in stock, and a great many lines are on display. All glass silent-salesmen are used to good effect in this department, and window displays of tools are frequent. They never fail to produce results, the firm states.

The toy department on the second floor is so arranged that every line handled is displayed all the time. Each article bears a price ticket. Invitations to visit this department are given by the firm and thousands of kiddies and their parents take advantage of them.

The photo shows a section of the main floor in Ingram and Daveys store. Note the effective use that is made of all glass silent salesmen, and the manner in which cut glass and other lines are freely displayed. Neat and attractive arrangement is one of the features of the store.

Catches the Eye

Right in the centre of the main floor and facing the main entrance, stand massive plate glass silent-salesmen filled with an array of silverware, cut glass, cutlery, and similar lines that not only arrest, but hold the attention of ninety-nine out of every hundred women who come into the store. Big sales in these lines are made each year and are steadily climbing. A feature that adds to the sales not only from the silent salesmen but from the window displays and store displays generally is the generous use of price tickets. People who come in can tell at once the price of any article and also know without going in to inquire the price of any lines featured in the windows.

Sporting Goods

At the rear of the tool section on the main floor is a large sporting goods department. The firm is the sole agent for some of the finest lines of goods on the market. Not in every city of 18,000 is there to be found a store that carries a complete stock of goods for golfers, curlers, hockey players, baseball enthusiasts, tennis players, fishermen and others. Ingram and Davey have all these and many more, and they sell goods for many miles around, and they do it by letting people know that they can get these things at Ingram and Davey's store.

While the firm does quite a large credit business it is extremely careful to see that any accommodation extended is such that there is little chance of loss. A great deal of this credit is necessary because hundreds of the firm's customers are railway men who only get their pay cheques perhaps once a month, and farmers who want credit until their crops are disposed of.

Not Afraid of Them

One of the gratifying things about the aggressive way in which the firm goes after business is its policy in connection with mail order trade. Ingram and Davey welcome the chance to meet the man or the woman who has it in mind to send to the department store for something he or she has seen in "the catalogue." After they are through demonstrating their goods and comparing prices, quality, etc., there is not much money goes to the big city stores. The firm also meets the mail-order competition by an offer to pay freight on all shipments over $10 in value.

Attractive Ads.

The firm has always been a consistent user of newspaper space, and it has always aimed to direct its messages to the buying public in an attractive and intelligent form. Space is not skimped and free use is made of illustrations. This has been found a most valuable assistance in producing sales. Another thing always featured in the ads. is to give the price in large figures. Ingram and Davey also pay special attention to keeping their ads. seasonable. They are right up to the minute. Frequently the firm features "Saturday Savings," as shown in the illustration accompanying this article and has found that excellent results have followed.

The basement is used for displaying a large stock of window glass, roofing material, oils and building material. At the rear of the store stands the warehouse where a large stock of iron is kept ready for immediate use. The upper storey of this building is used as a workshop. It is heated from the main building, and during the busy season twelve to fifteen men are employed.

Makes Packing Room

The top and last floor provides an up-

Continued on page 144

PUTTING THE WINDOW DISPLAY ACROSS

Continued from page 148

assembled in the form this firm used it. The cylinder is about 2 feet long and 16 to 18 inches in diameter. The face of each octagonal section would be about 10 inches in width, permitting the easy attachment of many small lines of tools. The cylinder in the photograph herewith appears under the large display card reading, "If it's mechanics' tools, we have them." It will be seen that the tools shown carry price cards, giving in plain figures the cost to the purchaser.

What Is Back of Price Card Ideas

"Our prices are right. We feel that the price we ask is a fair one, and we are never adverse to showing price cards on the goods in our windows," Mr. Virtue stated, when the question of price cards was mentioned. "In fact we not only use them in our windows, we use them in the display cases in the store—the goods sell themselves in this way," Mr. Virtue continued; "the mechanic knows pretty well what he wants, he sees it in our windows or in our display case in the store, and asks for it definitely. There is no necessity for him to ask the price from any of the salesmen—there is the price in plain figures, and with the many lines which the mechanic knows well, it is just a case of 'handing out the goods.'"

There are other factors in the price card idea, too, which have been covered often in HARDWARE AND METAL—one of these suggests itself here as a result of the talk with Mr. Virtue. The customer on seeing a price card on goods feels that the merchant issuing same is down to rock bottom in his selling cost. The merchant's idea may be higher than some of his competitors, but at least the consumer feels more confidence in the merchant—he gets the impression that those are the prices asked everyone—he is not being discriminated against in any manner as an individual. The customer's confidence is a mighty fine thing for a merchant to have, and this is obtained by fair prices and fair dealings.

Display No Complicated Process

In the window display herewith, the background was built up with boxes—the goods were displayed on purple crepe paper—the one side and back of the window were used to carry displays also. There was no available display space lost, but the goods were not crowded in by any means, either. There is, perhaps, a fine distinction to be drawn here, but it is quite clear that all the space can be utilized and yet avoid crowding. That is one reason why the windows dressed by Jordan and Virtue are such a success. They are arranged with a view to attracting the attention of the discriminating buyer, and all possible care to cater to his taste in neat arrangements is taken. Hangers, cut-outs, and in the store counter display cards are used extensively—getting the name of the goods handled before the user is the idea back of this selling program.

The Selling Idea Predominates

When one comes to the interior of the Jordan and Virtue store, the same care in arrangement, the same idea as to putting across sales is carried out. Whether it is mechanics' tools, aluminum ware, enamel ware, or paint, the idea is to get the goods out where they can be seen—priced so that selling effort on individual lines can be reduced to a minimum and yet extended to cover a greater range, or, at least, a greater volume of goods.

"Making It Easy to Buy Goods"

The display of enamelware, tinware and kindred lines is bright and attractive, arranged on tables and open shelving, where it is easily accessible to the buyer and to the salesman. "Making it easy to buy goods" might well describe the activities of this firm, and with such an idea back of them, it is by no means hard to figure out why, as Mr. Virtue claims, their record has been one of steady growth and expansion. It is the intensified selling campaign which they are conducting to which they attribute their success. "Having the goods our customers want—making it easy for them to buy—selling the goods at attractive prices," is how Mr. Virtue sums up their attitude.

"Comfy" Arrangement of Paint Department

The paint department is another very attractive feature. The stock is carried on shelving in the usual manner, but in front of the shelving is a lattice work of frame about eight feet in height. In the centre of this is a large opening where a counter is placed, back of which the salesmen stand, ready to show the color cards, make suggestions or hand out the paint. There is an intimate relationship established with the customer in this arrangement which those wishing to select paint cannot help but appreciate. The department is towards the back of the store, free from the many interruptions and counter-attractions which might be a disturbing factor were the sales being made nearer the main entrance. In its present location the customer is able to concentrate on her paint purchase, and the salesman is better able to suggest. The whole arrangement can be called "comfy"—it is not by any means too effeminate a turn.

Service and Cash

One might go through the entire store and mention each department, but those mentioned will convey the idea of service back of this firm's activities. Incidentally, it might be mentioned that this store does a cash business, and experiences no difficulty in taking care of the trade following this method. In the case of stoves, two months is sometimes allowed as an outside figure to those whose credentials are absolutely good. Mr. Virtue mentioned one little point in connection with stoves and washing machines as illustrative of his attitude towards cash purchases. "We have found," he stated, "that a stove or washing machine which is not paid for almost invariably develops an awful lot of complaints. There is something wrong all the time. When they are paid for at the time of purchase, they always give satisfaction." There is just an insight into human nature which the experience of this firm has proven. Did you ever try it out yourself, Mr. Merchant?—just see what happens in an investigation of this kind.

"Dollar Day" Has Advertising Value

Reproduced with this little story is a copy of the ad. run by Jordan and Virtue on Dollar Day, held last Saturday. Mr. Virtue looks on the day from its advertising value and not from the profit he doesn't make on the goods on the dollar list. Mr. Virtue doesn't look on the day itself as a money maker, but he considers it has real advertising value, and in that way justifies itself.

MORE FAVORABLE CONDITIONS INDICATED IN STEEL MARKET

According to "Iron Age," the United States' large output of steel in February has been held up as proof that conditions in the industry are more favorable than have been represented. The fact is that the February rollings of the Steel Corporation and those for January represented considerable tonnage, much of it rails, booked in 1917 at low prices, deliveries on which were suspended to make way for war orders.

New business has come in in the past few weeks at only a fraction of the February rate of operations. With most independent companies March orders have not been over 20 per cent. of capacity. It is also to be considered that in some districts, notably Pittsburgh, large rollings for stock were made in January and February.

It is thus to be expected that output will fall off in March and April, with progressive reductions in working forces at steel works and rolling mills.

The attitude of foreign buyers continues to be that of the buyer at home, only absolute needs being provided for and stocks being kept down. Under the new price fixing, states this authority, our export market will still be a law to itself. How long the American export level can be kept above the domestic market is a question, with British Government price fixing expiring in less than two months. British exports may then be more closely competitive with American steel, with the added advantage of lower ocean freights.

In this connection interest attaches to the expressed desire of British steel manufacturers to make some form of agreement with their competitors in the United States in respect to the export trade. Presumably the Webb Act would give sanction to such an arrangement, but no interest has been shown in it on this side and there is no likelihood of any early action.

A novel method of advertising that has produced results for E. Sauve of Montreal is an entertainment hall. Here his customers gather regularly and the entertainment, which consists of games, cards, etc., is varied by demonstrations of various lines which Mr. Sauve handles. Steadily increasing sales he attributes to this method of advertising.

Unusual Sales-Building Idea That Won

E. Sauve, of Montreal, Has Made Good With a Big Scheme to Interest Buyers — Has Played the Personal Element Strong—Sells Carload of Wall Board Yearly—Expanded From Small Store to Big Two-story Block

IF enthusiasm counts for the success of an idea, then that which has dominated the selling of hardware in the store of E. Sauve, 269 Monk Boulevard, Point St. Charles, a suburb of Montreal, has been a real winner. The originality of the idea behind this selling so impressed the special representative of HARDWARE AND METAL who called recently, that he concluded it was worth passing along to the big family of readers which this paper reaches.

Mr. Sauve has developed the personal idea in his own way. He believes that one should know his customers, and also those whom he would count as customers in more than a casual way. Just how to develop this idea as he wished was the big question that presented itself a few years ago, when he was about to erect his present new store. For, it should be pointed out, the beginning for Mr. Sauve was a modest one. That point will be treated later.

The Social Side

In erecting the present building, or rather in expanding it (for it has been practically doubled), Mr. Sauve had a large hall provided upstairs in the new part for which he had not any pressing need. It was very well appointed in every way, and a most attractive gathering-place, or could be readily made so. And herein was the solution of his wish —that of getting closer to his fellow-citizens.

"This is the biggest advertisement that we have," was Mr. Sauve's manner of describing the use of this hall for the entertainment of his friends far and wide. "It has been a big success."

Human nature likes entertainment, and in the pursuit of his ideal Mr. Sauve "sensed" this and provided the means for developing the social side. It has worked well and is a bigger success even than was thought possible. "I consider it pays me better than to rent my hall," said Mr. Sauve.

The Winning Idea

Reference to the accompanying photograph will convey a clearer idea than words can of the big advertisement that has won. If attention be directed to the general layout it will be seen that the hall has a platform. On this platform a "demonstrator" is outlining the advantages of the particular brand of paint which the Sauve store carries, and for which it is agent. The attention of the audience is directed to the speaker, and particularly if his talk be entertaining and instructive.

In the first instance invitations had been issued several days before and these asked the attendance of those present at a "Progressive Euchre" party to be held in the hall on a given date. There was no fee, and prizes were to be given for those successful in winning them. Chairs and tables to accommodate 300 to 400 people are always available, and as these are collapsible, they may be readily put aside to permit of dancing. As the hall is about 25 by 60 feet there is ample room for dancing and general entertainment. The floor is of hard maple, and the walls and ceiling are beaver-boarded, and attractively tinted in buff, and neatly panelled.

The Patriotic Side

During the war there was need for entertainment of various kinds in the community, and it was necessary to have a meeting place. Various societies had only to ask Mr. Sauve for the use of the hall, and if the scheme were worthy there was a readiness on his part to place his hall at the disposal of the committee having the raising of funds in charge.

Thus, with the average entertainment held, all the money raised was available for the use of the Red Cross, the Patriotic Fund, Y.M.C.A. purposes, and so on. "There are about thirty societies here who are free to use the hall."

The indirect benefit of this generosity has been very satisfactory, Mr. Sauve pointed out, in fact direct benefit has come to his business right along, for the citizens in the community served, numbering about 1,500 families, could not but appreciate this idea and be well disposed toward the store in the matter of their trading. The influence in creating goodwill for the store was ever present, although no mention was made regarding the feature. "The people are just inclined to come and trade with us," as Mr. Sauve put it.

Hard Work Counts

As stated in the early part of this article, Mr. Sauve began business in a smaller way. This was in Montreal proper, near Chaboillez Square. He was here associated in partnership with another merchant. About ten years ago he disposed of this business (also having already opened at Cote St. Paul), and concentrated all his effort at the latter point and where the business has grown materially. This was doubtless a wise move, for the district was and is a growing one. Already the Montreal Tramways Company contemplate the extension of their line down Boulevard Monk, and this will be a big help to trade, it is expected. Mr. Sauve expects to cash in on this.

The first store erected in Cote St. Paul was of moderate size, and this was later vacated when the present store was built, about four years ago, almost adjoining. A full plate-glass front was installed, and this permits plenty of light to the store. It is, and has been, a wise provision, for there is added the benefit of being able to make attractive displays frequently.

All this development has been made possible through close application and attention to detail, Mr. Sauve having given his best effort to building up his trade.

Some Big Sellers

"Do you sell wall board such as that used on the walls of your store, and in the hall, Mr. Sauve?"

"Yes, we sell about a carload each year. Having it on the walls is a fine advertisement for it, and we have had a good deal of success with it," was the reply. "Many people like it better than lath and plaster."

Paint is a big seller, too. Asked as to whether the war conditions had been hard on this line, Mr. Sauve replied that there was a good deal sold during the war years. "We carry a big stock of paint as well as of other lines, so that when a customer wants to do a job we have what he wants here without keeping him waiting. If he wants ten gallons of a certain shade of paint we can give it to him right away."

In this connection HARDWARE AND METAL asked Mr. Sauve how he had built up such a good trade for paint. He replied that he had taken advantage of the paint company's service which provides the circulation of paint cards and circulars. These are sent direct to a selected list of prospects, and the results are good. The store furnishes the names of prospects.

Wall Paper—Furniture

Wall paper has sold well. This is kept in the hardware department and is so arranged that "it almost sells itself."

A large panelled sample display stand is placed near the paper stock and the customer can see quickly, and without trouble, just what patterns are available and the cost is marked on each plainly, with the border cost also given. If a clerk is otherwise engaged it is therefore possible for a lady to select what she wishes, or in any case the salesman has less explanation to make when he is free to take the order.

In connection with the sale of this line, Mr. Sauve referred to the accumulation of remnants and odd lots, or rather to the prevention of this. "When a pattern gets down to say ten rolls, we put it up at the top of the rack, and the same is sold as soon as possible and a new pattern replaces it. In this way we keep our stock fresh."

This is an important consideration. It keeps stock fresh, and it is better to dispose of a line that has almost run out and replace it with a new one, even though the last small lot may be sold at cost.

Adds Furniture

Furniture was added to the stock two or three years ago, an addition having been made to the store, practically doubling its capacity. The sale of this enabled the owner to maintain a good turnover and helped to make up for the loss of trade in builders' hardware, and for which there had been a growing sale. There will be a large demand for this again, and Mr. Sauve expects to see big building activity next year.

Bicycles have sold well and will sell more extensively. Even last year nearly thirty were sold, and there is an excellent demand for the various accessories that cyclists require. These, Mr. Sauve said, were real profit makers.

Little Things Help

There are many little things that count in cultivating the customer and in holding his trade afterwards. Thus, at the rear of the store Mr. Sauve has arranged a small tinshop where odd jobs can be handled. He does not attempt to run a tinsmithing department, but has enough tools to do a great deal of work that is a convenience and an obligement to the customer. "A man may want a stove pipe of a special size," said Mr. Sauve. "We say, 'Can you wait a few minutes?' And so we go into the shop and make the pipe that is wanted. It is a big thing to be able to give this to the customer. He might have to go away in to the city if we were not able to make it for him right then when he needs it."

In giving his customers service, Mr. Sauve has from four to five clerks in normal times. And in his policy of business-building he has found it worth while to co-operate with his fellow citizens. His interest in their social welfare has solved the advertising problem to his own satisfaction, for, aside from some circularizing and his window displays, "this hall and the entertainments we give," he says, "are the biggest advertisement we have." And again: "This year I spent quite a lot of money for calendars. I expect to use this amount next year to carry out this scheme of entertainment. It will buy a lot of good prizes."

While the people are being entertained in the hall, the various lithographs and advertising matter placed on the walls, and the suitable use of two blackboards, one on either side, serve as mediums for giving a message that will further interest those present.

SOLVING YOUR OWN HOUSING PROBLEM

Continued from page 147

kitchen is directly off the hall and opens into the dining room through a swing door. The bedrooms upstairs are only two in number, but are of generous size.

The double house admits of slight variation in plan, several different arrangements being used. All the houses are heated by hot air, and all are provided with conveniences and electric light. Their popularity with the working staff is such that there is a waiting list for houses, which from time to time are vacated.

In order to make provision for those employees who are unmarried the company found it necessary to take over the old Baltimore house in Chippewa, a frame building which has existed for a good many years, for almost a century in fact. The interior of this building was completely remodelled, a new veranda built and other alterations made, which resulted in a very comfortable home for employees who wished to take advantage of it.

The housing problem is a real one today and, by giving it all the encouragement possible, the hardware merchant stands to benefit by the sale of merchandise and—not the least point to be considered—a better community to serve.

KINREAD BUYS "NEVERBREAK" RIGHTS

R. R. Kinread, formerly manufacturers' agent, of Winnipeg, Man., has purchased the business of the Canada Neverbreak Trace Company, and is now manufacturing this patented line of traces, shanks, fan belts for autos, shawl straps, etc. A full line of chrome specialties such as halters, hamestraps, backbands, bellybands, etc., is also being manufactured. Mr. Kinread has removed from his office on Bannatyne Avenue to larger premises at 74 Princess Street, Winnipeg.

Retailers Will Want to Be Shown

Proposed "Hardware Buyers Limited" Initial Prospectus Reveals No Real Reason Why Retailer Should Spend $260 to Become a Member—Careful Investigation Should Be Made Before Signing Contract

HARDWARE & METAL

Dear Sir:

We are enclosing a circular, which we received in to-day's mail. These people are evidently trying to do to the wholesale jobber the same thing as the farmers are trying to do to the retail merchant. We, for one, do not approve of this mode of procedure, and thought this might be worth printing in your next week's copy.

Yours truly,

Merrill & Hubbard.

RETAIL hardware merchants throughout Ontario and Quebec are being circularized by W. L. Hawksworth, 461 St. James St., Montreal, in an effort to secure 200 members as a starter for a proposed "Hardware Buyers, Limited."

The circulars which have been sent out are reproduced herewith, and there is nothing to the scheme yet for which HARDWARE AND METAL can see justification for even one hardware merchant to sign away $5 a week for one year—$260 in all.

In the first circular, among the other questions asked is the one: "What will the organization cost?" And this is answered by the promoter in this way: "The lowest price at which a large organization buying in a large way, and carrying a large stock can supply the goods."

Further elucidation of the estimated cost is given in circular No. 2. Here the "estimated cost to operate proposed organization" is itemized as follows:

	Per annum
Including rent, taxes, light, heat, wages and interest	$30,000
Dividend (10 per cent. upon $150,000)	15,000
Surplus, for contingencies	7,000

The only sure thing in this estimated cost which HARDWARE AND METAL can figure out is the dividend of 10 per cent., which will be paid to the proposed capitalists financing the scheme. The dividends are provided for out of the $5 per week which it is hoped 200 retailers will each hand over.

It looks like a sure thing—a remedy for the supposed evils surrounding the present system of distributing merchandise—but retailers should ask to be shown. There is absolutely nothing in the two circulars reproduced herewith to justify any retailer in signing away $260, so that the proposed capitalists putting up $150,000 will be sure of 10 per cent. dividends.

The second circular seems to be reaching out towards a basis from which something can be figured. It might be well to examine it and make some comparisons as to where, if possible, the members will derive benefit. Under the heading, "What You Get," the first answer given is: "Better service, as sole business will be buying hardware supplies." Let a question be asked here to answer this statement—what is the business of the wholesale hardware houses if not to buy hardware supplies solely, and why can they not give service under this arrangement?

The next answer to what you get, is: "Better deliveries, as we will carry a large stock in hand." That is most certainly a debatable point—most hardware jobbers to-day give a 24-hour or 36-hour service as a regular thing on orders entrusted to them.

Answer No. 3 of course is the pivot on which the success or otherwise of the venture would hinge and must be taken up when figuring out the estimated cost. The fourth, in reference to the contract, sounds well, but the retailer is bound not to buy more than $5,000 worth of merchandise, and anything less than that amount adds that much more to his cost.

It might be well to go into that point, and it really comes next, too, under the heading on Circular No. 2, of "What You Pay." The minimum fee on a yearly contract is $5 per week; for the year, $260. The maximum purchases are limited to $5,000 on approved credit. The multiple is $260 per year per $5,000 per annum buy or fraction thereof.

To see any real value it is necessary to take maximum figures. Two hundred members buy $5,000 worth of goods each, or $1,000,000 is the estimated year's business. Hardware Buyers, Limited, proposes to handle this amount of business for a fraction over 5 per cent., .052 to be exact. On the face of it HARDWARE AND METAL cannot see how it

TO THE RETAIL HARDWARE FIRMS

Dear Sirs:

How much does it cost you for act of buying your Supplies?
Do you buy direct from the maker?
If from maker, do you get the limit price?
Do you buy from the Wholesale Hardware Companies?
If from Wholesaler, what profit are they making on you?
What profit must the Wholesaler make, to exist?
Would you like to buy direct from the makers, at their Wholesale Hardware prices?
Would you like to buy in Montreal, at same cost as the Wholesale Hardware Companies pay?
Would you like to buy from a Proposed Organization, that will not charge you any profit on the Hardware Supplies that they buy for you?
What wages would you be willing to pay such an organization?
Would you pay them an Office Boy's Wage?
Would you pay them $5 (Five) per week?
Wage or Fee entitles member to services of proposed large organization and your Hardware supplies at their cost.
What will be the Organization cost?
(The lowest price at which a large organization, buying in a large way, and carrying a large stock, can supply the goods.)

ALL HARDWARE SUPPLIES WILL BE SOLD F.O.B. WAREHOUSE, MONTREAL, NO PROFIT ADDED.

Proposed Organization will have same Service, as the wholesale hardware firms pay a very much higher price for, than you could individually afford.
There are 1544 retail hardware firms in Province of Quebec and Ontario. Want 200 firms as Members.

ARE YOU TO BE ONE OF THE TWO HUNDRED?

THINK THIS OVER.

WILL HAVE BUYERS IN CANADA, UNITED STATES AND ENGLAND.

SERVICE, DELIVERY AND PRICE, FOR SMALL SUM OF FIVE DOLLARS A WEEK.

TELEPHONE MAIN 2295 **ASK FOR MANAGER.**

OR WRITE

W. L. HAWKSWORTH, **461 St. James St., Montreal.**

Circular No. 1 sent out as a preliminary to proposed "Hardware Buyers Ltd."

can be done. As far as the members are concerned, they can buy 1-12th doz. of this or 1-6th doz. of that—his orders can range from a total of $10 to $100, or even more (there is nothing said to the contrary at any rate). If anyone can demonstrate how this class of business can be handled on 5 per cent., carrying a "large stock on hand," as these people propose to do, he is certainly a wonder. No doubt figures could be juggled around to make them appear plausible enough, but it is hard to figure how they are going to stand up under investigation.

And that brings one down another notch in this life-saver for the retail merchants, to the estimated cost to operate proposed organization. Here, under the grouping of rent, taxes, light, heat, wages and interest, is found the sum of $30,000 per annum. This proposed organization is one capable of handling $1,000,000 worth of business—200 members buying $5,000 each. To handle this amount of business it seems very conservative to state that a stock of $200,000 must be carried—it is fairly safe to say that no jobber in Canada will show a million dollar turnover on such a small amount of stock, but to give the proposed company the best possible chance to make good, $200,000 will do as estimated stock to be carried.

Interest on the investment in stock at 6 per cent.—here again is a small rate of interest—is $12.000; rent, taxes, light and heat would be cheap at $4,000; wages are perhaps a little hard to estimate accurately—there will, it is said, be buyers in Canada, United States and England, and with even one in each country they will surely want to pay them at least $2,500 each—another $7,500. So far, the figures given total up to $23 500. and no provision is made for a warehouse or office staff—for a credit man to see that members pay for their goods, and a sales or advertising man to let the members know what goods are available. The last two men should absorb $4.000 between them, and that leaves $2.500 for the warehouse and office staff. Thirty men and girls at $10 a week each would cost in a year $15,600—there is the $2.500 balance and surplus for contingencies of $7,000 used up, and you are treading dangerously on to that 10 per cent. dividend which the proposed capitalists ask you to pay $5 down and $5 a week.

With the three buyers, a credit and sales or advertising man and thirty other employees, there will be some activity around the place if $1.000,000 worth of business is handled. It won't be any $10 a week warehouse men or invoice girls that will undertake to send out the goods and invoice them. Insurance, which must be figured, is not included at all—$2.000 is no more than enough to allow for this.

Now Hardware Buyers, Limited, show under "What You Get, No. 4": "Contract, not bound by same to buy any specified amount." By this they mean that you are not required to buy a full $5,000 worth of goods. The minute you fall below this amount your cost immediately starts to soar. If any hardware merchant could buy at manufacturers' cost, laid down, plus 5 per cent., it would be a good proposition. There is no question about that. However, under this scheme, say you only buy $3,000 worth of goods, it means practically 9 per cent., your cost for this service is $260, remember—if you buy only $2,000 your buying cost is 13 per cent. The $260 you lay out in a year is a direct charge to be added to the cost of your purchases, and the less you buy the greater this looms in the percentage you are paying for this buying service.

Now what of the wholesale hardware man who at present serves the retailer? He has money invested on which he hopes to make a fair return. It is doubtful if they average 10 per cent. in normal times, and most certainly they are not assured of 10 per cent. as the proposed capitalists backing Hardware Buyers, Limited, are in the estimated cost shown on circular reproduced herewith. There is another point—you know what you can reasonably expect to get from the wholesaler. You have his catalogue (it is a $30,000 outlay, and probably much more these days) from which you can sit down and order as you need the goods. There is no indication in the prospectus of Hardware Buyers, Limited, as to what they will supply you, nor at what prices. How are you to know you are getting manufacturers' prices? How can you be sure that there will be a "large stock to draw from?" Read letter from the Montreal representative of HARDWARE AND METAL, in which he states as coming from the promoter of this new company, "They will carry a considerable amount of stock and they will be able to get orders forward within a week or two weeks after orders are received." Is that better service than you are getting to-day, and does it appeal to you when you are figur-

HARDWARE BUYERS LIMITED

General Hardware to be Carried in Stock.
To Assist or Amalgamate Buying Interest of the Retail Hardware Firms.
Proposed Capital $150,000. Proposed Membership 200.

WHAT YOU GET

1. Better Service, as Sole Business will be Buying Hardware Supplies.
2. Better Deliveries, as will carry a large stock in hand.
3. Better Prices, as no profit will be added to delivered cost.
4. Contract, not bound by same to buy any specified amount.

MEMORANDUM

Will buy in a large way, carrying a large stock and will obtain limit wholesale prices.

There is a variable difference between Wholesale and Retail prices of from 10% to 30%.

Will have located buyers in New York City, N.Y.

WHAT YOU PAY

Minimum Fee: Yearly contract: $5.00 per week, payable in advance.

Maximum Purchase: Up to $5,000 per annum, on approved credit.

The Multiple: Is $5.00 per week; per $5,000 per annum buy or fraction thereof.

FOR COMPARISON—FIGURE

What it now costs you for "the act of buying."
What approximate profit now paying Wholesaler.
What approximate loss of time, delays and follow-up of orders cost you.

ESTIMATED COST TO OPERATE PROPOSED ORGANIZATION.

Including Rent, Taxes, Light, Heat, Wages and Interest..$30,000 per Annum.
Dividend (10% upon $150,000) ..... 15,000 per Annum
Surplus, for Contingencies ..... 7,000 per Annum

PROMISE OF AGREEMENT TO CONTRACT

On behalf of the Firm of ..... located at ..... as I am invested with the authority (by meeting of Board of Directors) in my official capacity of ..... of said firm, AGREE to place a "Purchasing Contract" for one year, with the proposed "HARDWARE BUYERS, LIMITED" and pay them $..... per annum (divisible and payable weekly, in advance) as firm desires to be able to purchase up to $..... per annum of General Hardware Supplies at proposed Organization's cost.

By Cost mean exactly what the organization pays to procure the merchandise and deliver same to you. From Stock or by Importation.

No profit or other operating expenses to be added.

First week's FEE to be paid soon as are notified that proposed organization has received its Charter.

(Name of Firm .....
(Authorized Official .....
(Witnessed by .....

Date .....

N.B.—For $5.00 per week you receive the services of a Special Buying Organization, the advantages of a large stock in hand and at limit Wholesale prices.

Circular No. 2, giving prospectus of proposed "Hardware Buyers Ltd."

Why My Men Are Loyal

Based on an interview with

FRANK WATERHOUSE

President Frank Waterhouse and Company

Reprinted by courtesy of "System," the Magazine of Business

A list of the businesses which Mr. Waterhouse has organized and controls would be a list of many of the most important undertakings in Seattle and the Northwest. He has had unusual success in creating loyal, profit-making organizations. And in this article are described his methods of handling one problem that he finds common and supremely important in all these organizations — men — the element that can most quickly make or break a business.

SHIPS and men are alike in many ways. I know something about both. Our business is shipping; and one of my principal business tasks is to make sure of the loyalty and ability of our men. Here is an instance of this similarity that exists between ships and men:

Occasionally, a fleet of merchant ships is offered to us for purchase or charter.

Invariably we ask:

"What is the average age?"

We are not interested in knowing that two or three of them may be only two years old, if several have seen service of 18 or 20 years, and the average age, say, is 15 years, it is not worth while to investigate such a fleet further. The normal opportunities for profit making with vessels of that age are very poor. But when the average age of the vessels is only 5 years, we might be very much interested, as the cost of operating modern vessels is a great deal less than the cost of operating old vessels. Furthermore, vessels 5 years old have a reasonable expectancy of 15 years of useful service, while vessels 15 years old might have very few years left.

In the same manner we believe in a youthful organization of employees, made up of men in their prime. Youth, as a general thing, is aggressive, ambitious, and physically and mentally able to absorb constantly increasing tasks. Age is usually more ready to shift responsibilities than to assume them. Of course there are many exceptions to this rule, but as between a young man and an old man of equal ability we prefer the younger, because his expectancy of life is greater, his period of probable future usefulness is longer, and the expectancy of life of our business therefore—if made up of young fellows like him—is greater.

Don't mistake me. We do not let men out at the top in order to keep a young organization. When a man comes with us and makes good, he is here for life. We have a number of men and women who have been with us since our business was established in 1898. We do take men in at the bottom. The average age of our executive officers, department managers, and office employees is about 36 years. The fact that many of the men have been with us for a long time is the more noteworthy because we are in a new country. An ideal organization, as I see it, is old in service but young in years.

We have a valued competitor, in whose organization the average age is nearer 56 than 36. Which business, his or mine, do you think has the better chance of survival?

How We Branched Into Various Lines

Age, of course, is but one element in building an organization. Nearly any concern will succeed if the men are right. I say this out of an experience with many apparently diverse lines of business. For as the opportunities of a rapidly growing country presented themselves, we advantaged ourselves of them in various ways. Our ships plying the coast and Alaskan trade made us familiar with the possibilities of bringing Vancouver coal to Seattle. Out of this trade grew the idea of becoming sales agents and producers, and consequently our coal company.

Delivery problems in the coal company suggested the need for motor trucks; and the economies of purchasing from ourselves gave us the idea of becoming sales agents for one or two truck manufacturers. This agency has become one of the largest in the Northwest, handling now both trucks and pleasure cars. In connection with the pleasure cars, we again saw a need this time in local motor transportation, and we capitalized it by establishing a taxicab company, and later, a baggage service.

Our shipping needs suggested opportunities also, and we organized companies to handle the stevedore business, to build and operate docks, to operate tugs, and to underwrite marine insurance. Recently we undertook to build up an iron works, and have started to publish a magazine.

All of these organizations, with the single exception of the iron works, have grown either directly or indirectly out of our shipping activities. And always, as each new unit has been added, the principal problem has been to make sure the men were right.

We have no faith in patented plans for picking loyalty and skill. We have tremendous faith in the ability of management, by right methods. to bring out surprising skill, plus loyalty, even in men and women of only moderate ability.

It is a human problem, which no mere set of rules can cover. But perhaps we can describe our methods best by summing them up briefly and then explaining our thought in detail. Not as hard-and-fast rules, therefore, but merely as a way of phrasing certain principles that are fundamental in building an organization, I believe that a high average of loyalty and skill can be attained only if you:

1. Understand your employees—know them at first hand;

2. Let them as well as the management share fairly in what the business earns;

3. Keep the organization young—the average age low—fill gaps in the ranks at the bottom instead of at the top;

4. Give every man a job, and let him run it—judge him by results, not by his personal methods of working.

Misunderstanding, to start with the first of these principles, is the original basis of enmity, and the cause, I venture to say, of 99 per cent. of all the troubles that arise between employers and employees. It is easy to avoid—but few of us avoid it. The remedy is simple: meet the man with whom you disagree and talk out your apparent differences of opinion in common terms and on a common basis. Often the differences, defined in that way, vanish completely.

I am frank to say that five years ago it never occurred to us that it might be wise to go down to our docks in Seattle and talk with the laborers. We took little or no interest if they and their families were sick, or went without proper food and clothes, or were suffering in their homes from lack of coal, or could not meet the rent, or were just barely able to get along on wages they earned working for us. Since we have learned to take a human interest in these problems we have had more happiness, and greater prosperity.

Nothing gives me greater satisfaction and happiness than the kind of harmonious relations that exist between our employees and myself. We are one big family working together for the mutual benefit.

The other day I was talking with a labor leader who anticipated a strike vote in his union. Some of the men of the union were employed in our iron works.

"How about this, Frank?" he asked.

"Of course, we can't afford to injure you."

"No, you can't hurt your friends," I said.

That puts it in a nutshell. And the proposition works both ways. If the men and the management are friends, the men cannot injure the management —and the management cannot injure the men.

How Shall Labor and Employers Come to a Mutual Understanding?

Business is rapidly changing. Traditions vanish overnight. Old ideas about the relations between employers and employees are being examined and revised in the light of new conditions. We work on the basis that snobbishness, class consciousness, the whole chain of evils and artificial barriers to business success, must be swept away.

Every business man, of course, works out the problem in his own way. Our way is to know the men first hand. I am willing to let bank presidents cool their heels in my anteroom occasionally if necessary. But my door is always open to labor leaders. We had a striking demonstration recently of the tremendous progress that can be made when men of divergent opinions sit down together and thresh out their differences.

Our immediate cause of trouble was the decision of the federal board charged with regulating the wages of workers on Government war contracts. The men had been led to suppose that the board would adjust wages to correspond virtually with the increase in the cost of living. The actual award—when it was announced—fell considerably short of their expectations.

The men immediately began to agitate a strike. And to cap the difficulty, word came from Washington that if the business men permitted the strike to take place, contracts aggregating hundreds of millions of dollars would be canceled instantly without further notice.

We laid these facts before the men. For our mutual interests we urged the formation of an informal arbitration board to discuss our common problems. We invited the men to submit the names of seven of their leaders for the approval of the business men. And we in turn proposed seven business men who were to be approved by the unions. These fourteen when chosen were to confer on the selection of a chairman.

I was chosen one of the members. When this committee first met, we were two antagonistic classes—capital sitting gloomily on one side of the table, labor on the other. Then we began to talk—to understand one another's problems—to see that we were considering not merely class benefits, but the welfare and interest of the entire community of which we are integral parts.

After but a few meetings there was no more ranging of sides. Men sat beside one another, regardless of whether they represented capital or labor. Dozens of delicate problems virtually solved themselves. All our cards were laid face up on the table. The original cause of class hatred—misunderstanding on both sides—was banished.

Although it has had a most beneficial effect in bringing employers and employees together, it is too soon to predict how successful its work will be. I believe, however, it is a move in the right direction, and that the best way to overcome labor difficulties is to become better acquainted with laboring men and to give them practical help with the many serious problems they have to face.

It is not always easy to take the point of view necessary for complete understanding. Often in the past we have been, perhaps unwittingly, unfair to employees by trying to grind the last cent of profit out of their labor. Unfairness has undoubtedly been directly to blame for the forming of unions, which we sometimes denounce. This or that important business man has said to me in effect: "I would rather pay my general manager $50,000 a year than $10,000 —$250,000 than $50,000—if I could find the man who was actually worth it."

Why?

Because the $250,000 man would grind out more profit for the company, perhaps from the men. This, I believe, is an unfair division; too much thought given to the managers, too little to the men. And it is my experience that there are tremendous possibilities in loyal, skilled men.

So I have felt in my business that we owe it to them to change our attitude. They, through their unions, and business through the changes that are rapidly taking place, will force us to change our attitude in any case. But if that were not true, we owe it to ourselves, as a matter of discarding a wasteful business practice, to substitute for our old troubles a good sound basis of mutual understanding.

Just now our labor situation is much disturbed. In the past, with one or two exceptions, we have gotten along well with the labor unions. I number among my best friends some of the principal labor leaders in the North-west, and it is difficult to quarrel with your friends. We of course believe in the right of both the employers and the employees to organize for protective purposes, and to bargain collectively. We believe it is our duty to uphold, in every way we can, the hands of conservative labor leaders.

I have found that the path of the conscientious labor leader, contrary to general opinion, is anything but an easy one. He should be helped in the fair performance of his duties by the employer. It seems sure that the working classes of all nations will organize for protective purposes under some banner or other. It surely is in the interest of all concerned that this organization shall be effected by membership in such bodies as the American Federation of Labor and their affiliated unions.

Directly out of this thought arises the second general consideration which I have already mentioned: namely, to let the employees, as well as the management, share fairly in what the business earns.

One Way to Lessen Labor Turnover

I am not by nature a philanthropist given to impractical schemes. The purpose of my organizations is to earn profits. And they have nearly all been at least moderately successful. My point is that the best way to increase profits, so far as the employees can help, is not to buy their financial worries as well as their services, through paying insufficient wages. There are tremendous possibilities for greatly increased profits through increased loyalty and skill alone.

Money alone will not buy loyalty. But you are not likely to have it in full measure without money.

We pay the highest wages or a little better, as a fixed policy. And we do more. We divide our profits in a fair manner with our employees. Every employee who has been with us over twelve months is entitled to participate in the profits. We distribute our profit payments to our employees twice yearly. While we have paid larger sums in the last few years than many concerns might find it possible to do, owing to unusual business conditions, yet we feel that if the employee, even one in a minor position, returns to us complete loyalty

ONE WAY TO WORK WITH MEN

A CAPTAIN who takes out a ship cannot wait on instructions from the owner if anything goes wrong at sea. He is the sole authority, charged with but one task —bringing his ship safely to port. So in business after a task has been assigned, there is but one thing in which we are interested—results. You can never tell what a man is capable of doing, what initiative or executive ability he will develop, until you give him the opportunity, and until you place the entire responsibility for the result of the work on him. It is a fact that if you share responsibility, the other man holds you partly to blame if there should happen to be any failure to come up to expectations.

and full service, he is worth above the market rate of wages, in our opinion, and we are glad to pay it as a matter of good business, and to make sure that the men are right.

Why, you may ask, do we pay a bonus that amounts to a great increase in the salary? I figured, simply, that it is just. Our employees are in the main responsible for large profits. They should share in what they help to create.

I have proved to my satisfaction that the bonus pays us well, mainly through the increased loyalty and pleasure our employees take in doing their work in the best way. At certain periods, for instance, we require hard and long-continued work. We scarcely know what it means to ask any one to work overtime. Every man and woman knows what his or her job is and stays until it is done. If needs be, the lights will commonly burn in our offices till midnight.

Besides, there is practically no labor turnover. People insist on staying with the company. Our experienced men seldom quit us. One of our girls was not as competent as we required. It was a question of reducing her salary or letting her go. We did the former, hoping she would quit.

"I think I'll stay," was her rejoinder "I can learn to do my work better."

Contented, loyal employees, without financial worries, naturally work a lot better than those in the background of whose minds are recurring thoughts of unpaid bills. Thoughts in business hours should be devoted to the job in hand.

When the war broke out we decided to encourage our boys to enlist in the service of this country or any of our allies. We agreed, during the period of their service, to pay them the wages they were receiving from us less the pay they received for their military or naval service, and to give them back their positions when they returned. The agreement has been carried out. Many of the boys enlisted. Several distinguished themselves and are now returning home with the happy assurance that a hearty welcome and the positions they left await them.

I insist on the point that if any man is in trouble of any kind, financial or otherwise, and goes to anybody except the boss for help, he is severely reprimanded. I consider it good business, not a waste of time, to attend to affairs outside the range of business that affect the interests of employees, when I can be of service.

Recently one of my executives was away on business. His draft questionnaire came to the house, and his wife, considering it of immediate importance, telephoned me to know what she should do. The questionnaire was not due to be returned for several days, but I had our company attorney go to the draft board and explain the circumstances. And I called the wife later to assure her that she need not worry.

It was a trifling service. But many misunderstandings arise from overlooking trifling affairs.

In addition to the salaries and bonus, my department heads all own stock and have a direct interest in profits. Every employee can hope to become a department head and stock owner, for, as I have explained, it is our fixed policy to fill the gaps in our organization from the bottom.

Some Rules We Follow With Our Executives

The considerations that prompt these financial arrangements with employees are primarily the considerations of good business and better profits. And there is a deeper consideration, not inconsistent with these. I put it last because it is perhaps a social thought even more than a business thought. But in my opinion no business man should fail to consider his social responsibilities.

The consideration is this:

I do not have to carry the burden of feeling that members of my family dress in furs, travel at will, take advantage of the best schools, or ride in luxurious limousines on profits earned from the labor of underpaid men and women. I feel that any man placed in charge of large affairs owes a duty, in return for the superior advantages accorded him, to the workers with whom he is associated.

The third general principle—keep the organization young, and fill gaps in the ranks at the bottom—I have already discussed. I feel that the importance of this policy should not be overlooked.

Rarely, and only for special purposes, do we take ready-made executives from the outside. We start our people at the bottom, and they learn our business thoroughly before they have the direction of affairs in their own hands.

Finally we let them run their own jobs. A captain who takes out a ship cannot wait on instructions from the owner if anything goes wrong at sea. He is the sole authority, charged with but one task—bringing his ship safely to port. So in business after a task has been assigned, there is but one thing in which we are interested—results. You can never tell what a man is capable of doing, what initiative or executive ability he will develop until you give him the opportunity, and until you place the entire responsibility for the result of the work on him. It is a fact that if you share responsibility the other man holds you partly to blame if there should hap-

Wells Hardware Co., Hamilton, Ont., have excellent displays on wall cases behind glass. The value of this display is quite apparent

pen to be any failure to come up to expectations.

What are the Tests of Executive Ability?

"The balance sheet and the income statement are my tests of an executive's ability. We set a task—what we think can and should be accomplished. The man in charge handles the job in his own way, as long as the result is attained. He need not come to me at all unless he wants my advice. If the results are right, my hands are off. A serious and continued failure to attain the desired results of course calls for a reckoning, in which case there can be no clouds on the record.

"This is the easiest way I know of for me to handle my work, in the course of which I have many things to do besides attend to the details of operations. And the results are most satisfactory.

"I cannot conceive of greater harmony prevailing in any business organization than in ours: where all our interests are mutual and the relations between employer and employee are based on sincere friendship and regard. Our business has principally succeeded through the loyalty and friendship which exists and has existed between our company and its employees; because of the low average age of our staff; because they started in with us when they commenced business life and for the most part have remained with us to the present time; because they are happy and contented and would not change their positions if an opportunity to do so presented itself; because we leave the working out of their jobs to them, judging the work solely by the result."

"Cash and Carry" Hardware Store is Opened at Cornwall, Ont.

W. L. J. Snetsinger Will Feature Auto Accessories, Paints and Shelf Hardware—Will Not Stock Heavy Goods, But Will Secure and Deliver Them if Ordered

A "CASH AND CARRY" hardware has just been started at Cornwall, Ont., by W. L. J. Snetsinger, until recently of the hardware firm of Snetsinger and Smith. Mr. Snetsinger has stocked his store with shelf hardware and paints. He will also feature auto accessories and has the agency for the district for a well-known auto and also for a line of phonographs.

"I decided about the value of doing a cash business after having to post up the charge accounts in another hardware," said Mr. Snetsinger to HARDWARE AND METAL. "The way I figure it out is that a merchant needs all his profits in his own business. I figure that by selling for cash I can offer the public better prices than merchants who do not, and the people are not slow to find out where they can get the most for their money. While I am running a cash-and-carry business it does not mean that I will not take an order for heavy goods. I do not stock these lines, but if a customer comes in and wants something, I will not only get it for him, but will deliver it. For instance a man came in to-day and gave me an order for plate glass. He paid cash, and I had the glass delivered to him. I could do this at a small cost and still make a good profit. However, by the plan I am working on I hope to keep my stock turning over rapidly, get the cash for it, and be in a position to put it right back into new stock and avoid a lot of worry and trouble in keeping track of 'credit' accounts, and reduce overhead expenses greatly."

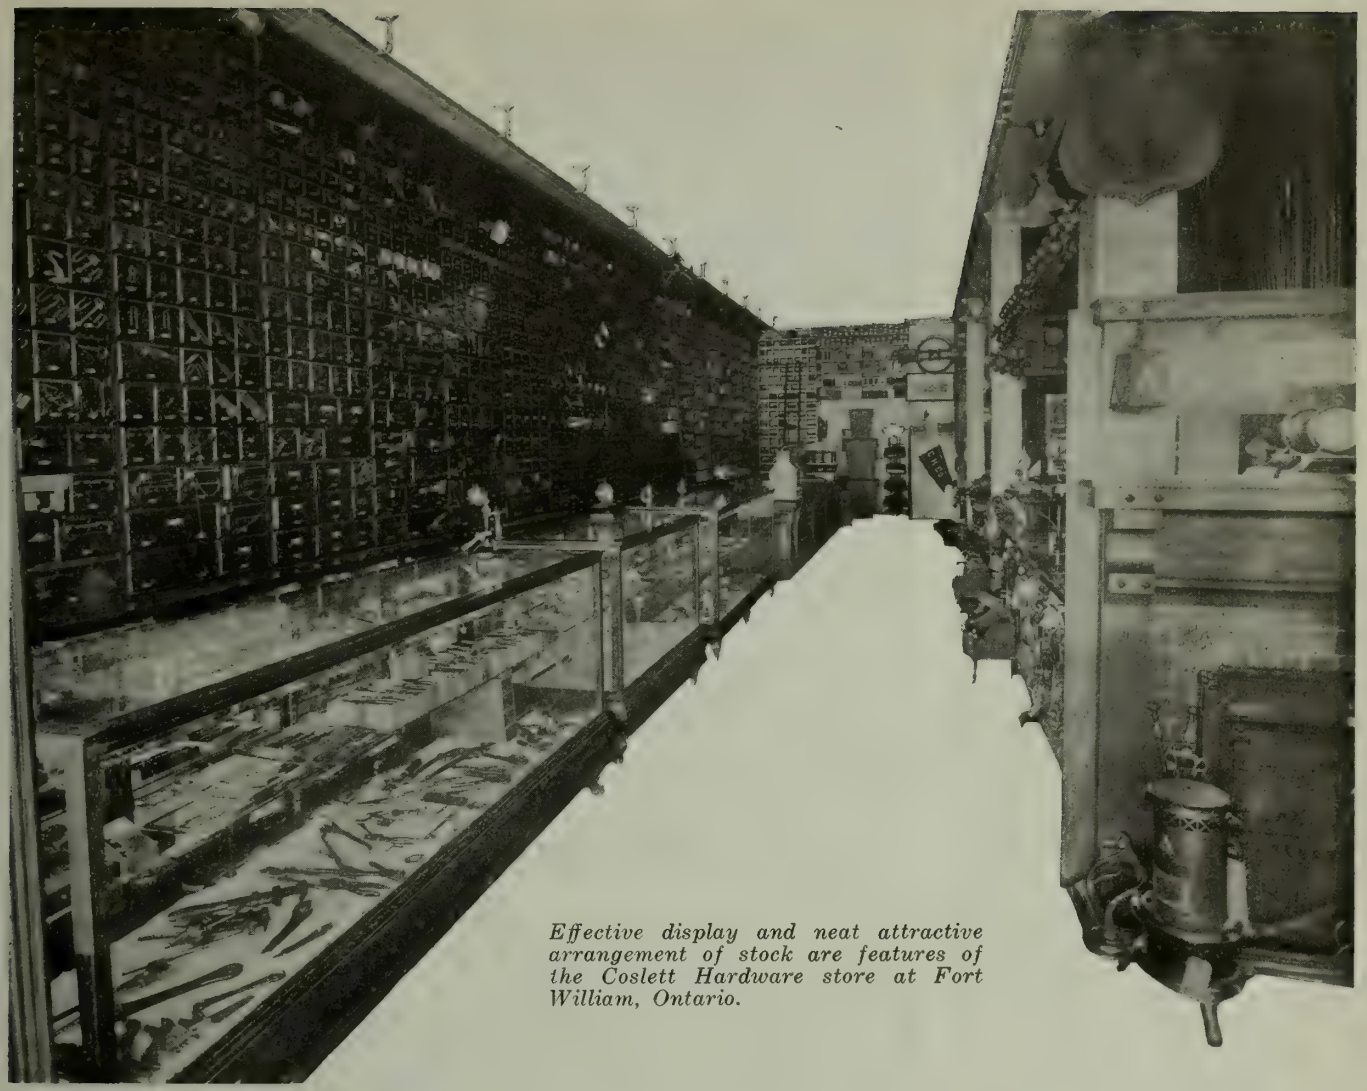
Mr. Snetsinger is preparing to boost his sales also by consistent advertising, by good window displays, and by a good store display. He is installing in his store all-glass silent salesmen so that customers can from every side see every article in the cases. His store shelving is arranged so that auto accessories which he features will occupy a prominent place at the front. His paint stock and all lines of shelf hardware will come behind this. A sample of every paint brush he carries in stock will be shown in a glass case so that a prospective buyer can pick out the brush he wants instantly. The stock will be arranged in a convenient place behind the glass case so that as soon as a brush is sold another will be put back in the case.

The gramophones and records will be placed at the front of the store where everyone can see them, and the smaller machines will be set at vantage points on the counters.

"Customers so far have received the cash-and-carry idea without a kick," said Mr. Snetsinger. "No one has raised any objections, even the farmers, when I explain to them the plan on which I am proposing to operate. On the contrary, many people say they will greatly prefer to pay cash and that it is decidedly unfair to ask a merchant to wait for a month or more for his money. There is a big farmers' trade in this district and the farms are prosperous and well able to pay cash."

LOSES ITS CHARTER

Because a complaint and investigation by the Federal Trade Commission into alleged unfair practices of the North American Linseed Products Co. brought about the forfeiture of the concern's charter by the State of West Virginia, the Commission has decided to take no further action, dismissing its case without prejudice.



SEEDS FOR SIBERIA

One of the first orders received in Canada from Siberia for seeds was placed through the Department of Trade and Commerce at Ottawa with a firm at Brandon, Man. The shipment included 3,800 pounds of seeds. Two-thirds of the order had to be put up in one-ounce packages, making more than 40,000 packets. The seeds were on their way four days after the order was received. Western Canada seeds, it is believed, will be particularly well adapted to the needs of Siberia owing to the climatic conditions, and it is expected that a steadily increasing trade may develop.

DEFLATION OF PRICES

"The law of supply and demand cannot cure what it did not create," according to a statement of the Industrial Board of the Department of Commerce, recently created to encourage the deflation of war-time prices in the interest of normal industrial activity being resumed. Viewed in the light of reason, states the "American Metal Market," this statement is strictly correct. It might be argued that as prices were controlled by the Government during the war they would have been still higher if the law of supply and demand had been allowed to function, but it must be remembered that the Government controlled production and consumption also, and if it had not exercised this direct control over prices it would have exercised indirect control by the limiting of consumption. The Washington authorities frankly assert that very profitable prices were allowed to industries, in the interest of stimulating production by keeping in operation the units that labored under one disadvantage or another. At the time, not all the industries were willing to admit that the Government limits were particularly liberal, but facts are facts, and no one is likely to arise now and deny the statement of the Industrial Board.

Unless procedure diverges far from the program as already clearly mapped out, this price suggestion is marked for but a limited life. There is nothing said to indicate that Government price fixing is made a fixture by reason of the inception of the present activities. It is distinctly stated that the operation is undertaken for the purpose of restoring the free play of the law of supply and demand. With true insight, it is remarked that the law cannot operate when there is no buying. No one in the steel industry needs to be told that, for time and again the steel industry has witnessed the maintenance of prices, simply because there was no buying making it worth while for the individual producer to cut prices. When, then, the law of supply and demand begins functioning the work of the Industrial Board, according to its present program, will be over.

Effective display and neat attractive arrangement of stock are features of the Coslett Hardware store at Fort William, Ontario.

Business Foresight Offsets Bad Guess

Fort William Firm Built Up Good Trade by Specializing in Lines Not Carried by Other Stores—This Brought Immediate Increases in Demand For Staples Which Has Been Steadily Growing

WHILE a good location for the store is important it is not absolutely necessary to the success of a hardware business. The proprietors of the Coslett Hardware Company at Fort William guessed wrong in regard to the ultimate location of the business section of the city, but notwithstanding this they gained success because they had the vision to foresee the future possibilities in the auto and marine motor business and the enterprise to go after it aggressively.

Fort William is one of those spread-out cities built along a river, stretching out from four to five miles with an average width of three-quarters of a mile. Along its entire length is a succession of elevators, wholesale houses, coal docks, freight sheds, flour mills and manufacturing establishments, including the railways, which skirt the river for the entire distance.

The Business Centre

In the east end Fort William has built its big business district. In the west end (the old town) there are still the remnants of a small business section. In between, residences predominate right back from the river. Thus you have the setting for this story.

About thirteen years ago two young chaps, fresh from school, Bill and Eddie Coslett (sons of G. A. Coslett, general manager of the Ogilvies' Flour Mills Co., at Fort William), thought they would like to go into the hardware business. At that time nobody seemed to know just where the big business section of the city would be, but everybody was taking a guess and backing his guess up by securing a patch of real estate here and there. Coslett, Sr., wise in years of experience in seeing Western towns grow, advised the boys to build their store (and he had many good reasons, coupled with the wild rumors he had heard, for doing so) midway between the two existing business sections. This they did.

Half a Mile Out

Business for the first two years was decidedly slow. The big down-town district landed its new location, but that did not help the Coslett Hardware Company, they being out just a half mile on their guess. "Ordinary small retail lines did not move as they should, not enough people passing our door," said W. R. Coslett the other day when asked by HARDWARE AND METAL what had induced him to build his store a half mile from any other.

"I was convinced before two years of our business career had passed," he said, "that a choice location on the main street was not going to be a stumbling block to our building up of a profitable

and successful hardware business. I looked around to see what could be done, for I was convinced that we must get into and specialize on lines not ordinarily carried by hardware stores, but still in our legitimate field—we were determined to make good."

Saw An Opening

"With the Kaministiquia, Mission and McKellar Rivers at our front door and the beautiful Thunder Bay stretching out its blue waters for miles, making accesible the best fishing streams of the north country, Eddie and I decided that there were a lot of motor boats, canoes and row boats to be sold here. We went after this trade hard and with accessories we accomplished splendid results. We brought in three of the first real pleasure motor boats to Fort William. We sold them and paved the way for the formation of the Fort William Motor Boat Club. We carried marine engines and every accessory and before long our trade in this line produced a revenue of no small proportions. Soon we became identified as the only complete outfitters among marine men, both commercial and pleasure, and this trade was growing fast. The elevator and wholesale men were all putting on motor boats or other craft on the river; we secured the bulk of their business."

A Widening Field

"When the automobile became more popular the demand, among private owners, became so persistent that we were not long in organizing this department. Farmers came to notice our advertising and applied to us for farm machinery, parts and implements, yes, and even tractors. I might say here, that we never received a call for any article, which we did not carry, but we made a record of it and if upon investigation we could see a market we stocked it. Soon we were compelled to build a large warehouse alongside our store to accommodate this branch of our business. During the year we have hundreds of private auto owners, who do their own repair work, purchasing all their supplies from us. They say they would rather do this than go to a regular garage, and thus be under no obligation to let the garage do their repairing.

"We installed a free air and gasoline service station in front of our store. We then fitted up two show cases in the centre of our store for the display of all kinds of accessories. We also devoted one of our windows to the display of accessories, even to motor boat engines in action, propeller and all—a sort of animated display. In fact this department of our business is so important now that we were offered and have accepted the wholesale distributing agency for many well-known lines. This season we are having printed for the trade a jobbers' catalogue which will give us a direct connection with the garages and other hardware dealers who feel they would like to go into this coming business. Strange as it may seem garage men are very friendly with us and encourage us by doing their buying from us—it relieves them of tieing up a lot of money, as each would have to carry a stock. Now they all buy from us."

Served in France

Eddie Coslett, the junior of the two boys who established this business, is not now connected with the firm. He enlisted during the early days of the war for service in France, and was badly wounded at the front. After arriving home he took a bad turn and the doctors ordered him to go to California. Fearing that he could not live in this climate any more he sold out his interests to his brother.

W. R. Coslett, the present proprietor, states that with the introduction of the special departments mentioned above he at once experienced an increase in the demands for staple lines. People coming in for the specialties were interested in the staples and also other lines. He now sells pulleys, belting and all kinds of machinery to the owners of the big grain elevators. This brings him in touch with the big men of the city and when they buy the big lines they do not forget the store when they want paint, or various other hardware lines for their homes, garages, etc.

Advertising Methods

In his advertising in the daily papers Mr. Coslett aims always to link his store up with national advertisers, thus connecting his store and products with the campaigns carried on in the trade and other papers.

"It pays me to do this," he said, "as the products have already been introduced and are known to the prospective customers. In a great many instances all I have to do is to close the sale."

Mr. Coslett is a great believer also in keeping his store and his store windows as attractive as possible. As will be seen from the illustration his stock is not only well, but neatly, displayed. It is always kept clean and in order. A well-kept store is a big factor in not only bringing people in, but in selling to them, says Mr. Coslett. Women especially like to buy in a store where the goods are kept looking their best.

"It is just as easy to keep the store and the windows attractive as to have them untidy," says Mr. Coslett, "and it certainly pays to keep both looking nice."

HOW I DRESSED MY MOST IMPORTANT WINDOW

By A. H. ILLSEY

IN many ways I always considered my first spring paint window the most important I should have to dress during the season. For, having a paint department of which I was ever pardonably proud, I just "ached" to get the window in form and clothe it with that which I trusted my customers would use to "paint the town red."

I would say at the outset that, in my opinion, there is no more important line carried in the modern hardware store than the paint and varnish stock, when considered from the important standpoint of arrangement, within the store, and in the display windows, which it always merits. Sales will be materially dependent upon the manner of the displays, and the successful hardware dealer will have paid more than passing attention to this feature.

Planning my Background

It is often suggested that there is a prodigal waste of good advertising matter, and it has been charged that in the matter of paint helps this is quite true. The point I will not argue, but this is to be said, which is, that the paint manufacturer affords the retail hardware dealer so great an assistance toward actual selling that he ought, with gratitude, and in a conscientious manner, to use every help sent him.

Almost invariably—and when I made the most attractive selling displays, I centred my principal effort upon the background. The "closed-in" window is ideal for a paint and specialty display. Having made this tight and covered the rough backing with white cheese-cloth (which was neatly pleated or made "full" through the use of tacks in bottom and top, and which it takes patience to arrange), I was ready to decorate the background suitably.

Procuring a package of small common pins and taking into the window with me a variety of color cards, cutouts, counter cards, etc., I was able to readily construct a background and also a "side" ground in the window that was respectably attractive. Many a time, even before I had a tin of paint or varnish in the window, have I seen interested passers-by stop and view the arrangement. The bright color cards and sample chips against the cheese-cloth stood out effectively, and these were interspersed with lithographs, etc.

The Display Itself

In arranging the display, different plans were followed. Usually, where it was desired to make the first "big splash" in the way of a paint window, I followed the idea of making an impression upon my customers and prospective customers that I had a big stock. This does not mean that I over-crowded the window, for that would defeat the object I had in view. It is not necessary to place all one's stock within the window to make the impression referred to.

Some of the paint cases from which the stock had been taken were brought in. These were placed in the window rather carelessly and after I had a few of them arranged I covered the whole floor of the window and these boxes with the same white cheese-cloth used on the background. The paints and varnishes were now brought in and arranged, some in pyramidic form and some otherwise. Care was taken to make the whole effect more or less "free and easy," so that there would not be a stiffness to the display that would mar its effectiveness.

In following the plan described, the idea was worked out toward the front of the window and small color cards were interspersed here and there. This all tended to keep the display bright and attractive.

Near the glass I arranged small squares (about six inches) of straw-colored paper. On these I would place various dry colors in small quantities, and the effect was splendid. It attracted. It gave another added touch of color that served to make a well-rounded display.

In the foreground a suitable arrangement of various brushes was made.

Price Cards—Other Displays

Without a price ticket, many an article in the modern store is picked up and set down again by a prospective customer who might otherwise have bought. In like manner many possible customers, to my mind, are lost through the absence of a suitable price ticket on the articles shown in the windows. In one of the largest and most successful hardware stores of Western Canada and where I had charge of the window dressing for some time the manager always insisted upon as many articles as possible being clearly tagged with the selling price. It actually sold the goods.

And so I used price cards. These were made by myself as neatly as possible and were placed on the various specialties on display. A larger card, or cards, gave information regarding the paint sold. All displays had a fair number of accompanying price and explanation cards.

This plan was altered from time to time to suit my own ideas. Occasionally brushes were attached to the window background by way of a change and this was sometimes carried out by using wall board and attaching the brushes to it first. Sometimes these took the form of a circle or a square, diamond, etc. Many shapes were worked out.

The whole idea was to get the people thinking paint and talking paint. The displays were invariably hooked up with the weekly newspaper advertisement and which was frequently illustrated with suitable cut or cuts.

No Immediate Change Likely on White Lead

Present Prices Probable For Couple of Months at Least, States General Manager—Present Stocks Pig Lead Bought on Peak Market—Future Will Not Record Return to Old Levels—A Big Future For Industry

IN the opinion of F. A. Scott, general manager of the Carter White Lead Company of Canada, Limited, there is little likelihood of changes being made in the basis of white lead for some time.

With an active spring business anticipated in all directions, and with the outlook encouraging for an active and profitable painting season ahead, the tendencies of the lead market are very important to the retailer. And this season, aside from being no exception to this rule, is one wherein the watching of prices is fraught with a much increased interest.

While it is true that prices have materially declined on pig lead, it is just as true that the stocks of lead in corroders' hands are high-priced. It is impossible for the manufacturer to buy to-day what the trade needs to-morrow. He must make arrangements ahead of time.

Cost of Present Stocks

It was pointed out that the cost of white lead as prepared for shipment at present and in the immediate future was such as to leave the corroders a very small margin of profit. In fact, some supplies had been procured at prices, which, when the reductions of last January were made, left the corroder without any margin, and in some cases with loss. It would therefore be out of the question to reduce prices for this commodity now, and stocks contracted for at the present time will not be corroded and ready for market for weeks to come, probably not before the middle of June or thereabouts.

The pig lead market has been a very interesting one in that declines for many weeks have been anounced until base prices hovered between five and six cents. At the lowest levels reached, Mr. Scott said that some of the larger operators were actually selling below cost, and it is very doubtful, it was further pointed out, if prices will ever reach anything like their pre-war levels; such a condition is decidedly improbable. For labor will not consent to a reduction of wages, and this is one of the big items. "We can get labor more readily now," said Mr. Scott, "but it costs us as much, and in some cases more than it did before."

Better Delivery Now

Added to other troubles confronting the corroder of lead for long enough was that of the delivery of stock for which he had contracted and against the receipt of which he had to figure on filling his orders. This trouble is now largely dissipated, and as there was a lack of severe weather conditions this winter the manufacturer is in the position of being able to take care of his early deliveries reasonably well, and with greater promptness, perhaps, than would have been otherwise possible. The dealer will be able to take delivery of his earlier needs without delay, but it would be of no advantage, Mr. Scott indicated, to defer the purchase of what lead one would require in the earlier part of the season, and in such quantities as a dealer might reasonably expect to sell. Should there be a general withholding of orders, there was much likelihood of a grand rush at the last moment and delays would result. For the facilities of the manufacturer, while large, are not such as to take care of business at the last moment and ensure dispatch.

Big Expansion Expected

"In the course of the next five years I expect that there will be a very considerable expansion in lead corroding in Canada," said Mr. Scott. "For some time back there has been very little corroded lead imported into Canada and it is possible to take care of all the Canadian business by Canadian corroders. There has been a very marked increase already, and the expansion has also been large as relating to litharge, red lead and orange mineral. It will also be possible to take care of the requirements in these commodities. We are making improvements to produce these on a larger scale and also expect to make greater improvements later."

Mr. Scott continued to point out that there was a very satisfactory increase in the tonnage of corroded lead, litharge, etc., produced. While it is true that ready-mixed paint contains, in much of the product at least, a large bulk of lead in oil, there is still a big tonnage and an increasing one going forward in the regular way for use in various ways. Altogether the future was very bright for this.

The Future of Prices

Asked as to the ultimate levels that might be expected for lead in oil, Mr. Scott was sure that there would be a higher price basis than that which obtained prior to the war and that there would never be a return to old prices. "The lead will not be worth any more in the mine," said he, "but it will be costlier at the mine's mouth."

The tariff as arranged at present is a very awkward thing to lead corroders, and particularly in the matter of litharge, a very similar product to that of white lead. For the peculiar condition exists which permits the importation of litharge, duty free, while there is duty on the raw product, making it extremely awkward for the corroder who has established facilities for treating the virgin lead in making the finished product. This condition has long existed, and it seems improbable that there will be any changing at present. If this were done, it is claimed, the corroders here would be justified in arranging their plants to take care of a larger business. But even as it is the development, as already pointed out, has been satisfactory.

Prospects for Paint and Varnish Sales

Lessons to be Learned From Experiences of War—Price of Paint No Excuse to Delay This Conservation Measure—Encourage Protection and Decoration Idea—Reconstruction Problems—Painting of National Importance—The Opportunity to Create Work

ARE there any lessons to be learned from the war by Canadian paint and varnish dealers, or are there none?

Most emphatically there are many.

Are there any lessons to be learned during the reconstruction period?

Again, most emphatically there are many.

The condition of Germany's mighty fleet when surrendered, due very largely to the lack of paint, is a notable instance of what neglect will bring about, both in efficiency and morale.

Paris, the brilliant and gay, has drawn upon herself the mournful comment of writers of fact and fiction. after four years of neglect in the matter of paint

Never before the war had governments given such earnest consideration and investigation towards promoting the efficiency of paint and varnish coatings on battleships, motor boats, aeroplanes, and as a means of camouflage.

The economic service of paints and varnishes as a means towards promoting war-time efficiency has been both enhanced and enlarged.

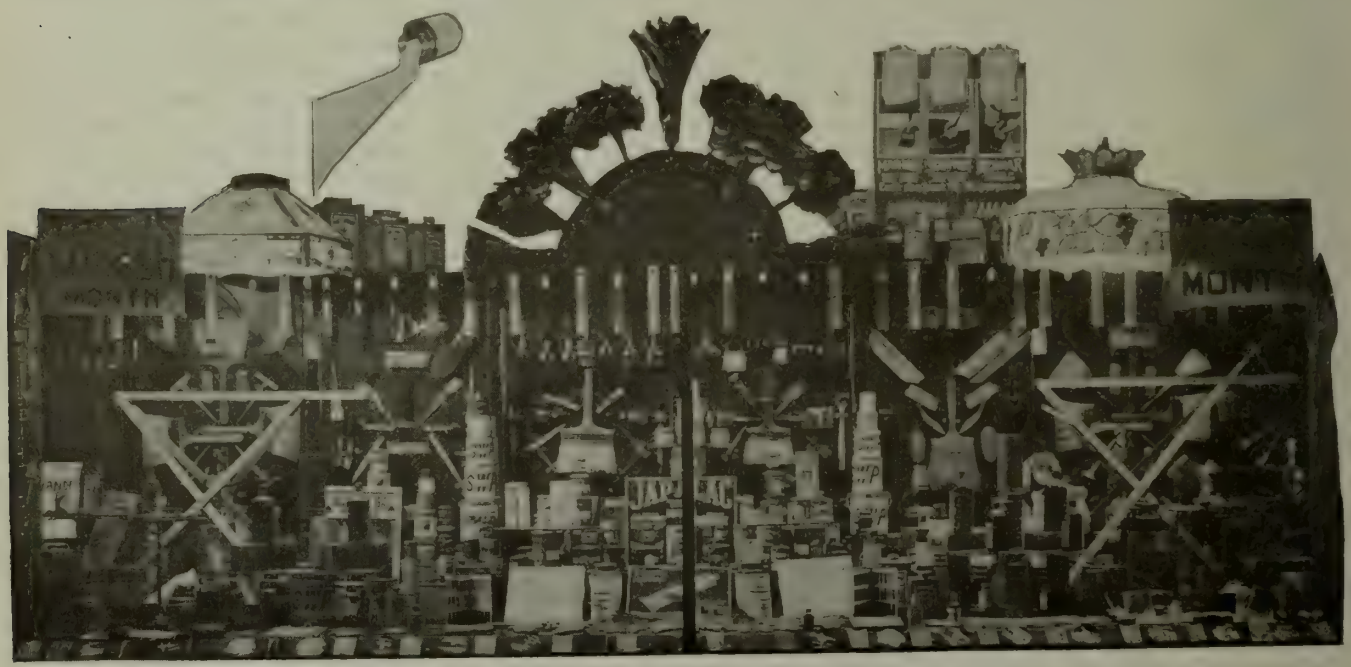
Negative Attitude Bears a Lesson

There is also a mighty lesson to be learned from the negative attitude taken by the consuming public towards paints and varnishes. We see evidences of this attitude wherever we go to-day. The down-at-the-heel condition of property; the ravages of this neglect, with war-time conditions for an excuse, have left their mark on every community in Canada.

And many paint and varnish dealers must share the blame for this with the consuming public. They have not attempted any up-hill fight in their own or the public interest to maintain their volume of paint sales. And when we say volume, we mean number of gallons and pounds, not dollars and cents.

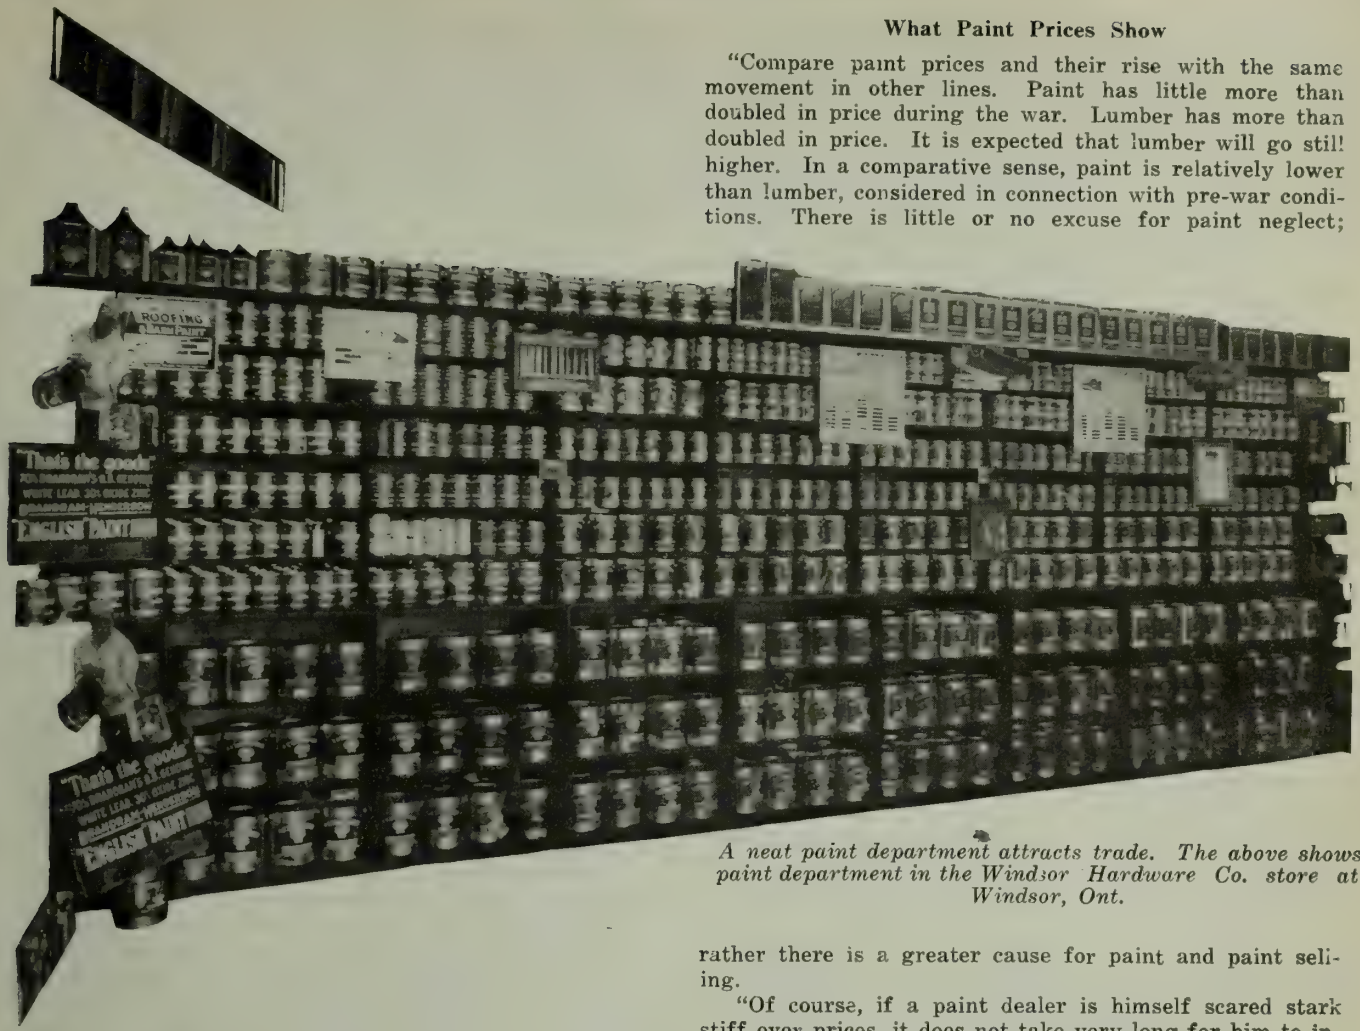
High Price of Paint No Reason to Delay

Because of the necessary high cost of producing paints and varnishes they have hoodwinked themselves, and too often their customers, into believing that painting should be made to wait for lower prices. From the standpoint of conservation of the country's building material, this has become a serious problem, and many properties will bear the marks of this neglect for all time to come.



True, this neglect has not become entirely unredeemable and a vast saving can be affected on Canadian property if paint sales and painting are energetically pushed this spring. But every year's postponement makes the problem more serious. It has come to the stage where it is no longer a question of the high cost of paint, but a serious problem as to the high cost to both the individual and nation of doing without paint.

Opportunity Presents Itself



However, enough of this chiding. There's little use of crying over spilt milk. It is our purpose to point out the opportunity arising out of these conditions that exists for Canadian paint and varnish dealers during the spring of 1919.

After three years of war, and a necessary continuance in the rise in prices, paint dealers were greatly surprised to note the revival in painting that took place during the spring of 1918. No one can exactly give any predominant reason for this, except that people had become so weary of the run-down appearance of their property that they bought paint, rented ladders and wielded the brush themselves, when they could not get painters to do the work.

Now that the strain of the war is off, still greater at-

This window display furnishes many suggestions for a spring paint window.

A neat paint department attracts trade. The above shows paint department in the Windsor Hardware Co. store at Windsor, Ont.

tention is being paid to the necessity of painting. Our Government very justly advocated thrift and economy in our living and spending during the war. Whether they had painting in mind or not, it is hard to say, but many people listed it amongst the things that they could do without. To say the least, it was a queer idea of economy, when at the same time extraordinary efforts were being made by the same Government to teach necessity for conservation of our natural resources.

Those who purposely postponed painting certainly saved at the spigot and cocked their eye at the leak in the bung.

Encourage Protection and Decoration Idea

But these restraints and admonitions are all off. As stated, people are turning attention to the protection and decoration of their property. Our Government is still advocating the necessity of conservation. Our War Trade Board is making strenuous endeavor to advance industry and provide work for our laboring people. The encouragement of painting will assist to solve many of these problems.

Paint dealers can contribute no small part in helping by encouraging the greater use of paint. Just here let us speak a little word to the paint dealer who discourages paint sales, either through indifference or by throwing cold water on his paint sales because of the price situation. With this inclination towards painting on the part of the public, together with the effort of the Government to encourage industry and conservation, he is not doing himself, his trade, or the nation, full justice if he does not exert efforts beyond the ordinary to boost his paint and varnish sales during the coming spring.

There might be repeated, by way of emphasis, one or two paragraphs that appeared in HARDWARE AND METAL on February 15:

What Paint Prices Show

"Compare paint prices and their rise with the same movement in other lines. Paint has little more than doubled in price during the war. Lumber has more than doubled in price. It is expected that lumber will go still higher. In a comparative sense, paint is relatively lower than lumber, considered in connection with pre-war conditions. There is little or no excuse for paint neglect; rather there is a greater cause for paint and paint selling.

"Of course, if a paint dealer is himself scared stark stiff over prices, it does not take very long for him to infect his trade in the same manner. It doesn't require a second look for trade to spot a long face and a pessimistic mind. Such an attitude has no place in reconstruction."

"Reconstruction needs men that whistle and put their shoulders to the wheel. It wants men that will go over the top with business aggressiveness. Hiding in a funk hole of pessimism will never reconstruct. Filling these holes up and forgetting them is the idea and the job."

"The buying attitude of many paint dealers during the late fall and winter has shown little preparedness for this reconstruction movement. Holding off for lower prices is good business sense if prices were likely to fall. As has been pointed out, there is little likelihood of any price alterations before next summer, and what next summer will bring about finds no present grounds for very sound prophecy."

What of Reconstruction Problems?

Our reconstruction problems are providing opportunities for paint and varnish sales. What are you going to do about it, Mr. Paint Dealer? Are you going to take a broad view of the benefit you can render your community through your paint department and encourage the sale of paints and varnishes? Are you going to take into consideration the relationship that a sale of paint has upon conservation, the building up of the community, and all the other beneficial factors that arise from the use of paint? Are you going to boost your paint sales on this basis and do your part in promoting the welfare of the nation? Or are you going to let the present price situation be a mote in your eye, and allow it to blind you to your own opportunities and advantages? It is up to every paint dealer to determine his own fate. The opportunity will be here for greater paint and varnish sales this spring. Will you make or mar them? The public wants

to paint, of this there is growing evidence every day. Encouragement by right selling methods will increase painting and paint sales. Discouragement by wrong methods will discourage painting and paint sales.

Put Pep in Your Selling

Encouragement will cost a little money in advertising and extra selling effort, but it will bring positive business and profits. Discouragement and indifference are the least costly to advertise, but the only returns they bring are loss of sales and profits, which is another way of looking at it. Are you going to advertise encouragement, or are you going to advertise discouragement and indifference to your paint business? Your returns will be determined by the action you take in the matter.

We are not without direct evidence of the fact that already painting is on the boom. We quote from a Toronto evening paper of March 12:

"The committee which has had in charge the arranging of a parade of the unemployed to gather in Queen's Park and impress the Legislature with the need of public works, has fixed on Tuesday, March 18, for the event. The committee has yet no figures from the various unions to show how many men are out of work. The Painters' Union reported none idle and a demand for more men."

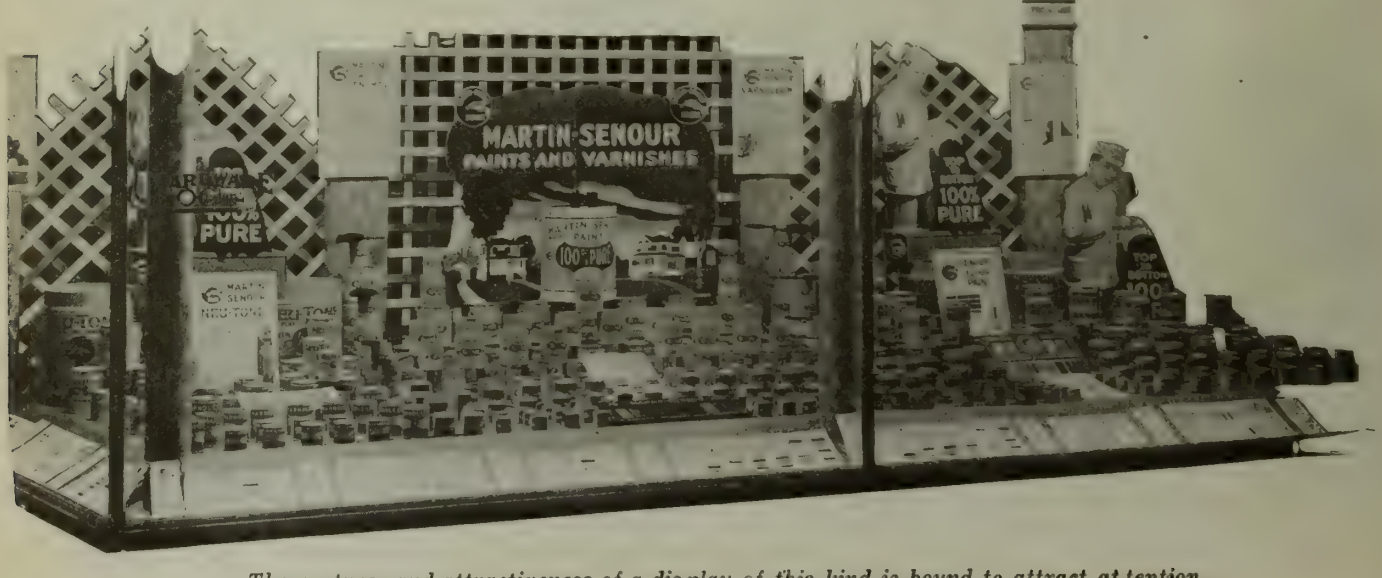
Inquiries Are Numerous

At no time during the past four years has the writer, in frequent contact with the consuming public, encountered more enquiries regarding paints and varnishes. The following statement from a lady enquirer typifies many letters and conversations: "We've put off painting and decorating as a sort of war-time economy, you know. We just cannot stand it any longer; we've got to paint and decorate each year."

Painters throughout the country have refused work offered them right and left, because they had not the help. We have in mind one man in particular in a small country town, who, in normal times, always employed from five to eight men throughout the year. During the past three years his help has been limited to himself and a boy. With the return of the army and the taking up of peace-time pursuits by those engaged in munition work, a great bulk of this shortage of painting labor will be overcome.

Painting of National Importance

We have made reference to the national importance of encouraging the use of more paints and varnishes. From this standpoint, and entirely apart from the commercial aspect and the necessity of encouraging our industries, it may be well to indicate briefly wherein it is the duty of paint and varnish trade to promote larger use and sale of its products.



Mention has been made of the extent to which the use of paints and varnishes has been neglected in Canada, and attention drawn to the subsequent losses through lack of protection and preservation, as well as loss of business.

Their Real Significance

These losses are both individual and national. Their real significance is most clearly shown by a consideration of their effects under the following headings:

1st. Natural resources. Anyone giving the slightest heed to the propaganda of our Government on the necessity of conserving our natural resources, will realize that unnecessary and preventable deterioration and loss is not only unpatriotic, but will sooner or later contribute to the detriment of our national welfare. Neglect or lack of protection of any building material that can be preserved by means of paint necessitates replacement by material that could be used elsewhere, perhaps to better advantage. It also means drawing on our natural resources unnecessarily or at a too early period. Canada has reached the stage where this problem must be considered, and it is one of growing importance each year. If paint and varnish can prolong the usefulness of our building resources, it is clearly the duty of the trade to promote their use in every way possible. One cannot continue altogether in a selfish attitude that such a consideration is "none of our business"; the broader national view makes it some of our business." When the paint dealer can take this view, he will find something of the altruistic in his work and effort, and we are also convinced that he will also find more actual commercial profit. Big business to-day is tending to base its efforts on just such broad, comprehensive ideas. If a broad viewpoint is good for big business it ought also to be good for business of lesser volume.

2nd. The increased sale of paints and varnishes will likewise tend to overcome impaired commercial credit, brought about by the rundown condition and appearance of property. Any paint dealer who has had the opportunity of reading a commercial report, either from a bank, a loan company or a mercantile agency will appreciate the significance of this consideration. This benefit need not necessarily apply to individual property owners. It applies equally as well to farms, whole communities, and to business concerns. Painting and re-painting with sufficient frequency to maintain good appearance undoubtedly has its beneficial influence on the casual observer, as well as the banker who looks more closely into such conditions. It is scarcely necessary to dwell upon the influence of a well-painted store front and to what extent it draws business. While it is estimated that the loss by fire is less than actual loss by reason of lack of paint, it is yet to be seen where any estimate in dollars and cents of the value of paint and varnish on a business establishment

The neatness and attractiveness of a display of this kind is bound to attract attention.

is reckoned. Every dealer, at some time or other, has seen a business in a small community plod along with mediocre success; taking little account of appearances, until some live, wide-awake chap sets up shop nearby in the same line with a newly painted front and interior fitted up-to-date. Either the fellow that neglected such things spruces up or goes under. The cost of going under is serious when a little painting up might have kept his head above board if nothing else. Paints and varnishes in such instances are an asset.

Paint Up and Clean Up Movement

And there are the paint-up and clean-up movements that have pulled many a town into respectability. So that there are opportunities for paint and varnish sales in this connection which can be linked up with community benefit that would be well worthy of a paint dealer's extra effort. War time neglect makes such opportunities doubly important for the coming spring.

Promotion of Industrial Progress

3rd. The promotion of industrial progress. We have already pointed out that some industries are unnecessarily engaged in the replacement of building material that has deteriorated through neglect. Much of the fire conservation effort of our Government is directed towards the elimination of this sort of replacement. If it is important from the fire conservation standpoint it is that much more important from the paint protection standpoint, in that losses by this means are greater than loss by fire. To compete successfully with other nations Canada must eliminate every possible form of waste both in materials and effort. With Canada's unfavorable trade balances threatening to jeopardize the financial situation, efforts must be made to avoid unnecessary replacement, and export our raw materials as such or in manufactured form. This will also assist to absorb any surplus labor and will be energy well directed towards bringing much needed money into the country. This may seem a rather far-fetched paint argument, nevertheless it bears its own share towards one of the problems now facing some Government departments and the commissions under their charge.

The Opportunity to Create Work

4th. The loss of employment, or perhaps we might better call it more positively the opportunity to create work.

In this connection it might be well to quote from a previous issue of HARDWARE AND METAL the possibility of service that can be rendered in the greater use and sale of paints and varnishes:

"The promotion of the use of more paint and varnish would also assist to strengthen the position of the painting trade and place it on a more important level. It is not out of the way to estimate that each one of our 1,600,000 dwellings would require, on an average, $50.00 worth of labor for decoration and protection. If each was repainted every four years, it would provide an annual labor bill of $20,000,000.00, which ranks very well in comparison with the total annual wage bills of other industries during 1915. Amongst the highest of these we find that the timber, lumber and re-manufactured timber industries paid $28,900,000.00; iron and steel paid $27,000,000.00; textiles paid $27,000,000.00, and the combined food industries $22,000,000.00. There are no available figures showing what has been paid for painting labor, but it is quite safe to assume that it has not been anywhere near this figure.

"In providing an opportunity for a greater amount of labor by extending the use of paints and varnishes, the trade has, therefore, almost unlimited room to take a prominent part in the rehabilitation of the industrial workers into a worthy peace time pursuit."

Retailers Have Function to Perform

To avoid an absolute and irrevocable loss of materials, labor and time, the basic elements of our real created values, in deterioration of property through lack of paint, proper painting or through insufficient painting, places an obligation on the trade which cannot be very well shirked. The paint dealers have at once a duty and an opportunity to advance their sales from this standpoint which can be both national, communal and individual in their bearing.

The larger factors in the paint and varnish trade, both in Canada and the United States, have come to realize their responsibility in this regard. They recognize that both methods in advertising and selling must be adapted to reach national needs, as well as the needs of the trade as a whole. More aggressive educational methods in advertising to emphasize the basic economic necessity of paints and varnishes have been needed for some time and are in the course of realization. This is being brought about through the decision of the Canadian Paint, Oil and Varnish Association to conduct an impersonal educational campaign throughout Canada during the coming spring. Like many other industries they have come to realize that greater co-operation of all interested factors has become necessary in order to increase the use of their products.

In addition to the opportunity that has been created out of our economic conditions for the larger sale of paints and varnishes, the paint trade has decided to bring the Canadian public face to face with the condition of their property, the losses they are sustaining and to show how paints and varnishes may be of real money saving service from both the national and individual viewpoints.

The spirit of this campaign is co-operative, which means that the individual paint and varnish dealer is being looked to, to lend every aid within his power within his circle of influence. Any failure to do so on his part means that much loss of its effect on his particular trade.

The Value of United Effort

There are vast possibilities in this united effort, even though the paint dealer through his indifference fails to further it to his own ends. If he links up with this big movement, in the spirit of helpfulness, there is absolutely no doubt but what he can cash in on his own and the united effort that will be back of him.

The paint dealer that cannot see a brilliant future for his trade during the coming spring is either trying to get a squint at the situation through smoked glass or is looking through the wrong end of the telescope.

The conditions of Canadian property clearly point to the necessity of more paint—in thousands of cases it is crying for paint. Property owners relieved from the stress and strain of war conditions are turning their attention to the preservation and decoration of the property. Our conservation efforts can readily receive the co-operative service of paints and varnishes in protection and preservation. One of the main purposes of the advertising campaign outlined above is to point out the economic service of paint protection and preservation. If the public are taught to buy paint as a protection, immediately it will lead them to seek all the protection they can get, which will raise the level of standards for their purchases. This will, undoubtedly, have a beneficial effect on the consuming public and place paints and varnishes on a firmer and more lasting footing as a necessity in their minds, rather than a luxury. Our economic conditions demand the promotion of every industry within the country; this with the opportunity that can be created for labor is of no mean importance.

Is there a paint dealer that fails to see business ahead in face of this situation? The country is bristling with chances. There are opportunities foreseen and unforeseen which the optimist will take hold of and make money out of.

Instead of blue ruin, trepedation, trembling, fear of high prices, let us all pull together for bigger business. It is our hope in addition to our endeavor to point out the possibilities for the coming year, we have also provided progressive selling arguments and incentives to the sale of more paints and varnishes.

If these arguments have gone home try this little selling receipe on your trade: Make your customers feel that their property needs the application of your paints and varnishes more than they need the money which you ask for them.

Sees Splendid Paint-Selling Year

"No Change in Prices," Says F. J. Penberthy—"Only Decline Will Come When White Lead is Selling Below $12 and Linseed Oil is Below $1.40"—No Indication of These Prices Yet

MR. F. J. PENBERTHY, Vice-President and Managing Director of Lowe Brothers, Limited, Toronto, is looking for a splendid paint-selling year and for no change in prices.

"In December," states Mr. Penberthy, "we, like all other manufacturers, had a material falling off in our sales, due to the fact that manufacturers were doing very little and dealers were reluctant to place orders on account of the expected weakness of the markets. A few—not many—expected a tumbling of prices. Some weakness was exhibited, but it was shown only in such materials as had inflated, rather than concrete values.

In January, young Canada again placed her feet firmly on the ground, looked conditions squarely in the face and saw that it was no time to talk low prices or wait for them. Consumers were buying goods and the merchants must necessarily carry stocks to supply the demands. Orders were placed freely and on account of the remarkable weather dealers have sold paint all winter. This gave them confidence and they placed substantial orders for spring shipment and the month of January with ourselves and, I understand, a number of other paint manufacturers, was up to normal. During that month confidence was fully restored, orders were placed freely and our increase in the month of February over February of last year has been great enough to overcome the very large decrease in December sales.

Cannot be Reduced

"There can be no price reduction in the price of paint at the present time," said Mr. Penberthy to HARDWARE AND METAL, "it would be purely and simply business suicide. There would be no one to benefit by such a decline except the merchant who had waited four years for a drop in prices, has not bought anything in that time nor sold anything in that time. There can be a decline only when the time comes that white lead is selling below $12.00 per 100 lbs. and linseed oil is below $1.40, or a decline could take place when white lead is $14.00 and linseed oil $1.10.

"There is not the slightest indication that these prices will prevail and as far as present prices are concerned the manufacturer has never based his cost on the high price of lead or on high priced oil. If he had the merchant would probably have been paying over $5.00 for mixed paint and then the paint manufacturer would have had something to fall back to, but as they never went up to high prices, they cannot drop back until raw materials are below the level on which their costs were based."

Gives the Figures

At the Annual Convention of the Retail Hardware Association of Ontario in 1918, Mr. Penberthy gave an address on paint and paint prices, which are shown in the table accompanying this article. According to Mr. Penberthy's figures as taken from the table, the paint manufacturer should get $4.43 per gallon for his product with white lead at $14.00 per 100 lbs. and linseed oil at $1.50 per gallon, and $4.54 if the market price of lead is $14.00 and linseed oil $1.60. These figures as shown in the table have never been contradicted by merchant or paint manufacturer since they were presented by Mr. Penberthy and cannot be now, he states.

The following should be the selling price of a white paint composed of 60% of lead and 40% of zinc, allowing 5% profit to the manufacturer:

Market Price of Lead	*Market Price of Oil*	*Selling Price*
$14.00	$1.60	$4.54
14.00	1.50	4.43
14.00	1.40	4.32
13.00	1.40	4.21
12.00	1.40	4.10
14.00	1.40	3.90
10.00	1.30	4.23
14.00	1.20	4.13
14.00	1.00	3.90
14.00	0.80	3.63

The whole question of paint prices centres around the cost of raw materials which go into the paint and the cost of producing and marketing them. The figures shown in the table are just as applicable to-day as they were when presented by Mr. Penberthy a year ago and are the basis on which prices will be estimated two years from now or five years from now.

To Some Extent

Mr. Penberthy further states that the merchant usually considers that the price of mixed paint is influenced by lead and oil, which is true to some extent providing all the other materials entering into the manufacture of paint remain constant, but a decline of 50c per 100 lbs. in white lead is easily overcome by an advance of 4c for a gallon can, 2c for a box and ½c for a label and labelling.

One or two things do not make the price of paint, but a combination of many things. Paint is no mystery as it was at one time considered. We are dealing with lead, zinc, linseed oil, turpentine, tin plate and other spot cash articles that are just as staple as flour, gold or copper. Dealing with such staple articles as these we cannot treat them as a patent medicine or a thing of mystery and if in the eyes of the public it is so considered it is the paint manufacturers' fault for not teaching and the merchant or consumer's fault for not wanting to learn.

The Big Factor

"The paint business that any dealer will do during the coming spring or summer or throughout the whole season is governed," Mr. Penberthy says, "by the state of mind of the dealer. If he has faith and goes after business aggressively he will reap the harvest; if he lets his stock dwindle down to nothing, waiting for a decline in prices he will not have the goods his customers call for and many sales will be lost.

If the dealer is convinced that the prices asked by the manufacturer, as the table shows, are justified and adopts a courageous attitude, it will become contagious and the customer in turn will have faith. It must be borne in mind that all sales are made in faith.

A twenty-eight page catalogue issued by W. H. Banfield & Sons, Limited, Toronto, lists the various electrical lighting fixtures made by the firm. The catalogue is attractively printed in colors. Copies will be sent to readers of HARDWARE AND METAL upon request.

How to Increase Sales of Insecticides

Since Manufacture Has Greatly Increased Some One is Selling More of This Line—Hardware Dealer the Logical Handler—Convenient Packages Make This a Good Line

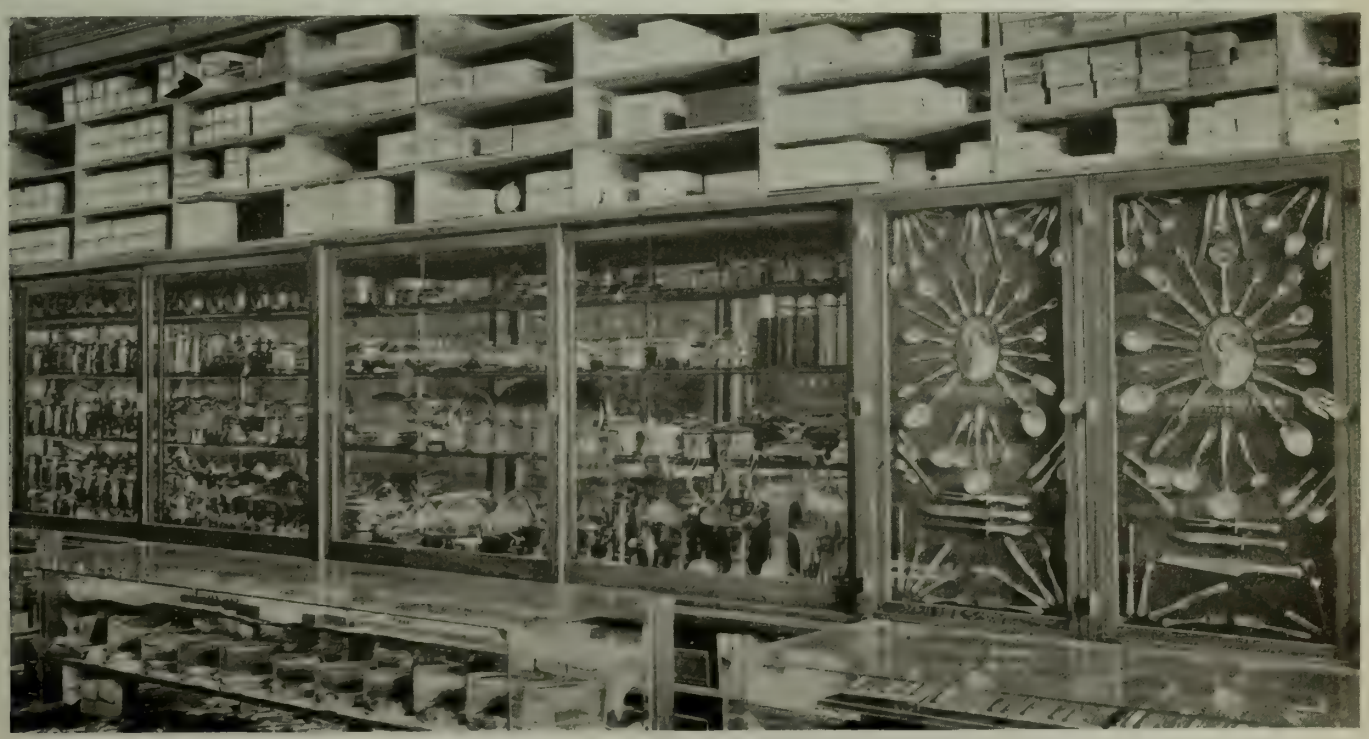
THE manufacture of insecticides in Canada has increased by a very appreciable percentage in recent years. Some factories engaged in the manufacture of these products have reported increases in their output of from over one hundred to five hundred per cent.

In view of the foregoing facts and because of the nature of these commodities, a representative of HARDWARE AND METAL called recently upon Royal Cluxton, manager of the Canada Paint Company, Montreal, to ascertain whether the hardware dealer was selling a reasonable proportion of the output of the manufacture. Mr. Cluxton's reply was to the effect that the very large proportion of insecticides went through retail dealers, but all of these dealers are not hardware men. The question then arises—Can the hardware dealer increase his sales of these commodities and will it yield him a profit commensurate with his investment and handling expense?

Canada a Big Field

Those fortunate enough to attend the Retail Hardware convention at Hamilton in February were given some of the outstanding facts of interest concerning the development of insecticide manufacture. The special representative of HARDWARE AND METAL writing this article had the privilege of witnessing the various operations through which these commodities pass in the course of manufacture, and it would appear that there has been a very considerable development in manufacturing methods as well as in actual output. For the factory visited was large and modern, with much machinery of approved latest type and a large and complete laboratory for the testing of materials and the conducting of tests and experiments. If, therefore, the product is turned out in larger quantities from year to year, someone is selling it, and the hardware man will doubtless consider what his chances are for getting more business and making a profit on it. Canada is a big field and a growing one, and there are some facts worth considering.

Advantages Are Many



HARDWARE AND METAL spoke with one retail dealer in the City of Montreal last year who had sold immense quantities of insecticides. He was located near one of the large markets to which the farmers brought their vegetables, fruits, etc. His sales were heavy and thousands of pounds (a large portion of it Paris green) were bought by the farmers. Doubtless, his location was a help to him, but "it paid to advertise," in any case, the fact that he had these goods, and he sold them.

One of the advantages which the dealer has to-day is that of purchasing insecticides suitable to the needs of his own district in neat and convenient packages. These are very attractively labelled, so that when the shipment arrives it is ready to be displayed on the dealer's shelf or in his window. Half pounds, pounds, fives and larger quantities may be had. It is said that the popular sizes are the smaller ones and these should yield a good margin of profit. In addition to Paris green, there are several other commodities suited to spraying trees, bushes, etc.

Mailing Lists—Maker's Helps

A very excellent advantage that will appeal to the dealer who is in a position to develop this feature of his business, if there be fruit trees or other foliage in his neighborhood which will require treatment, is that of securing the co-operation of the manufacturer. This will be readily given.

The first thing necessary would be to decide on the number of farmers in one's district that should be using insecticides. Probably many of them are now using them each season, but they may be purchasing from other sources than the hardware dealer—it may be from the local druggist. In any case, a survey of the field would enable the dealer interested to send forward a list of good prospective customers to a reliable insecticide maker with the request that he send them literature bearing on the importance of spraying, and giving the pros-

A corner of the cutlery and plated goods section of the Wells Hardware Co., Hamilton, Ont. The value of good display isquite obvious in the picture.

pect the dealer's name. This would ensure a personal letter reaching your prospect by direct mail and the impression would be lasting and effective. It ought to bring real results. The large makers will be glad to help in this way.

Advertise—Make Displays

The writer recalls how very extensively the selling of insecticides was conducted by the drug stores in many centres for a great many years. This is doubtless the case still. With a tightly-sealed package, there ought to be little or no objection to handling these lines by the hardware dealer, for there is no danger. And the beginning of a campaign at the right time might result in the sale of several thousand pounds in one season.

The local paper could be used to start a campaign. Such attractively-worded notices have been run by many dealers and the same plan could be followed by others. In addition to this the matter of display should receive the attention of some one clerk or the proprietor himself. Selling helps in the way of pamphlets and other printed and lithographed matter will be sent by the maker. These can be used within the store to advantage, but particularly in the windows with an otherwise attractive display, and accompanied by price cards and a few pointed remarks about the advantages of spraying.

Altogether it ought to be a good season. For the sake of helping in the conservation of our orchards and with a view to increasing yields in the common purpose of furthering thrift, the dealer can use his advantages to good effect. For greater care with our orchards means greater production and a consequent benefit to the community at large. And in the final analysis there is that important factor—your own profit.

RETAILERS WILL WANT TO BE SHOWN

Continued from page 155

ing your purchases closely—buying hand-to-mouth?

Shown in the small panel is a letter received from one retailer on the new scheme, and the letter received from HARDWARE AND METAL's Montreal editor is reproduced below. Before committing yourself to an outlay of $260 a thorough investigation should be made—tag yourself "from Missouri" and ask to be shown. The circulars sent out so far are not convincing. That $260 wanted should be good value in the hands of the retailer for a little while yet.

The letter from the Montreal editor of HARDWARE AND METAL reads as follows:

"I had a talk with Mr. Hawksworth, and he was just mailing out more of these circulars. He figures that this is going to be a good thing for two hundred men if they will take it up. As outlined, it is proposed to have retail hardware men pay Hardware Buyers, Limited, $5 per week on a yearly contract, and for this to get the advantage of buying hardware at manufacturers' prices, the above concern to buy the hardware in a large way from the manufacturer and sell to the retail dealer at this price. Just how they can do this I am not convinced. Mr. Hawksworth is sure that it can be done. He proposes (if enough retail hardware men come through with the $5 per week) to give such members the privilege of manufacturers' prices to the extent of $5,000 per year; if they buy more they will have to pay a proportionately higher fee for the service rendered.

"Mr. Hawksworth stated that he was in touch with many of the best firms in the States and England as well as elsewhere. He would propose to buy from these firms at lowest jobbers' costs and to give the benefit to the members of the organization. Those putting up the proposed capital of $150,000 are rated as capitalists, and he intimated he could secure these. He has not collected any money yet, and does not want, he says, any money sent in by the retailers until he knows whether there will be enough response to justify his going on with the scheme.

"Like many other big schemes, Mr. Hawksworth thinks this will be an ideal venture. He says they will carry a considerable amount of stock, and that they will be able to get orders forward within a week to two weeks after orders are received. The overhead charges are set forth in the sheet attached, and he figures that this proposed $52,000 (made up of 200 members at $260 per year fees each) will carry the thing along all right. He said that he figured the average hardware retailer could save around $1,000 per year on purchases of $5,000 through this plan, figuring the jobber's advance over cost at 20 per cent.

"Goods would be sold to members on practically a cash basis. Mr. Hawksworth said that they would expect goods to be paid for after they were received and the invoices checked.

"They would propose to rent a suitable warehouse and to engage a number of reliable hardware men. (I might point out that this man Hawksworth is a mill supply retailer and not a hardware man). He said that he had good men in mind to undertake the necessary work of attending to details, etc., and that these men would be paid good salaries under the item: "Rent, heat, wages, etc." There would be no need to figure any percentage on invested capital other than that for the "Proposed capital of $150,000."

"No member will have to buy exclusively from this concern unless he wishes. But if he signs the contract to pay his $5 weekly for this privilege he will have to pay it for a year, I was given to understand."

Canadian File & Tool Works, Limited, head office Montreal, capital $200,000, plans to carry on the business of steel and iron masters, iron founders, tin plate makers and to manufacture files.

McColl Brothers, Limited, head office Toronto, capital $1,000,000, plans to manufacture and deal in oils, varnishes and soap.

Eastern Canada Motor Truck Company, head office Ottawa, capital $500,000, plans to manufacture motor cars, tractors, motor trucks, trailers, and motor vehicles of all classes.

The Crammond Machinery Company, Limited, head office, Montreal, capital $50,000, plans to carry on the business of iron founders, makers of automobile parts, brass founders, and to manufacture implements, tools, hardware and motor parts.

Uses Location Advantage to Lure Business From Big City Nearby

THE River Ottawa divides Hull, Que., from Ottawa, Ont., but the fine Interprovincial Bridge spans nature's barrier and provides a connecting link between the twin cities.

Hull enjoys lower rents, moderate taxation and lower expenses in many ways than its bigger neighbor and this fact is taken advantage of by W. E. Scott, hardware, 48 Montcalm st., Hull, Quebec. He came to the conclusion that the people of Ottawa would be eager to buy hardware in Hull if he could show them that in doing so they could save money. Plans were made to attract the business and Ottawa papers selected as the medium to produce results.

The savings offered were used as the strong point in the advertising, the advertisements claiming that the saving amounted to 25 per cent. The reproduction shows the usual lines adopted, showing also that the space used was not very expensive.

Results have been surprising and the trade is rapidly growing. It taxes the present premises to their capacity, it is stated, and every sign points to the fact that they will be outgrown at an early date.

A great deal of business is done by telephone, many of the customers never having been inside the store, nor do they know its proprietor.

Dealing in Automotive Equipment

Great Opportunity For Dealers During 1919 — Good Displays Important in Selling Automobile Equipment—Need For Association

Written for Hardware and Metal by C. Dixon, manager of sales, bicycles and automobile accessories, Hyslop Bros., Ltd., Toronto.

THE season of 1919 offers greater opportunities for the sale of automotive equipment, embracing accessories, tires and supplies for automobiles, trucks and tractors than 1918, or ever before, because there are 70,000 more car owners, and all the old motor cars, after another driving season, require extra repair parts and supplies. As a dealer you are the only satisfactory outlet and source of supply for the car owner.

Of late several writers and speakers have handed out much advice in a general, indefinite way to dealers telling how and what should be done to improve their merchandising methods, the handling and exhibiting of stock, in order to conserve and save more nickels out of every dollar's worth of sales, that I fear some repetition, but will try to suggest briefly and pointedly specific methods that can be adopted to advantage.

Probably the biggest problem is sales, and sales depend on proper buying. This means you must anticipate and plan to have a sufficient assortment of stock to take care of your customers' needs and give prompt service. If your present stock is low and you have not bought your spring stock, get on your toes at once, as otherwise you will be out of the running.

Prices on automotive equipment are likely to remain at present levels for the entire season. The firm with which I am connected have carefully searched the raw material markets and factories in Canada and United States, but there is nothing whatever on the horizon to indicate a reduction in prices for at least the next six or eight months, and even then no sweeping changes are likely. The trend of events in the next three or four months may give some indication of price possibilities for 1920 buying, but for the 1919 season we, as jobbers and distributors, can find nothing to indicate any serious reduction in the price of goods we handle.

Every dealer should plan his buying in proportion to the number of each article he sold during the past season. This can be accomplished by keeping a sales record of each article, or you can get it from your invoices. By keeping a simple stock record of the quantities of accessories sold during the season you can form a correct basis for buying for the following season. You will know exactly the proper quantities to buy and the proper time to stock certain seasonable lines which have not a regular sale. When buying your stock, proper consideration should be given to the demand for such an article in your locality and the quantity limited to the extent of your ability to make turnovers. It is advisable to carry an assortment or complete line of accessories, but carefully avoid an overstock of any one item which costs money in the way of interest and discounts, soiled stock and other increased expenses. Overbuying and slow sales are the greatest enemies to the turnover. Overstocks tie up profits, and for the coming season the dealer can more safely plan to operate with a smaller quantity of each article of stock and buy oftener than during war-time seasons.

Buy With Care

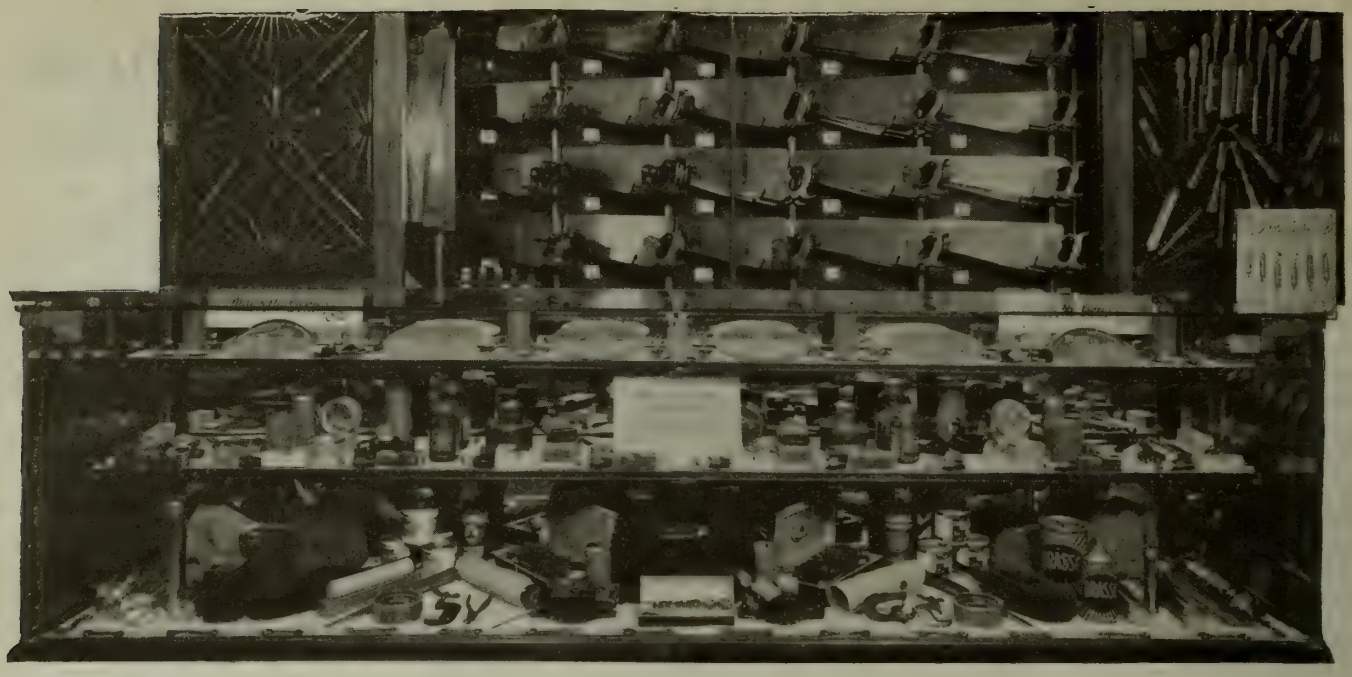
In selecting the lines of accessories to put in stock, you should be guided by the wants of customers plus the total car owners in your territory. Ascertain how many cars of each make. When you know how many Fords and how many Chevrolets and other makes are in your territory you can better decide on proper quantities to buy.

Due allowance should be made for the number of customers controlled by your competitors, then you can fairly correctly determine sales possibilities and the quantities and kinds of accessories to buy should be in accordance with customers' and prospective customers' cars. One special point, and that is, do not allow yourself to be stampeded by some salesman into buying heavily in order to get a price on some new-fangled, untried device. Better line up with some reliable firm who have had experience in sorting out these new offerings and who handle most of the standard lines.

You can do a great deal at the present time to maintain a feeling of confidence on the part of customers and car owners. If the car owners find that you are not buying goods, on the expectation of a decline in price, they on their part will refuse to buy for the same reason.

Many car owners have already overhauled their motor cars, or will very soon start the buying stream, and their needs must be supplied from someone. You can, to a large extent, create your sales market before the buyer arrives at your store.

More time and thought should be given to increase sales by every possible legitimate method. One way is to keep your customers and prospective customers well supplied with reasons why they should buy your goods. Many car owners do not know the uses of certain articles, or are not aware of the existence of certain articles. This sales effort can take the form of personal solicitation, local newspaper advertisements, catalogues, price sheets, circulars, and the other many advertising and selling plans. Put into the heads of your customers plenty of the reasons why they should buy and you stand to get an order sooner or later.



From the writer's experience with the retail business I am satisfied that the best time to sell accessories and extra supplies is the moment after the new car has been sold. The new car owner is delighted, or should be, and is in a very favorable mood to receive your suggestions that he provide a set of tire chains, tire irons, grease gun, hydrometer, set of extra bulbs, tools, bumper, spark plugs, jack, clock, seat covers, a can of oil and grease, wheel puller, spare tire, tire cover, fuse plug, mirror, cleaning materials and brushes, and many other articles that will suggest themselves.

Cash Basis

In case you are not doing so, the time is now ripe to put your business on a cash basis. Your gross profit on accessories will average from 20 to 35 per cent. on sales, or 25 to 50 per cent. on cost, which will not provide for bad debts. On a cash basis the banker will lend more money on the strength of your financial statement and because such position will enable you to pay for regular purchases and take advantage of any special opportunities. You will also avoid many unpleasant interviews with your customers in collecting unpaid bills. In order to purchase goods from the right markets and at the right prices, you require cash sales, as open unpaid accounts will not buy new, fresh stock.

It is also imperative that you sell at list prices—no cut prices, discounts or other deductions—such as fitting or installing accessories, no charge. You should know how long it takes and how much it costs to fit or install accessories even though you may not be equipped to do the work yourself. In almost every case the goods are worth the price that has been fixed on them and should not be sold at any other. Once you make a special or cut price on an article it is very hard to re-instate correct prices, and not only is the profit on that special sale lost, but the profit on after sales as well. If prices are cut on certain articles prices must be raised on other articles to cover the loss. Then the buyer of the higher-priced goods is not getting a square deal. Get your price, don't let your customer beat you out of a nickel here and there on the purchase of his motor car supplies. In the long run the dealer profits most who serves this trade the best. All customers should pay the same price and be treated alike. Up-to-date dealers practise the one-price policy and tag each article plainly, showing the price.

That leads me to consider the actions of competitors. If you believe it necessary to sell your goods at cut prices because of competitors' actions, then I recommend the need of trade co-opera-

Silent salesman containing display of motor accessories in Wells Hardware Co., Hamilton, Ont.

tion with your competitors. One of the outstanding lessons of the Great War was the great advantages in organization. For several years past all combines or organizations on the part of manufacturers, wholesalers and retailers were looked up in most cases with suspicion. That was due largely to the fact that a few individuals have brought the name of "associations" into disrepute through the fixing of prices and throttling trade in various ways. To-day most manufacturers, wholesalers and retailers, realize that when they get together the most important or desirable thing is not to fix prices but to eliminate wasteful methods, to compare systems, exchange plans, arrange for road and highway improvements, discuss and spread better trade methods, and incidentally raise by education and conference the status of any "lame duck" or inexperienced dealer, if there is one in your locality. A discussion along the lines of the cost of doing business will in most cases cure the price-cutting habit. Know your cost of doing business, and if your competitor is selling a standard article at a cut price go to him in an open-handed way and show him where he is losing money, and make him a friend. There is no need for competitors to be enemies, and fair competition means co-operation. Through co-operation much antagonism and suspicion can be wiped out by associations giving publicity to the objects of their organizations and the good which they are able to accomplish. I understand that collective price fixing is not only unlawful, but is considered unnecessary by associations. Go at it the other point of view and educate your competitor by showing him how to find the gross profit on the sales of accessories and how to find his cost of doing business. By helping him arrive at the cost of doing business and facing the gross percentage of profit with naked eyes, the incentive to cut prices is wiped out, as the net profit will certainly not permit him to stay in business and sell automobile accessories. An association, either local or provincial, can be of marvellous advantage in introducing many other reforms; when you join, be active, suggest and start something. At one time or other nearly all get caught with an overstock of a line of goods—probably the local market will not absorb the goods, but through the medium of your association very often some other member can use the over-stock and will pay at least the cost price for it. The association should work in this and similar ways.

The necessity of properly displaying accessories is important. Show cases or sloping shelves are necessary. Take advantage of your windows. Window space is the most valuable and nearly always the cheapest advertising that you have.

In conclusion, do not overlook the every-day-of-the-year stability of the accessory business. The average gross profit, the immense possibilities for present and future sales, are worth your time and effort. The sales possibilities of your territory or locality can be visualized by multiplying the number of car owners by a minimum of $60—the average yearly purchases of accessories per car owner, and this figure would not include tires nor gasoline.

Observe, study and practice the methods of some of your successful neighbors who are retail merchants in other lines and you can be reasonably certain of making money and building a good business in the line of automotive equipment.

Item in "Hardware and Metal" Brings Letter From South Africa

A STRIKING illustration of how closely even small items in HARDWARE AND METAL are read, and of how widely distributed throughout the world are its readers, was disclosed this week when George A. Marshall, proprietor of the Perfection Sanitary Brush Co., Toronto, received a letter from Johannesburg, South Africa. This was written by George Robertson, manager and buyer for the firm of Stuttaford & Co., who have a nine-storey department store. Mr. Marshall met Mr. Robertson while in England in 1914 shortly before the outbreak of the war. He had not heard from him since until this week. In his letter, Mr. Robertson says that in reading one of the November numbers of HARDWARE AND METAL he noticed among the personal items in the Montreal news column that Mr. Marshall was in that city on business. He at once remembered him as the man he had met in England five years before, and wrote to ask how he was getting along, and also stated that he was keenly interested in Canadian products, and that if Mr. Marshall would care to send him a price list he might do some business. Mr. Robertson some years ago was in Canada and was employed in the store of the Vokes Hardware Co., Toronto. This was long before Mr. Marshall met him. He states in his letter that he tried to join the army in England but on account of his health was unable to do so and went to South Africa.

Stove Manufacturers Optimistic

See Big Selling Year Ahead For Dealers Who Go After Business Aggressively—No Reduction in Prices Likely, They Say, While Present High Wages Are in Effect

STOVE manufacturers of Hamilton are optimistic regarding the prospects for business in 1919. There will be more business to be had in Canada than ever, they say, and it is a question of going after it. The retailer who goes after the stove trade aggressively will make good, they say.

"I am looking for a shifting to some extent of trade this year," said Mr. Robinson, of the D. Moore Company, Limited. "It seems to me that there is likely to be a falling off in the trade in the cities and an expansion of buying in the rural districts. The farmers are the people who have the money to-day. They are the people who are making the money, and they will be a big buying force."

No Price Reduction

Mr. Robinson said that he did not see where there was any possibility of stove manufacturers reducing their prices.

"Even allowing for a small reduction in the cost of raw materials," he said, "there is no chance of prices coming down as production costs will be more than offset by increased wages. The raw material in a stove is comparatively a very small item. Labor is the big cost and runs as high as seventy-five per cent. in many cases.

Lots of Business

"We are optimistic regarding the business outlook. There is going to be a lot of good business. What a dealer does depends largely upon his attitude of mind. The dealer must have faith in himself and in his community. That means faith in his country, too. If he gets pessimistic, he blocks trade, and this becomes the forerunner of bad times created by the dealer himself. Production will be about the same as usual. There is a tendency just now for the retailers to let the manufacturers carry the stock. This is a condition the dealer wants to weigh carefully in sizing up business, or by autumn, when he needs the stoves, he may find he is losing business. The dealer should always bear in mind that the mail order house never lets its stock get low. The dealer who has the stock is the one who gets the business. It is a poor plan to have people coming in and wanting to see goods and talk about buying them, and then not having any goods to either show them or sell them.

The Price Question

There has been no unwarranted advances of any kind in stove prices, stated Mr. Robinson. As a matter of fact, the stove manufacturers have not advanced prices anything like they have been advanced in many other lines. The prices that are prevailing to-day are not high. As far as manufacturing conditions are concerned, it is just as hard to obtain skilled help in Hamilton as ever before. There has been no reduction in wages and the molders are making good pay. General operating expenses are in no way decreased, and manufacturers will not, as far as I can see, have any opportunity of reducing prices."

Mr. Robinson pointed out also that there has been five years of holding back in stove buying. On account of the war needs and the calls for conservation, people had fixed up their old stoves and got along with them as best they could. Any number of these people are now prospects of the best kind for new business, and a great many of them will be purchasers.

Another Viewpoint

J. S. Fraser, of the Hamilton Stove and Heater Company, thinks the retailers in the great majority of cases are not going after the stove sales in the way best calculated to bring results. Perhaps twenty per cent. of the retailers handling stoves, he says, might be called good stove salesmen. The other eighty per cent. do not make the most of the talking points of the goods they are handling. Mr. Fraser says this is largely because they do not know the selling points of the stoves, do not take any trouble to find out about them, or to

Current Events in Photograph

The photo shows Princess Pat pinning a laurel wreath to the colors of the Princess Patricia's Canadian Light Infantry, emblematic of victory and of work well done. Of the original Princess Pats' battalion there are only seven survivors left.

give any real selling service to their customers.

Give Instruction

"I am going to bring up the matter of instructing retailers in stove salesmanship," he stated to HARDWARE AND METAL. "I think it would pay the stove manufacturers to pool the expense of having a real stove salesman go all over the Dominion and show some of the retailers how they can increase their sales by going after the business in the right way. A whole lot of retailers do not keep their stock in good shape to start with. They do not try to find out what the prospective buyer wants or what is best suited to his needs. They simply have a stove to sell and say: "Well, this is a pretty nice looking stove and will give you good results." That is about as far as their sales talk goes. I know of a case out West where a man had twenty-two stoves stocked, and said he could not sell them. A stove salesman said he would come up for a day or two and see what he could do to help him.

Put On Demonstration

"The first thing he did was to get the dealer to advertise that he was going to hold a demonstration of the stoves. This was done, and the salesman stayed right through and not only sold the twenty-two stoves, but took orders for six others. This shows what can be done by intelligently directed efforts."

Mr. Fraser also pointed out that business may reasonably be expected in new stoves, because so many people have been repairing their old ones since the war.

"The live stove dealer," he said, "will have no difficulty in persuading these people to buy new ones. In many cases he will be doing them a real service by replacing their old stoves with new ones which will consume less fuel and give better results."

Another Big Field

"The huge building program," he said, "also opens up unlimited opportunities for the dealer. In all parts of Canada there is a shortage of homes, especially of workingmen's homes. There will be thousands of homes built from now on and in a very large percentage of these stoves will be required. There is a big chance here for dealers."

Discussing export prospects, Mr. Fraser said he was expecting a lot of good export business, especially from South Africa. His firm has an exhibit at the Lyons fair also, and is going after export business in France, England, and other countries. While paying its share of the fund subscribed by the stove manufacturers to send a representative to Europe to go after export business, the Hamilton Stove and Heater Co. also has its own men looking after its interests.

Favors Standardizing

While considerable has been done toward standardizing stoves, Mr. Fraser believes that there is still more to do and that it can be done with beneficial results to the whole stove industry.

As far as prices are concerned, he said that he does not look for any reduction for some time. The slightly lowered cost of materials would not make any appreciable difference from the manufacturers' standpoint, as the big item in connection with stove production is wages. The molders and other workers are receiving high pay and are demanding a still higher schedule. Another factor that will have an influence on the prices of stoves in the future will be the prices decided upon for iron and steel at the meeting of the big steel men to be held in the United States shortly.

The Tariff Question

"I believe there will be a tariff reduction," said W. H. Monk, secretary-treasurer of the Burrow, Stewart and Milne Company, to HARDWARE AND METAL. "If that comes it will mean a period of hard times. The United States built up its industries by a high protective tariff, and now because of their growth and their wonderful country they want to expand their markets. Western Canada has been a dumping ground for a lot of American stoves, the manufacturers selling at the lowest prices in order to keep up their production. They have a short haul to Winnipeg, whereas the Ontario manufacturers have a long haul. If the tariff is reduced there is only one way to make up the revenue that will be required and that will be to impose a heavy land tax. That will hit the Westerners a good deal harder than the present tariff schedule hits them."

Sees Good Business

Mr. Monk says there is every prospect for a splendid stove business this year. In the last two or three weeks business has improved steadily, and there is every indication that it will continue to pick up.

As far as prices are concerned he sees no prospects of any change unless they are increased. The steadily increasing cost of production, especially the higher wages demanded by the men, may necessitate an advance in stove prices.

As conditions are now, he said, the manufacturers are carrying the stock. In the meantime, however, they are going ahead with their usual production and are preparing for a good business.

EASTERN CANADA STOVE MANUFACTURER OPTIMISTIC

H. G. Jackson, manager of Record Foundry Company, Ltd., Moncton, N.B., was a recent visitor at Toronto office of HARDWARE AND METAL. Mr. Jackson is quite optimistic regarding the future outlook for the stove industry in Canada. He is of the opinion that prices will be maintained, as manufacturers have stocks on hand which were bought at high levels and although slight declines may occur in the prices of some raw materials, Mr. Jackson states that labor is one of the biggest items and represents at least 60 per cent. of the cost of a stove. Mr. Jackson is of the opinion that there is a possibility of further advances in the cost of labor and he states that in his opinion stove manufacturers would be justified in making an advance in price at the present time. The business of the company in the Maritime Provinces has been exceptionally good and last year it showed an increase of 62 per cent. Mr. Jackson emphasized the fact that the Maritime Provinces are not subject to fluctuation to the same extent as the other provinces and therefore business has continued good, with a good outlook for the future. Buyers are in some cases still holding off. Mr. Jackson is of the opinion that by holding off too long a buyer is liable to lose more through not having the goods in stock than he can possibly save through any slight decrease in price, and especially as there is no possibility in Mr. Jackson's opinion of a decline in the immediate future in the price of stoves. Mr. Jackson emphasized the importance at this time of manufacturers and their employees getting together and stated that there is a move in this direction in Moncton and that employers and employees have met together to discuss mutual problems.

NORTH BATTLEFORD, SASK., ADOPTS EARLY CLOSING

North Battleford, Sask., retailers have ratified the early closing plan. They also favored a weekly half holiday for a period of four months commencing with May. Wednesday afternoon will be the half holiday. Early closing will include each day of the week but Saturday, all stores closing at 7 p.m. daily except Saturday, and drug stores at 8 p.m. Officers of the North Battleford Retail Association for the ensuing year were elected as follows: President, H. R. Bowers; secretary, F. P. Nelson; treasurer, F. Frawley; first vice-president, A. J. McCormick; second vice-president, R. J. McClinton; executive, R. S. Cruickshanks, A. F. Macdonald, F. Sallows, O. Johnston and W. G. Watson.

JOHN DIAMOND CALLED BY DEATH

John Diamond, founder and directing head of John Diamond & Sons, manufacturers of ink, bluing, stove polish, etc., of North Third Street, Philadelphia, passed away at his home in that city on Feb. 7. Mr. Diamond was born in Glasgow, 67 years ago. He came to Philadelphia when a youth, and has been engaged in the manufacture of blackings and similar lines almost all his life. His loss will be deeply felt by the trade. The business will be continued by his two sons and surviving partners, Edmund A. Diamond and Frank P. Diamond.

Big Demand for Auto Accessories

Impossibility of Securing Early Delivery of New Cars Opens Big Opportunities For the Dealer in Auto Supplies—Open Winter Has Been Turned to Advantage by Many Hardware Men to Boost Sales

AUTOMOBILE manufacturers are facing a peculiar situation. With orders pouring into the factories from all parts of the country they are unable to get the materials to meet anything like the demand. Any one who gets a new car early this season will be lucky, they say.

"Last year this time we were in a position to give our dealers fifty cars each if they needed them," said the Toronto manager of a large auto concern to HARDWARE AND METAL. "This season we will not be able to give them four. There is any amount of business in sight but apparently not the slightest possibility of being able to make even reasonably early deliveries. To start with we cannot get the materials and we were held up in getting started. When the Government took over our big factory and everything was put on a war basis, the Government sent an officer to take an inventory of everything. When the war ended and we wanted to go back to normal business we were held up just seven weeks before the Government could send a man to take the necessary inventory. A big plant cannot be switched from a war basis to a peace basis over night. So there was a delay there again. Then we were unable to get anything like the quantity of materials we needed. All this means delay. We will make the cars eventually but there is no telling when we will make deliveries."

This ad. of the Cowan Co. offers valuable suggestions for hardware dealers in arranging their own copy. Note the attractive use that is made of illustrations also the well balanced arrangement and the fact that prices of everything are given.

A Big Opportunity

This is more or less true of conditions in all the big plants. However while it means great delays for the auto dealers it opens up some splendid chances for the hardwaremen who are handling auto accessories. Thousands of people who had planned to buy new cars will simply have to make their old ones do for an indefinite period. This means new accessories of all kinds and there is every indication that accessory sales this season will be very large. The volume of sales has been increased also by the open winter which enabled many car owners to keep their machines in operation throughout the months when they are usually locked up.

Given any kind of a chance the car owner will drive whenever possible. He has had the chance this season and has taken advantage of it. This has meant a lot of fixing up of cars also and the sale of a lot of accessories that make for comfortable driving in cold weather.

Report Big Sales

Hardware men who are handling auto accessories report excellent sales. They have taken full advantage of the open winter to dispose of robes, foot warmers, heaters, and similar lines and as a result of the recent fine weather have turned their attention to boosting auto finishes and paints with excellent results, they state.

Going after the business is the surest way to get it and the man who gets busy earliest is naturally the one who is going to get returns first. There is no more effective way of increasing sales in the accessory department than to bring the lines you have to offer before the public by attractive advertising.

How They Do It

The illustrations of advertising copy used by hardware firms to boost sales in their auto accessory department are reproduced with this article and offer valuable suggestions which any dealer may turn to excellent account in arranging his own copy.

It will be noticed that both firms use the most prominent type in their announcements to let the public know that "auto accessories" and "automobile supplies" are to be had at the stores mentioned. There is not any guess work about this plan of advertising. The whole idea is that the first impression gained will remain and that every time the car owner wants any auto supplies of any kind he will just naturally associate "auto supplies" and the firm.

Get Excellent Results

"We always get excellent results from our advertising matter," said T. Jones, manager of the Cowan Hardware Co., London, Ont., to HARDWARE AND METAL. "Our auto accessory business has been showing a steady increase each season and this is directly traceable to the advertising we do and the fact that we carry the stock to give car owners service. We back our newspaper advertising by good window displays."

The results obtained by the Ashdown Company were fully outlined in an article in a recent issue of HARDWARE AND METAL. This year the firm is looking forward to a bigger business than ever.

Advertising copy of this kind has produced most satisfactory results. Note the impression of service and where to get it that is conveyed throughout the whole copy, right to the very last line.

Use Good Illustrations

In connection with the advertisements

Poultry Supplies Offer Opportunities

Returned Soldiers Going Into the Raising of Poultry as Light Work During the Process of Re-establishing Themselves Into Canada's Civil Life

THE past few years, when greater production was the "war cry," has seen great strides in the raising of poultry; not alone from the standpoint of quantity, but method in handling to get the most out of the business. Even amateur or backyard poultry men (and women) have studied the more scientific methods of handling fowl, studied the best producing breeds and the best way to keep them healthy and producing both meat and eggs.

One of the chief essentials in poultry raising is to keep fowl properly housed and protected against animals; this perhaps applies especially in country districts. Too often the farmer allows his fowl free range, with the result that many a bird is lost and many dozens of eggs are unaccounted for. The saving of time which may be the result of caring for or rather neglecting his poultry stock in this way does not overcome the actual loss resulting from allowing his birds to wander at will over the farm.

The hardware dealer can do much to educate the farmer and amateur poultry man in the proper care of fowl—proper coops, yards, supplies, etc.

In the first place you are perhaps the first man the would-be poultry fancier gets in touch with, for among the first things he does is to buy poultry netting either for the constructing of his pens or enclosing his runway, or both.

Know What is Needed

By knowing the needs of the properly-equipped poultry yard and pen and keeping such lines as are necessary in stock you can give your customer the right start. Besides selling him his requirements you should get the opinion of some good poultry men in your districts regarding the care of chicks, etc., so that you can give the beginner real sound advice. It will work out to your benefit as well as give a patriotic service to your community.

Two designs of poultry houses, fixtures, fittings, etc., are here illustrated which may be of interest to a customer and which may help him in his effort to get good results.

Many a returned soldier is finding that poultry raising is giving him pleasant, light, and profitable employment during the period of recuperation after his return from overseas. Some are doing this as a business while others are adopting this means of fitting back into civilian life gradually. These are the men you should try to assist all you can. You should first know what they will need, then carry a stock, and lastly, sell it by encouraging this producing business.

How to Show Netting

Rolls of poultry netting are, to say the least, awkward things to display. They take considerable room on your floor, especially if you carry all widths and styles.

A most unique but simple method for showing poultry netting was seen in a hardware store in Toronto. It was a real silent salesman which helped the customer to select the style and width he required quite easily.

A piece of six-foot netting was wound around a post in the centre of the store. Under the netting was a piece of green goods which formed a background to make the wire stand out stronger. Over the green background, before the netting was applied, was a series of white lines formed with tape, showing various widths of netting, ranging from 12 inches up to 6 feet, and each width was labelled with the size and price of the netting shown.

Accompanying this were a number of panels about a foot square showing all the styles carried in stock. Each panel was bound with tin which made handling easy and prevented scratching of the hands. Each panel bore the sizes in stock and the price per foot.

The advantage of showing the samples like this was that the customer could easily pick the proper width of netting and the style required. The idea can be worked out in another way. Instead of a post being used, a six-foot panel could be made and covered, giving the same effect as the post.

Spring is Chick Time

With spring comes the baby chick. This is probably the most difficult period for the chicken fancier, for so many difficulties arise in raising the little downy birds. Good, sound advice is needed now to assure proper feeding and proper attention.

You may find it advisable to stock incubators, brooders, hovers, etc. Now is the time they should sell. Keep a stock of drinking fountains, feed dishes, dry mash hoppers, etc. on hand. Show them in your windows. Keep them on display inside the store. Let the poultry fancier know you can supply him. This is a big and growing industry—treat it in a big way—encourage it and you will be one to benefit.

Denbigh and Dickinson have leased premises at Victoria, B.C., and plan to manufacture the Ellsworth Triple Oil and Gas Burner, for which they have obtained the Canadian rights.

Confined flocks are advocated by men who study the poultry business. This means sales of poultry fencing and many other supplies.

Discourage farmer customers from allowing their flocks the free range of the farm. The loss does not compensate them for the saving in labor and feed.

Building Figures Do Not Lie

Twelve Hundred Per Cent. More Building Permits Taken Out in Toronto the First Two Months of This Year Than Last—25 to 33% More Business Done in Building Materials by Local Hardware Stores—Outlook For Big Business

ONLY a month or so ago HARDWARE AND METAL was bombarded with reports from various sources to the effect that the building trade of 1919 was only a myth and that though a great many building permits were being taken out there was no sign of activity as far as the actual building was concerned—the outlook was indeed anything but rosy if the reports which came in were a criterion of the actual conditions.

Some, in fact nearly all, claimed that builders would not build while prices of materials were so high, and especially when there was a downward tendency. To-day the tables have turned and pessimists are turning out to be most optimistic and are talking the biggest building year since the outbreak of the war.

Sixteen Permits in "Eighteen"

The statistics at the City Hall tell a most wonderful story—a story that is almost unbelievable. During the first two months of 1918 there were only sixteen permits taken out in the City Architect's office for building of dwellings in the city of Toronto—three for solid brick and thirteen for cheaper houses, the total cost of these houses being estimated at $37,200. Notice the percentage of better class houses compared with the poorer type. This would indicate that the building was not done by the so-called moneyed class as the houses were of the laboring man's type. Compare the above figures with the following:

Hundred and Ninety-Two in "Nineteen"

From the same source comes the information that the statistics for the first two months of 1919 show that there were permits taken out with an estimated total cost of $901,560; of this amount $391,750 was for solid brick dwellings, $35,500 for brick and roughcast, and $5,100 for frame, representing a total of one hundred and ninety-two houses compared with sixteen in 1918, an increase of 1,100 per cent. in number of houses, or 1,068 per cent. in dollars and cents. And there is every indication that the bulk of these permits will be used within the time limit of six months. Few builders would go to the expense of having plans prepared and permits taken out unless they anticipate taking action, especially when there is a great shortage of houses.

Evidence that the building permits are being used is in the fact that hardwaremen specializing in builders' supplies claim an increase of business in this department of from 25 to 33 per cent. over last year for the same period —January and February.

Excavators Loaded With Work

Geo. Mathewson, 734 Queen St. East, Toronto, whose store is situated in the Riverdale district, and who caters to the building supply trade of the east end of the city, says that his builders' supply trade so far this year shows an increase over 1918 of 33 per cent., and that there is every indication that this spring and summer will make a record-breaking year for building materials of all kinds. His business has increased enough to warrant him building an addition to his store to provide a show-room for building supplies alone.

Mr. Mathewson says that while there are a great number of residences going up in his district there are on one street alone, Danforth Avenue, over eighty stores being built and planned on for the coming summer. He says that one excavating contractor who uses a steam shovel is already booked up for the year and is refusing to take any more orders.

Returned Soldiers Building

Mr. Mathewson states that he knows of several cases in his district where returned soldiers are building homes and that families who during the war "doubled up" to cut down expenses, were now going into their own homes. This means a demand for more houses, and has contributed to the great shortage of accommodation in the city of Toronto as well as in other centres. In conclusion Mr. Mathewson stated that "Any man who cannot see big business ahead this summer is blind."

HARDWARE AND METAL, in searching for evidence that the building permit figures of the City Hall did not belie the real conditions, called on several leading hardwaremen in the down-town district as well as the surburban, and the same story was told everywhere—big increase in building supply business.

The Bulls and the Bears

Oliver Vokes, of the Vokes Hardware Co., Toronto, when asked how he found conditions in the building trade, stated that they reminded him of the stock market. There were the bulls and the bears. The bears were the builders who were waiting for a drop in price of building material before they would commence to build, while the bulls represented the broad-minded fellows who could see that the main element which entered into the building of a home—labor—could not drop materially, and that to wait for supplies to drop was short-sightedness when houses were in such demand and with rents at the high mark. Mr. Vokes stated that their building supply department showed an increase of approximately 25 per cent. during the first two months of the year and that he could see a real building revival which, though big, could hardly be termed a "boom." One reason, Mr. Vokes stated, for the building revival this year is the fact that one of the main materials, brick, must come down in price as its manufacture does not represent the employment of very skilled labor and its raw material is not scarce. There are at least a dozen brick firms which were closed during the war who are beginning operations again this spring.

Mr. Vokes states that 1919 business is infinitely better in building lines than the same months have shown for the past four years.

This opinion was gleaned also from an interview with the manager of another large hardware retail store in the down-town district. He also stated that their business showed a 25 per cent. increase in building materials over any year since 1914, and that the prospects for a big year were very bright.

Conditions outlined here, as applying to Toronto, are by no means confined to this city. From all centres, large and small, come reports of renewed activity in building, and it is up to the hardware man to get in on the ground floor and lend his encouragement to this present movement. The year is going to be a big one—get right in back of the movement towards better things now and put it across in a big way. It is up to everyone individually to help now—do your bit and make 1919 a hummer.

BIG DEMAND FOR AUTO ACCESSORIES

Continued from page 175

of both firms hardware dealers should note the extent to which illustrations are used. This is in line with the general advertising policy of both the Cowan Company and the Ashdown Hardware Co., Ltd. In all their advertising copy free use of illustrations is made and the results have been most satisfactory.

Discussing the prospects in the auto business for the coming season this week with HARDWARE AND METAL, Manager Fox of the Toronto branch of the Ford Motor Co. of Canada stated that he had recently returned from New York.

"I know just how we are fixed in regard to making deliveries early," he said, "and just to find out how the other companies are getting along I went into the branches of a number of companies in New York. They did not know who I was and without exception when I mentioned the matter of wanting cars delivered early they declared they could not do it as they cannot get the machines from the factories. That is the general situation. Thousands of people who have cars and want new ones will just have to get along with the old ones until the factories can get back on a normal producing basis again."

Don't Overlook Selling End in Buying

If You Starve Your Stock You Starve Your Business — Keeping Stock Complete Enables Sales to Be Made—Getting Back to Basis of Confidence— Develop Opportunities For Business

PERHAPS the average retailer to-day, and not only the retailer, but as a matter of fact many wholesalers, consider the price question in relation to the goods that they are handling, as of vital importance in their operations during the present year. There is no getting away from the fact that the man who buys well, securing the best merchandise at the lowest possible prices is the one who stands to gain when he turns from the buying end and devotes his energies to selling.

Consider Buying and Selling End

There is just one point to bear in mind, however, and the same was brought home forcibly to one of the representatives of HARDWARE AND METAL on a recent editorial trip to a very good sized town east of Toronto. On the occasion of this visit, one retailer had received a very large shipment of enamelware, tinware and kindred lines. The question was asked of the retailer, "Aren't you afraid to buy goods at the present time?" The attitude this man took is one which all buyers might well look at and see whether they are considering the selling end of their business as they should. Whether it is a retail establishment run by the boss and one clerk, or whether it is a large wholesale establishment with a president and big selling and other forces, there are the two ends of the business to be considered always, namely, the buying and the selling. A buyer may feel that by waiting a month or two months, he will be able to buy a certain line of goods at a saving of 5 or 10 per cent. over the prices prevailing to-day. Looking at it, however, from the selling standpoint, is there not a possibility that the loss of sales during the intervening month or two months will more than offset the saving in buying which will be effected some time hence?

Starve Stock, Starve Business

The retailer above referred to stated to HARDWARE AND METAL in no uncertain terms: "If I starve my stock, I starve my business." There in the one sentence is the buyer's end of the game and also the salesmen's end of the game as well; these two must be worked out together. As far as can be learned, the average manufacturer, wholesaler, or even retailer does not seem to be urging buying in overly large quantities. However, to each individual factor in the merchandising game, it is essential to the welfare of them all that stocks be maintained on a good basis, and that each one is in a position to take care of orders which may be handed to them.

Building Activity Promises Well

From inquiries which have been made in many of the cities and towns throughout Canada, HARDWARE AND METAL has learned that a great deal of building is under contemplation. There seems to be no getting away from this fact. Inquiries to-day are very numerous and it looks very much as though in another month's time, activity in the building trades will be very noticeable.

This brings one around again to the point where the question of the price of goods is involved. It seems true from investigations which have been made, that there are a great number of large works being held up because the factors interested feel that prices on their present basis are too high. These interests look for steel and iron to lead the way towards lower prices, and it looks very much as though the meetings which are being held between Government officials and United States steel interests now will result in a further lowering of the prices on basic materials with a similar movement soon to be reflected in the manufactured articles, of which steel or iron form a part. It seems quite reasonable to believe in and all indications point to the awarding of actual contracts, once an announcement is made of a reduction in the price of these basic materials.

Getting Back to Basis of Confidence

It does not seem as though the average individual expects a return absolutely to the prices which prevailed prior to the war. However, there is a feeling that prices have been unduly inflated during the war period, and once public opinion is turned around to the point where they have confidence in the prices being asked, even though they may be fairly high, they are going to be ready to spend money. There is the hope in the present situation, as HARDWARE AND METAL sees it, and it will be the aim of this paper to maintain in its service first hand information as to what may be expected to develop in regard to prices.

Steel and Iron Lead in Price Revisions

Reviewing the situation in regard to prices as it exists or has existed since the first of January of this year, it will be seen that many lines have undergone revisions downwards. It may also be said that the majority of the lines, that is the really important and big items, can be covered under the general classification of steel or iron goods.

Iron and steel bars including common bar iron, refined iron, mild steel, sleigh shoe steel, tire steel and kindred lines have dropped in price. Other lines include genuine wrought iron pipe and wrought steel pipe, annealed wire and bale ties. Wire nails, and cut nails along with black steel sheets, galvanized steel sheets and steel plates have also been revised downwards.

Sheets Show Substantial Drop

Perhaps the greatest change made so far has been in black steel sheets and galvanized steel sheets. On August,1918, black steel sheets, 10 gauge, were selling at a Government fixed price of $10.00 per 100 pounds. On January 1, 1919, a decline of $2.50 had been made, making the price $7.50. Since that date a further decline of $2.00 has been recorded, bringing the price to-day down to $5.50. The fluctuations in galvanized steel sheets are not unlike the ones above. Galvanized steel sheets, 28 gauge, on August 1, 1918, were quoted at $9.20 per 100 pounds. By November 9, two days before the signing of the armistice, a price of $11.70 had been reached. January 1 of the present year saw a reduction of $2.70 to a $9.00 base for this gauge. Since that date a further decline has been recorded and the price to-day is $7.95.

In the case of the black steel sheets, the total decline was $4.50 since August, 1918, or as a matter of fact since the signing of the armistice. It is not reasonable to assume that another $4.50 will be lopped off to-day's prices. However, it does seem likely that a further slight reduction may be made, and when same has been taken into account, the buyer will feel more like going into the market for his supplies and the salesman will solicit business on a very keen basis, feeling that he can with reasonable confidence get his customer to purchase goods without having the feet cut out from under him very shortly afterwards by further substantial declines.

Develop Opportunities for Business

There seems to be abundant opportunities for business awaiting the aggressive hardware merchants. In lending support to any housing schemes which may be started in your own community, in giving the benefit of your experience in the selection of the hardware required and by urging that builders get started at as early a date as possible, the merchants will be sure to reap the benefit. Practically every department of the retail hardware merchant's store will show some reflection from any extensive building operations which are undertaken. Not only builders' hardware, carpenters' tools and paint will be sold but there will be a new tenant go into the new house, who will want the latest household equipment embracing washing machines, electrical household needs, enamelware and tinware and various other lines of goods. The hardwareman's opportunities for selling goods for a house do not end when he sells the paint or varnish for the finishing touches. This is a point which might be borne in mind with profit the retailer.

Outlook For Turpentine Somewhat Uncertain

Restrictions to be Lifted and Lateness of Crop Strengthening Factors—Litle Change in Prices in Four Months—Market Hard to Determine

WHEN the armistice was signed over four months ago the opinion was very strongly held that prices of turpentine would immediately soar. As a matter of fact they did soar locally about 18 cents per gallon following a similar movement at primary points in the South. The reason which was assigned for this, and which it was thought would carry prices to higher levels, was the fact that Great Britain and other European countries were looked upon as big factors from the buying standpoint. That they may, in time, be big factors in the market is quite true, but as yet there has been no export to amount to anything and just when shipping will be available in sufficient tonnage to make any appreciable difference in the market situation is still an uncertainty.

Restrictions to Be Lifted

The latest reports from London, England, show that Government restrictions on the importation of turpentine will be entirely lifted at the end of the month. Restrictions on rosins will be lifted about the end of April. These factors have resulted in a slightly firmer undertone to the market on both these products, but there has been no move on the part of the factors holding stocks to boost prices to any great extent.

Firming Tendencies Exist

Under normal conditions there are undoubtedly enough elements in the situation to-day to provide for a stronger market. These are the lifting of the restrictions on imports as mentioned above, along with the fact that in the South the 1919 turpentine crop should now be well under way of harvesting, but, owing to excessive rains, is being kept back and curtailing production. Under normal weather conditions the work of the producing interests would be well under way by this time and it might be said that even various estimates as what the crop would be would be hazarded. Just how accurate these guesses usually are at this time of year is not a factor except in as far as it can be mentioned that there are no tendencies shown by interests to-day to try to figure out what production for the present season will be.

Little Change in Prices

However, if one compares prices which were ruling on November 9, which was two days before the signing of the armistice, and on March 15 of the present year, it will be seen that there is very little change. The prices on this latter date were one cent per gallon higher than those prevailing on November 9, 1918. For 3 or 4 weeks following the signing of the armistice, there was quite a considerable amount of excitement in the market, November 16 showing a price locally at $1.10 per gallon, November 23 showing a price of $1.20, November 30, a price of $1.15, December 7 a price of $1.15, December 14, a price of $1.07, and from then until January 18 there was no change. On the latter date a higher price was shown again, $1.10 being asked, and this price ruled until the week of February 15, when a decline to $1.05 was recorded. Since that prices have declined a couple of cents more, and just what the future may hold is a little bit uncertain.

Market Hard to Determine

The market in the South, which really governs the situation locally, has advanced in the last week, and whether this movement will continue is dependent on the amount which may move overseas, and the progress which will be made with the production of the new crop. There seems every reason to believe that if there are big shipments moved to Great Britain, the market will, at least, maintain its present basis, and perhaps go slightly higher. Along with this situation, of course, must be considered the new crop and the adverse weather conditions are tending to strengthen the situation from that angle. However, it is usually the case that at this time of year prices sag a little bit. It does not look as though there will be any very heavy advance made, and prices may even decline slightly. Present indications do not point to a very extreme movement either way in the price of turpentine for the next month.

Linseed Oil Situation Shows Strength

Argentine Crop a Big Factor in Outlook — Seed Available Hard to Figure—The Trend of Prices—Market Sensitive to Demand

"COULD we only know for about three hours in advance what the market on flaxseed was going to do, it would only take about three months for us to become independently rich." This was the statement made to HARDWARE AND METAL by one of the leading crushers in Canada when asked for his opinion on what the future of linseed oil might be. That seems to be the opinion generally held by the largest factors in the trade, and those most closely associated with it. There seems to be nothing so uncertain as flaxseed at the present time. During the war period it was quite reasonable to assume that whereas prices might decline slightly one day, the loss would be recovered and perhaps a further advance made the next day. However, that is not the situation to-day.

Argentine Situation Big Factor

There are many elements entering into the market, which must be considered in the light of how the trend of prices will go. Perhaps one of the biggest factors which must be considered is the Argentine crop. This flaxseed is very often a dominating influence in the prices of the grain in the United States markets, but this year owing to lack of shipping space and the fact that the boats which are in that service are not available, owing to strikes of workers, Argentine seed has not yet been a factor to bring about any revision in prices to lower levels. Indications are that there have been some small shipments come through, but as noted above these must be represented by sufficient volume to prove of particular influence in a country which uses millions of bushels.

PRICES RULING ON LINSEED OIL FOR PAST FOUR MONTHS

Volume Seed Hard to Figure

In Canada there are varying estimates as to the amount of the crop which was harvested last Fall. However, as far as can be learned, there was nothing very abnormal about it, but this cannot be actually determined upon until towards the end of the crop season, when the seed which is held in farmers' hands comes from under cover and is marketed. It is a pretty hard proposition to tell just what amount of seed may be held in the hands of the farmer. It is this uncertain factor which tends to surround all the movements of the grain market with rather a speculative atmosphere. However the market in Canada is maintaining a very fair amount of strength.

There are many elements contributing to this, the Argentine situation, as outlined above, being undoubtedly a factor in its relation to the United States markets, the situation here showing a reflection of conditions which may exist in

Present Questions to Government

Executive of Dominion Board of R.M.A. in Convention at Ottawa Discuss Many Important Questions and Urge Legislation

Reported by Resident Representative.

THE Dominion executive of the Retail Merchants' Association has been in session at Ottawa this week. The following were in attendance: Horace Chevrier, W. G. Devlin, C. W. Rannard, J. A. Banfield, Winnipeg; J. G. Watson, A. Daniel, J. S. A. Filion, L. M. Cornellier, Montreal; W. C. Miller, D. W. Clark, Toronto; A. A. McIntyre, John H. Vaughan, St. John, N.B.; W. J. Hopgood, J. C. Doyle, Halifax; B. W. Ziemann, Preston; C. H. Burtt, Fredericton, N.B.; J. J. Polson, Regina; E. J. Turcotte, East Broughton; Henry Watters, E. M. Trowern, Ottawa.

The delegates were welcomed by E. R. Fisher, S. McClenaghan and Henry Watters, of the Ottawa branch of the association, the speeches of welcome being replied to by B. W. Ziemann and J. G. Watson. The whole day, until 8.30 at night, was spent in discussion of the matters to be laid before the members of the Dominion Cabinet and members of the House of Commons and Senate.

The meeting with the members of the House and Senate took place at the Chateau Laurier on Tuesday, and was well attended by those representatives particularly interested in retail trade. Mr. Horace Chevrier of Winnipeg occupied the chair and presented the whole programme for the consideration of those present in a most admirable manner.

He dealt at length with the Bankruptcy Act. He said the retailers did not think there was any need for such an Act. It is being asked for by the Credit Men's Association. The retailers did not think an Act could be made that would not cost more to the commercial and financial interests in Canada than it would save, in the way of expenses as well as stability in trade. Owing to the way it was originally drafted, it was more like an addition to the criminal code than an Act to help trade and credit. Even today, after many amendments, it bids fair to be fruitful of litigation and waste of estates.

It is necessary for a small proportion of traders, but the only object of a Bankruptcy Act is to free of all bonds the man who has given to his creditors all he has in the world. Unless there are important changes in the draft of the Act from last session, that principle is lost sight of. If those powers which are asking for the Act are strong enough to hypnotize Parliament and to obtain the consecration of the principle of the Bankruptcy Act in spite of the fact that it is absolutely unnecessary from our point of view, then certain safeguards would have to be imposed.

He said there had been a Bankruptcy Act in Canada years ago which worked hardships to the public, and the whole credit structure of Canada was placed in a bad position. There is no evidence that the credit men and bankers were any more angelic than they used to be, and if this proposed Act is not carefully looked after we may see the same thing repeated.

"Do you think," interposed Senator McSweeny, "that we need one at all? We should much prefer that there be no Act passed."

In the matter of the proposed legislation requiring merchants to keep books, the Association agreed that this was necessary, but care shoud be taken to see that it was not made excessive. The proportion of men in business who go in with the deliberate intention of swindling was very small and should not govern in the matter.

On the False Advertising Act, it was pointed out to the meeting that up to the present the law could not catch the man who systematically allowed his advertising to be conducted to the detriment of the trade and the public. The association was asking amendments to the False Advertising Act to deal with this. The Act was quite severe on the merchant who personally advertised falsely, but did not get at the man who allowed his agent to do so.

The officers for the ensuing year were as follows:

President, J. A. Banfield, Winnipeg.

First vice-president, J. G. Watson, Montreal.

Second vice-president, J. L. S. Hutchinson, Saskatoon.

Third vice-president, F. W. Daniel, St. John, N.B.; fourth vice-president, T. A. Gaetz, Red Deer, Sask.; fifth vice-president, W. J. Hopgood, Halifax, N.S.; sixth vice-president, G. A. Howker, Vancouver; treasurer, Henry Watters, Ottawa; secretary, E. M. Trowern, Ottawa.

Carrying of Parcels and Catalogues by Mail

It was pointed out that only a small portion of this was borne by the parties benefiting, the remainder of the cost had to be borne by the letter service. This allowed the mail-order houses to take away a great deal of trade from those parts of the country where it should be carried on. The country was being drained of its small towns and villages and those centres of society which were so necessary and which retail trade tended to encourage were suffering. The trade which they should get was being taken from them by the mail-order houses. He regretted to say that many who should have a wider outlook were among the greatest encouragers of this business. The clergyman, for example, who should have a wider outlook. The mail-order catalogue was next to the Bible in many homes, where they sat down on Sunday and studied the big catalogues and made out their orders. The whole thing was largely due to the fact that the Government was carrying parcels at less than cost.

Senator Blain asked if it was not a fact that the country merchants themselves were great sinners in this respect, and often bought abroad what they could get at home. He was told that if there were those who did so, they were not members of the Retail Merchants' Association. "Anyway," said Mr. Chevrier, "we ask that you make this impossible on the part of the merchant or any other individual."

Fire Insurance Act

It was pointed out that it was not the retail merchant who was asking for this legislation. An attempt was being made to put through forms of applications containing innumerable questions and to make this signed application a part of the policy. In many cases the questions were impossible to answer. Exception was also taken to the fact that the Act would allow of too many structural changes in buildings being required. The agent of one company would require one thing and another agent would require something else, so that, if, as very often happened, a man had ten or a dozen policies, his building might practically have to be reconstructed. It looked to the association like a well-organized system of black-listing. They objected to the application becoming part of the policy, but if it is so, then the rates should be reduced. If the companies are to take absolutely no risk, they should share part of the premium with us; or, we say, once a policy is issued on this proposed application form it should be absolutely non-contestable after a certain time.

Weights and Measures

The Retail Merchants' Association asked that the fees for inspection under this Act be abolished. If this were done the merchant would invite inspection. It was for the public benefit and should be a public service.

Price Maintenance Legislation

The association was in favor of price maintenance in order that the manufacturer should be able to maintain the quality of his goods. It was pointed out that a catalogue picture could make anything look good, but that did not assure quality, as they knew.

Weight of Contents of Cereal Packages

With this matter was also considered

the weight of the wrapping on hams. While it has usually been possible for the merchant to protect himself in this matter, there is a limit to the distance he can go. They are many who do not realize how much this adds to the cost of the hams. It should be delivered to the merchant at the net price, regardless of the weight of the wrapper. In regard to weight of package contents, this is asked for by the consumer, the complaint being frequent that packages are not equally filled.

Adulteration Act

The association thinks the standard should be set in regard to honey and maple sugar. As to margarine, there was a question in the minds of some as to whether it should be sold at all or not; it was one of the matters on which opinion was divided, but in any event it should be graded. At present it is all sold the same, though there is a great difference in the materials composing the product masquerading under the name. This may be profitable for the manufacturers, but it is hurtful to the country. The consumer should have a chance to know just what the grade is of the material he is buying.

Inland Trade Commission

"Much of the trouble we are giving you gentlemen this morning would be obviated if we had an Inland Trade Commission," observed Mr. Chevrier. "As regards inland trade, we must say that the Department of Trade and Commerce is still only at the beginning. We find it always in the position of being about to be made as useful as possible—but not yet. A commission would stimulate inland trade; it would simplify matters, benefit the public and make the life of those in business better than it has been."

Government Employees and Garnishee Act

With the possible exception of the Bankruptcy Act the matter of garnishee of the wages of Government employees was laid more stress on than any other subject that came up. It was pointed out that with the C. N. R. becoming part of the Government machinery and the law preventing garnishee in civil suits, we had the condition where thousands who were once good pay were now trying to deadhead under the protection granted them. Any man who gets his cheque from the Canadian National Railways—and they are scattered all over Canada—cannot be garnisheed. The laws in the different Provinces vary so much with regard to debtors that it is a fact that in certain Provinces you can not get at a man's goods nor have him up under judgment summons, so with the absence of garnishee you have no recourse at all. We have to recognize that there is a large class which has become known as civil service deadbeats. Probably 95 per cent. or more of them were originally honest, but they are being put in the position of not being easily trustable, so that there is no disposition on the part of dealers any longer to extend credit to civil servants. The only reason for garnishee not being allowed is the inconvenience it might be to the Government, but, as has been the experience where it has been allowed in the case of Provincial Governments, the very fact that the privilege of exemption does not extend to the civil servants has made it very seldom necessary to invoke the Act.

War Stamps on Patent Medicines

This has worked a hardship to the retailer as the Department has had spotters all over the Dominion looking for a chance to catch men, and actually laying traps for them by making pretence of great hurry on the part of the buyer and of his being unable to wait for the stamp or even to have his purchase wrapped up. It has been haste, not dishonesty, which has caused whatever trouble there has been. It has cost the Government over 62 per cent. to collect the revenue. It should be abolished.

War Profit Tax on Luxuries

This also should be abolished. It is hard to say just what luxuries are nowadays, and when you put jewellery in that category any man is prepared to say a watch is a necessity, and the same is true of cuff-links and other articles. Automobiles also were necessities in many cases.

There was such unanimous assent to the suggestion that the purchaser of goods on Sunday should be made equally guilty with the seller that the matter was not considered as requiring further urging.

Daylight Saving

The chairman said he was aware that there was some difference of opinion in regard to this. As he went on to discuss it he was interrupted by some of the legislators present who said the scheme was practically dead so far as Parliament was concerned, and it was unlikely that anything more would be heard of it.

Cost of Living Statistics

It was pointed out that this was now in the Department of Labor and had not been well handled. It was thought it should go to the Department of Trade and Commerce, so there might be a chance of getting dependable figures.

Customs Confiscating Automobiles

Numerous cases of this kind had arisen and worked great hardship. There was a practice of smuggling or distributing liquor in cars, and the cars, when caught, were seized at the border. It was pointed out that in a great many cases the cars were not the property of the nominal owner, being paid for in instalments. Unless it was proved that the real owner had guilty knowledge he should be protected.

Co-operative Societies

All such societies should be carefully examined as they were guilty of deceptive methods. Active steps should be taken by the Retail Merchants' Association to see that the public was more fully informed regarding them. Their method of showing profits, when they did show them, were not fair or legitimate. In this connection the matter of the co-operative efforts of civil servants was brought up, and the fact that they were doing their work to some extent with Government conveniences and in Government time. "You can stop this," the legislators present were told. "They are breaking bulk on their purchases and dividing stuff up in Government time and on Government premises."

The chairman made it plain that the association was not in favor of asking for a tariff commission. They thought the tariff should be changed at once and not left to the slow operations of a commission, but if a commission should be established they wanted to be represented thereon.

A more or less general discussion on the different points brought out then ensued. Senator Blain wished to know something definite regarding the position of the retailers on the matter of the accuracy or inaccuracy of the trade statistics. Secretary Trowern pointed out many inaccuracies. At the time of the postmen's strike last summer statistics were presented stating that there had been an increase of 64 per cent. in the cost of living, which the association claimed was far too high. They asked to be permitted to put expert men in the Labor Department who would conduct an investigation free of cost, but the permission was not granted. Babsons' reports, which are considered a standard, show the postmen's figures to be far too high. Another speaker pointed out that in Moose Jaw figures had been taken for eight items and compared with the reports of the Department of Labor, and the figures of the latter had been shown far too high.

Senator Blain said it was very important from the standpoint of Canada as a country seeking immigration and business, that the figures should be accurate.

Different members and senators spoke and expressed pleasure with the idea of bringing them to the meeting. Many of the arguments presented had impressed them favorably. Garnishee was a hardship and should be abolished. Speaking on co-operation, one of the visitors said he was in favor of the old tried way of selling goods from the manufacturer to the retailer and from him to the consumer—a way which had stood the test and could not be beaten.

In a further discussion on the matter of an Inland Trade Commission, it was pointed out that the object of the association in urging this was to try to control Canadian business for the Canadian manufacturer. We should find out if we are losing trade, and to whom. Why can we not get trade now going to the United States turned into Canadian channels? The matter of men's furnishings was instanced, and it was asked what was the matter with the Canadian manufacturer when he could not control this business. If it was a matter of inferior goods, less attractive packages, or whatever it was, it should be found out. We want the balance of trade to remain in Canada. All the retailers asked was that the Dominion Government should help them to find out those things.

The afternoon meeting of the Dominion Executive of the association was held in camera when there was a discussion on the sixty several resolutions which the executive will discuss with the Cabinet on Wednesday.

THE CLERKS DEPARTMENT

"Thinking Ahead" is Success Secret of Millionaire Tire Manufacturer

Harvey S. Firestone, Who Started His Career as Clerk in a Coal Office, Now Has Factory Employing 1,500 People —Ability to See Opportunity and Take It Has Won Rich Reward

THE story of H. S. Firestone is a remarkable one, even in the annals of big business. Not the least interesting thing about it is that it is a story of straight business. Many great fortunes have come through the control of natural wealth, such as oil, iron, copper, lumber, and so on. But here is a farmer boy who has won phenomenal success by starting at the bottom in business, without help or special knowledge, and planning and working for the future.

Here is his story as told in the American Magazine:

When people think of business as a mere matter of merchandise, of buying and making and selling goods, they overlook what is perhaps the most important, and certainly the most interesting, factor in the game. It takes **men** to produce merchandise. It takes **men** to sell it. To get the right kind of men is, therefore, the chief concern of every executive.

I have employed thousands of men and have picked scores for promotion. Of course, sometimes I have guessed wrong. There is no infallible formula for choosing them. But unless an employer can guess right in a majority of cases he can scarcely hope to run his business successfully.

Asked Questions

When I used to hire all my employees myself, I asked applicants a good many questions which some people might think irrelevant. I went back to a boy's grandparents. Who and what were they? Where was he born? What did his father do? How about school? Did he go through high school? If he didn't, why not? And all the time I was getting a line on his character. From his answers and the way he gave them I was learning whether he thought clearly and quickly, what was his training, what were his powers of reasoning and analysis. When I got through, I had a pretty good idea whether he was energetic, persistent, straightforward, and ambitious. If he had those qualities, he had at least the right stuff in him. Minor faults might be corrected. But the fundamentals were there.

Watches Eyes and Hands

And while I talked with him I watched his eyes and his hands. I always do that when I am trying to determine anybody's character. We all like a man to look us straight in the eye. Yet there is a difference in the way men do even this. Some of them do it because **they** are watching **you**. And that is all right, too, unless there is a sort of suspicion behind it. A man must, of course, "watch the other fellow," sometimes. But if suspicion and distrust are a part of his character it is pretty safe to conclude one of two things: either he has been fooled so often that he has come to expect it—in which case there is something wrong with him; or else he himself is looking for a chance to get the better of you. I like to see a man who is evidently studying a **proposition.** But when a man is watching **me,** either because he expects me to try "to put one over on him," or because he is looking for a chance to get some advantage for himself, I have a good many reserves about him.

An Exceptional Type

There is one type of man that does not often look you in the eye and yet, in his case, it does not repel me. He is the thoughtful type. And he thinks better when he can detach himself from outside influence. He is very likely to be looking out of the window, or down at his hands, while you are talking. He is listening—and thinking. But when he does bring his eyes back to your face there is a quiet directness about his glance.

The way a man uses his hands is very significant. Suppose you are talking to an applicant for a position and, after you have explained what will be expected of him, he gives a flabby little wave of his hand and says, "I guess I can do it." Maybe I am wrong, but my feeling is that he is nothing but a guesser and not a very good one at that. If he involuntarily shuts his hand hard, as if he were gripping some material thing, and says, "I believe I can do it. I certainly will try!" I am inclined to think he will "take off his coat" and make a good job of it.

The Nervous Man

The man who is always tapping his fingers on something shows that he is of a nervous temperament. That, in itself, is nothing against him. Nervous energy is all right if it is expended in constructive action, in doing real things. But you have to be sure that the nervous man isn't the kind that simply stirs himself and everybody around him into a turmoil. He sets the water to boiling, but he doesn't do anything with the steam. It merely makes a cloud around him and his associates, makes them hot and uncomfortable, and finally evaporates without having developed any horse power. Such a man needs to concentrate his nervous energy on getting things done. Then he is likely to be what is known in business as "a driver" and may be a valuable asset in an organization. But you want to be sure of this before you take him.

Has to be Careful

An employer tries to be careful about hiring a man, in the first place. But I believe it is the experience of all managers and heads of departments that **promotion** may have even more important consequences, both for the man himself and for the business. Strange as it may sound, it is sometimes an actual injustice to a man to advance him. If he is promoted too rapidly, or is put into a position for which he is not fitted, he may fail to make good; and that failure may be a setback from which he will never recover.

The power of promotion is one of the gravest responsibilities an employer has to meet. If he makes a mistake, he not only does harm to the business but he also hurts the man he has advanced. Out of mere justice to his men, therefore, an employer should be careful in picking the ones he promotes.

May Be Two Causes

When a man does fail to make good after promotion, I believe it is due to one of two causes: He may have been a success in a minor position, but is out of his depth in a higher one. He has been able to see clearly when he has had only one line of action to consider, but when he has to get "the big picture," he can't do it. He fumbles around, making decisions simply because he must do something or be hopelessly stalled.

Won't Stand Still

A business won't stand still and wait while you dally around, wondering what to do. The different departments are like several horses pulling the same wagon. If one of them stops, the wagon is on his heels and the whole thing piles up in confusion. All of the departments are interdependent. You must keep raw materials coming in steadily to feed production. Labor and machinery must be provided to handle raw materials. Sales must take care of the production, and distribution must keep the current moving between these two. One department cannot slow up without affecting all the others. A man may fail, therefore, because he can't keep the pace or isn't big enough for the job.

But when this happens, when a man has been advanced and fails to make good, his career in that organization is generally ended. Not because the heads of it want to let him out, but because he doesn't want to drop back to his old place. You can't blame him. That is a pretty hard thing for a man to do. It hurts his pride and, whether rightly or wrongly, he thinks it hurts his standing with his associates.

Makes Good Still

I have had cases, however, where a man put his pride in his pocket, went back to the work which was congenial to him, and for which he was fitted, and in time made a greater success than was open to him in the line he had to give up. Because a man fails in one position is no disgrace. A baseball player may be a fine batter but a rotten pitcher. If he is tried out as a pitcher and fails, there is no reason for him to think his usefulness is ended. He may be worth even more as a batter—the thing he **is** fitted for.

One advantage in working with a big organization is that there are so many

lines of activity in it that a man is pretty certain to find the one where he can make good. He can transfer within the organization; and if his ambition is greater than his pride, he will overcome an apparent setback in one direction and forge ahead in another. But, because no man really enjoys a setback, and because it often discourages men and humiliates them, an employer is bound to be careful about promotion lest it may prove an injury rather than a benefit to an employee.

Can't Stand Success

The other cause of this occasional failure to make good is that some men cannot stand success and the things which come with success, especially the added power over other men. It goes to their heads. They see themselves under a magnifying glass. They not only run their own job but jump over the fence and try to run some other man's job. The trouble with that type of man is not that he isn't equal to his work. He is big enough for the job. But he **thinks** he is **too** big for it.

Learn to be Orderly

Take the one question of orderliness. My boy's room at college used to look as if a cyclone had gone through it. I tried to make him feel that an orderly room indicated an orderly mind. But I can't claim to have been very successful. Uncle Sam, however, has taught him, and a few million other young men, that lesson, and others even more important. Instead of their period of military service being a misfortune to them I think it is going to send back into the realm of business a mass of trained, self-reliant, energetic, healthy young men who will be invaluable in meeting the great problems coming after the war. One thing alone—the broadening of their ideas through this experience in other countries—will make them especially helpful in handling the export business, which is going to be of greater importance in this country than ever before.

Have No Objective

No one can dismiss the subject of men as we see them in business without speaking of a certain class which is always saying: "What about me?" I refer to the men who tell you how long and how faithfully they have worked without getting anywhere in particular. They can't see where they have failed in themselves, and so they put the blame on circumstances, or on their employers. They say: "Everything was against me."

Well, hard work and faithful work isn't everything. Did you ever see a horse in threshing season on the farm? **He** works hard and faithfully; but he doesn't get anywhere! He goes round and round in his little circle. He puts in so many hours a day and keeps right on plugging. He is fed and watered, and goes back to his stall at night, and that's all there is to it.

Thousands Like This

There are thousands of men who work just that way. As a rule, I believe that the trouble with them is that they haven't any goal. They have not picked out an object to attain. The horse cannot help himself. He has no power of choice or of initiative. But the fine thing about a human being is that he **can** choose his goal, and set out to attain it, if he has the will and the necessary courage. If you find that you are going around in a little routine circle, your head down, just plugging, the only thing for you to do is to look around you, pick out a definite goal which you want to reach, and begin traveling toward it. It may not be some remote and difficult peak. It may be simply the top of the nearest hill. There are not many "air-lines" in business. It is a matter of climbing, not soaring. The essential thing is to pick out an objective and try to reach it. When you have gained that one, you can pick out the next higher one, and begin climbing toward that. But a man must have some goal to work for, or he is not likely to do much traveling.

The Real Comparison

We are always talking about "success," and we are likely to regard money as the gauge by which to measure it. In one way, money really is a good gauge, but I don't think it is always applied in the right way. I think the comparison should be made within the **same** class of work and not between **different** classes. I mean that we should compare a salesman with other salesmen, a clerk with other clerks, a banker with other bankers, and so on. We should not compare a clerk with a banker, a salesman with a manufacturer, an engineer with a merchant.

Ability is really merchandise. And the rarer the particular kind of ability, the higher the price it brings. Executives are scarcer than manual laborers. Inevitably, therefore, they command a higher price. If manual skill were scarcer than executive ability, the market price would be reversed.

But when you measure one man's success by comparing it with the success of a man in another kind of work, it is like comparing the relative price of, say, apples and cabbages. If you want to estimate the value of an apple, you must compare it with other fruits. Cabbages should be compared with other vegetables. And so on.

Compare Yourself

If you want to determine the quality of your own success, compare yourself with the men who are doing the same kind of work you have set yourself to accomplish. What you are doing now may be only one stage of your progress. But if you are doing better work at this stage than others are, you are succeeding. If you are doing the work you are happy in and fitted for, the kind of work you want to stay in, and are doing it better than anybody else, I think you are a success. You may be plowing a field, or making a tire, or keeping a set of books. Whatever it is, if you are doing it to the top notch of skill and efficiency, and if it is the thing you are best fitted for, you are achieving success. And, using money as the gauge, you will almost certainly register higher than the men who are doing the same work less competently.

A Truer Measure

I think a truer measure of success, however, is accomplished. Certainly it is a deeper source of satisfaction than money is. The man or the woman who doesn't accomplish anything doesn't get much out of life. I believe most men will make good if they find the work they are happy in doing.

The mere routine job-holders may seem to disprove my theory, but I don't think so. The fact is **they** are happy in just drifting. They go on year after year, in some minor position, always thinking they are **going** to pull up to something better, but never doing it. They are quite comfortable, the job is easy for them, and they just drift along. They don't get hold of the oars and brace themselves and pull up the stream with every ounce of energy. The drifters slip along until they float into some quiet by-water, or they go over the falls—and that is the end of them. Ambition is something more than **looking** at the point you want to reach. Ambition is taking off your coat and pulling and dragging your boat up the stream.

LINSEED OIL SITUATION

Continued from page 179

the United States. At the present time there are United States interests buying flaxseed in Canada, and as long as this prevails the price here will remain fairly high and the amount of seed available for Canadian crushers restricted to that extent. This does not mean that there is any immediate prospect of any shortage of seed, but it does look as though the crushers in the States face a possible shortage, and if this is the case, the question of supply and demand will govern the prices here as they do over there, and even higher levels may be looked for.

The Trend of Prices

The trend of prices on linseed oil is shown in the panel herewith from the time of the signing of the armistice until the present week. It will be seen in looking this over that there is a spread between the price on Nov. 9, 1918 and the price on Feb. 1, 1919 of 36 cents per gallon. However, the most of this has been recovered in the last three or four weeks and it looks very much as though prices may possibly stay up around present level or reach a little higher basis during the next two or three months.

Market Sensitive to Demand

Crushers advise that the market today is working on such a responsive basis that they couldn't go into the market to buy 10,000 bushels of flax without probably sending the price up 5, 6 or maybe 8 cents a bushel. It can easily be seen then that when a market is as sensitive to conditions as this would indicate there may be factors develop which will bring about declines. These are not visible at the moment, and with the big consuming months coming, perhaps the month of May leading in this respect, it does not look as though prices will go very much lower before that time. Even were the strike situation in the Argentine overcome and ships available in fair numbers to carry seed from there to the United States, it must take some time to load these ships and get the seed on the market. In the meantime the crushers have an increasing demand to provide for and they must go into the market to cover for their needs. This they are doing and unless conditions change almost over night, which in these days may well happen, it looks as though prices will be fairly well maintained for some little time.

PRINCE ALBERT, SASK., R.M.A. ELECTS OFFICERS

A branch of the Saskatchewan Retail Merchants' Association has been formed at Prince Albert. Officers have been elected as follows: President, Ray Manville; first vice-president, W. W. Mann; second vice-president, F. M. Henderson; treasurer, W. D. Mitchell; secretary, T. J. Morgan; executive, Ralph Miller, C. P. Erwin, Gordon Zoellner, J. A. Klein, D. H. Wood, W. Baker, P. L. Darnell, Frank Harvey, R. C. McLean, James Sinclair. Visitors at the organization meeting included J. J. Polson, of Regina, vice-president of the provincial association; F. E. Raymond, Saskatoon, provincial secretary, and W. L. McQuarrie, provincial organizer.

R. Hogg has purchased the S. France butcher business at the corner of River Street and Second Avenue, Prince Albert. Mr. Hogg was for two years with Mr. France in business before taking over the management.

EVENTS IN THE TRADE

Business Changes

Unionville, Ont.—John W. Graham, hardware, is succeeded by J. W. Perkin.

Linn and McConnell have purchased the hardware and garage of W. W. Matthews, Arden, Man.

Fire Losses

Fire, which started when a gas pipe became disconnected, caused a loss of $1,000 in the premises of the Electrical Fittings Co., Limited, Toronto.

Obituary

Herbert L. Merritt, aged 47, president of the firm of Merritt & Co., bent goods manufacturers, Chatham, Ont., died very suddenly.

The death occurred at Pine Forest Inn, Somerville, South Carolina, on Monday, of William A. Kemp, vice-president of the Sheet Metal Products Co., Toronto. Heart trouble which followed an attack of typhoid fever when he was in Italy in 1911 left Mr. Kemp weak. Three weeks ago he went South. He was 53 years old and was born in Quebec Province. Mr. Kemp was president also of the McDonald Mfg. Co. of Toronto.

Following a brief illness with pneumonia, Robert W. Sullivan, former advertising manager of Lowe Brothers, died at his home in Chicago. Mr. Sullivan was thirty-seven years old. At the time of his death Mr. Sullivan was vice-president of the Advertising Association of Chicago and advertising manager for Wilson & Co., Chicago packers. He was a former advertising manager of the Du Pont Powder Co. also.

Personals

A. W. Lawrie, Toronto, representing Simmons Hardware Co., has started on a trip to the Coast.

James Fraser, who has been manager of the Dutton Wall Co. at Melfort, Sask., has been appointed manager of the Melfort branch of the Imperial Oil Company.

President L. P. Moore, of Benjamin Moore & Co., has returned to New York after a tour in which he visited the company's plants in Toronto, Chicago and Cleveland.

C. C. Falconer, hardware merchant, Winnipeg, was a visitor at HARDWARE AND METAL'S Toronto office this week. Mr. Falconer is spending some time calling on Ontario manufacturers before returning.

Trade Notes

The Imperial Oil Company contemplates the erection of a new plant at Melfort, Sask., shortly.

The partnership existing between Lessard and Frere, hardware, Upton, Quebec, has been dissolved.

The Paramount Phonograph and Record Co. of Canada, Ltd., has been registered at Montreal.

Farm Machinery Mfrs., Ltd., Saskatoon, has made application to change its name to Jackson Machines, Ltd.

W. A. McLaren, hardware merchant at Hensall, Ont., has purchased a new store and will move his stock shortly.

A winding-up order has been granted and Paquet and Bonnier named as provisional liquidators of the Roxton Falls Mfg. Co., Ltd., Roxton Falls, Quebec.

The Union Glove Works, Ltd., of Montreal, has been granted a charter.

The Weyburn Sash, Door and Glass Co., Weyburn, Sask., has been succeeded by Edward A. Shoewell.

The Canadian Collapsible Rim Company plans to locate a plant at Windsor, Ont., for the manufacture of collapsible rims and auto accessories. The head office of the firm is in Chicago. John A. Campbell, of Windsor, Ont.; James B. Gunn, of Winnipeg, and Wm. H. Duncan, of Toledo, are among the incorporators.

Montreal News

Harry E. Haynes, with the Savage Arms Co., Ilion, N.Y., was in Montreal this week.

E. P. Harris, of the D. P. Harris Hardware Mfg. Co., New York, was in Montreal this week.

Frank Odell, with the Atlantic Tubing Co., Utica, N.Y., called on the Montreal trade this week.

R. P. Dickson and Roy Sumner, of the Sumner Co., Moncton, N.B., were in Montreal recently.

C. D. McDowell, representing H. D. Smith & Co., Plantsville, Conn., was in Montreal this week.

R. C. Lewis, sales manager of the T. S. Simms Brush Co., St. John, N.B., was in Montreal recently.

F. J. Wittl, general manager of the Gem Leather Goods Co., Milwaukee, was in Montreal this week.

Mr. Hurtubise of the North American Hardware Co., Montreal, has returned from a trip to the States.

Raymond A. Catlin, of the Corbin Lock Co., New Britain, Conn., called on the Montreal trade this week.

John Richardson, of Richardson and Bureau, manufacturers' representatives, Montreal, is in Quebec this week.

W. H. Newton, sales manager of the Canada Paint Co., Montreal, has returned to his desk after a short illness.

Harry M. Patterson, representing the Stratford Brass Co., Stratford, Ont., visited the Montreal trade this week.

S. M. Ward, trade sales manager for the Canada Paint Co., Ltd., Montreal, is in the Maritime Provinces this week.

W. W. Ingersoll, vice-president and secretary of the Dougall Varnish Co., Montreal, is in Newark, N.J., for ten days.

Notes From Regina

Mr. Plewes, of Plewes, Ltd., Winnipeg, was in the city this week.

E. C. Craig, of Craig & Co., Winnipeg, is in this territory on business.

John Madison, hardware merchant at Dilke, Sask., was in the city this week.

Mr. McGee, of the Moore Push Pin Co., Philadelphia, was in the city this week.

L. Richardson, representing the Sheet Metal Products Co., Toronto, was in the city this week.

P. A. C. McIntyre, of McIntyre Co., auto accessories, Winnipeg, visited the city recently.

Geo. H. Halpin, travelling salesman for the Canada Glue Co., Winnipeg, called on the trade this week.

Mr. McDonald, Winnipeg representative of Scarfe & Co., paints and varnishes, was in the city this week.

Mr. Samuels, representing the Louis McLain Co., Ltd. of Winnipeg, called on the local hardware firms this week.

Incorporations

Doherty Metal Plating Company, Limited, capital $10,000, head office Sarnia, Ont., plans to carry on the business of metal platers.

The Thompson Welding Co., head office Toronto, capital $40.000, plans to carry on the business of welding and cutting all kinds of metals.

Ontario Sewer Pipe and Clay Products, Limited, capital $300,000, head office Toronto, plans to manufacture and deal in sewer pipes, brick, tile and contractors' supplies.

J. E. Hanger, Limited, head office Toronto, capital $50,000, plans to manufacture and deal in cements, oils, paints, pigments, varnishes and in electrical, chemical and photographic materials.

Discount For Cash Pleases Customers, Says Alberta Hardware Firm

A "Cash with order" plan, which was inaugurated by the Watt Hardware Co., Ltd., of Innisfail, Alberta, on February 1, when it took over the business of the Day Hardware Co., is working out most satisfactory, the proprietors state.

"Our idea in starting this plan," said Mr. Oscar Watt to HARDWARE AND METAL, "was not to go on a straight cash basis, but to give the customer who pays cash an advantage over the man who runs a monthly account. We give a straight 5 per cent. discount on all goods bought and paid for over the counter. If the bill is charged and goes through the books the customer pays the regular price. We haven't tried this plan out long enough yet to know positively how it will work out, but we find that our customers, without exception, to whom we have explained our plan, are very well satisfied withour offer and seem pleased to be given a discount for cash over the monthly account system. We believe that by educating our customers along this line we can raise our percentage of cash business considerably and that it will work out to the advantage of both customer and dealer. We might say that for the month of February our business went 65 per cent. cash over the counter, while to date in March it has run slightly over 75 per cent. cash. Of course it is too early yet to attribute this difference to our new plan. We will be better able to say after giving the system six months' or a year's trial."

FIFTY YEARS IN BUSINESS

The 50th anniversary of the founding of the firm of James W. Paton, Toronto, paints and oils, was celebrated on Tuesday evening by a dinner at the King Edward Hotel. Since 1900 the firm has been under the management of James F. and Charles E. Paton, sons of James W. Paton.

"OLD TIMERS" DINNER

G. E. Ruby, general manager of the Frost and Wood Company, Smiths Falls, Ont., marked the completion of his thirtieth year of service with the firm by a dinner, at which he was host to the "old timers." More than 80 employees, some of whom have been with the firm 50 years, attended. Frank Whitcomb, assistant general manager, who has been with the firm 29 years, was chairman over a program of speeches and musical numbers which followed the dinner.

WAS IN BUSINESS 45 YEARS

George A. Richardson, who has been in the hardware business at Guelph, Ont., for 45 years, has disposed of his store to L. B. Cronk, of Dresden, Ont., and A. D. Buchanan, of Midland, Ont. The new owners took possession on Tuesday.

E. O. DALGLISH WITH DAVIDSON'S

E. O. Dalglish has been appointed assistant to Edward Goodwill, manager of the Thos. Davidson Mfg. Co., Ltd., Montreal. His appointment will date from April 1. Mr. Dalglish succeeds A. L. Patrick who has been associated with the company. Mr. Patrick goes to Halifax to take up a line of manufacturing in which he was formerly interested.

TAKEN ILL ON WAY TO LYONS

While on his way to the International Exposition at Lyons, France, Charles H. Gratton, special representative of Brandram-Henderson Ltd., who was to personally supervise the exhibit made by this company, was stricken with influenza in London. This did not prove serious, but delayed Mr. Gratton ten days. He was sufficiently recovered to proceed to France a few days prior to the opening of the big fair and was able to arrange the exhibit under his care in due time.

HON. W. J. HANNA

President of the Imperial Oil Company of Toronto, died very suddenly at Augusta, Georgia, on Thursday following a stroke. He went South two weeks ago to take a rest.

Radiator Repair Dept. Helps Other Business

A radiator repair department which has been installed at Regina, Sask., by the hardware firm of Armstrong, Smyth and Dowswell, Ltd., promises big results. It is not only bringing in a lot of business for the new department, but a noticeable increase of sales of auto accessories in the main store has resulted. The firm is reaching out for business all over the district and the Regina correspondent of HARDWARE AND METAL says that the following advertisement which appeared last week in thirty-two papers of the city and district has paid for itself many times over and that business is still coming in steadily:

A New Service for
MOTORS AND TRACTORS
we rebuild and repair
RADIATORS

Our facilities for this class of work are probably the best in the West, and our workmen are all skilled mechanics, and we guarantee every job at reasonable prices.

Phone 2615
Armstrong, Smyth and Dowswell Ltd.,
1832 Scarth Street, Regina
We also carry in stock a full line of accessories

LEAVING HAMILTON FIRM

W. H. Monk, secretary-treasurer for the past three years of the firm of the Burrow, Stewart & Milne Co., Ltd., stove and furnace manufacturers, Hamilton, Ont., will leave about the middle of April to take the position of assistant manager of the Royal Bank at Hamilton. Mr. Monk before going with the Burrow, Stewart & Milne Co., Ltd., was manager of the Royal Bank at Port Arthur. G. R. Stewart, vice-president of the company, will take over the duties of secretary-treasurer.

NATIONAL PAINT JOBBERS IN FAVOR OF STANDARDIZATION

The National Association of Paint Jobbers has sent the following letter addressed "To Manufacturers":

"At the fifth annual convention of this association held in Chicago the following resolutions were adopted, and your cooperation is now asked:

"Whereas, the War Trade Board has seen fit to remove the restrictions concerning sizes and colors of paints and varnishes, and we believe it is to the interests of the entire paint and varnish trade as well as the ultimate consumers to have certain of these rulings continued; therefore, be it

"Resolved, That the National Association of Paint Jobbers place itself on record as favoring the continued elimination of half-gallon and pint cans of prepared house paints, flat wall paints and barn paints, and also of half-gallon cans of clear varnish, and that we strongly approve the continuance of the present reduced color cards and in all lines.

"Whereas, There seems to be a feeling of uncertainty about the market trend of prices on mixed paint and other paint sundries, and as the interests of the whole trade can best be served by a stabilized market, therefore be it

"Resolved, That the National Association of Paint Jobbers urge the paint manufacturers to make some definite statement to the trade generally indicating how long the present market prices will be continued; be it further

"Resolved, That this association go on record as being strongly opposed to any reduction in terms."

"Truth in Advertising" Movement is Aimed to Protect All

BECAUSE the truth-in-advertising movement of the Associated Advertising Clubs of the World is subscribed to and backed by advertisers and advertising mediums alike, it is often possible for a local advertising club vigilance committee to obtain results even in cases where it might be hard to prove a violation of a truth-in-advertising law.

A case in point is that of a Detroit advertiser whose statements as to values, which might have been difficult to prove untrue in court, were nevertheless exceedingly doubtful, and certainly were not of a character to inspire public confidence in advertising.

H. C. Dart, secretary of the local vigilance committee, took the matter up with the newspaper in which the announcement of the merchant had appeared, suggesting that the paper should be as careful in protecting its readers as it would be in protecting itself against the possible poor credit of an advertiser—that the fact that an advertiser has the money with which to pay for space is a comparatively small consideration.

The manager of the newspaper agreed to examine future advertisements submitted by the store, for Mr. Dart had not been convinced by the promises of the advertiser himself.

Two days later, the store sent another large advertisement to this newspaper. According to previous instructions, this "copy" was submitted to the general manager of the paper. He declined to publish it, suggesting numerous changes. These changes were later made and the advertisement was published.

Since then, this advertiser had learnt that it takes more than money to buy advertising space in that community—that he must show that his advertisements are fair to the reader.

This incident, declares a bulletin from the National Vigilance Committee of the Associated Advertising Clubs of the World, is but one of many which might be cited to show the great influence which is wielded by a strong local vigilance bureau. Active work of this character is now going on in one hundred cities, says the Associatiin bulletin.

LETTERS TO THE EDITOR

These columns are open to contributions upon any topic of interest to the trade, it being understood that the views expressed are those of the contributors, and do not necessarily imply editorial indorsement. Names of contributors will be withheld, if desired, but name of writer must accompany correspondence as an evidence of good faith.

Editor, HARDWARE AND METAL,
Toronto, Ont.

Dear Sir,—In your editorial comments in a recent issue there is an article entitled "Results of Publicity."

The article in question shows the retailer how he can fight the mail order houses and shows him the advantages he has over the mail order house. It is a remarkable fact that articles of this nature are appearing in various trade magazines from time to time, and although the retailers know that the root of the evil is not to be reached through these channels, yet they never seem to speak out and show just where the mail order house has got them by the neck.

Here is the truth of the matter, Mr. Editor. The manufacturers have two prices, one for the retailer and one for the mail order house. I could show you articles in a copy of a mail order catalogue from Saskatoon, where the said mail order house is selling the same sweat pads that I handle and selling them for less money than I pay for them. Where is the Solomon who can show me how to fight that kind of thing? Then again they have a horse clipper which I am certain is made by the same firm, although a slight change is made in the appearance. They even state that the clipper head will fit the machine I handle.

Now, while it is the manufacturer's privilege to sell to whom he likes he should remember that if the retailer goes under or stops buying his goods then he has lost a good friend. If his price to the mail order house enables them to sell the clipper for only fifty cents more than I pay for it I am certainly not going to handle it.

The only bright spot on the horizon that I see is that the retailer is waking up and the time is coming when Mr. Manufacturer will have to get off the fence; in other words, if he sells to the mail order house cheaper than he does to the retailer (which he certainly is doing) then he will have to depend on the mail order house for his living, because the time is coming when the retailer will boycott him.

What I fail to understand is that no person takes this matter up; they must know what is going on. I can pick out articles in the hardware catalogue that the mail order houses are selling cheaper than I can buy, yet some will tell us we have the advantage over the mail order houses. Not a bit of it. Look what happened to Formaldehyde this spring; the mail order houses selling it cheaper than the hardware men can buy it (maybe there is not a nigger in that wood pile).

I am in a small town and carrying a small stock, but if the manufacturer would sell to my wholesalers at the price he does to the mail order houses I could beat him at his own game.

HARDWARE AND METAL states that some merchants object to the taxing of mail order houses. Why should they not be taxed, and good and heavy at that? Do they (the mail order houses) ever give a dollar to this town for the Red Cross, for our little school, our church or anything else that the community needs for its benefit? If they do I have never heard of it. Whereas the merchant has his hand in his pocket all the time; he gives his dollar to every worthy cause and does it with a smile. He also is often called upon to help a lame dog over a stile and many cannot get in the money so tied up in this manner and eventually write it off the books.

ALBERTA RETAILER.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

622. **Brass and iron valves, also lubricators.**—A London firm wishes to secure the sole agency for Great Britain and the continent of Europe of Canadian manufacturers of brass and iron valves, and also all classes of lubricators.

624. **Domestic woodenware and general hardware.**—A firm of builders and merchants in the South of England would be glad to hear from Canadian manufacturers of domestic woodenware and general hardware, in the form of locks, bolts, fittings, etc., also stoves, in all of which they are interested.

627. **Australians to call on Canadian manufacturers.**—Two representatives of an important Australian company will shortly arrive in Canada with a view to interviewing Canadian manufacturers who may be able to supply articles required in Australia. The following lines are of particular interest to this firm: Galvanized black and steam tube, bar iron, steel boiler plates, rivets, bolts and nuts, galvanized corrugated iron, black steel sheets, aluminum ware, enamelware and engineers' requisites in general. They are engineers and contractors in a very large way of business, with warehouses under most capable management at Melbourne, Sydney, Brisbane, Adelaide and Perth. They do a very extensive trade generally, besides being successful contractors to various Commonwealth and State purchasing departments.

637. **Hardware.**—A firm of commission agents in Milan, Italy, which prior to the war represented important German houses, inquires for Canadian hardware.

639. **Commission agent.**—Engineer at Turin, Italy, would handle on commission metals in general, minerals, tools, machinery, motors, scientific instruments.

649. Agents at Bologna would import for own account or handle on commission cycles, automobiles, accessories, sport articles, machine tools, lubricant oils, etc.

651. Party at Genoa, Italy, would represent exporters of coals, chemicals, metals, fire clay and bricks, etc.

652. Merchant at Florence, Italy, requires umbrella and sunshade frames, hardware, jewelry, etc.

654. Foundry at Pavia, Italy, would buy foundry machines and plants for the use of permanent moulds, galvanizing apparatus and plants (Sherard process).

657. **Chemicals and fertilizers.**—Bologna, Italy, agent would represent British manufacturers of chemicals and fertilizers.

658. **Rubber heels.**—Party at Turin, Italy, wishes to represent rubber heel manufacturers.

661. **Agency.**—Palermo, Italy, sumac steam mills firm wishes to represent for Sicily exporters of coal, soaps, leather and hides (dressed), ironmongery, etc.

662. A firm of importers in Stockholm, Sweden, would like to get quotations and samples from Canadian exporters of nickel, asbestos, mica.

663. **Agricultural machinery.**—A firm at Nova-Nikolaevsk, Siberia, with several years' experience in the agricultural machinery and engineering trades of that country, is desirous of securing the representation of Canadian firms in a position to supply machinery and other lines suitable for the Siberian market.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

THE hardware markets this week are the exception to the rule, owing to the great number of price reductions which have gone into effect. Lower prices are now in effect on fence staples, fence hooks, bit stock, wood and blacksmiths' drills, brassed iron rod, hay wire, bale ties, sad iron handles, stove polish, lamp wick, cotton rope, awning and sash cord, seine twine, cheap teaspoons, manila, sisal and hemp rope, copper products, corn brooms. Advances have been made in prices of lumbering tools and rifles. In the iron and steel markets there is still talk of price reductions, and this is having a tendency to cause a cessation in buying. It is generally felt that about April 1, something definite will be done regarding a new schedule of prices. Even though reductions may be made in prices of iron and steel, these reductions may not be reflected to any great extent immediately in hardware manufactured products. In a great many hardware lines of manufactured goods, the cost of labor and finishing is the big item to be taken into consideration. Retailers' stocks are low, and buying is being done on a conservative basis. The constant wrangling at Ottawa over the tariff problem is having a bad effect on trade generally, and is causing unsettlement in hardware circles. The outlook for spring is exceptionally bright, so far as the retail hardware trade is concerned.

MONTREAL MARKETS

MONTREAL, March 20.—There are numerous changes of importance this week, and among the advances made lumbering tools and manila clothes lines are the two items registering such a change. On the other hand, there is quite a decided lowering of prices on some lines. Rope has been reduced again 3c per pound for manila grades. Cotton rope and cordage of various kinds is lower, sash cord, awning cord, clothes lines and cotton twines figuring in this downward revision. Wick, too, is reduced.

Stove polishes are on a lower price basis and cheap teaspoons of the "900" variety, as well as desserts and tables and also forks, are lower. Copper is down one cent to a base price of 19c. Old materials are weak and likely to be further lowered in price.

The state of trade has been somewhat interfered with by the unfavorable condition of the roads.

Stove Polish Down; Lamp Wick, Too

Montreal.

WICK, STOVE POLISHES.—Declines are made for lamp wick following the reductions in cotton lines of goods. No. 0 x 32 yards is priced at 75c per roll; No. A, 95c; B, $1.35; D, $2.15. In the 12-yard size No. 0 is priced at 28c; A, 35c; B, 52c. and D, 82c. Oil stove wicks are reduced, the flat sizes selling at these prices: 3 in. per gross, $5.60; 3½ in., $6.60; 4 in., $8; 4½ in., $9, and 5 in., $10.20. Stove polishes have been reduced in price in varying degree. Rising Sun brand declining from $6 to $5.40, and for the larger size from $12 to $10.80.

Lumbering Tools Up; Teaspoons Lower

Montreal.

SPOONS, LUMBERING TOOLS.—Lower prices are quoted on tea, table, and dessert spoons of the "900" variety. Teas are quoted at $3.60 per gross, desserts at $7, and tables at $7.15, while medium forks are $7.65. A complete change in the list price and discount on Pink's lumbering tools is in effect, and this is tantamount, it is understood, to an increase of price approximating 8 to 10 per cent. New discounts are, on the tools, 35 per cent. and on handles 35 and 10 per cent. These discounts are based on the revised list.

Hay Wire and Bale Ties Down

Montreal.

HAY WIRE, BALE TIES.—Lower prices are quoted on hay wire and cut bale ties. The following prices are in effect for cut hay wire on the various gauges:

Cut Hay Wire	Per 100 lbs.
No. 9	$6 15
No. 10	6 20
No. 11	6 25
No. 12	6 40
No. 13	6 50
No. 13½	6 50
No. 14	6 65
No. 15	6 90
No. 16	7 10

Single loop bale ties are quoted as follows: No. 12, $6.25; No. 13, $6.35; No. 13½, $6.40; No. 14, $6.50; No. 15, $6.70, and No. 16, $6.95.

Wares Are Active; Stoves Dull

Montreal.

WARES AND STOVES.—A much better movement of various wares is now manifest and the trade has been ordering quite freely. Tubs and pails, enamelled and stamped ware are the bigger sellers just now and it is expected that prices will hold for the most part, costs to the manufacturer still being high, and particularly for labor. Stoves are quite slow at present in point of sales, and there is no prospect of an immediate improvement, though this should come in a few weeks.

Some Nails Going; Basis is Held

Montreal.

NAILS AND WIRE.—Sales of nails are frequent though of narrow compass, individually considered. The basis is steadily held at $5 per keg for standard wire, while that for cut nails is unchanged at $5.35. Smooth steel wire is unchanged at $5.75. The output of fencing is better, wire poultry netting and made-up fencing selling more freely every week.

Manila and Cotton Ropes Lower

Montreal.

ROPE, CORDAGE.—An unexpected reduction came during the week, reducing the price on manila rope 3c per pound. This makes the base quotation for pure manila 34c per pound, and that for British manila 30c. There is no change whatever in the price of sisal grade or in lath yarn. Business has been fairly good. There has been a lowering of prices on cotton rope and kindred products. The basis for 3-16 cotton rope is now 66c, and for ¼ inch and larger, 65c. Sash cord is down to 71c for No. 6, 70c for No. 7, and for 8 to 12, 69c. Cotton clothes lines are reduced. Thirty-foot length is quoted at $2.65 per dozen; 40 feet, $3.20; 48 feet, $3.85; 60 feet, $4.80; 72 feet, $5.75. Awning cord, drab, No. 3, is quoted at $2.85; No. 4, $4.30; No. 4½, $5.70. For the white cord in corresponding numbers the prices are $2.35, $3.80, and $5.25. Cotton wrapping twine, 3-ply, is priced at 65½c, and 4-ply at 69c per pound. Manila, 6 x 50 clothes lines are quoted up from $3.75 to $4.75 per dozen.

Good Sales Oil And Gasoline

Montreal.

COAL OIL, GASOLINE.—In a seasonable sense there has been a good movement of gasoline and also for coal oil. The latter is held at the recent advance and there seems to be a fairly firm undertone. Sales are made at from 20 to 23 cents according to grade. Gasoline of motor grade is quoted at 34 cents. The demand for fuel oil is only fair.

Iron Bars and Steel Holding

Montreal.

IRON AND STEEL.—Little interest has developed in iron or steel bars and there is not much movement. Most of the trade is anticipating announcement of a reduced price for steel, and if this comes there may be a revision of the price basis on these lines. Orders from the country are just fair.

Common bar iron, per 100 lbs.	$4 30
Refined iron, per 100 lbs.	5 30
Mild steel	4 30
Iron finish machinery steel	4 35
Norway iron	12 00
Single reeled machinery steel	6 00
Spring steel	6 00
Sleigh shoe steel	4 30
Tire steel	4 50
Toe calk steel, per 100 lbs.	5 20
Band steel	4 30
Harrow tooth steel	4 35
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Sheets Have Held But Are Slow

Montreal.

SHEETS AND PLATES.—There is a steadier basis for both black and galvanized sheets, but the amount of business coming to hand is anything but excessive. The same spirit of buying in anticipation of present needs only still obtains, and it may be a few weeks before there is a general resumption of activity in the bigger way.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$6 00	$6 75
12 gauge	6 10	6 90
14 gauge	5 85	6 75
16 gauge	5 95	6 80
18-20 gauge	6 10	7 00
22-24 gauge	6 15	7 10
26 gauge	7 20	7 15
28 gauge	6 35	7 25
GALVANIZED SHEETS—		
10¾ oz.		$9 50
28 gauge		9 00
26 gauge		8 75
22 and 24 gauge		8 60
20 gauge		8 60
18 gauge		8 60
16 gauge		8 25

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Little Sale For Lead Products

Montreal.

LEAD PRODUCTS.—With the basis for pig lead fairly steady there is no change on manufactured lines. It is probable that there will be less change at present if lead holds. No great amount of activity is reported for any of the lines, solder and other supplies being bought in a small way for present requirements.

Lead pipe, lb.		$0 12
Lead pipe (cut lengths)		0 13
Lead waste pipe, lb.	0 13	
Lead traps and bends	Net list.	
Lead wool, lb.		0 14
Lead sheets, 3 to 3½ lbs., sq. ft., lb.		0 12
Lead sheets, 4 to 8 lbs., s. ft.		0 11
Cut sheets, ¾c lb. extra, and cut sheets to size 1c. lb. extra.		
Solder, guaranteed, lb.		0 40
Solder, strictly, lb.		0 37½
Solder, commercial, lb.		0 35¼
Solder, wiping, lb.	0 31	0 35
Solder wire (8 gauge)—		
40-60		0 44
45-55		0 47¾
50-50		0 51½
Zinc sheets, casks		0 17
Do., broken lots		0 18

Old Material Is Unsettled

Montreal.

OLD MATERIAL.—There is really little new to say on old material as the sellers are not seeming anxious to sell and buyers are just as pleased not to buy. The undertone is a weak one and prices are likely to be still further reduced. The manufacturers are anything but anxious to make bids, and if they do it is pretty sure to be on their own price terms.

Dealers' Buying Prices—		
Pipe scrap, ton		8 00
Stove plate, ton		15 00
No. 2 busheling		5 00
Old rubbers, boots and shoes	0 06	0 06½

Copper Down 1c; Markets Dull

Montreal.

INGOT METALS.—There is one change this week, that of a reduction in the price of copper. Otherwise, and in general there is a decided quietness to business, orders being limited.

COPPER.—If there be any difference in the interest obtaining on ingot metals copper might be considered one of the quietest. The price basis is down here 1c to 19c per pound.

TIN.—Less change of price is reported from London this week, and locally there is no change, with 60c the basis per pound.

LEAD.—There seems to be a more settled feeling on lead at present and no changes have been made here or outside. Price remains at 7½c to 8c.

ANTIMONY.—There is ample stock of this for all needs, but little is selling. The price remains at 8c per pound.

SPELTER.—Operators seem to be making efforts to stimulate business outside but with apparently little success. Local market is quiet at 9c per pound.

ALUMINUM.—A steady and unchanged market is reported, sales being made at 40c per pound.

PIG IRON.—The trade is anticipating some announcement regarding the future price basis. In the meantime local basis is held at $45.

TORONTO MARKETS

TORONTO, March 20.—Lower prices are again named on manila rope this week, and at the basis reached seems quite firm. Whisks are lower, the decline amounting to about 30 per cent. Sheets are very well maintained, and jobbers report inquiries very numerous. Sash cord and cotton rope is down.

There seems to be a better undertone to trade to-day and buying is becoming a little more general. Prospects are very good from present indications.

Sash Cord, Cotton Rope Being Revised

Toronto.

SASH CORD, COTTON ROPE.—Prices are under revision now as applied to sash cord and cotton rope. The decline will amount to about 5 per cent., and the following prices are mentioned as likely to prevail: Sash cord No. 6, 71c per pound; No. 7, 70c; Nos. 8 to 12, 69c; Cotton rope, 3-16 inch, 69c per pound; ¼ inch and larger 68c.

It is understood that kindred lines of cotton goods such as clothes lines, awning cord, seine twine and candlewick are on the down grade too. New prices should be available by next week.

Whisks Show Sharp Revision

Toronto.

WHISKS.—Prices have sagged this week on whisks and the decline is a pretty substantial one, amounting as it does to about a 30 per cent. decline. Present quotations are back to list prevailing January 15, 1918, which was revised upward in September last.

Drills to Come in For Decline

Toronto.

DRILLS.—Indications are that declines are about ready to be announced on twist drills of all kinds. Just how great this will be is a little uncertain but probably 10 to 12 per cent. will represent the amount of the drop.

Manila Rope Prices Decline

Toronto.

CORDAGE.—Manila rope prices have again been revised downward and at present the market is firmly held at new prices announced. Effective March 14, pure manila rope was changed to a base price of 34c per pound, a reduction of 3½c and British manila was changed to a 30c basis, a reduction of 3c. There has been no change in sisal rope or lath yarn, the basis on both these lines holding at 27½c per pound.

Nails Holding; Wire Steady

Toronto.

NAILS, WIRE.—The price on nails shows no change during the week, quotations holding at levels ruling since recent decline, viz. for wire $4.95 per 100 pounds base and cut $5.35 per 100 pounds base.

Wire is unchanged from last week's figures and basis seems quite steady. Smooth steel wire is quoted at $5.75 per 100 pounds base.

Oils Holding, Demand Fair

Toronto.

OILS, GASOLINE.—New prices on machine oils are still being held back but change seems imminent. The decline will probably amount to about 2c per gallon. Coal oil is held without change this week, prices ranging from 19½c to 22½c per gallon according to grade. Gasoline is active with prices showing no variation at 33c per gallon.

Stoves Unchanged; Summer Lines Move

Toronto.

STOVES, WARES.—There seems to be a fair movement of summer lines of stoves, embracing coal oil, gasoline, electric and gas and whereas dealers are not specifying for usual quantities, the manufacturers look for repeat business to overcome present curtailed volume of sales. Stoves and ranges are held at steady and unchanged figures. The movement of all lines of wares is very good and trade is considered quite satisfactory.

Iron and Steel Bars Holding

Toronto.

IRON AND STEEL.—The market maintains a steady basis and a fair amount of business seems to be coming along. The tone to the market is better.

Common bar iron	$4 75	$5 00
Common bar steel	5 00	5 25
Refined iron	5 15	5 40
Angle base	5 25	5 50
Horseshoe iron	5 00	5 25
Tire steel	5 15	5 40
Mild steel	5 00	5 25
Norway iron	11 00	13 00
Toe caulk steel	5 90	6 15
Sleigh shoe steel	5 00	5 25
Band steel, No. 10	5 25	5 50
Do., No. 12	5 50	5 75
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Corrugated Sheets Show Up Better

Toronto.

CORRUGATED SHEETS.—There is really not a heavy amount of business being placed but there are numerous inquiries and for substantial blocks of goods which may be expected to develop into orders when things open up a little later. It is usually a month or so later than present date before big business is placed for corrugated sheets. Prices are unchanged.

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Sheets Hold Steady For Work

Toronto.

SHEETS, PLATES.—There is a steady tone to the market and more or less of a waiting attitude in respect to what may develop in the next week or so. Prices have shown no revision during the week and prices given below are those now in effect.

BLACK SHEETS—	Per 100 lbs	
10 gauge	$5 50	$6 00
12 gauge	5 55	6 05
14 gauge	5 60	6 10
16 gauge	5 70	6 20
18-20 gauge	....	6 30
22-24 gauge	....	6 35
26 gauge	....	6 40
28 gauge	....	6 50
3-16 inch plate	....	5 75
¼-inch boiler plate	....	5 50

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$8 25	$8 50
U.S. 28	7 95	8 20
U.S. 26	7 65	7 90
22 and 24	7 50	7 75
18 and 20	7 35	7 60
16	7 20	7 45

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Wrought Pipe, Boiler Tubes Steady

Toronto.

WROUGHT PIPE, BOILER TUBES.—Wrought pipe maintains a fairly steady basis and the outlook seems to be unchanged from that outlined last week. Prices show no change at figures in current market quotations.

Jobbers report some arrivals of 2 inch boiler tubes on which stocks were pretty well depleted and consequently are in a much better position to take on business coming to hand, which is fair. Prices follow:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1 inch	$28 00	$.....
1¼ inch	32 00	.....
1½ inch	35 00	28 00
1¾ inch	35 00	28 00
2 inch	40 00	28 00
2¼ inch	43 00	30 00
2½ inch	45 00	35 00
3 inch	52 00	40 00
3¼ inch	.....	47 00
3½ inch	62 00	48 00
4 inch	70 00	60 00

Lead Products Maintain Firmness

Toronto.

LEAD AND ZINC PRODUCTS.—There have been no elements of weakness creep into the market this week. The prices are all well held on a firm basis and some activity is reported. Solder shows no change from figures prevailing last week and with tin and lead stiffer, solder may be expected to at least hold its own if it doesn't go higher.

Lead pipe, lb.	....	$0 12
Lead waste pipe, lb.	....	0 13
Lead traps and bends	....	Net list
Lead wool, lb.	..	0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	$0 35	$0 37
Solder, strictly, lb.	0 33	0 37
Solder, commercial, lb.	0 30	0 36
Solder, wiping, lb.	0 29½	0 32½
Solder, wire, lb.	0 40	0 45½
Zinc sheets, per lb.	....	0 20

Old Materials Maintain Dullness

Toronto.

OLD MATERIALS.—Dullness is the predominating influence in the market, no sales being made and no buying being done. Range of quotations for the week is unchanged.

Dealers' Buying Prices—		
Tea lead	....	0 03
Heavy lead pipe	....	0 04
Pipe scrap	....	8 00
Stove plate, per ton	....	10 00
No. 2 busheling	....	8 00

Old rubbers, boots and shoes	0 06	0 06¼
Overshoes, lumbermen's rubber boots	....	0 04½
Bicycle tires	....	0 04½
Automobile tires	0 03½	0 04.

Better Undertone to Ingot Metals

Toronto.

INGOT METALS.—There seems to be a better undertone to the markets and a more general trade is being done. Cop-

per seems quite firm and tin is also showing strength. Spelter is weak and antimony is similarly affected.

COPPER.—The market has firmed up on copper and there seems to be a little business offering. Stocks are not considered heavy by any means though they are ample. Quotations range around 18c per pound.

TIN.—The tin situation is showing greater strength and supplies are rather small. There is a very fair demand which is showing improvement and outlook seems brighter. Price is firm at 60c per pound.

SPELTER.—Stocks of spelter are very narrow but this has not proved a strengthening influence on the market, prices sagging ¼c and now ranging from 8¼c to 8½c per pound.

LEAD.—A better demand is apparent for lead, there apparently being more confidence in market situation as it exists to-day. The price is well maintained at 7½c per pound.

ALUMINUM.—Interest is still lacking with price only nominal at around 50c per pound. There is little commercial activity as yet.

ANTIMONY.—Dullness is revealed in the market on this metal. The price has dropped ¼c and is now quoted at 8¼c to 8½c per pound.

LONDON MARKETS

LONDON, March 20.—A number of important price changes have taken place, including declines on several lines. Sash cord, cotton rope, braided cotton lines, awning cord, seine twine have declined in price. Reductions have also occurred in the price of manila, hemp and sisal rope, corn house brooms, bit stocks, wood and jobbers' drills, blacksmiths' drills, fence staples, hooks, brassed iron rod, corn brooms, sad iron handles. Business continues fair in this district, and the outlook for spring is exceptionally good. Collections continue good.

Cotton Goods Decline in Price

London, Ont.

COTTON GOODS.—A decline of about 5 per cent. has taken place on cotton goods, and prices are now as follows:—

Sash Cord—No. 6, 71c lb.; No. 7, 70c; No. 8 to 12, 69c.

Cotton Rope—3-16 in., 69c lb.; ¼ in. and larger, 68c.

Braided Cotton Clothes Lines—50 ft., $4.35 doz.

Twisted Cotton Clothes Lines—30 ft., $2.40 doz.; 48 ft., $3.60; 60 ft., $4.50.

White Braided Awning Cord—No. 3, $1.85 doz. hanks; No. 3½, $2.10; No. 4, $3.35; No. 4½, $4.65.

Seine Twine—No. 18 and larger, 1 lb., 85c lb.; No. 18, ¼ lb., 80c; No. 15 and smaller, 1 lb., 86c; No. 15, ¼ lb., 87c.

Candle Wick—73c per lb.

Rope Goes to Lower Levels

London, Ont.

ROPE. — Another change in rope prices brings quotations down to a lower level. Prices are now as follows:

Pure Manila, 34c lb. base; British, 30c; New Zealand Hemp, 30c; Sisal, 27½c.

Corn Brooms Show 10% Reduction

London, Ont.

CORN BROOMS.—New and lower prices are now in effect on corn brooms. Quotations are as follows: XX, $7.00 doz.; 4 String, $7.75 doz.; Parlor, $8.75 doz.; No. 7, hardwood handle, $10.00 doz.; No. 8, hardwood handle, $11.00 doz.; Factory or Mill, $10.00 doz.

Stevens' Rifles Show 5% Advance

London, Ont.

RIFLES.—Stevens' rifles have advanced about 5 per cent. to the following levels: No. 14½, Little Scout, $5.75 each; No. 26, Crackshot, $6.75 each; No. 12, Marksman, $8.50 each; No. 17, Favorite, $10.50 each; No. 27, Favorite, $11.00 each; No. 70, Repeater, $17.25 each.

Fence Staples, Hooks Down 25c Per Hundred

London, Ont.

STAPLES, HOOKS, ETC.—A drop of 25c per 100 lbs. has taken place on fence hooks, staples, etc. New prices are as follows: Bright staples: kegs, $5.50 per 100 lbs.; 25 and 50 lb. boxes, $6.00 per 100 lbs. Galvanized staples: kegs, $6.25 per 100 lbs.; 25 and 50 lb. boxes, $6.75 per 100 lbs.

100 lbs.; 25 and 50 lb. boxes, $6.75 per 100 lbs.

NAILS.—No change. Wire, $4.95 base; cut, $5.35 base.

Miscellaneous Lines Advance in Price

London, Ont.

MISCELLANEOUS LINES.— Screen door catches have advanced in price and Marvel hangers are now $1.65 doz.; automatic, $1.35 doz.

Curry combs have advanced slightly, No. 04 are now quoted at $2.50 doz.; No. 4 at $3 dozen.

Drills Decline New Prices Issued

London, Ont.

DRILLS.—Reduced prices have been issued on drills as follows: Bits, stock drills, 45 per cent.; wood-boring drills, 45 per cent.; jobbers' drills, 40 per cent.; S. & D. blacksmith drills, 40 per cent.

Oil and Turps Remain Unchanged

London, Ont.

OIL, TURPS.—Linseed oil remained firm, and turpentine is unchanged. Oil prices are as follows:

1 to 2 bbls., raw, $1.67 per gal.; boiled, $1.70.

3 to 5 bbls., raw, $1.66 per gal.; boiled, $1.69.

6 to 9 bbls., raw, $1.64 per gal.; boiled, $1.67.

Less bbls. add 10c gal.

TURPENTINE.—1 bbl. lots, $1.03 Imp. gal. 2 to 4 bbl. lots, $1.02 Imp. gal. 5 gal. lots, $1.13 Imp. gal.

GLASS.—Single diamond, 25 per cent.; double, 25 per cent.; cut lights, 10 per cent.

PUTTY.—Standard, 100 lb. drums, $6.75 per 100 lbs.; 25 lb. drums, $7.00. Pure, 100 lb. drums, $8.75; 25 lb., $9.00.

WINNIPEG MARKETS

WINNIPEG, March 20.—Price changes for the past week again show numerous items of interest to the dealers, markets in general showing a decline, and affect the following lines: Pure manila rope, African hemp and British manila rope, Paris green, solder, wrought iron staples, snow shovels, furnace scoops and black iron sheets, while linseed oil, toboggans, Universal vacuum bottles, and duck decoys register advances.

Business in general is reported fairly brisk in all spring lines, while stocks are reported to be well assorted.

Further Reduction On Black Sheets

Winnipeg.

SHEETS.—Following the reduction in the price of galvanized sheets new prices have been announced on black sheets which show a further reduction of 50c per 100 pounds over former quotations, making to-day's selling prices f.o.b. Winnipeg as follows: Black iron sheets, 28 ga., $8; 26 ga., $7.90; 24 ga., $7.85; 22 ga., $7.85; 20 ga., $7.80; 18 ga., $7.80; 16 ga., $7.25; 14 ga., $7.15; 12 ga., $7.10; 10 ga., $7.05 per 100 pounds.

Rope Prices Show a Decline

Winnipeg.

ROPE.—Prices have again registered

a decline during the week, falling off 3¾c per pound on pure manila and 3c per pound on British manila and African hemp. No cause is given as to the decline as indications for some time past have pointed to firm markets. Prices ruling to-day on the various grades are given as follows: Pure manila rope, 35¼c base; British manila rope, 31¼c; African hemp rope, 31¼c; sisal rope, 28½c; lath yarn, 28¼c.

Oil Moves Up; Turps Unchanged

Winnipeg.

TURPENTINE. — Prices show no change on the local market during the week although reports from the south would indicate that supplies will be adequate owing to the lack of export business, and Eastern markets in some cases show lower prices. To-day's Winnipeg markets are as follows: Barrels, per gal., $1.25; ½ barrels, $1.28; 5-gal. lots, $1.30; 1-gal. lots, $1.30, plus usual extras for containers. Linseed oil prices moved up 5c per gallon on the local market duing the week, to-day's prices being $1.85 per gal. for raw, and $1.88 for boiled in barrel quantities, while the demand is below normal.

Prices Are Out For Toboggans

Winnipeg.

TOBOGGANS.—New prices have just been established on birch toboggans for fall delivery, based on costs received from manufacturers which show an advance of approximately 10 per cent. over former quotations, which makes to-day's selling prices as follows: 4 ft., $2.70; 5 ft., $3; 6 ft., $3.60; 7 ft., $4.20; 8 ft., $4.80. Among other lines released for fall booking appears large calibre rifles, shot guns, baby cutters, sleighs, etc., prices of which may be had on application.

Paris Green Prices Show Reduction

Winnipeg.

PARIS GREEN.—Prices on Paris green which are established by the manufacturers have just been announced and show a substantial reduction over last year's prices, the reduction being approximately 17c per pound. Prices now in effect are given herewith: Barrels, about 600 lbs, 49½c per pound; kegs, about 250 lbs., 50c; 50 and 100 lb. drums, 50½c; 25 lb. drums, 51½c; 1 lb. pkgs., 100 in a case, 53½c, ½ lb. pkgs., 200 in a case, 55½c.

Copper Goods Prices Are Revised

Winnipeg.

COPPER GOODS.—Some revisions have been made in the prices on copper and coppered rivets over last week's prices, to-day's ruling prices being as follows: Copper rivets and burrs, assorted, No. 8, 68c: No. 10, 73c per pound; copper rivets only, No. 7, 60c; No. 8, 61c; No. 10, 66c; No. 12, 71c; copper burrs only, No. 7, 60c; No. 8, 61c; No. 10, 66c; No. 12, 71c; coppered iron rivets and burrs assorted, No. 8, 31c;. No. 10, 33c; coppered iron rivets only, No. 8, 34c; No. 10, 36c; coppered iron burrs only, No. 8, 34c; No. 10, 36c.

Solder Shows a Further Decline

Winnipeg.

SOLDER.—Prices on half and half solder again register a decline of 4c per pound during the week, due to drops in the tin market, but indications point to steadier, if not higher prices in the near future. To-day's ruling prices are given as follows: Half and half solder, full cases, 36c per pound; less than cases, 37c per pound. Prices on wrought iron staples have been revised to lower levels during the week, based on new prices from manufacturers.

Advances on Decoys and Vacuum Bottles

Winnipeg.

VACUUM BOTTLES, DECOYS.—Based on new costs from the manufacturers a further advance is recorded on Universal vacuum bottles which move up approximately 20 per cent., making to-day's selling prices as follows: No. 21, $2.40; No. 22, $3.85; No. 61, $2; No. 62, $3.40; No. 71, $2.65; No. 72, $4.10; No. 81, $3.60; No. 82, $5.50; No. 91, $3.85; No. 92, $5 each. Lunch kits, No. 310, $3.85 each. Extra refills, 1 pint, $1.65; 1 quart, $2.65 each. New prices have been issued this week on duck decoys, which show a moderate advance over former prices due to higher manufacturing costs. Bookings for fall are being solicited by the jobbers at the following figures: No. 1, $10.50; No. 2, $10; No. 3, $8.50; No. 4, $12 per dozen.

Furnace Scoops, Snow Shovels Lower

SCOOPS, SHOVELS.—Furnace scoops and snow shovels have been revised to lower levels during the week, new prices received from manufacturers showing a considerable reduction. To-day's revised prices are given herewith: Snow shovels, No. 16, $13.50; No. 18, $10.80; No. 20, $8.10 per dozen. Furnace scoops, No. 3, $9 per dozen.

PITTSBURG MARKETS

PITTSBURGH, Pa., March 20.—As noted in last report the steel industry in February operated at the surprisingly high rate of about 84 per cent. of capacity. Operations have of course been tapering off, but they may be estimated this week at fully 75 per cent. of capacity. Some of the plants are aiming to run full, so as to keep down overhead and operating conditions prove so favorable that tonnages are large. This is advantageous from the cost standpoint but it is somewhat embarassing, particularly to sales managers. The only mills that can do this, of course, are those that are in position to stock a portion of their output, but some mills that have storage facilities do not use them.

Steel Corporation Obligations

It is strongly intimated in well posted quarters that the Steel Corporation, whatever may be the case of the independents, is fairly well fortified to run at a moderate rate for several months to come, on its old orders. It is asserted that all the cancellations necessary by reason of the war ending have now been made and that the monthly report of "unfilled tonnage" will no longer reflect any such cancellations. If all is true the corporation is in distinctly stronger position than the independents. Its last report showed that at the end of February there was 6,010,787 tons of unfilled obligations on books. There had been a decrease in three months from the 8,124,663 tons reported at the end of November, or a trifle over 2,000,000 tons. One would have supposed, last November, that the ending of the war would cause the cancellation of about one-quarter of that tonnage, but such a tonnage would represent approximately the total decrease that has since occurred. If one accept such a view, therefore, he has to admit that the new bookings in the three months were about equal to the shipments, which may be estimated at 3,500,000 tons. That any such high rate of booking actually occurred, however, is very doubtful, considering how very dull the market was reported to be during much, if not all, of the period.

Meeting Postponed

The trade has expressed much regret at the postponement of the meeting that was to have been held March 13 between the Industrial Board and the general committee of the iron and steel industry. Hopes had been entertained that at this meeting a basis for price deflation would be reached so that the iron and steel trade, buyers and sellers, would have an opportunity to go ahead. The postponement was due to Judge Gary's illness, his presence being regarded as absolutely essential on account of his recognized fairness and his ability to detach himself from personal and immediate trade interests. The Industrial Board, however, has evinced no impatience at the delay, and indeed has made the statement that it expects to get through with its price deflation work in 60 to 90 days, this including lumber, brick and various building materials, besides iron and steel.

Markets Dull

The pig iron, unfinished steel and finished steel markets have been particularly dull in the past week and indeed in the past fortnight. It seems that while all buyers had previously been pursuing a hand to mouth policy in buying, they were able to display fresh powers of waiting when it became ap-

parent that prices would probably be reduced, and materially reduced, by April 1 if not sooner.

In the case of pig iron there is not enough inquiry to test the market, as a rule. In many quarters it is believed that all that is needed to bring down the price of a given grade of pig iron in any district is for a fairly good sized order to be offered to producers, whereupon one or another would cut the recognized price. Such inquiry, however, is lacking, save for occasional exceptions. As noted in last report, some valley furnaces had quoted $28 or less at furnace for No. 2 foundry iron, or $3 a ton under the previously recognized price, and making foundry iron quotable at $28, valley. Meanwhile, however, nothing has occurred in Bessemer or basic in the local market, and these grades are still quotable nominally at $32.20 and $30 respectively, at furnace. Reports from Chicago, however, are to the effect that a sale of a good sized tonnage of basic iron was made at $25, Chicago furnace, or $5 a ton under the previously recognized price. The story is that the buyer is a wire interest, with steel mill but no blast furnaces, so that it was able to offer an order of tonnage importance.

In finished steel products there is not enough business going to test prices, but it is commonly assumed that the mills, save in exceptional cases, would not cut prices in order to obtain business, as such a procedure might interfere with the price deflation program that is to be carried out in connection with the Industrial Board at Washington. Naturally it is greatly desired that when prices are reduced the new reduced prices shall hold well. There are of course some exceptions, it being reported, probably correctly, that plates have sold at $2.85, Pittsburgh, that being $3 a net ton under the recognized quotation.

Improving Sentiment

While steel producers are usually quite blue when they are not effecting large sales and the mills are not falling behind in deliveries, there is a greater note of hopefulness among producers, and as to buyers they are not pessimistic by any means. Some are now found who assert positively that they are prepared to place good sized orders if there are reasonable reductions in prices. It is now felt in many quarters that the bearish sentiment has run altogether too far, that the country has been disposed to cry out before it was really hurt, and that with a moderate amount of readjustment in prices business can be resumed on a good scale. One impressive fact is that the country has been taking so much steel since the armistice was signed, when apparently there was little consumptive demand. If so much steel is required when there is little activity there ought to be much more needed when business conditions are really good.

There is much less talk than formerly about the necessity for wage reductions and indeed it is far from probable that there will be any general wage reductions in the next few months. Indeed, the idea in some quarters is that by reason of four years' cessation of immigration already, with no prospect of its being resumed and rather with prospects that possibly a few hundred thousand workmen will leave the country to join the new republics being set up in the interest of their races in Europe, labor will be able to command very high rates right along. It is admitted with somewhat more frankness than formerly that manufacturers' war time profits will have to be greatly reduced.

As to labor, furthermore, there has been a great improvement in that labor is much more efficient. Better work is being secured for a day's pay, and various frills, premiums, etc., are being cut off here and there, so that while general wage rates have not been reduced, labor costs have shrunk very materially at many plants.

Ontario Farmers to Do Three Million Business

Expect That the Total Retail Business During the Year of the Farmers' Co-operative Company Will Reach This Figure
T. P. Loblaw, of the Loblaw Stores, Toronto, Appointed General Manager

THE Farmers' Co-operative Company, Limited, the merchandising end of the organization of the United Farmers' Association of Ontario, has come under the general management of T. P. Loblaw, the founder of the Loblaw Stores, Toronto, who will have the complete direction of the campaign to put this department on a thoroughly business-like basis. Mr. Loblaw, when seen by HARDWARE AND METAL at the association offices, King street, Toronto, stated that he was just taking up the work and had taken no definite steps as yet. He anticipated, however, that the thirty thousand members of the United Farmers would all be interested in the undertaking, and he estimated that the Farmers' Co-operative Company would, during the current year, do a business totalling three million dollars.

Will Be Fair Competitor

"The idea behind the organization," he stated, "was not to sell the farmers goods at figures below those of the general retail stores. As a matter of fact, the farmers' clubs that are the nucleus of the organization may buy through the company in any quantity that they may require, but, irrespective of quantity, the goods will be delivered at the regular retail price. In this way, the company, while directly competing with the local retail stores, claim to be doing so on an eminently fair basis. Where the farmer profits is in this, that he, as a member of the United Farmers' Organization, is one of the partners in this business, and as such shares in the yearly distribution of the profits made by the Farmers' Co-operative Company. These profits will be divided among the various farmers' clubs in proportion to their buying during the year, and these profits in turn will be distributed to the individual farmer."

A Mercantiling Company Also

The only incentive that the company is offering to the farmer members, according to Mr. Loblaw, is the fact that this is their own organization, that the profits, if profits there be, are theirs, and that the company stands ready to serve them at all times. The farmer can write in, to buy groceries, to sell any products of the farm, or to purchase binder twine, or even a binder. It is, Mr. Loblaw stated, the intention of the company to act as an intermediary for the farmer. To buy for him what he wants to buy, no matter what these needs may be, whether groceries, hardware or machinery, and to in turn handle the goods that the farmer has to sell.

To meet the needs in this latter department there has already been established a branch at the Toronto Union Stockyards, where an official of the company is always in charge. Live stock is shipped direct to this official, and regular account sales of the transaction are made to the shipper, the company deducting the usual selling commission. At the end of the year, such profits as accrue will be distributed as above stated.

There is also the matter of produce, that it is the intention of the company to handle when they can do so advantageously to the farmers. This may in a measure affect the business done by the general store, Mr. Loblaw admitted, but he did not believe that it was a business that the general merchant would greatly regret to lose. In any event, as in other activities, they intended to work on a strictly legitimate competitive basis.

In response to a question as to how the company expected to keep their proposition before the farmers, Mr. Loblaw stated that they had for some time past been sending out a bulletin containing such information. With the taking over of the "Weekly Sun" by the United Farmers, however, it was his intention to make the fullest use of this medium, in presenting the case of the Farmers' Co-operative Company. In this way he believed that it would be possible to present the case in a way that would make the proposition attractive.

Mr. Loblaw took over the management of the company on Monday last. He expects to leave next week for Winnipeg to investigate the workings of farmers' organizations in the West in order to get a sound foundation on which to operate.

Buying is Restrained Pending Outcome of Price Conference

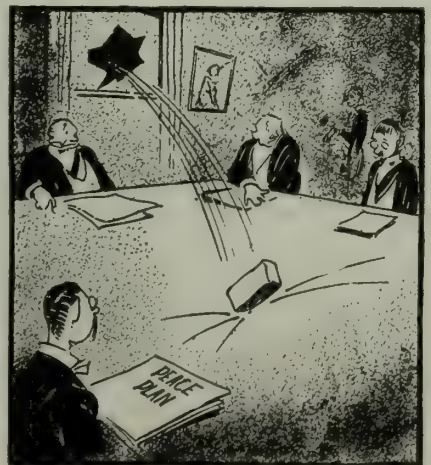
Cleveland, Ohio, March 20.—The "Iron Trade Review" to-day says:

While an expectant market awaits the outcome of the price conference at Washington, iron and steel buying continues along exceedingly restrained lines. Buyers, with few exceptions, throughout the past week have carried out their policy of declining to make purchases at the prevailing quotations unless they were allowed satisfying concessions. On several sides these inducements have been forthcoming. The total turnover has remained exceedingly small. Most producers have preferred to await their chances on closing business until after the opportunity for a concerted and orderly readjustment of prices had been availed.

The sharpest illustration of any discounting on the part of producers of deep cuts in finished steel prices has been shown in the Chicago district. Certain makers there have restored a Chicago base price of 2.70c in steel bars. This represents a concession of the Pittsburgh freight or $5.40 per ton. On structural shapes the price has been $2 below the Pittsburgh freight differential, a net reduction of $7.40 per ton. In plates shading has been only $3 per ton. On forging billets, quotations $17 lower have been encountered. A better and more clearly defined outlook for new tonnage to follow a substantial lowering of prices is appearing. Railroad interests are showing a greater desire to release needs long held back and the formulating program on the part of the railroad administration for financing the requirements of these systems in an accompanying development of favorable character. It is believed that if satisfying prices will be put out, large orders for rails, cars and locomotives may be expected. In various districts new structural steel demands have been coming out more freely this week. Automobile plant extensions have figured conspicuously in these. Actual export business continues to expand, but ship space still remains a regulating factor. South America closed in the week for 15,000 tons of railroad material. Other new sales include 1,000 tons of tin plate to Brazil, and 2,500 boxes of tin plate and 800 tons of bars to Japan. China wants a considerable tonnage of railroad material and Belgium 3,000 tons of plates. Steel, which has been held up in New York warehouses awaiting transportation, now is being cleaned up more rapidly, especially for South America and for certain Far Eastern destinations. A contract has been closed for transporting 300,000 tons of ship material to Japan over the next 10 months.

REGINA R.M.A. FAVORS EARLY CLOSING

The Regina local branch of the Retail Merchants' Association at a meeting this week went on record as favoring the closing of all retail stores at six o'clock every evening, including Saturdays, the year around. There was a large representation of all trade sections and the vote in favor of early closing received unanimous support. The resolution provides for a Wednesday half holiday during the months of June, July and August, and exempts the evenings of the week preceding Christmas.



In favor of the resolution it was pointed out that public sentiment was fast crystallizing into an active sympathy for clerks and salespeople who have to stand on their feet through the rush of a fourteen-hour day once a week. Retailers, it was stated, had previously hesitated making any radical change in shopping habits, believing that a portion of the community valued the privilege of Saturday evening shopping. Recently, however, customers have become outspoken in the belief that storekeepers should feel at liberty to do what they think wise for the improvement of conditions in their own stores.

Petitions will be circulated at once among the retail stores of Regina, and the hope is expressed that these may be signed universally, in order that Regina may lead the way in establishing as a general by-law such a desirable condition for the workers in retail trade.

SASKATCHEWAN R. M. A. CONVENTION TO BE HELD IN MAY

Arrangements are being made for the annual convention of the Saskatchewan Retail Merchants' Association which is to be held in Regina May 13, 14 and 15. This convention is of national importance from the standpoint of the trade as it will see the first step taken in the movement to provide something in the nature of a merchandising course of lectures and training for the use of the merchants and their associates.

The convention will be one of the most important in recent years. The program has not yet been announced, but is now in the course of preparation. There will be speakers of international fame and the program throughout will be of such a character as to appeal in the strongest manner possible to all the merchants coming within the scope of the association's activities.

The delegate from Ireland sends in his card.

SCALE MANUFACTURERS ARE NOT REDUCING PRICES

At a meeting of the Canadian scale manufacturers held in Montreal to discuss trade conditions generally it was decided to make no reductions in prices. High cost of production, especially for skilled workers, was the big factor which had to be taken into consideration in arriving at this decision. Wages are the largest item entering into the manufacturing cost of scales. Business in general was reported as good and there are prospects for some export business.

AWARD MADE IN SCALE CASE

Judge Landis, in the United States District Court of Illinois, according to report, has awarded $420,883 in profits to the Computing Scale Company of Dayton, Ohio, against the Toledo Computing Scale Company of Toledo, Ohio, for infringement of patent. The case has been in court since 1910. It has been through the Court of Appeals and was sent back to Judge Landis for the award in the accounting of profits.

Master in Chancery, Charles B. Morrison, had the case before him for three years in arriving at the sum to be awarded to the Computing Scale Company of Dayton, Ohio. The plaintiff charged the defendants with infringing their patent on the drum-shaped scales, the scale, they claim, that is used by the majority of the retailers of the United States.

The Toledo Scale Co., Toledo, Ohio, in connection with the above, maintain their contention is correct and that an appeal has been taken to a higher court, where they believe they will gain release from the judgment of Judge Landis. They further state there is no liability attached to users of their scales.

APPOINTED MANAGER OF THE AMERICAN CAN COMPANY FOR CANADA

T. N. Anderson, formerly district manager of the Canadian business of the American Can Co., has been appointed general manager for Canada with headquarters in Hamilton, Ont. The company feel that their business in Canada now requires an executive head in direct personal contact with its affairs, and Mr. Anderson was selected to fill the position on account of his knowledge of conditions here and the work he has done as district manager.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, March 20.—Linseed oil is again the centre of attraction in paint markets, it having moved up 1½c to 2½c per gallon. There is no guarantee of the basis remaining at the present figure for any length of time, and some anticipate further increases, the flax market ruling very high and being of an advancing nature.

Turpentine is also on the move to higher levels. Some have raised their prices, and the base quotation at this writing is $1.05, with a higher price probable ere long.

Putty is steadily firm and paints and varnishes are likewise holding steady. There is a firm basis for white lead in oil. Taken all through, the volume of business is reported very satisfactory.

New Advances For Linseed Oil

Montreal

LINSEED OIL.—Flax markets are still on the upward trend and this has resulted in a higher basis for linseed oil. At this writing quotations are based at 1½ to 2½c higher than the prices of last week, and with the sparse delivery of Argentine seed there is no telling what prices will be from day to day. There is every indication at this writing of higher prices being attained, flax quotations changing frequently. There is a fair amount of business passing.

Raw, Imp. Gallon—		
1 to 4 bbls.	$1 60	$1 65
5 to 9 bbls.	1 59	1 65
10 to 25 bbls.	1 58	1 65
Boiled, Imp. Gallon—		
1 to 4 bbls.	1 62½	1 67½
5 to 9 bbls.	1 61½	1 67½
10 to 25 bbls.	1 60½	1 67½

Turpentine Firmer; Range Narrowed

Montreal

TURPENTINE.—The range has narrowed and base barrel price is $1.05. There is a strong market here and the tendencies are of a decidedly firming nature. It will not be surprising if new high prices are made before the end of the week, for there is a growing scarcity of supply with export conditions from the southern producing areas to England more favorable, and an insistent demand from the latter point for supplies. Present indications point steadily upward.

Turpentine—		Imp. gal.
1 to 4 barrels	$....	$1 05
Small lots	1 07	1 17

(Packages extra).

Putty is Firm With Oil High

Montreal

PUTTY.—While there has been no quotable change, putty is steadily firm under the influence of higher linseed oil. Whitings used in its manufacture are also none too plentiful, and the result is that no lower price basis is anticipated. Sales are moderately fair.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Firm Undertone on White Lead in Oil

Montreal

WHITE LEAD IN OIL.—The market is ruling with a considerable steadiness. Deliveries of lower-priced pig lead will not have any immediate effect upon prices now, the corroders point out, for it will be many weeks before these supplies are corroded. There also has been much activity, and orders have come in well. Linseed oil prices will have a firming effect, but it is not anticipated that prices will move above the present basis. This is: for five ton lots, $15.50; ton lots, $16; and small quantities, $16.35; all prices per 100 lbs., and for standard grade.

Signs of Spring In Paint Movement

Montreal

PAINTS, VARNISHES.— Indications point to an early activity in painting. Actual reports to HARDWARE AND METAL are to the effect that orders received total large, and show increases over the same period of a year ago. This should inspire confidence, and it would seem that the dealer who goes after paint orders will get them, and the sooner the better.

Prices remain firm, both on mixed paints and varnishes, and there is little likelihood of changes being made.

TORONTO

TORONTO, March 20.—Firm prices for linseed oil with a noticeable increase in the volume of business feature this week's market. Dealers' stocks are low, it is stated, and are being cleared out rapidly. Another factor in increasing business is that the paint manufacturers are now drawing on the crushers for considerable quantities of supplies. Seed values are keeping up, and as there is little coming in, with many buyers for what is offered, prices are expected to remain firm.

A four cent advance in the price of turpentine with indications that there may be further advances shortly has followed the lifting of the restrictions imposed by the British Government. Large shipments have already commenced to overseas ports. A noticeable improvement in the general volume of business is reported due to the activity with which the spring trade is opening.

Linseed Oil is Showing Firmness

Toronto.

LINSEED OIL.—While considerable variation in price is given by various dealers, all report a firm market without the slightest indication of any reduction being likely in the near future. There is a heavy demand for seed with little coming in to meet it. A good deal of seed from the Argentine is moving to British and European ports, and an increased volume of overseas business is expected. As far as Canadian export business in oil is concerned, it is reported there is a good demand. Seed values at all points remain firm. Dealers are unanimous in expressing optimism over the business outlook. Orders are coming in steadily they say. Some firms expect that a slight advance in price may be made before long. The range of quotations is as follows:

Linseed Oil—	Raw	Boiled
1 to 2 barrels, gal.	$1 72	$1 80
3 to 5 barrels, gal.	1 71	1 79
10 bbls. and over	1 69	1 77
	Boiled	Imp. gal.
1 to 2 barrels, gal.	$1 63½	$1 83
3 to 5 barrels, gal.	1 62½	1 82
10 barrels and over	1 60½	1 80

Prices shown are those ruling on Thursday of current week and subject to daily fluctuations of the market.

White Lead in Oil Remains Unchanged

Toronto.

WHITE LEAD IN OIL.—Firm prices for linseed oil have not yet resulted in

any changes being made in quotations for white lead in oil, and manufacturers state that there is no reason to expect any immediate changes. Just what may happen if European demands for linseed oil continue to show a steady increase they are not prepared to say. In the meantime quotations are as follows: Pure white lead in oil, $15.80 per hundred pounds in 5-ton lots; $16.30 per hundred pounds in ton lots, and $16.65 per hundred pounds in less than ton lots. The various brands are shown in the current market quotations.

Increased Activity In Mixed Paint Trade

Toronto.

MIXED PAINTS.—Prices in mixed paints show no change. The volume of business however is showing a most satisfactory improvement. It is expected that with favorable spring weather from now on this will be maintained, especially as a great deal of building is getting under way in all parts of the Dominion. As far as prices are concerned little alteration in the present figures is expected. Considerable business has been handled in the past week or two in wall finishes. As a seasonable line, activity in these lines is expected to continue from now on. Manufacturers state there is nothing to indicate that price changes are coming.

4-*cent Advance in Prices of Turpentine*

Toronto.

TURPENTINE.—An advance of four cents in turpentine features the market this week, due to the raising of the British embargo, heavy shipments overseas and news from the South regarding the effects an exceptionally wet season are having on the production of the new crop. No new shipments are coming to hand while the stocks at present held are moving steadily. There is every indication, it is stated, that the turpentine market will be very firm for the next sixty days and perhaps for even a longer period if weather conditions in the South continue unfavorable. The market advance commenced on Wednesday and some dealers believe there will be an upward tendency for some time. They report a steady volume of business. Quotations to-day show advances of 4c. making the price $1.06 per Imperial gallon in single barrel lots:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1 07
2 to 4 barrels (barrel included)	1 06
5 gallon lots	1 17

No Variations Shown in Glass or Putty Prices

Toronto.

GLASS, PUTTY.—Market quotations on window glass show no variations this week. Business has been fairly quiet but there are evidences of improvement. The discounts are shown in the current quotations.

No changes in prices of putty have been made. Quotations are as follows:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

EUROPEAN GLASS SITUATION

Considerable uncertainty exists in the minds of the Canadian trade, according to J. W. Hobbs, of the Consolidated Plate Glass Co., as to the present condition of the glass industry in Europe and the possibility of its very shortly resuming its export trade. So far as plate glass is concerned, these works are few in number and those which were not destroyed, were entirely dismantled. This industry being a machine industry, cannot be re-established quickly, and it may be taken as almost an assured fact that no European plate glass can be exported to Canada in 1919.

The window glass situation is somewhat different by reason of the fact that in Northern France and Belgium, where these factories were located, it is exclusively a labor industry and not a machine industry. The plants there are many in number and small in size. On the whole, they have not suffered as severely as was anticipated, but are more or less in a state of dilapidation by reason of four and a half years of inactivity. The difficulty in putting these plants into occupation exists in the absence of skilled labor, as many of these workmen have been killed and many others have left the scene of their former occupation. Railway sidings and other methods and means of transportation were removed by the Hun, and transportation facilities in this area were destroyed except such as were needed for military purposes. Soda ash requires to be brought from England and lumber from Norway, and other raw materials are difficult to get. In a survey of the situation made by the Banque Centrale of Antwerp, and based on the information received from several of the largest pre-war manufacturers of window glass, it is stated that transportation is far from being reestablished, and the restoration of the industries will rest with the Belgian Government and that of the Allies. Whatever productive capacity remains available in a very limited degree is manufacturing for the French Government, and it is scarcely possible that there will be any Belgian glass to export before the fall of 1919 at the earliest, and it is questionable if such glass will arrive in Canada for the fall trade, and until such time as Belgian glass can come into this market in substantial quantities, there is scarcely likely to be any alteration in the U. S. price to Canadian buyers.

ACTUAL BUSINESS DENOTES HEALTHY CONDITIONS

"There is activity all along the line, and this is taking the country in a general way. There is a good healthy increase, both in volume of business and in gallonage," said W. S. Fallis, managing director of the Sherwin-Williams Company of Canada, Limited, to HARDWARE AND METAL.

"We have every confidence in the future," continued Mr. Fallis. "There is nothing to warrant any but the greatest confidence in business conditions, and in every unit of our organization, this is justified, increases being made all through."

Mr. Fallis stated that there was no false optimism underlying his feeling regarding the outlook. Actual results have been of the most encouraging nature, and with the increased volume of business coming to hand it was possible to look into the season ahead with every hope that conditions would be satisfactory. Much would depend upon the individual having a faith in himself and in a growing condition in his own territory. It was quite the time for exercising a real, rational, hopeful outlook, and the results would take care of themselves.

In speaking of the tendencies for both mixed paint and varnishes, Mr. Fallis supported his expressions along this line, as already made. He said: "Instead of any weakness in price, nearly every day shows advances for some commodities in the raw state. There have been some minor changes in a few lines, but the increases have been many.

"Speaking of varnish, the market has been very high, and gums are especially so. Many of the ingredients are much higher than they were a year ago. On the other hand, there is a better basis for China wood oil, and this is because the great demands for war purposes are now past. With this relief there is a little better price basis than formerly. But in a general way we are trying to keep prices in this line down, even though it is costing more to make varnishes."

In speaking of labor outlay, Mr. Fallis stated that wage sheets were much higher than they had been last year, and that the totals were considerably in excess of the same period a year ago. "We do not feel that there is any justification in interfering with wages so long as living costs remain high, as they are to-day," said Mr. Fallis.

D. A. MACNAB SELLS INTEREST IN ORILLIA BUSINESS

D. A. Macnab, of Macnab Bros., Orillia, has disposed of his interests in the business to his brother, C. L. Macnab, and the business will continue under the name of Macnab & Sons. D. A. Macnab is a past president of the Ontario Retail Hardware Association.

Catalogue No. 21 issued by the Bonney Vise and Tool Works, Inc., of Allentown, Pa., contains sixty pages in which are listed the full lines of wrenches and vises made by the company. The catalogue is most attractively illustrated. Copies will be supplied to readers of HARDWARE AND METAL who are interested.

CURRENT MARKET QUOTATIONS

These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.

Stephens'
REGISTERED TRADE MARK

Paints That Sell!

"That's Satisfaction"

Stephens' Paints satisfy the dealer in an abundance of repeat orders.

Stephens' Paints satisfy the customer because—they are easily applied—cover much surface and are remarkable in their wearing qualities.

Used by wise consumers and sold by live dealers.

Our standard of uniform, high quality ingredients, our most careful process of manufacturing and our exacting tests have made possible the **Stephens' Guarantee.**

A Stephen's Agency will mean more paint sales and greater profits for you. Write us for particulars.

G. F. STEPHENS & CO., LIMITED

Paint and Varnish Makers

WINNIPEG AND CALGARY

In The SPRINGTIME

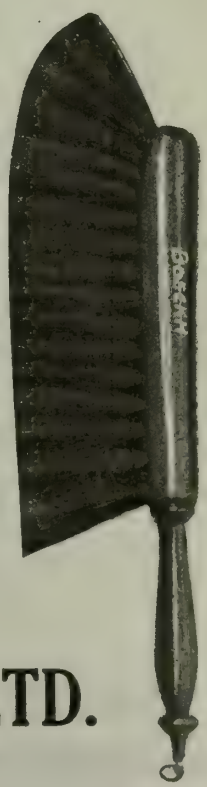
BOECKH'S

HOUSEHOLD BRUSHES and BROOMS

Boeckh's Brushes and Brooms have earned their reputation.

Year after year thousands of practical housekeepers buy Boeckh's Brushes for one reason—and only one—Boeckh's cannot be equalled for service, satisfaction and length of wear.



The name "Boeckh" is backed by sixty years' experience in the manufacture of brushes and brooms.

STOCK and display Boeckh's Brushes. The selling season is at hand and the demand will be increased by our national advertising campaign.

Remember, we are willing and ready to co-operate with our dealers in every possible way to make more Boeckh Sales.

THE BOECKH COMPANY, LTD.

TORONTO CANADA

Extravagant Statements?

DISAPPOINTMENT and failure go hand in hand to meet the Dealer endeavoring to increase sales through Extravagant Statements.

The days of unwarranted claims and extravagant statements are over. The public knows what it wants. Goods are judged on their merits.

"Moore's Paints and Varnishes sell on their merits."

Back of every Dealer with a Moore Paint Agency there is one of the largest Paint and Varnish Manufacturing concerns on the American continent, and a product that takes second place to none.

The proof of this assertion is conclusively evident in the rapid and steady growth of the Benjamin Moore Company since its inception 30 years ago.

During the trying period of unusual war conditions our business increased 100 per cent. A substantial increase of paint and varnish sales to dealers selling to consumers, and not war-contract business. Another proof of the confidence in our ability to meet the public demand for High Grade Paints and Varnishes.

We feel proud of the favor our products have won with the public.

Benjamin Moore

A Challenge!

THE three fundamentals upon which Moore's Paints and varnishes are constructed and which has enabled them to give a maximum efficiency are—Durability, Covering Qualities and Appearance.

For some time we have been throwing out our "Acid Test Challenge" and the fact that no one has taken it up proves that our paints are known to be the equal of any paint on the market.

ACID TEST

We understand there are some of our friends who make the statement that "Moore's House Colors are a second grade paint." We are perfectly willing to paint the outside of a house with our paint, providing those who claim our Paints are inferior will paint the outside of a similar house, under similar conditions, with the same quantity of their paint, and if Moore's House Colors do not stand up as well as theirs, we will pay for the painting of both houses, providing of course, that they agree to do the same thing.

This *Acid Test* still stands to protect the Public, our Dealers and Ourselves.

The quality of our products remain unchallenged. The Dealers' interests command our first consideration.

We are formulating plans for greater things in the future. We anticipate even greater successes. Do you desire a share in them? We believe you should.

Lowe Brothers Paints

Don't expect your customer to think of everything he needs while in your store

—A casual suggestion from you may lead to a substantial paint sale.

YOU can be reasonably certain that every man who comes into your store has more or less need of paint for his house or his barn, silo, farm implements, or his fences, wagons, carriage or automobile. But he does not ask for paint because he does not realize he needs it until you suggest it, or he sees his neighbor painting.

To greatly increase your paint sales, make it a point when you are serving a customer to inquire about his paint needs.

Of course, your suggestion, to be successful, should be seasonable.

For instance, this is the best time of the year for the repainting of autos and carriages. You know who have automobiles or buggies. Lowe Brothers' Auto-Gloss will make them look like new. A little reminder to these people when they come into the store may be all that is necessary to sell them.

The same with floor paint. This is the best time to paint floors—before the muddy days of spring. Walls and ceilings should be painted now, before the outside of the house is done.

Suggest Lowe Brothers' "Hard Drying" Floor Paint and "Vernicol" for the floors; "Vernicol" and enamels for the woodwork, and our beautiful "Mello-tone" for walls and ceilings.

Another thing—this is only the beginning of the painting season, and these little reminders to your customers will not only increase your paint sales, but may keep your customers away from your competitors who might have the foresight to suggest their own brands of paint.

A glance over your paint shelves will be all that is necessary to give you and your clerks some pretty good selling ideas.

BUY W-S-S WAR-SAVINGS STAMPS

DA-COTE means an enamel which dries in one day. "Paint it this afternoon—run it out new to-morrow" is the DA-COTE slogan.

This broad band is the color of the contents of the can. An aid to customer and salesman. A most attractive package. "The label shows the color."

Motor Car Enamel is your big opportunity for spring. Several thousand cars need painting and most owners will paint their own cars in this economy year.

OUR NEW PRODUCT IS READY

For months, our chemists and varnish experts have been perfecting Da-cote. Back of those months of special effort is over fifty years' experience in making the finest of materials for finishing coaches and automobiles.

Da-cote is designed for the amateur or professional painter. It flows on smoothly, leaving no brush marks, and dries over night. It produces a fine, hard, glossy elastic finish which will withstand exposure, dust and washing. Da-cote is furnished in black, white, and eight standard shades.

Da-cote is being heavily advertised in all the leading magazines. There is bound to be a big demand for it.

Prices, discounts, and terms competitive with other lines of motor enamels.

Write or wire collect for 10 gallon standard assortment together with window displays and dealers' helps. The season is on—every day lost may mean lost sales.

A Quality—economy trade mark

IN all wood finishing operations the matter of durability should be carefully considered by the varnish buyer, as upon this depends the ultimate cost to the user.

The question is not only how the finish will look, but how long will it last.

The long wearing period of Berry Brothers' Varnishes, Enamels, and Stains permits economy without any sacrifice of beauty or utility.

The "Berry" trademark is a valuable sales help for the dealer because it is so widely known and trusted by all varnish buyers.

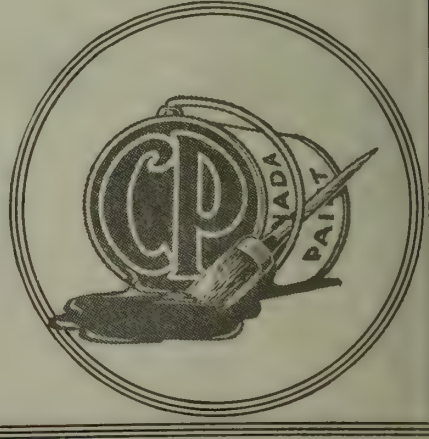
Your Contented Customer

The woman who uses Canada Paint, C. P. Varnishes and C. P. Sun Varnish Stains about the house is the contented woman—your contented customer. She cannot praise these splendid house-cleaning helps enough—she tells all her friends and neighbors how she has given another lease of life to that old hardwood floor, or this cabinet or that chair—how easily and quickly it was done.



She is especially active each Spring, making her home immaculate with spotless new paint—tearing down old wallpaper, tinting her walls with the velvet-textured Sanitone, brightening up the radiators and other things with aluminum and gold paint—getting hints from our Free Decorative Service.

Canada Paint Lines

have proved their worth to her. They will prove their worth to many *new* customers this Spring.

How are your stocks? Have you a good supply of Canada Paints, C. P. Sanitone, C. P. Homestead Liquid Red, C. P. Varnish, C. P. Sun Varnish Stains, etc.?

There is no time like the present to secure for yourself all the benefits derived by pushing the Canada Paint Lines.

The Amazing Story of an Amazing Success

How Men Were Turned from Skeptics to Boosters

"SOME people have said 'There's nothing new under the Sun,' but I want to tell you that what I'm showing you IS new. No one in this room ever saw its like before!"

The speaker of the above words stood in the auditorium of the Royal Connaught Hotel in Hamilton. He threw out his challenge boldly. He held a place of prominence on a slightly raised platform in the end of the great room.

In the exhibition room the speaker's eyes flashed with enthusiasm as he noted the intense interest on the faces before him. In one hand he held a highly-varnished panel of wood, finished in its natural color; in the other hand he held an ordinary paint brush. He punctuated his remarks from time to time by passing the brush with a single stroke down the glossy surface of the wooden panel in his hand. Every stroke worked a transformation. One turned the beautiful natural grain into a soft mahogany finish; another stroke produced dark oak; another stroke, and the panel presented a light oak finish; another brought out the grain in a delicate, soft green—the finish that is so coveted, and is so difficult to produce perfectly.

Seven strokes in all were made by this modern Aladdin, and seven distinct finishes appeared on that single piece of wood as if by magic.

Art Mason (for it was no less a personage than the Standard Paint & Varnish Co.'s sales wizard) was having the time of his life. He was perfectly happy, for he stood amongst the celebrities who had gathered at the big Retail Hardware Men's Convention in Hamilton, which opened on February 16th, 1919. He never knew that he was a natural-born orator before, but, like many another whose praises are unsung, he never was inspired before. True, he had held forth on many a station platform describing his feelings towards railway companies, generally, in languages both eloquent and lurid, as he awaited a belated train, but this burst of eloquence was different.

He could hardly believe the wonders he worked, himself. He often experienced a slight heart flutter as he drew the brush across the varnished wood, thinking: "Gosh! wouldn't it be fierce if it failed to work this time?"

But it always worked.

A stout, grizzled man stood beside him. It was he who placed the glass receptacles within easy reach of the orator, handy for him to dip his brush into as he demonstrated the stains they contained. That stout man was the real wizard. It was he who invented the transparent liquid which held the audience spell-bound.

"I can make the stain," confided the inventor to the Manager of the Standard Paint and Varnish Co., "but I can't shoot the bull."

"We will send our best 'bull fighter' along with you," promised the manager, and he promtply sent for Mason.

They made a great team—that pair. The delicate compliment of the manager had caught Art's fancy, and he became such an expert "shot" that he scored about a dozen bull's eyes a minute. As Art left the room with the inventor there was a regular stampede for Room 1012, where their regular exhibit was spread out.

"What'll you take for the exclusive territory for those Solvent Stains?" was the question hurled at the pair from every angle during the next several hours.

Far into the night the Standard Paint's representative wrote orders for the "Absolutely New" invention of the age. As the last weary waiter in the line begged on bended knee for territory already taken, Art Mason crumpled up with pain.

A physician was hastily called.

'Humph!" grunted the medico after a cursory examination. "Absolutely the worst case of writer's cramp I ever saw."

It was a pale, but happy, Mason who was unloaded at the Standard Paint & Varnish Co.'s office in Windsor two days later, his good, right arm in a sling.

"Ja-get all the orders?" he asked the Manager.

"Orders? Eh! What!! Is that you Mason?"

Mason smiled feebly and flapped his uninjured wing.

"Yes, yes, should say so. By the way, Mason, you'd better lay off for a day or two until we fill all these orders. You need a rest anyway. Pay goes on just the same."

This is just a simple little story of the experience of the traveller who demonstrated the most wonderful stains that were ever put on the market. The most wonderful thing about them, is that they can be put on over the highest varnish finishes, and they in no way injure that finish. They penetrate the wood to an amazing depth, are indestructible, and can be applied by the veriest novice with success.

They can be used as a Flat Stain or Wood Dye over new wood and finished either with a wax or glass finish, but if the surface is painted or varnished they will penetrate and stain equally as well as on bare unfinished wood. With most Stains it is necessary to use a ground color before staining and this eliminates the grain of the wood, while the Windsor Solvent Stains can be applied without this Ground Color, making only one application necessary. Another big feature of these Stains is their good drying properties. Other Stains require from six to twenty-four hours in which to dry, while the Windsor Solvent Stains will dry absolutely hard in two hours and dust proof in fifteen minutes. They contain no Varnish and have no sticky nature and their easy flowing properties enable the novice to do very satisfactory work without showing laps.

The paramount thought when first these Stains were produced was not only to put the best quality in the goods, but to also adopt a package that was attractive and convenient. The large mouth patent top bottle was the result and in order to satisfy the wants of the smallest as well as the largest users, they can be had in packages from quarter pints up.

They give the biggest profit of any stain on the market and sell at popular prices.

Did you get your territory reserved?

DO IT NOW! SEND FOR MASON.

TRAINING WILL TELL

OUT IN FRONT AND GOING STRONG

TRADE SIMMS SET IN RUBBER MARK

IS CONFIRMING THE OLD ADAGE THAT "TRAINING WILL TELL"

The qualities represented by this trade-mark are the results of intensive training. Training in every branch of the brush business from the selection of the crude bristles, lumber and other materials, through the many manufacturing processes down to the finished product—a product of real art in brush making.

Training is ever in process; training to conserve time through improved machinery, modern methods and standardization of output, thereby keeping the costs down and training in quality workmanship, finesse in detail and finish, and in the many little operations that are necessary in the making of a perfect mechanics' tool, thereby keeping the quality up.

It took us years of constant effort to perfect our process of setting in rubber, and it cost us a pile of money. Anyone can set a brush in rubber, but very few can do it well. So also can anyone shoot a gun, but not every shooter can bring home the antlers.

A burned, scorched or unevenly rubberized brush is worse than the old pitch or glue-set brush that, before the invention of the setting in rubber process, we were all compelled to use, but a properly made set-in rubber brush is a perfect working mechanics' tool. Be sure you get them by carrying

THE DURABLE PRUDENTIAL WALL FINISH

There are so many ways in which **Prudential Wall Finish** may be used that it becomes a fixture among the necessities of the home. It can be used in any room of the house, from the ordinary walls of the kitchen to the most delicate fresco of the drawing room.

Prudential Wall Finish is not only a household necessity but also the most ideal covering medium for public buildings of all descriptions.

It is easily applied—colors are permanent (white stays white)—is germ-proof—can be washed with soap and water, and presents a pleasing appearance at all times.

Made by the largest paint and varnish manufacturers in Western Canada, and backed by a guarantee that protects you in every way.

May we send you a color card with complete information and prices?

BAPLAC MAKES OLD THINGS NEW

BAPLAC Varnish Stain both stains and varnishes with one application, and the results are far superior to regular varnish.

To the amateur painter, where time and money count, **"BAPLAC"** makes a tremendous appeal. It need not be applied by an expert.

BAPLAC may be used on old or new floors, and is a great reviver of old furniture.

You can't go wrong on this line. It will earn you splendid profits, and the satisfied customers it's bound to create will add more "good business" to your store.

Send a postal to-day for full particulars and prices.

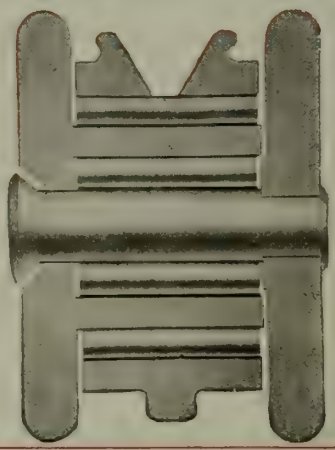
BRITISH-AMERICA PAINT CO. LIMITED



VICTORIA VANCOUVER CALGARY EDMONTON REGINA

There is door hanger business going after by your salesmen—

ALLITH
1914

This shows end section of track with fitting to prevent trolley from running off end of track.

Sectional View of Hanger

ALLITH
1915

The above is a sectional view of 1915 trolley roller bearings showing the oil hole which allows rollers to be easily lubricated.

(Shown above) is square track hanger with four wheeled trolley which when operated on the round grooves eliminates friction and gives perfect balance. Each wheel is fitted with roller bearings.

(To the right) is made on same plan as 1914 hanger but each wheel has double set of roller bearings which may be lubricated easily from oil hole shown in illustration

"ALLITH" 1914 and 1915

These are two very popular hangers, both made on the same principle and operating on the same style of track—square, adjustable, with round grooves on which trolley moves easily and without friction.

The 1915 style has advantages over the 1914 inasmuch as the wheels are fitted with double instead of single roller bearings and provision has been made to properly and easily lubricate the wheels.

They are both excellent hangers with ready sale. All they need is demonstration to your customers to sell.

Order a few sets to-day.

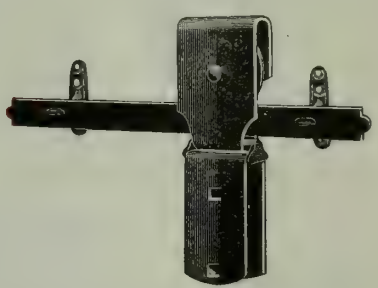
in your district that only needs turn the sales with the "Allith" range

THE "RELIABLE"
Especially adapted for factory doors. Made in sizes 1, 2 and 3. It sticks to the track, never binds.

"ALLITH" TROLLEY
—wind-proof, storm-proof track. Track is made of 14-gauge high carbon steel. Made with plain hasp or flush hinge.

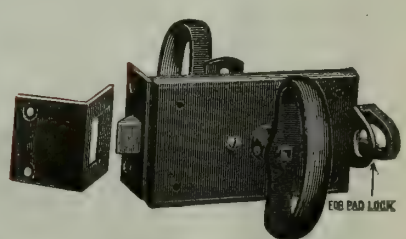
NO. 130 HANGER
Boiler plate steel frame. Hanger pendent is flexible, allowing for adjustments. 3½ inch wheel with roller bearings for 1¼ x 3-16 track.

Put on an early spring drive for door hanger business



Don't wait until the doors are all ready to be hung on those new barns, driving sheds and garages before you go after the hanger business. Now is the time to start something and get your customers thinking.

First, get the stock and, second, show it. Show the ALLITH Range of hangers right in your store. Let your customers see them in operation. Hunt up an old door and fit it with one of the best ALLITH Hangers and start the wheels going for early spring business.



We are showing here four splendid selling lines of hangers and an ALLITH No. 50 Latch.

Any one or all will prove a gilt edge proposition for you.

Write for prices.

NO. 131 HANGER
Frame constructed of boiler plate steel. Steel roller bearings, adjustable hasp (1½ to 2¼), flexible, runs on steel track, 1¼ x 3-16.

ALLITH NO. 50 LATCH
—the latch which is a fitting worthy of the Allith name. Adjustable to any thickness of door. Provision is made for padlock.

PEERLESS POULTRY FENCE

The kind that endures—in place to stay and please — because it lasts. It looks well and is always in place — "it stays put." It's the dealer's friend. You can put up the strongest kind of a guarantee—we back you up.

We build this fence of open hearth steel wire with all the impurities burned out and all its strength and lasting qualities retained. Peerless poultry fencing is extra strong, heavily galvanized, can't sag, won't rust, never gets out of shape, keeps in and keeps out—both great and small.

Poultry Will Pay the War Debt

The Peerless Lock holds the intersecting wires in a firm grip that is non-slippable. Compare it with any other poultry fence. The Peerless fence is built to stand any test. It is durable.

Note the extra close spacing at bottom, no base boards required. Turns the small chicks, keeps small animals in or out.

WRITE FOR DEALER'S PROPOSITION

We show you where the big trade is for parks, lawns, cemeteries, fences plain and ornamental for farms, ranches, all purposes. **Write for Catalog.**

Canada ranks high in the poultry business. A well fenced poultry farm means larger profits when Peerless fencing is used.

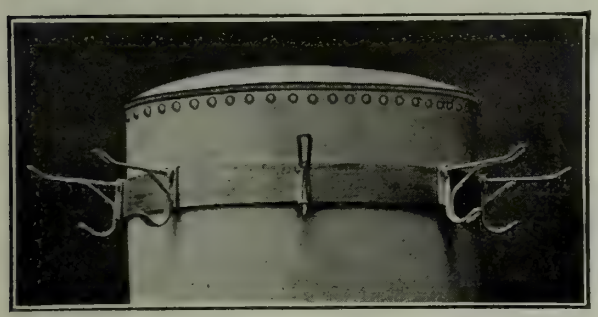
GOODS THAT SELL!

Our steadily increasing sales and expansion of our business is evident proof of the saleable qualities of the goods here illustrated. You too can add to your volume of sales by selling them. May we send you our new price list and circulars. A postal will bring you full information.

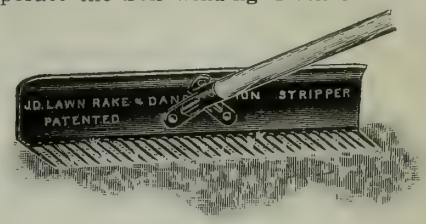


Kiddies Fair Box Bank

The most popular toy of its kind on the market. **Made in three sizes** and three colors, Red, Green and Blue.

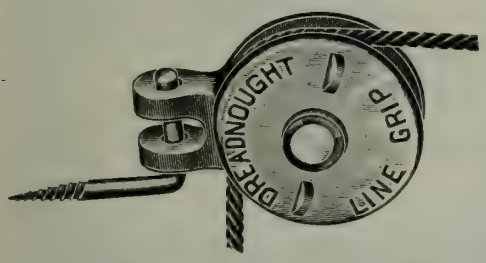
Self-Winding Clothes Line

Eliminates the usual unsightly clothes reel and ropes stretched across the back yard. Contains 110 ft. of high grade rope that winds up into the case, out of the way when not in use. A child can operate the **Self-winding Clothes Line.**



Family Clothes Drier

The drying of children's clothes is always a problem with the housewife. Advise her to put two of these fixtures on the hot water tank and solve the problem. One at the top and one half-way down. Hooks are adjustable to any position. Easy to apply.



No. 2

J. D. Lawn Rake

A good Spring Seller. An ideal rake for **stripping dandelions,** cleaning lawns, applying top dressings and removing stones, leaves and refuse of all kinds from lawns without injuring the tender grass.

DREADNOUGHT ROPE GRIPS

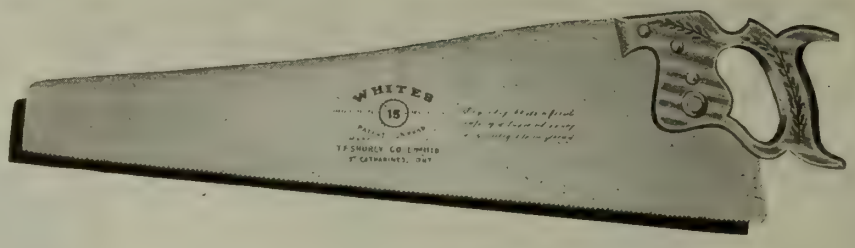
No. 1

Made in four styles—approved and used by Dominion Government on Canadian Transport Wagons.

Substitute a **Dreadnought Rope Grip** wherever a rope needs frequent tying and untying.

Used for awnings, clothes lines, tarpaulin covers, freight wagons, etc., etc.

Absolute security without risks. Instantaneous release when required.



No. 3

We also manufacture Stamping, Snow Shovels, Rink Scrapers, and the Safety Collection Boxes for Billiard and Pool Rooms, Clubs, Associations, etc.

What is Polarine for?
Who Buys It?

WHY YOU SHOULD SELL

Polarine

FRICTION REDUCING MOTOR OIL

MAKES A GOOD CAR BETTER

You should sell Polarine because it is the best lubricating oil made. Because it will so satisfy your customers that they will come back to you for more Polarine.

And, every time a customer comes into your store you have a chance to sell him other items from your stock.

Polarine promotes long-engine life, low upkeep cost and smooth running by perfectly lubricating every part of the motor.

Remember there is a big market for Polarine among the tractor users and motor-boat enthusiasts. Make your store headquarters for Polarine and Lubricating information and you will attract this profitable trade in addition to your regular motor car business.

Polarine sells quickly—you can turn over Polarine stock more often than less-in-demand oils and make more profit.

You should carry a full supply of the complete Polarine line. When the motorists in your locality know that you can give them the size they want and the correct grade they will deal with you regularly.

Two grades,—Polarine and Polarine Heavy, also Polarine oils and greases for effective transmission and differential lubrication.

Polarine is sold in ½ gallon, gallon and 4 gallon lithographed sealed cans, 12½ gallon steel kegs, half barrels and barrels.

If you have not received the Polarine book on Automobile Lubrication, write to 56 Church Street, Toronto, for your copy.

Over Quarter Million Motors in Canada

"THE *Motor Accessory Department which I started two years ago has been the most profitable department in my store," stated an Ontario hardware merchant to a* HARDWARE AND METAL *representative a few days ago. Two years ago this retailer put in a small stock of motor accessories because, as he stated, he had been reading regularly in* HARDWARE AND METAL *of the success of other retailers selling this line. To-day this merchant claims that his Motor Accessory Department is the most profitable department in his store and that it takes up less room and permits a greater and quicker turnover than any other line, considering the amount of money invested. The experience of this merchant is typical of that of hundreds of other hardware merchants in various parts of Canada.*

Many of the best motor accessory departments in Canadian hardware stores to-day were started in a moderate way with small but well-selected stocks, and on account of the aggressive selling methods of the merchants have become great trade-pullers for hardware merchants.

During the past two or three years many of the leading hardware jobbing houses in Canada have introduced motor accessory departments, with the result that a great many hardware merchants are now enabled to purchase motor accessory lines along with their regular hardware lines. The motor accessory line is undoubtedly the fastest growing line in the Canadian hardware business to-day.

It is generally believed that the business at present is only in its infancy and that there will be remarkable developments within the next few years. It is quite obvious that with the increased use of motors in Canada there will be a correspondingly great increase in the demand for accessories of various kinds. The bulk of the motor accessory business is undoubtedly controlled by the wholesale and retail hardware trade in Canada at the present time and the trade is certainly determined to continue securing the bulk of this business.

There is another line which is receiving attention from the hardware trade at the present time and it is tractor accessories. Within the next few years many thousands of farm tractors will be in use throughout Canada, and accessories for these tractors will be needed regularly just as they are for automobiles at the present time. Many hardware firms, especially in Western Canada, have already taken steps to secure a big share of this business and as the line is one which works in well with motor accessory line, it is reasonable to suppose that hardware firms in all parts of Canada will gradually take on this line.

It is even suggested that within a few years' time hardware firms will be carrying aeroplane accessories. At the present time there are upwards of 250,000 *motor cars in use in Canada, and many thousands of new cars will be put into service this year. Add to this number of motor cars the many farm tractors now in use and the probable sales of tractors during* 1919, *and you can readily understand why Canadian hardware merchants are reaping a great harvest of business in motor and tractor accessory lines. In this section of the paper hardware buyers, both wholesale and retail, will find many interesting advertisements.*

BACKBONE

DUNLOP TRACTION TREAD

A New Dunlop Product

—SHUR-ON PATCHING MATERIAL—

Dunlop "Shur-On" Repair Material is exactly what its name says it is: a highly efficient substance for making repairs that "stay put" to Rubber or Leather-made goods of all kinds. "Shur-On" permanently seals up cuts, tears and holes. The secret of its success is in its high-grade composition and the careful workmanship exercised in its making. The substance is extremely tough and has great adhesive powers. Its basis of strength is a strong khaki fabric. Therefore it lasts while it sticks. It is absolutely guaranteed not to curl or rub off.

Is suitable for use on Tires and Tubes, Rubber Footwear, Rubber Coats, Aprons, Hats, Hot Water Bottles, Garden Hose, Tubing, etc.

"Shur-On" will prove a ready seller because of the fact that it is such a boon in the household or to the car user. You should place your order soon in order to get immediate benefit of the demand.

Made in two sizes, each containing sufficient material to make dozens of repairs. Costs little to buy. Saves several times its cost first time used.

Dunlop No-Cement Patches

Dunlop No-Cement Patches have been further improved and will hereafter be made with a high-grade red adhesive surface, which renders them much more effective even than heretofore. Put up in several combinations. Write for more particulars and prices.

These other Accessories should also be represented on your shelves: Dunlop Cements, Reliners, Lace-On Boots, Hook-On Boots, Inside Tire Protectors, Tire Tape, Tire-Cut Material, Soapstone, Special Service Repair Kit, Mats, Radiator Hose, Repair Materials, etc.

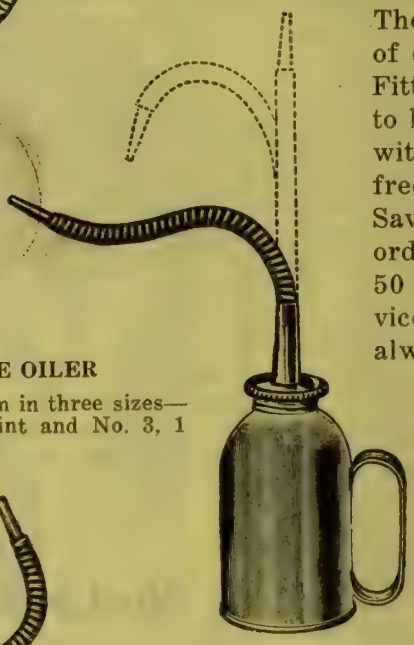
ALL-WAY OILERS

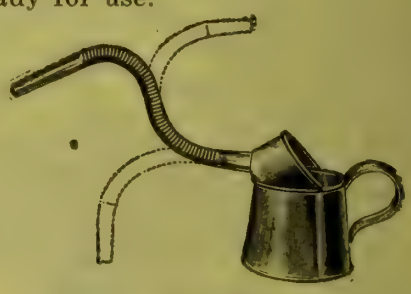
The only Device of its Kind on the Market

There are any number of **"All-Way" Oilers** you can sell in your district. No competition. Nothing else made like it. A Handy Device that will make an instant appeal to all your customers.



The "All-Way" Oiler is strongly made of copper-plated steel in different sizes. Fitted with a flexible steel spout, made to bend in any desired angle or position without breaking or interfering with the free flowing of the oil.

Saves the waste of oil occurring when an ordinary oiler is used. Reduces oil bills 50 per cent. Has a special cleaning device at end of spout which renders it always ready for use.



GENERAL PURPOSE OILER

Made with steel spring Bottom in three sizes—No. 1, 1-3 pint; No. 2, ½ pint and No. 3, 1 pint. A 7″ spout to each.

R.R. OILER

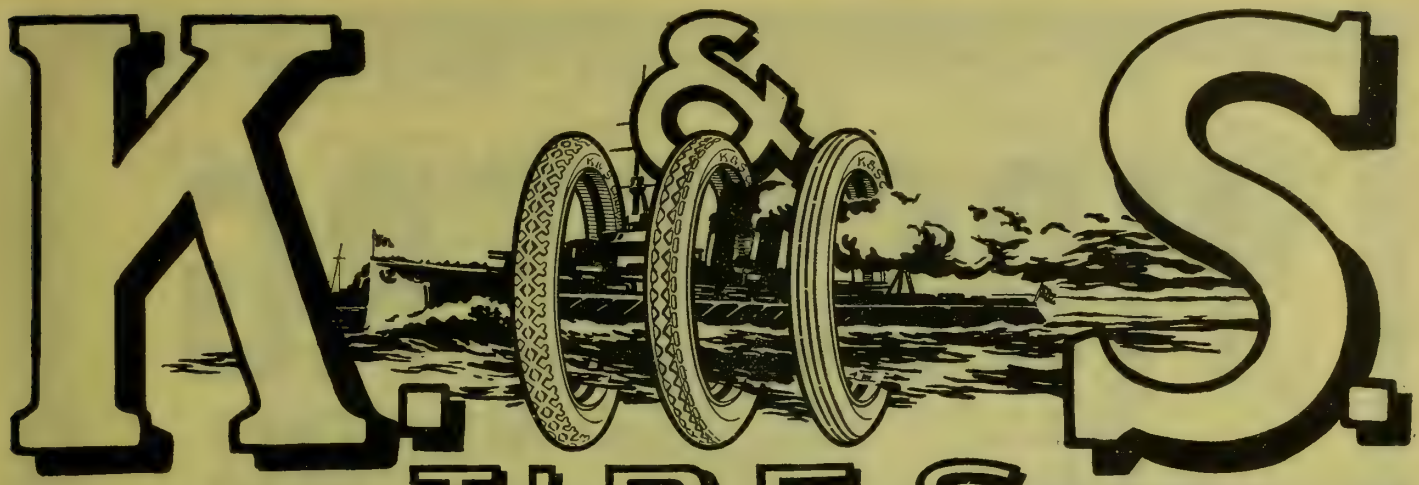
For Locomotives, Machinery, Threshers, etc. In two sizes, No. 4, 1 pint and 10″ spout; No. 5, 1 quart and 11″ spout.

COHBINATION FILLER AND FUNNEL

For Hardware Stores, Garages, etc. In four sizes, No. 101, 1 pint and 10″ spout; No. 102, 1 quart and 13″ spout; No. 103, ½ gal. and 13″ spout; No. 104, 1 gal., and 13″ spout.

OIL GUN
No. 201

For Automobile and all types of machinery. Fitted with a 9″ spout.



Once used always used. A line that will be a credit to your store. There are splendid profits in it, too.

The Powder You Sell

WHEN your customers go to the traps or into the game covers for a day's sport they use the shells that experience has taught them are best adapted to their needs. To get the best results they stick to their favorite shells just as they do their favorite gun.

They should be just as careful about the powder that these shells contain. That the powder plays an important part in shooting is obvious.

In this connection you can't do better than recommend that they buy and stick to

HERCULES
Smokeless Shotgun
POWDER

The next time you order loaded shells be sure to specify that they be loaded with Infallible. You should have no difficulty in getting shells loaded with this powder for it is found in any one of the thirteen standards shells listed here.

Hercules Smokeless Shotgun Powder can be relied upon to give you the same service at all times. Its qualities are not affected by time or weather conditions and it will always give high velocity, light recoil and even patterns.

Every Returning Soldier is an Iver Johnson Prospect

TRAINED in the use of firearms, every returning soldier will want a revolver for his home. No man will appreciate more the need of absolute safety in the home revolver. He would not think of leaving a military sidearm in his home loaded and available for instant use. He knows the danger of accidental discharge.

Knowledge of firearms makes the veteran an easy customer for the revolver that is safe. Show him that the safety feature does not depend upon memory or carefulness or familiarity with firearms. Show him why it is possible to "hammer the hammer" without danger of discharge. Show him also the piano wire, drawn-tempered Iver Johnson springs; the sturdy, simple construction; the perfectly rifled barrel that means hard, straight shooting.

IVER JOHNSON
SAFETY AUTOMATIC
REVOLVER

And don't forget that it pays to carry the complete Iver Johnson line of Hammer and Hammerless Revolvers, with Regular, "Perfect" Rubber, "Western" Walnut Grips.

How to Sell More Brake Lining

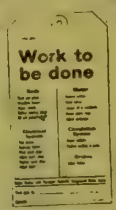
What these signs and display racks will do for you

RIGHT in your town to-day there are motorists who need new brake lining on their cars. The big Thermoid National Advertising Campaign has convinced them of the danger of inefficient brakes. If they know you are a Thermoid dealer, the business will come to you. It will give you a chance to put new customers on your books.

Don't allow any of these sales to get away. Use the signs, display racks, etc., shown on this page and tie up your store with the Thermoid National Advertising.

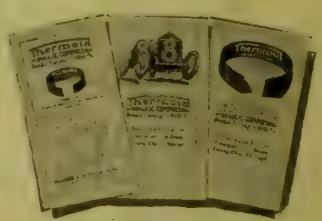
The big **transparent window sign** shown in the above picture lets every motorist who goes by know that you sell Thermoid. This size chart gives the sizes and amounts of brake lining needed on all the leading passenger cars and trucks.

The attractive cabinet No. 9 displays Thermoid Brake Lining effectively to everyone who comes to the store and is a great convenience in cutting the exact length of lining required.



The **tag 7A** has been a great convenience to garage men and a splendid business-getter. Be certain to get a supply of these. Use the Thermoid **printed circular** No. 8 to enclose with the bills or distribute over the counter.

The "Brakes Inspected" **sticker** should be on the windshield on every one of your customers' cars.



You should also have the **long window trim** which shows how quickly a car should stop if the brakes are right. Every one of these will help build profitable business. Simply ask your jobber or write us direct. Get the full benefit from the demand for Thermoid by using these dealer helps. Every foot of Thermoid is backed by ***Our Guarantee: Thermoid will make good—or WE will.***

TRADE MARBLE'S MARK

Specialties for Sportsmen

There's a steady year 'round demand for Marble's Specialties. They are quality goods that induce genuine pride of ownership and it will pay you to stock, display and push them. Marble's Specialties are bought, used and endorsed by experienced hunters, campers, fishermen and outdoor people the wide world over.

Every article that bears the Marble trademark is fully guaranteed in regard to quality of material and workmanship and will give your customers keen satisfaction and long service. Items listed here were picked at random from our catalog of Sixty Specialties. If you would rather do the picking yourself we will send you the catalog.

Prices shown are **list.** Any Canadian jobber will quote you discounts and fill your orders.

No. 1—Marble's Flexible Rear Sight. Stem is not rigid, but is held by a spring, which gives, in case sight is accidentally struck. Prevents breakage. Two discs furnished—different sizes. **$3.30.**

NOTE.—When ordering sights direct from us, always mention make, model and calibre of rifle they are intended to fit.

No. 2—Marble's Improved Front Sight. Ivory or gold bead—1/16, 3/32 or 1/8 in. Fine for running or snap shots. Used by many professionals who do fancy shooting. **$1.10.**

No. 3—Marble's V-M Front Sight. Gold face and gold-lined aperture. Many experts prefer it to a bead sight. **$1.65.**

No. 4—Sheard Front Sight. Gold Bead. Shows up well in dark timber—will not blur. Shows same color on all objects. Type shown is for rifle. Also made for many revolvers. **$1.65.**

No. 5—Special Sheard Sight for Winchester 1894 Carbines. **$1.65.**

No. 6—Marble's Duplex Sight. Combines "fine and coarse" sights in one. Makes snapshots sure shots. The 1/8 in. white enameled bead folds down when the 1/16 in. gold bead is being used. **$1.65.**

No. 6A—Marble's Duplex Sight. Showing enameled bead in use.

No. 7—Marble's Standard Front Sight with 1/8 in. ivory or gold bead. Can also be furnished with 1/16 or 3/32 bead. **$1.10.**

No. 7A—Marble's Standard Front Sight with 1/16 in. gold or ivory bead. Can also be furnished with 3/32 or 1/8 in. bead. **$1.10.**

No. 8—Marble's Waterproof Match Box needed by every soldier, hunter, camper. Guaranteed moisture proof. **55c.**

No. 9—Marble's Pocket Compass—Polished brass case. Agate bearing. Guaranteed accurate —**$1.10.** With revolving dial—**$1.40.**

No. 10—Marble's Coat Compass. Attaches to outside of coat or shirt. Always in sight. Balances so readily, direction can be taken while walking. **$1.40.** With revolving dial—**$1.65.**

No. 11—Marble's Clincher Gaff. Humane—doesn't rip nor tear. Holds any fish 1/2 to 20 lbs. Quicker, surer than landing net. **$1.10.**

No. 12—Marble's Folding Fish Knife. Cuts rips, scales. Blade folds into handle. Locks when open. Carried in pocket. **$1.40.**

SHARP SPARKS

"Carbon-free after months of service"

A SELLING point that sells—that challenges the attention of every motorist—brings the first order and the order for every additional plug replacement in his car.

Kopper King

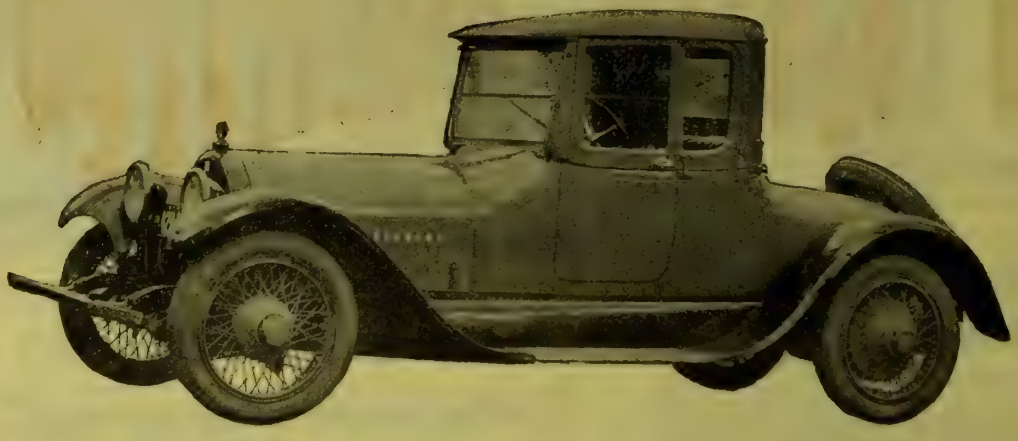
Spark Plugs are both anti-fouling and rust-proof. They are big, husky plugs with the points that appeal to every motorist—

porcelains of rock-like strength;
firing points of anti-fouling monel metal;
shells of heavy steel protected from carbon and corrosion by a thick surface of copper.

The Goliath

"Built for Endurance"

a massive, strongly built plug, fully a match for hard usage and strenuous service in pleasure car or truck.



The shell is extra large—of heavy, blued steel. The porcelain is designed for super-strength at points of greatest strain, and is hardened into rock-like strength at a temperature of 2,600°, insuring greatest possible freedom from insulation troubles. Goliath extra-strength construction gives your customers trouble-free sparking.

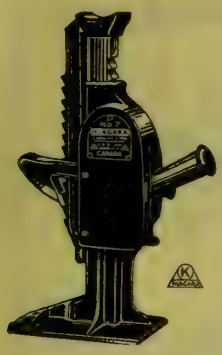
HERE IS A "LIVE WIRE" WHEEL PROPOSITION

No wire wheel on the market equals the Pasco combination of Strength, Safety, Economy and Beauty. It is a wire wheel of distinctive and aristocratic design and it has

Three Exclusive Patented Features:

Improved method of Tangent Spoke lacing — which gives the strongest kind of resistance to lateral and radical thrusts and yet yields the elasticity necessary for easy riding.

Ingenious Safety-Locking Device— which absolutely prevents a wheel coming off a car while in motion.



Indestructible Hub Cap—so sturdy and massive that the ordinary bangs and knocks of traffic leave it unscathed.

A Book that will Increase your Business
1919 Automotive Equipment Catalogue

Everything points to 1919 as being most favorable for the Automobile Industry. The manufacturers and the press are in accord with the prophecy, that there will be a record demand for Automobiles and Automotive Equipment.

Are you, Mr. Dealer, prepared for this great volume of business? The hardware store is the logical place for automotive equipment and supplies and the motoring public will make large demands for such articles, and the dealer who intends featuring them is laying the foundation for a successful year.

To keep a Hyslop stock of automotive equipment, means to have on hand only such articles as proved their worth and found favor with motorists everywhere, thereby creating large sales and quick turnovers.

Our new 208 Page Catalogue is just off the press and is replete with standard equipment that is new and up-to-the-minute. and, therefore, is indispensable to every dealer who caters to car owners. If you haven't already received a copy, a postal card will bring you one, together with the dealers' discount sheet.

Co-operation with Hyslop Brothers leads to success.

HYSLOP BROTHERS, LIMITED

Canadian Agencies Open

For British-built

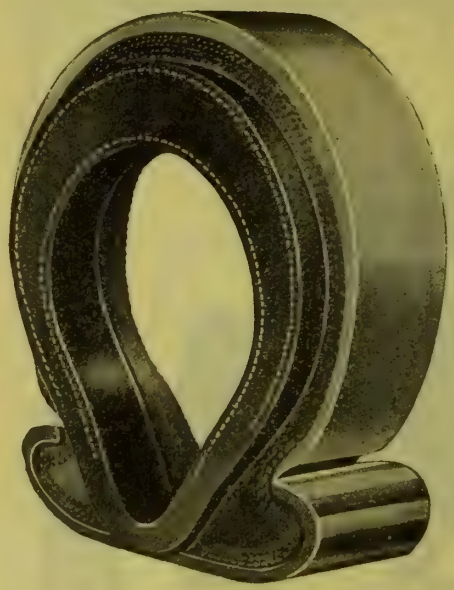
Royal Enfields

With very great thankfulness we are now able to say that, due to the cessation of hostilities, and the consequent relief from our Government Contracts, we are again able to devote our undivided attention to our private trade, and particularly to our Overseas trade which has suffered so much during the past four years.

We want live Agents in several parts of Canada. We are prepared to back the right men with all the resources at our disposal—by special terms, prompt shipments, and adequate advertising. British-built Royal Enfields will provide the most prosperous agency of all.

Royal Enfield Cycles and Motorcycles represent the outcome of more than 25 years' continuous experience. We supply everywhere where cycles and motorcycles of the highest quality and efficiency are required.

We make upwards of thirty models in Cycles and three distinct types in Motorcycles—the 2¼ h.p., two-stroke; the 3 h.p. twin-cylinder, and the Royal Enfield Side-car Combination with 6 h.p. or 8 h.p. engine. All our motorcycles are built with specially strong frames and fittings. They are not low-priced models, but represent the highest grade products of automobile engineering.



We invite correspondence from Canadian buyers right now—by the earliest mail, so that arrangements can be completed without delay.

THE ENFIELD CYCLE CO,, LTD., Redditch, England

London Office & Showrooms: 48 Holborn Viaduct, London, E.C.

Contractors to His Majesty's Government, the U.S.A., French and Belgian Governments and the (former) Russian Military Authorities.

Sternwear Reinforced Pneumatic Tools

—reduce the cost of motoring.
—solve puncture and blow-out problems.
—double the mileage of casings.
—cannot be pinched by inside cracked casings.
—can be mended the same as any other tubes.

Note the section here illustrated.

The "Sternwear" is not only very thick, but is double reinforced with fabric. No matter how thin a spot is in the casing the pressure is distributed over the whole tire, and there's little or no chance for a blow-out.

Made in all standard sizes.

Write, phone or call on us for Price List and other information.

MERCHANT'S ANTI-SKID CHAIN TIGHTENERS

Patent Pending

$1.00 a Pair

Sells all the year around, and should form part of the equipment of every car.

The investment is small, and the profit good. Every motorist needs them, **and will buy them** at this price.

IF DEALER DOES NOT HANDLE, WE SELL THEM DIRECT PREPAID ON RECEIPT OF PRICE.

Simple and easy to attach. You can slip it on a customer's car in about one minute, and it means a sale **every time.**

The Tightener catches the chain at five points, giving an easy tension all around. It holds the chain in place, prevents dragging or rattling, and yet permits the chain to creep on the tire, and carry out to the full its non-skid action. Keeps chain from pounding the fender, and prevents it from unhooking.

JOBBERS AND DEALERS:—Write at once for full particulars and generous terms, for now is the time to sell these things.

Northern Electric
VACUUM CLEANER

This Vacuum Cleaner is the most modern and best. Its extra large nozzle, equipped with a specially-designed brush; its large fan, and its high-speed motor, make this cleaner a powerful, reliable, and economic machine. The extra attachments enable one to clean draperies, upholstery, pianos, picture moulding, out-of-the-way corners, etc. It is absolutely sanitary. A vacuum cleaner that will give the user entire satisfaction, and the dealer a splendid sales proposition.

Here Is Banfield's New Lighting Fixture Catalog

Write For A Copy!

This is a handy pocket-size catalog illustrating our new range of popular-priced Electric Lighting Fixtures.

These fixtures are a medium grade line which have the artistic appearance of more costly goods—fixtures that have a big and constant sale among working and middle-class people who want an attractive fixture, yet with whom price is a very important consideration.

Each fixture is labelled with the Banfield trade-mark, symbolizing standardized quality and design, and signifying also that we stand behind them with a guarantee of their good value.

Always In Stock

You can rely on always being able to get delivery of Banfield Lighting Fixtures. The range, while not over large, is complete with all the styles that are in constant demand. And we carry a big stock at all times. By ordering Banfield Fixtures you avoid loss through delay and need never disappoint a customer. Each fixture is individually boxed, which preserves the finish and makes for ease of handling and neat stock-keeping.

Moreover, our discounts allow you to fix a price that gives you a good profit. Write for this catalog to-day.

Home Laundry Equipment operated by electricity

The SEAFOAM will accomplish everything required of a combination washing and wringing machine, and there is nothing intricate or delicate about it.

Washes with a dolly, and has a wringer which runs both ways.

Washing and wringing can be done separately or at the one time—ALL BY POWER.

Fitted with 1-6 H.P. Robbins and Myers splash-proof motor.

The Seafoam is carefully tested before leaving our factory, and you get it all ready to attach to an ordinary standard electric receptacle.

Style "B" is for engine drive.

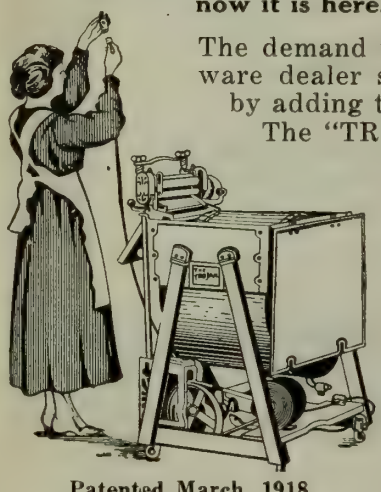
HURLEY SERVICE

A successful "first trial" of electrical household apparatus is the *entering wedge* in the development of a complete electrically equipped home.

The electric dealer with an eye for future business will risk no chance of an unsatisfactory "first trial" —he will lay a solid foundation for an increasing electrical trade, by selling a THOR, *backed by the famous THOR Guarantee and Hurley service.*

HURLEY MACHINE COMPANY, LIMITED



413 Yonge Street, Toronto

ELECTRICAL GOODS FOR THE HARDWARE TRADE

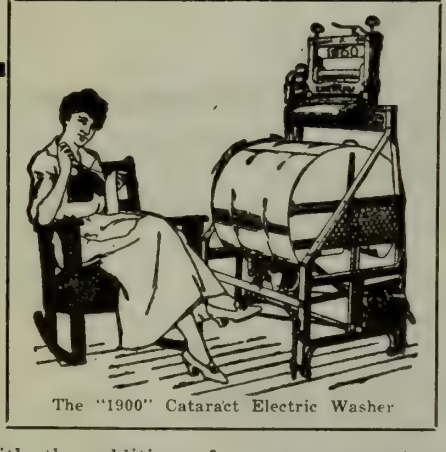
Your Profits Will Quickly Increase

If you sell the **Trojan ELECTRIC WASHER**

Women are to-day turning to the Electric Washer as the most useful labor-saving appliance of modern times. They have wanted it for many years—**and now it is here.**

Patented March, 1918

The demand for Electric Washers is developing fast. No live electric or hardware dealer should ignore the opportunity to increase the profits of his business by adding this line.



The "TROJAN" has so many desirable features and is so simple and economical to operate that it finds instant favor and is easy to sell. In most cases a simple demonstration will quickly close a sale.

We shall be glad to send you our sales plans for dealers. Write at once for full particulars. The spring months are among the best—so don't delay, write at once.

The "1900" Cataract Electric Washer

The Washers the Women Want

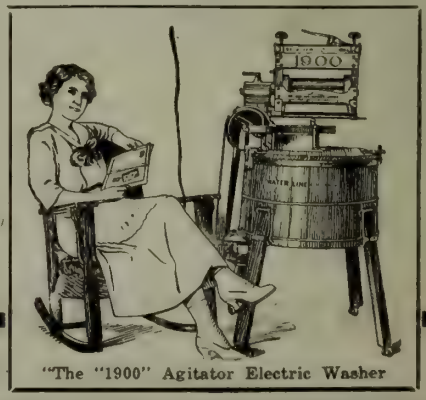
The articles that are in demand are the profitable ones from the Hardware Man's standpoint. Those that are hard to sell—the unknown ones—prove less lucrative, in the long run.

BUY W-S-S WAR-SAVINGS STAMPS

It's Profits That You Want

and you can get them from "1900" Washers.

For more than twenty years we have been making and selling nothing but washing machines—the very best that can be made. Our whole attention has been centred on "1900" Washers, on perfecting and developing new models.



With the addition of our two newest and greatest models, the "1900' line is complete.

The "1900" Cataract Electric Washer

These most modern washers, as well as the other "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising, and these inquiries are turned over to such "1900" dealers as have proven their worth in their different territories.

The "1900" Agitator Electric Washer

If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the Wholesale Department.

"The "1900" Agitator Electric Washer

THE "1900" WASHER COMPANY

357 Yonge Street .·. Toronto

ELECTRICAL GOODS FOR THE HARDWARE TRADE

No Trouble to Sell *this* Cleaner

The inclined nozzle, which pokes "under things" and gets close up to carpet edges, is an exclusive feature of the "APEX" that makes an instant appeal. Once seen, a prospective customer will buy no other, and the sale is closed without difficulty.

Apex

The "APEX" has an unusually powerful motor. It will pull dust and dirt from under any carpet and thoroughly renovate while it cleans. Women are delighted with it and enthusiastically recommend it.

ELECTRIC CLEANERS

The steady demand from the best dealers proves the increasing popularity of the "APEX" and the growing demand for appliances of QUALITY, RELIABILITY and EFFICIENCY.

Write us at once and secure the agency in your district, if it is not already taken up. You have no time to lose as the demand for electric cleaners is greater in spring than during any other time of the year. *It is a great money-making opportunity.*

Prosperous Times for Prepared Roofing

ON account of the labor shortage little building was done in Canada during the past four years.

To-day there is a shortage of houses in practically every growing city and town.

There are thousands of new homes, apartment houses, schools, stores, etc., already planned and will be erected as labor becomes available.

There are also thousands of buildings needing repairs and re-roofing.

Therefore, from now on we look to increasing activity in the building and roofing trade.

Brantford Roofing was advertised to the consumer steadily during the war and in the face of a decline in building our business increased.

For example, the output of Brantford Asphalt Slates in 1917 was double that of 1916, and in 1918 the demand was more than twice that of 1917.

The quality, reputation and economy of Brantford Roofing make our line particularly suitable for present day conditions.

Brantford Roofing provides a durable fire-resistant roof, at a moderate cost —a roof that can be easily and quickly laid. There is a style of roofing suitable for every requirement. There is very little roofing business that should go past a wide-awake Brantford Roofing Agent.

Brantford Asphalt Roofing, sanded on both sides, 60, 70 and 80 lbs. per square, is our most popular roll roofing.

Brantford Rubber Roofing, smooth surface, 40, 50 and 60 lbs. per square, is another excellent roll roofing.

Brantford Crystal Roofing has a crushed slate surface of red or green, 80 lbs. per square. A beautiful, durable roll roofing.

Brantford Asphalt Slates. The same material as Crystal, but in individual size shingles. The demand for this line is increasing at a wonderful rate.

Brantford Asphalt Slab Slate is four shingles in one. When laid the slab looks exactly like four individual shingles. A wonderful time saver in laying. Fewer nails required. This is our newest line and it's a winner.

Brantford Leatheroid, a smooth surface roofing, and Standard Mohawk, sanded on one side, are two popular roll roofings at a low cost.

Climax Sheathing Paper completes our line of strong sellers.

This year Brantford Roofing will be more largely advertised to the consumer than ever. It is a money maker for the dealer. Samples, booklets and prices on request.

DOMINION RUBBER SYSTEM
AND ASSOCIATED COMPANIES

LAWN AND GARDEN HOSE
OF
HIGH STANDARD QUALITIES
THAT GIVE SATISFACTORY SERVICE

The only sure way to get satisfactory service is to buy products of known worth.

That is why it always pays Hardware Dealers to carry Dominion Rubber System Lawn and Garden Hose. The worth of Dominion Rubber System Hose is known because every ounce of material and every detail of workmanship must test up to a fixed quality standard, which has proved its worth under the severest tests.

This is the result of over half a century of hose-making experience, by the oldest and largest rubber organization in Canada.

No. 300 Hose is the popular favorite. Its material and workmanship are guaranteed. Its value is unequalled.

If your supply of Lawn and Garden Hose for the coming season has not been ordered, write to the nearest Dominion Rubber System branch for prices.

Barrett Everlastic Roofings

Check the buildings you will roof this Spring—

If you want to be absolutely *sure* of getting the best roofs for your money, read carefully the descriptions of the "Big Four" Everlastic Roofing given below and pick out for each building the type of roof it requires. Figure on Multi-Shingles, Tylike Shingles or Slate-Surfaced Roofing in rolls for the house and the better buildings, and the popular Everlastic "Rubber" Roofing for such buildings as sheds, stables, silos, etc.

	House
	Garage
	Barn
	Stable
	Chicken Houses
	Hog Pens
	Corn Crib
	Silo
	Sheds

Everlastic Roofings positively can't be beat for value. They are made by The Barret Company with a record of 60 years of successful roofing experience. They are waterproof, weather-proof and resist sun, rain wind and fire.

Everlastic "Rubber" Roofing—A recognized standard among so-called "rubber" roofings. Famous for its durability. Made of the best waterproofing materials, it defies wind and weather and insures dry, comfortable buildings under all weather conditions. Nails and cement with each roll.

Everlastic Slate-Surfaced Roofing—A high-grade roll roofing, **surfaced with genuine crushed slate** in two natural shades, red or green. Never needs painting. Colors are permanent. Handsome enough for a home, economical enough for a barn or garage. Combines real protection against fire with beauty. Nails and cement with each roll.

Everlastic Multi-Shingles—Made of high grade felt thoroughly waterproofed and **surfaced with crushed slate** in natural colors, either red or green. Laid in strips of **four shingles in one** at far less cost in labor and time than for wooden shingles. Gives you a roof of artistic beauty worthy of the finest buildings, and one that resists fire and weather.

Everlastic Tylike Shingles—Made of the same durable slate-surfaced (red or green) material as Everlastic Multi-Shingles but cut into individual shingles, 8 x 12¾ inches. Laid like wooden shingles but cost less per year of service.

Write to our nearest office for free illustrated booklets.

BUY
MADE IN CANADA
Lamp Burners

A and B Size
Correct Lamp Burner

WE point with particular pride to our "Correct" lamp burners, which we guarantee superior to any American burner.

No. 2 Cold Blast
Correct Lamp Burner

"Correct" burners are also cheaper in price, than any other similar American burner, so why buy American burners, when you can buy superior, and at the same time cheaper burners, made right here in Canada?

Photo Reproduction
Illustrating Flame of B or No. 2
Correct Lamp Burner

We also make—

"Queen Mary" and "Dominion Burners"

A burner for every class of trade.

Send for your sample—it will be a pleasure to mail it.

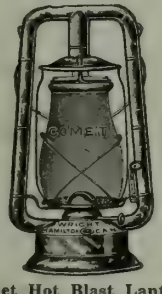
LANTERNS

For the Farmer, Stockkeeper, Railroad Man, Watchman, Autoist, Engineer, Contractor, Fireman, Deliveryman, Meter Reader and Householder

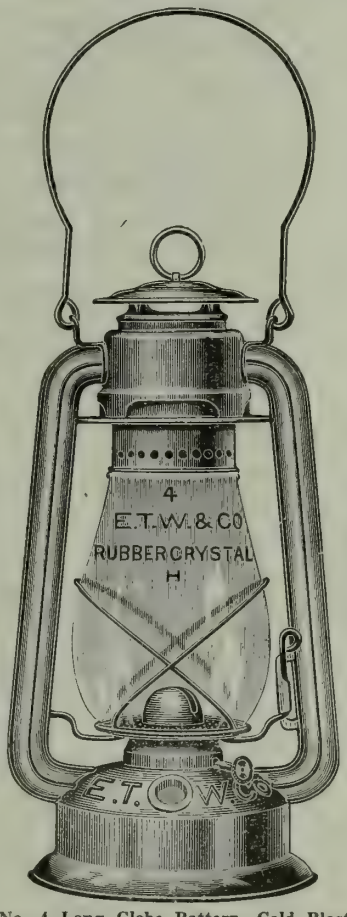


Ask about our new assortment of SIX LONG-TIME BURNING LANTERNS

Traction Engine Headlight Lamps
For Coal Oil or Acetylene Gas.

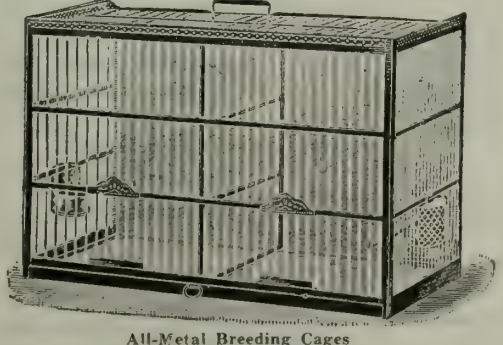
No. 3 Triangular Station Lamps
Draft-proof and brilliant.

Comet Hot Blast Lanterns
A cheap, serviceable light at low price.



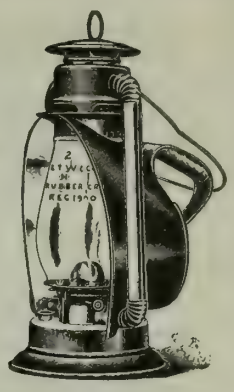
Auto Combination Measures and Funnels.
Ask for illustrations and prices of Auto Accessories and Oilers.

Victor Flour Sifters
The Sifter which has stood the test of years, unchanged.

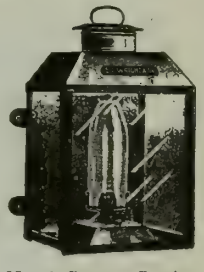


OUR SUMMER CATALOG—If you didn't receive your copy, let us know. This catalog gives you a list of the standard warm-weather goods, and you can see the prices at a glance, without the bother of taking off awkward discounts. It is a great help to the buyer in ordering.

BE SURE YOU GET YOUR COPY



No. 4 Long Globe Pattern, Cold Blast Lantern
The standard pattern of the world backed by **thirty-four** years' experience and success in lantern making.



YOUR PROTECTION — With every shipment from us, you not only get the goods, but also the "WRIGHT" guarantee to replace free of charge, or otherwise make good anything with which you may have reason to be dissatisfied. We expect, of course, that your receiver will exercise ordinary business discretion when accepting the shipment, and be careful to mark any losses or breakages on the freight paid receipt which he hands the transportation company.

All-Metal Breeding Cages
Absolutely vermin proof easily cleaned. Made in three sizes. Drop us a card for our cage catalog and prices.

Car Wheel Inspectors' Lanterns
Cold Blast or Hot Blast Type.

No. 2 Square Station Lamps
Removable glasses and strong reflector.

Canuck Bread Mixers
The advocate of clean, sanitary food, untouched by human hands.

Balloon Fly Traps
The cheapest, quickest and most efficient way of exterminating the house fly.

Bird Cages
Brass and Japanned. In all sizes and designs.

Think of the Trough and Pipe Jobs that must be done this Season

For five long years property owners have been compelled to let repair work go — because there wasn't enough skilled labor in the country to look after it.

A year ago now you would have side-stepped an order to do an eavetroughing job in the country. You found it hard to attend to the work within a stone's throw of your shop.

But thousands of the boys are home now, and thousands more will be by the time the season opens up.

You will be able to look after all the trough and pipe contracts that offer—and there will be plenty of them.

Prepare now for the Spring rush, and don't be caught short of material. Don't take any chances on having to pass up business. Order in your supply of Preston Eavetroughing and Conductor Pipe now from the nearest branch of the M. S. & S. Co.

Preston Eavetrough is the same good kind. Made on a heavy power press with patented dies—every length is exactly the same—every joint fits so snugly that it takes very little solder to make it watertight.

You can make money on Preston Eavetroughing, and your customers will get a lasting, satisfactory job.

What About Flat Galvanized Sheets?

Don't let your supply get down too low. Everything points to an early Spring, and the first thing you know you will be up against the usual rush of Spring orders, and will find yourself short of galvanized iron.

That may mean a serious delay, because hundreds of other shops will be in the same situation as yours—and there will be a congestion of orders for sheets.

For sure satisfaction, use our famous "Acorn Quality" Sheets. They are the kind that have built our business, and they will build yours, too.

Send us now a memorandum of the sheets you are likely to need, and date of delivery, and we will quote you a rock-bottom price.

How We Help You Sell More C·C·M· Bicycles

C. C. M. Skill, Accuracy and Sincerity of Workmanship produce smooth-running, durable, beautiful bicycles with a deserved reputation all over Canada for giving satisfaction.

C. C. M. advertising in the newspapers, street cars and elsewhere is making these good qualities known to more people and sending customers to your store.

For the same reasons less effort is required to sell C. C. M. Bicycles.

After the sale, C. C. M. quality makes the customer a satisfied booster for your line and your store, instead of wasting a lot of your time fixing the things that go along with cheap machines. The C. C. M. Guarantee, the C. C. M. Service are back of every C. C. M. Bicycle.

The principal C. C. M. nameplates are:

"Gendron" "Ivanhoe" "Columbia" "Massey" "Red Bird" "Cleveland" "Perfect"

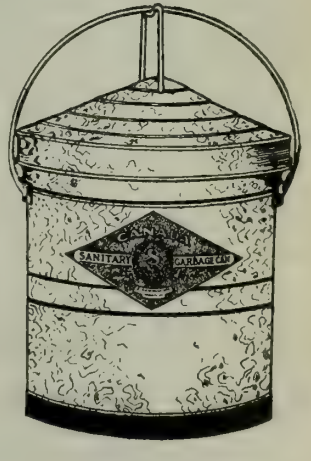
For Agency Terms and full particulars write Head Office or nearest Branch.

CANADA CYCLE & MOTOR CO. LIMITED

Montreal Toronto WESTON Winnipeg Vancouver

Samuels "CANADA" Garbage Cans

Profitable money-making lines that every Hardware Dealer can handle to good advantage. Both cans are made with tapered sides and therefore nestable. A large quantity takes up little storage space.



"Canada" Sanitary Garbage Can

The new member of the "Canada" Family. Made of heavy weight black sheet steel, hand made, finished with two coats of baked enamel. Rust-proof. Lid is locked to prevent spilling of garbage and strengthened by reinforcing rod. A popular-priced can, 33% lower than galvanized can. Made in two sizes.

"Canada" Galvanized Garbage Can

An extra strong and durable can. The bottom is protected by a rim of band iron and inset to prevent coming in contact with ground.
Made throughout of heavy galvanized iron. Cone-shaped cover prevents moisture collecting on lid. Lid is locked with handle, and edges of can and lid have reinforcing rod. Made in two sizes.

"Canada" Garbage Cans will satisfy your customers. They stand the usual abuse of the garbageman. Order through your jobber.

THE "TIME SAVER" IS AN EASY SELLER

The way in which the "Time Saver" is selling surprises even us.

From every section of the Dominion the demand comes for more and more of them. Evidently they are filling a need in Canadian Homes and Hardware dealers are finding them profitable to handle. The patented features; the beautiful finish; the durable tub made of cypress—the everlasting wood—and the careful construction, are giving the "Time Saver" a ready market from coast to coast.

If you have not already done so, why not give one a trial in YOUR store. You will find it a grand sales maker.

If there is electric power in your town, there is a market for the "Time Saver" Electric—shown above. In the rural districts the "Time Saver" for use with gasoline engine is in great demand.

Write to our nearest branch for circular and prices.

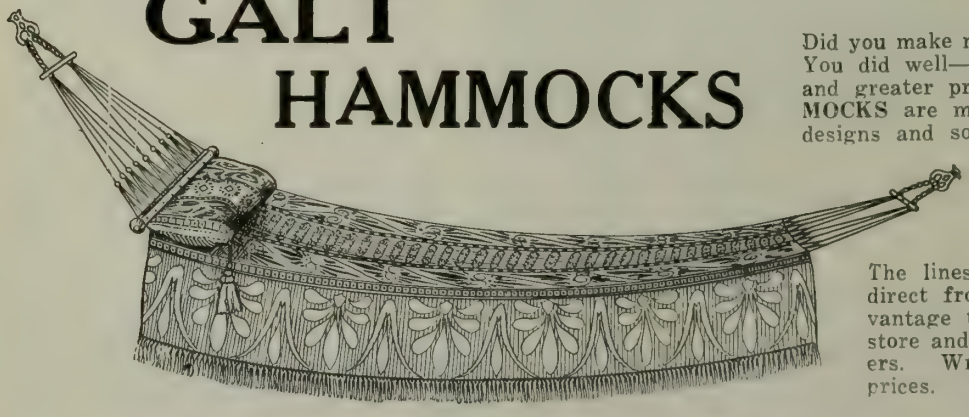
GALT AUTOMOBILE ROBES



We would be discounting your ability to "keep in touch" with things, by trying to convince you that there is a steadily increasing demand for "Quality" Automobile Robes. You already know that. But are you aware that *GALT ROBES* are the most profitable for you to sell?

In handling *GALT ROBES* you are selling a high quality line of merchandise that cannot be equalled within our price range. They are made in cotton, wool, union cloth, plush, Astrachan, imitation buffalo and goat, plain stripes, checks, plaids and floral designs; sizes 48 x 72 and 54 x 72; weight from 2½ to 8 lbs. They can be interlined with rubber at extra cost if so ordered.

Ask for our newest folder on Robes. It illustrates the various cloths in their natural colors.

GALT HAMMOCKS

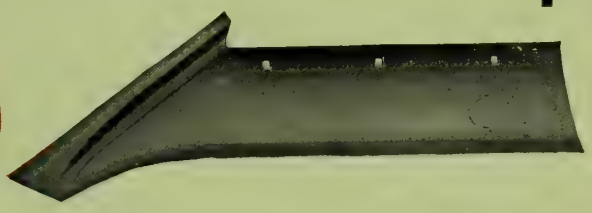
Did you make money on Hammocks last year? You did well—would you like to make more and greater profits this year. **GALT HAMMOCKS** are made in a variety of exclusive designs and sold to you at prices that will give you a decided advantage over all competitors. Stock up early and thus be prepared for the Summer Trade.

The lines here illustrated are all sold direct from factory to dealer. An advantage that attracts business to your store and saves money for your customers. Write for full particulars and prices.

The GALT ROBE COMPANY, Galt, Ontario

OUR NEW ACCESSORY DEPARTMENT

Automobile accessories are rapidly becoming the most profitable line for the hardware dealer to handle. As the number of automobiles in use increases, so will the dealer's sales be multiplied.



In order to supply hardware dealers who wish to cater to the automobile trade we have put in a complete stock of automobile accessories, consisting of articles such as are in demand for automobiles every day.

SATISFIED CUSTOMERS and Westwo LINES MEAN PROFITS FOR YOU

The manufacturers stand back of every dealer with a guarantee of satisfaction for every customer. Every possible precaution is taken to turn out lines that cannot be excelled —careful selection of woods, most modern machinery, skilled workmen and the best procurable paints and varnishes have made Westwo products the acme of perfection. We know they are right, that they last longer and look better than others, and we guarantee them against defects to the point of replacing any that may not measure up to this high standard.

Westwo LINES NOT ONLY CREATE BUSINESS BUT RETAIN IT

Every product bears the Westwo trademark. Our extensive advertising campaign amongst the farmers in Western Canada is acquainting them with our line. Be prepared to handle this business.

CUSHMAN

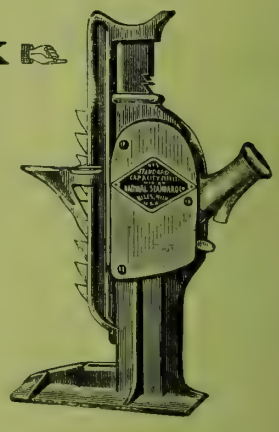
Display These Auto Jacks for Easy Selling

Perhaps no other accessory for an auto is so indispensable as a Jack, and you should bank on this fact and carry a good line, like the Cushman.

No. 14
LEADER JACK

A handy inexpensive jack that does good work. Ten inches high, raised 15 1-2 inches high, capacity 1,500 lbs.

No. 21
LEADER

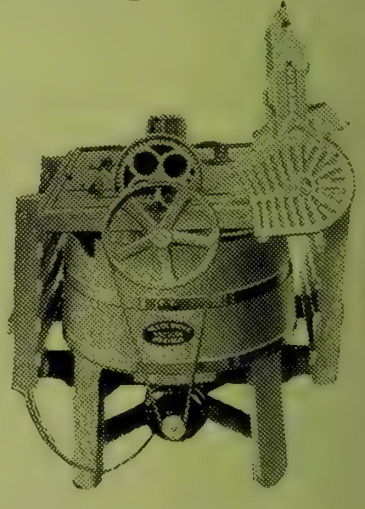


Better quality than No. 14. Height, bar down, 5 3-4 and 9 in. Bar raised 11¼ and 14 1-2 in. Capacity 1,500 lbs.

No. 3
STANDARD JACK

With "the step that steps." Height, bar down, 11 3-4 in., bar raised, 17 1-2 inches. Capacity 2,000 lbs.

There are also three other jacks in Cushman line



SOME OF THE
Cushman Lines

- Tank Heaters
- Straw Spreaders
- 24 x 46 Separators
- Combination Threshers
- "Hoiland" Wild Oat Separators
- Lincoln Grinders
- Smut and Pickling Machines
- Vacuum Washing Machines
- Lincoln Saws
- Incubators and Brooders
- Wagner Hardware Specialties
- Shinn-Flat Lightning Conductors
- Auto Accessories

Besides jacks the Cushman line of Auto Accessories is complete and every article is trustworthy and priced right---ask about the entire line.

The "Klean Kwick" Washing Machine

KLEAN KWICK VACUUM WASHERS are taking the housewives by storm. They are "making good" in lightening the burden of wash-day and cleaning clothes as no other washer is doing. Built on a new and correct principle of washing—forcing and pulling the hot suds through the clothes by air pressure and suction. The heart of the **Klean Kwick Washer** is the **STOMPER**, which does the work. The stomper is a cone, that when attached to our improved mechanical construction, forces over a thousand gallons of hot water and steam through the clothes in three to five minutes. This means quick washing, clean washing, easy washing. Sell this washer—it's a money-maker.

DEALERS:

The Cushman line—which is partly listed at the left—has made good throughout Western Canada. You'll find it profitable to get the facts.

THE
MANITOBA STEEL and IRON COMPANY
LIMITED
Steel, Iron and Metal Merchants
WINNIPEG, CANADA

Announcing a Change in Name

Beginning with this announcement, the name of our Company, which has previously operated under the title of The Winnipeg Steel Granary and Culvert Co., Ltd., has been changed to Crossen Metal Works, Limited.

While there has been no change in the personnel or management of the company, the directors have decided that the old name was not only cumbersome, but bore no relation to the fact that we are now producing practically everything in sheet metal, as well as doing light structural work, and embodying in some of our products the use of castings and machine work.

We greet the trade under the new name but under the old familiar trade-mark of the

HARNESS COLLARS AND SADDLERY

NEW ILLUSTRATED CATALOGUE

NOW READY — To Be Distributed

We have just issued one of the most complete catalogues, and merchants who handle harness will find it a great help. "IMPERIAL BRAND HARNESS" is well known for quality.

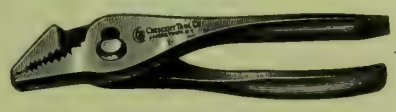
The TREES, SPRIGGS, CO., LIMITED WINNIPEG, MAN.

Forgetting

One of the things we all do well is to forget.

Names that were household words yesterday are gone to-day.

Because people knew your Name and your Line a year ago it is no sign they do to-day. They forget easily.



Keep yourself in the public mind by advertising. It is just as important to make old friends remember as it is to win new friends. Advertising does both.

Wrenches, Pliers, Screw Drivers

On this line of goods we have built a reputation. We have taken care of the trade on Crescent Pliers and Wrenches particularly well, and at the present time are guaranteed deliveries by the manufacturers to the end of 1919. In addition to the well-known Crescent lines we handle the Bemis & Call Adjustable, the No. 80 Motor Wrench, the Carll Wrench, which is interchangeable, can be used as a nut or pipe wrench. The Bonney Stillson, the Special Auto Stillson, the Como Pipe, and Eagle Claw, the Imperial Angle, the Lane Set of Ratchet Wrenches and the Allen-Eureka Ford Ratchet Sets. In Screw Drivers we have the Crescent Hammer Handle, the No. 35 assortment with Oak Display Stand, and the small Screw Driver for hard-to-get-at-places. If your stock runs low on Pliers, Wrenches or Screw Drivers at any time we are the people to write.

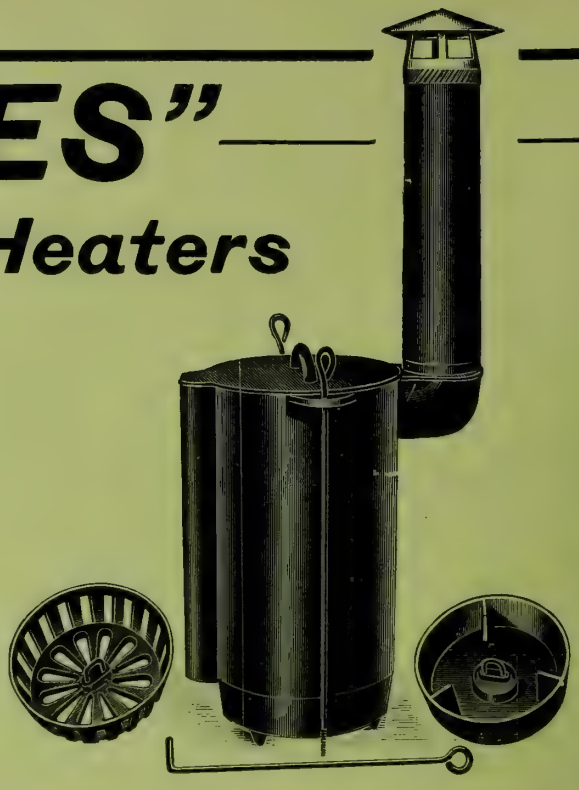
"ANTHES"
Cookers and Heaters



Anthes Cast Iron Feed Cooker

Built for service and lots of it, the Anthes Feed Cooker is a necessary part of the equipment of everyone who has stock to feed. The cauldrons are of high-grade cast iron, uniform in thickness and smoothly finished inside and out. They come in 20, 30, 40, 50, 60 and 75-gallon sizes, Imperial measure, conforming to the law which prohibits the use of wine measure.

In the 20 to 60-gallon sizes the jackets are of 16-gauge sheet steel, and in the 75-gallon size of 14-gauge sheet steel, reinforced at bottom with heavy band iron.

You'll be pleased with your margin of profit on this Cooker.

Anthes Cast Iron Self-Sinking Tank Heater

Every farmer, stock raiser or rancher who sees the "Anthes" Tank Heater on your floor will be convinced that it's the best for his business. He wants to buy the best, and you'll find it more profitable to sell him an "Anthes." The Anthes Tank Heater is made of high-grade Cast Iron, and every heater is tested and guaranteed before leaving the factory. Made in two sizes:

Dia.	Height	Weight
12 in.	22 in.	120 lbs.
14 in.	24 in.	150 lbs.

Descriptive Circular Sent On Application.

For sale by all leading jobbers—specify "Anthes" when ordering.

RADIATOR NEVERLEAK

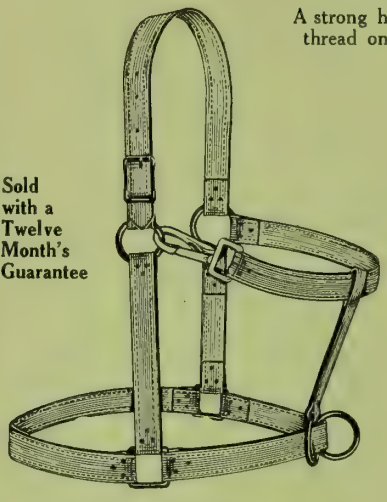
Stops All Leaks

Radiator Neverleak is a guaranteed preparation for stopping leaks in Auto Radiators. It is a carefully and scientifically compounded liquid that will, positively, in from five to ten minutes, stop any ordinary leak in a radiator or cooling system. And the repair will be permanent.

It Contains No Acid, Meal, Cement or Sediment to Clog or Impair the Cooling System

It will not evaporate, consequently it remains in the radiator indefinitely, automatically sealing any new leaks that may occur. It also tends to prevent the formation of scale or rust in the cooling system.

As your profit on NEVERLEAK is extra good, it will pay you to investigate. You can sell on an absolute money-back guarantee.



GREAT WEST ELECTRIC CO., LIMITED

Result of 31 Years of Service

We have been building up our publications for thirty-one years on the basis of the very best service we could devise for subscribers and advertisers, and to-day we offer to you, at a very reasonable rate, the use of the connection we have established.

The proo of the high standing of the MacLean Trade Newspapers is:

(1) Large percentage of trade in each field wno subscribe and renew year after year.
(2) Practically all subscriptions are paid in advance.
(3) No premium or special inducements are offered to secure new subscribers.
(4) Subscription price. Weekly papers, $3 per year; monthly papers, $2 per year. This ensures papers will be read.
(5) Written testimony of hundreds of subscribers that they read each issue, both editorial and advertising pages, and then pass on to members of their staff.

Ask us for further details on any of these points.

You will admit you must get dealer co-operation, a good trade newspaper offers you the most economical, the easiest and most satisfactory method. You have no trouble about mailing list, job printing, addressing, etc. You merely get up good, live copy, or have it prepared by our Service Department or by some capable advertising agency; send it to us and it goes out quickly to subscribers who have formed the habit of looking for such announcements in their trade newspaper.

MacLean's trade newspapers furnish the one dependable method by which you can create dealer enthusiasm when figuring on a plan for any line of merchandise sold through the following classes of retail stores: Dry Goods, Clothing and Haberdashery, Hardware, Grocery, Plumbing, Books and Stationery.

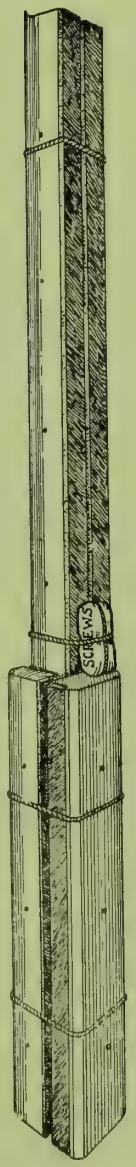
Swan Weather Strip

No Splitting
No Trouble
No Waste



CROSS SECTION VIEW OF TOP AND SIDE PIECES.

CROSS SECTION VIEW OF BOTTOM PIECE.

NOTE the Cross Section Cuts Showing Construction

By stocking early on weather strip you can be sure of a complete supply to meet all the needs of your customers.

Swan Weather Strip is the only weather strip of its kind on the market. It's guaranteed to keep out drafts, is attractive, durable and low priced. Made of selected oak and specially manufactured green felt—no rubber that dries out nor metal that buckles. Nicely finished, glued to the oak edge-ways and impossible to be pulled away.

Conveniently put up in sets complete for one door — two pieces 7 feet long for the two sides, one piece 3 feet long for the bottom, and one piece 3 feet long for the top. Holes are drilled and nails supplied.

The most practical and common-sense weather-strip on the market. Wherever it is sold it becomes at once by far the best seller.

Send in Your Order Now

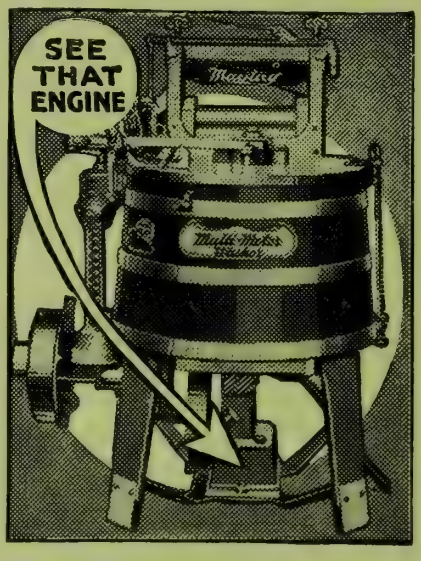
The MAYTAG

One-Horse Gasoline Engine

This is not only the lightest and simplest Gasoline Engine on the market, but at the same time the most powerful.

A Sample Engine on exhibition in your store will prove that it is a ready seller, as it fills a long-felt want. The profit will please you.



We furnish the engine, which is an air-cooled, two-cycle, a set of sealed batteries, a coil, one gallon of Maytag special lubricating oil, everything, ready to go.

WARRANTED IN EVERY PARTICULAR

For pumping, running, fanning mill, separators and other light work, it has no equal. No trouble to pick it up and carry it from place to place.

Maytag Multi-Motor Washer with Swinging Reversible Wringer

What the Maytag Multi-Motor Washer Will Do

It operates the washer and wringer. It will operate the sewing machine, churn, cream separator, or any other small machine that does not require more than ½ h.-p. WASH-DAY, and that is WORK-DAY, changed into PLAY-DAY. Good-bye backache, headache, nerve wreck! No woman need bend over the wash tub, as her grandmother did, nor turn the old-style washer, as her mother did, if she has a MAYTAG MULTI-MOTOR.

There is a Maytag for every need — Electric, Power-driven Multi-Motor and Hand. Thousands have been sold in Canada, and the demand is increasing.

Dealers are protected with our exclusive contract. Write for particulars.

A MAYTAG Contract will make you money.

We are Headquarters for
EVERYTHING IN THE WAY OF THRESHERS.

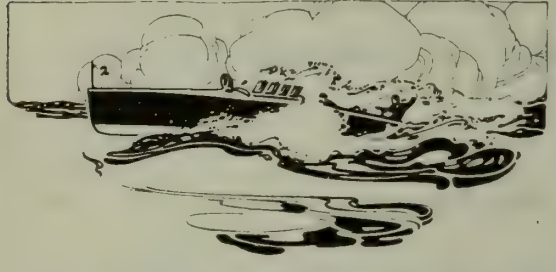
THE HOUSE WITH A THOUSAND LINES

The Canadian Company,



Canada's Departmental Automotive Equipment

In the year 1918 there were over 250,000 auto licenses issued in Canada, and the manufacturers of cars, accessories, and tractors expect to double their output to handle a forecast increase in the number of consumers in 1919.

Our accessory department has been equipped to handle supplies for the tractor, automobile, truck, motor boat, or motor cycle.

Our stock includes a full line of SPARK PLUGS, LAMPS, BATTERIES, TIRES, SKID CHAINS, CLOCKS, SPEEDOMETERS, GREASES, OILS, PUMPS, BUMPERS, SIGNALS, STEERING WHEELS, and, in fact, every essential specialty that is requisite to your successful trading in this fast expanding line.

Write any of our branches for any information that you need to make this department in your store thoroughly conversant with our goods, or if you have a problem that we can help you with, get in touch with us now.

"AUTO LINKS"

is a little periodical that will prove very interesting to you, and we will be glad to send it on request (without charge, of course).

Address "Auto Links," 84 St. Antoine St., Montreal.

A NATIONAL ADVERTISING CAMPAIGN FOR

Kwik-lite

THE QUALITY FLASHLIGHT

This attractive 3 panel display screen about 2½ feet high by 3½ feet wide is ready to set in your window. It will help you to tie-in with our National Advertising.

With an order for our No. 4 assortment of KWIK-LITES you receive this handsome sales cabinet.

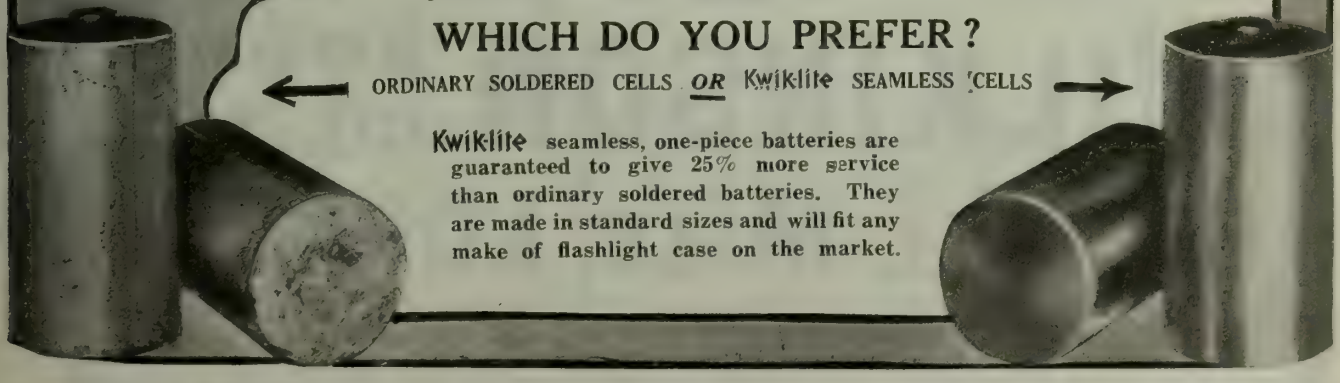
The Kwik-lite Advertising Campaign is bigger than ever. Our advertisements are appearing in the Saturday Evening Post, Collier's, Literary Digest, American, Metropolitan, and other popular publications. These advertisements will tell millions of people why Kwik-lite stands supreme among flashlights and will create a big demand for this quality light. You can direct this demand *your way* by using the attractive window display, counter case and other sales help we are prepared to furnish you.

Here's What We Are Doing To Help You Sell

Kwik-lite

THE QUALITY FLASHLIGHT

1. National Advertising to the consumer.
2. Furnishing you with an attention-getting window display and a handsome counter display case.
3. Furnishing, also, a complete line of business-getting sales helps for local advertising such as folders, booklets, lantern slides, etc.
4. Supplying you with copies of the most complete and attractive catalog ever issued on flashlights.



Now is the time to tie-in with our Advertising Campaign and sell "The Quality Flashlight." The BIG Kwik-lite BOOK tells the whole story—prices, discounts, sales and advertising plan, everything. Write to-day for your copy of this interesting and profitable book and catalog No. 08.

THE USONA MANUFACTURING COMPANY

WINDSOR, ONTARIO, CANADA TOLEDO, OHIO, U.S.A.

WHICH DO YOU PREFER?

← ORDINARY SOLDERED CELLS *OR* Kwik-lite SEAMLESS CELLS →

Kwik-lite seamless, one-piece batteries are guaranteed to give 25% more service than ordinary soldered batteries. They are made in standard sizes and will fit any make of flashlight case on the market.

Orders Received Now

are reasonably certain of being met. Increasing demands impose disappointment on those who delay.

THE output of our famous WILKINSON Silver Sword-Steel Razors has been largely restricted through War requirements. We feel the time has arrived when factors and retailers should be placing their orders for "After-the-War" delivery, and we invite such orders, to be executed in strict rotation as received. Every effort made to meet sample orders from present limited output.

The
World-Famous
WILKINSON
Sword-Steel RAZOR

—The envy of every man who loves an easy shave.

T. H. RANDOLPH, *Managing Director.*

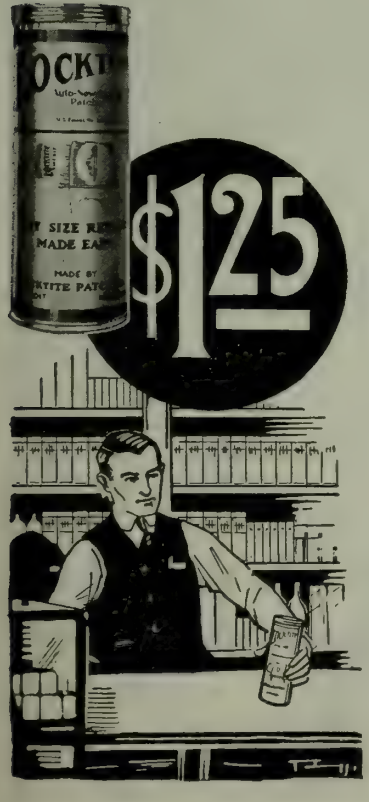
Takes little shelf space Brings big returns

YOU'LL get big returns for the small space devoted to Locktite Patchers.

Motorists are buying the Locktite Auto-New-Matic Patcher because it solves their blowout and puncture troubles.

Locktite seals tube cuts and rips quickly and permanently—locks them tight. The Locktite Patcher is a complete workshop on the road—for the emergency or for the repair of spare tubes in the garage.

It's a time-saver for the motorist—a money-maker for the dealer.



Are you getting your share of the Locktite Patcher business?

There is also a special garage size of Locktite Canvas-Back Patcher.

This offers a splendid profit-maker for dealers. Write for proposition.

How It Works

Place the injured tube around the container—as shown in the picture. Clean and roughen the surface around the hole with the emery on the top of the package. Apply and allow the cement to dry. Then press on the patch firmly—and the tube is ready to go into casing.

What is it Worth?

When a dealer decides to take on another line he considers it worth the effort to thoroughly investigate the product and the concern with which he contemplates doing business.

The *quality of our products* and the *service we render* have proven to be vital factors in the successes of a great many hardware dealers.

All our products are made in Canada by men who are experts in their respective lines.

We aim to give the dealer a service equal to, or better than any that may be obtained elsewhere. The rapid growth and expansion of our business would indicate the wisdom of this policy.

We welcome all inquiries relative to our various lines. May we send you catalogue and price lists? Write us to-day.

"MORE POWER TO YOUR ELBOW"

By this time no doubt you are beginning to feel the effects of our national advertising in the newspapers, magazines and farm press.

Just how much benefit you get out of this publicity of the AutoStrop Razor will, of course, depend to some extent upon you. Advertising will create good-will and inquiries; but in order that these may be converted into sales, your help is needed. Let us suggest, therefore, that instead of letting people find out that you carry the AutoStrop Razor you take some steps to let them know that you do.

Make good use of the window "spreads" that we will send you. A striking display of AutoStrop Razors in conjunction with these attractive "broadsides" will, we feel sure, result in your geting increased inquiries and sales, besides identifying your store as the place where AutoStrop Razors are sold.

For one thing, your salesman can recommend the AutoStrop Razor when "something better" is requested.

Very often by a little tactful talk and a clean-cut demonstration of the AutoStrop Razor the prospect can be interested and the advantages of the AutoStrop Razor made clearly apparent. Then it's up to the customer to decide for himself. But rare indeed is the case where a man having had the AutoStrop Razor carefully explained to him will be content with any other make. And once sold, the AutoStrop Razor stays sold and earns good-will for you every time a man uses it.

Our advertising department is always at your service. Electros for newspaper advertising are furnished free. So don't hesitate to call on us if we can be of the slightest use. We cordially welcome an opportunity of working with you at any time.

A SPRAYER
that is Fool-proof

We have it—Our STURDY sprayer has been perfected to the last degree. Every eventuality is thought of. Our years of experience have taught us how. With the war over, only quality goods will be shipped.

Our Crown Sprayer is the standard quart jar sprayer—gives a large double spray, very misty.

The Sturdy Sprayer. A guaranteed compressed air sprayer.

The Crown Sprayer holds one quart, large double spray. Made extra strong. The Gem Sprayer holds half pint.

The Misty No. 1 Sprayer holds one quart. Misty Midget smaller size. The Handy Bucket Sprayer for whitewash or general use.

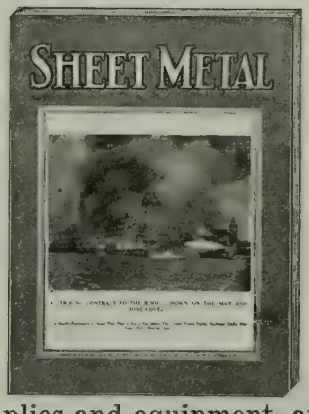
AUTOMOBILE AND BICYCLE SUPPLIES

Again in Demand

The wooden tub is back—the high cost of the metal tub is largely responsible, but a wooden tub has other advantages.



There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a Source of Good Revenue.

"Delta" Files
— we'll help you sell them

TRADE MARK
DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

Have you received HARDWARE AND METAL'S Electro Catalogue?

More Canadian Horses and Cows will be clipped in 1919 than any previous year

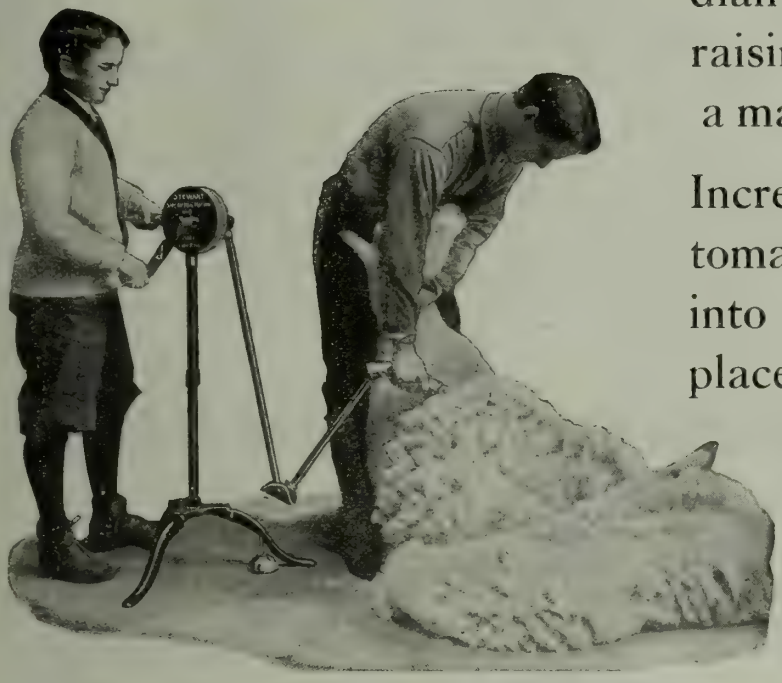
This will mean a record-breaking demand for the Stewart No. 1 Ball Bearing Horse-Clipping Machine.

Demand for Horse-clipping machines is being wonderfully stimulated by the testimony of returned soldiers who saw the Stewart at work in Belgium and France on army horses and mules in the spring of 1917 and 1918—saw the magical way in which the animals responded to their relief from the burden of a winter coat; saw the decrease in colds, sickness and death among the animals, and noted their new life, vigor, strength and willingness to undergo the most stressful work.

Cow-Clipping on the Increase—and Why?

Increasing popular demand for **clean milk,** coupled with the high prices the farmers and dairymen are getting for milk, will double the sale of Stewart machines for clipping milch cows around udders and flanks.

It has been clearly demonstrated that this clipping precaution **does** keep filth out of the milk pail; and health authorities everywhere are urging its immediate adoption.



Stewart No. 1 Ball Bearing Horse and Cow Clipping Machine retails for $13.00 in Canada, and our liberal discount makes each sale net a tidy profit.

Order at once, direct, or thru your jobber, a larger stock than you ever carried before —and **then** you won't have enough.

Chicago Flexible Shaft Co.

12th Street and Central Avenue
CHICAGO, ILLINOIS

SALES OF STEWART
SHEEP SHEARING MACHINES
will break all records this year

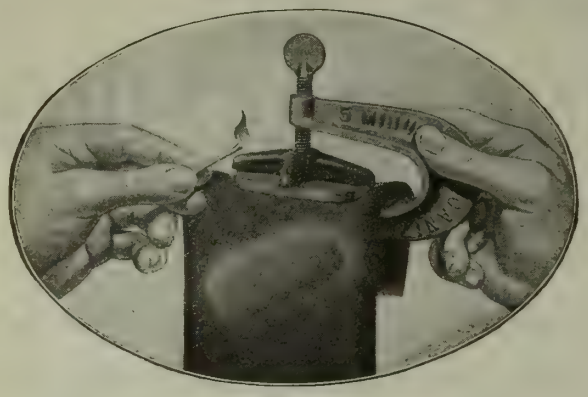
Stewart No. 9 Ball Bearing Sheep Shearing Machine

World-wide demand for Canadian Wool has stimulated sheep-raising thruout the provinces to a marked degree.

Increase in size of flocks will automatically throw hand-shears into the discard and make a place for the

Stewart No. 9 Ball Bearing Sheep Shearing Machine

Canadian retail price for Stewart No. 9 is $19.00. Our liberal discount makes each sale net you a tidy profit.



Order a stock right away (direct or thru your jobber) to insure sufficient supply.

Send for Free Book.

And when you explain to owners of even the smallest flocks how the Stewart machine increases the yield of wool **fifteen per cent.** for each clip, they will **listen** now as they would not listen when wool was low in price.

Increase in size of flocks will also make present owners of Stewart machines buy additional machines in order to speed up the shearing.

Chicago Flexible Shaft Co.
12th Street and Central Avenue
CHICAGO, ILLINOIS

1,000,000 Motorists Use It 4,000,000 More Need It

The limited supply and high cost of inner tubes makes it necessary for motorists to repair punctures, cuts, tears and cracks—to keep their tubes in good repair.

The present conditions make it imperative for motorists to stop the easy-going, wasteful habit of carrying $5 to $15 worth of spare tubes—that deteriorate quickly—and scrapping perfectly good inner tubes that merely have a puncture, cut or tear—which can be repaired *permanently* with a Shaler 5-Minute Vulcanizer, quicker than a new tube can be inserted.

Saves Tubes—Saves Repair Bills

Easy to Use

Repairs tubes—as good as new. It's easy and inexpensive. *The Shaler works automatically* —and without fail. Just touch a match to the non-flaming chemical fuel. In five minutes you have a firm, flat, "feather-edge," permanent repair—stronger than any "stuck on patch"—stronger than the tube itself. No gasoline, cement or flame, and no danger of injuring the tube. Carry it in your tool box for emergency use. It works in the wind, in any weather, anywhere. The heat is applied directly to the pure gum patch and does not extend to the tube itself.

Easy to Sell

A five-minute demonstration sells the Shaler Vulcanizer easily. Every sale gives you a good profit. The large resale of Patch and Heat Units is profitable and brings new customers into your store, who will also buy other accessories.

Over 1,000,000 Motorists now use the Shaler 5-Minute Vulcanizer for repairing tube punctures, cuts, etc.; 4,000,000 more need it. Every motorist is a prospect for this handy tube vulcanizer—it should be in every car owner's tool box, for emergency use on the road or repairing tubes at home.

Complete Outfit Only $2.00

The outfit includes, the Vulcanizer — 12 Patch & Heat Units (6 round for punctures, and 6 oblong for cuts) — complete $2.00. Extra Patch and Heat Units, $1.00 per dozen.

Sold By All Accessory Dealers and Jobbers

TO DEALERS—To insure shipments—it is advisable to order from your jobber now. The great demand has exceeded our factory capacity, and shipments will be made according to priority in receipt of orders.

Catalog of the Complete Shaler Line of Vulcanizers for Motorists, Repair Shops and Garages mailed on request.

REED'S ROOF CEMENT

For Roofs that Leak in the Spring-time -

You can best serve your customers and make good profits for yourself by having a stock of **Reed's Patent Plastic Asphalt Roof Cement on hand** early.

This is the roof cement that for twenty-five years has stood the test of heat, cold, rain, snow and wind, and has never failed to stick where laid. It mends all manner of leaks in slate, metal, gravel and prepared roofs; is effective for pointing around Chimneys, Skylights and Dormer Windows, and for repairing coping stone, gutters and wood and stone work.

Reed's Patent Plastic Asphalt Roof Cement can be obtained from all jobbers or direct from the makers. It is put up in 1, 5 and 10-lb. tins, in drums of 125 lbs., and barrels of 500 lbs.

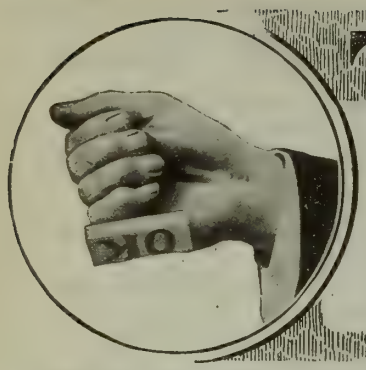
Why Not Benefit by the Light When It Is Let In?



Our Cash Carriers will enable your selling staff to devote more time to customers, and to serve them more promptly. In other words, the staff can do more business when Gipe-Hazard Carriers are used than it is possible to do without them which, when properly interpreted, means greater profits for the merchant, and better satisfied customers.

Too, there is not to be forgotten the saving of labor, and the avoidance of the disagreeable feature of salesmen having to crowd between persons when going to and from the place of change making.

Write for that circular.

STEEL RULES

THE RECOGNIZED RELIABLE STANDARD
CARRY THE LINE THAT SELLS

THE LUFKIN RULE CO. OF CANADA, LTD.
WINDSOR, ONT.

Wanted

WANTED

WANTED—HARDWARE BUSINESS IN GOOD, live town, with farming community. Must be good business and fair size stock. State particulars as far as possible. Box 232, Hardware and Metal.

AGENTS WANTED

AGENTS WANTED TO HANDLE STANDARD line of Elastic Steam Jointing Cement. Some good territory open in Canada. Box 233, Hardware and Metal, Montreal.

WANTED—AGENT FOR ENGLISH FIRM OF brush manufacturers. Apply stating full particulars of ground covered, etc., to Box 65, MacLean Co. of Great Britain, Ltd., 88 Fleet St., London, Eng.

HELP WANTED

FOREMAN WANTED FOR TINSMITH AND plumbing shop in Maritime Provinces. Apply Box 208, Hardware and Metal.

ONE-MINUTE WASHER REPRESENTATIVES wanted for Maritime Provinces, Saskatchewan, Alberta, British Columbia. Apply 74 Logan Ave., Toronto.

HARDWARE CLERK, WITH FOUR OR FIVE years' experience. Must be good salesman. State age, experience and salary expected. Give references. The Earl Grey Hardware Co., Ltd., Earl Grey, Sask.

WANTED—TINSMITH TO TAKE CHARGE OF shop, to figure on furnace and plumbing work. State age and wages. Box 230, Hardware and Metal.

WANTED—MAN CAPABLE OF PREPARING advertisements and literature for the retail hardware trade. Good salary. Apply giving qualifications to Box 235, Hardware and Metal.

FOR SALE

1—NO. 8, 37" x 2" SLIP ROLL FORMER, Brown-Boggs make. Used about six months. W. J. Heaman, Exeter, Ont.

HARDWARE, STOCK FORTY THOUSAND; long-established; fine town, handsome store, favorable lease. Death of owner forces sale. Attractive price and terms. J. J. Lawrason, Business Broker, 25 Toronto Etreet, Toronto.

FOR SALE—A BATTERY OF SIX BOWSER pumps and tanks, together or separately. Also set Cameron & Campbell's drawers, nail bins and tool cabinet. Box 201, Hardware and Metal.

HARDWARE, STOCK TWELVE THOUSAND; long-established, and doing extensive business; progressive town. If interested, let me tell you why owner will accept seventy-five cents on the dollar. Great snap. J. P. Lawrason, Business Broker, 25 Toronto Street, Toronto.

TINSMITH AND PLUMBING BUSINESS IN small but growing town in Eastern Ontario. Population 1,400. Waterworks. No opposition. Good proposition for live man with small capital. Town is located on Lake Ontario. Box 224, Hardware and Metal.

GENERAL HARDWARE STOCK FOR SALE IN Sudbury. Old-established business of Purvis Bros., Ltd. Good general stock of shelf and heavy hardware, about $20,000.00, with twenty-nine years' good-will and fair dealing. Premises can be leased or bought. Retiring on account of failing health. Purvis Bros., Ltd., Sudbury, Ont.

OWING TO THE SERIOUS ILLNESS OF THE proprietor, which has necessitated his removal to a Southern climate, I am offering for sale that well-known and established business in the town of Oshawa now being carried on by Glenn A. Henry & Co. This is a straight hardware business —no tinshop,—and has been conducted on practically a cash basis. It has always been a good paying business and would not be on the market were it not for Mr. Henry's failing health. Stock will run from $10,000 to $12,000. Here is a first-class proposition for someone. Wire or write, W. E. N. Sinclair, Barrister, Solicitor, etc., Oshawa, Ont.

POSITIONS WANTED

AT ONCE, POSITION AS HARDWARE salesman, preferably in North-west, by discharged soldier. Eight years' selling experience. Four in retail hardware as salesman and window dresser. References from former employers. Box 231, Hardware and Metal.

MISCELLANEOUS

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

STOVE REPAIRS FOR ADMIRALS, CLIMAX, Pen Esthers, Acmes, Crown Hurons, Garlands, Colonials, Marvels, Silver Kings, Souvenirs, Imperial Oxfords, Jewels, Peninsulars, Sterlings, Oak Laurels, Sunlights, Pandoras. Write for full list of stoves and prices. Grundy Bros., Strathroy, Ont.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada. (tf)

ADDING TYPEWRITER, WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fensome hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor Costs only $70. Write for catalogue "B," Otis Fensome Elevator Co., Toronto.

TRANSLATIONS

ENGLISH INTO FRENCH. COMMERCIAL, Financial and Technical Literature. Advertising booklets, catalogues, circulars, posters. Private correspondence. Manufacturers and Manufacturers' Agents desiring English to French translations will secure expert service at a moderate rate by addressing Leon A. Archambault, P.O. Box 135, Station B, Montreal.

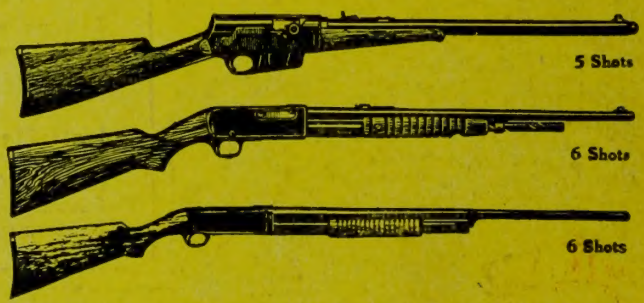
There's a big increase in the building permits being issued in nearly every locality--a healthy boom is in sight. Are you ready for it with a full stock of
Red "S" Window Glass ?
Let us supply you with your requirements. We carry in stock
Plate, Figured, Stowed, Wired, Mirror and Ornamental Glass. We're glass benders to the trade.
RED
S
TORONTO PLATE GLASS IMPORTING CO. LIMITED
TORONTO, CANADA



More than 100 years

More than 100 years of progress in the making of high-grade arms has built up for us the largest rifle, shotgun and ammunition business in the world. Yet no "demand" is ever great enough to tempt us to lower our quality in any way. Anything stamped "Remington UMC" is right — from the humble little .22 short—on through our 450 metallics—and from the little .22 rifles to our splendid Repeaters and Autoloaders and Shot Guns. Every user of Remington UMC is sure of his weapon—his ammunition, and of us—always. It's that sureness that begets success for our dealers.

Every man should teach his boy how to shoot—and use a Remington U.M.C. .22.

Autoloading Rifle.

Repeating Rifle

"Pump" Shot Gun.

Trap shooting is clean, healthy sport. The Remington UMC "Pump" is the most widely used trap gun in the world.

The new Wetproof Remington UMC Shells—Arrow and Nitro Club, steel lined and smokeless—are making a big hit with Canadian shooters. A new, patented process makes these shells absolutely impervious to any amount of wetting and exceptionally strong in the crimp, where most shells are weakest.

ALL JOBBERS CAN SUPPLY YOU
